AGENDA

- Program Background
- NFL Innovation Framework Overview
- NFL Technology Innovation HUB Intro
- Governance Structure
- Program Structure
- HUB POC Goals
- Next Steps

Why is a **framework** needed at the NFL?

- To address the lack of visibility, monitoring and measuring of technology innovation projects and ideas
- Eliminate siloed pockets of innovation and redundant projects
- Leverage ideas from all levels of the organization
- Strengthen brain power through increased collaboration
- Foster creativity by working as a connected NFL (networked, flexible, and learning) organization
- Solve complex business problems collectively to enhance the game.

The Foundation

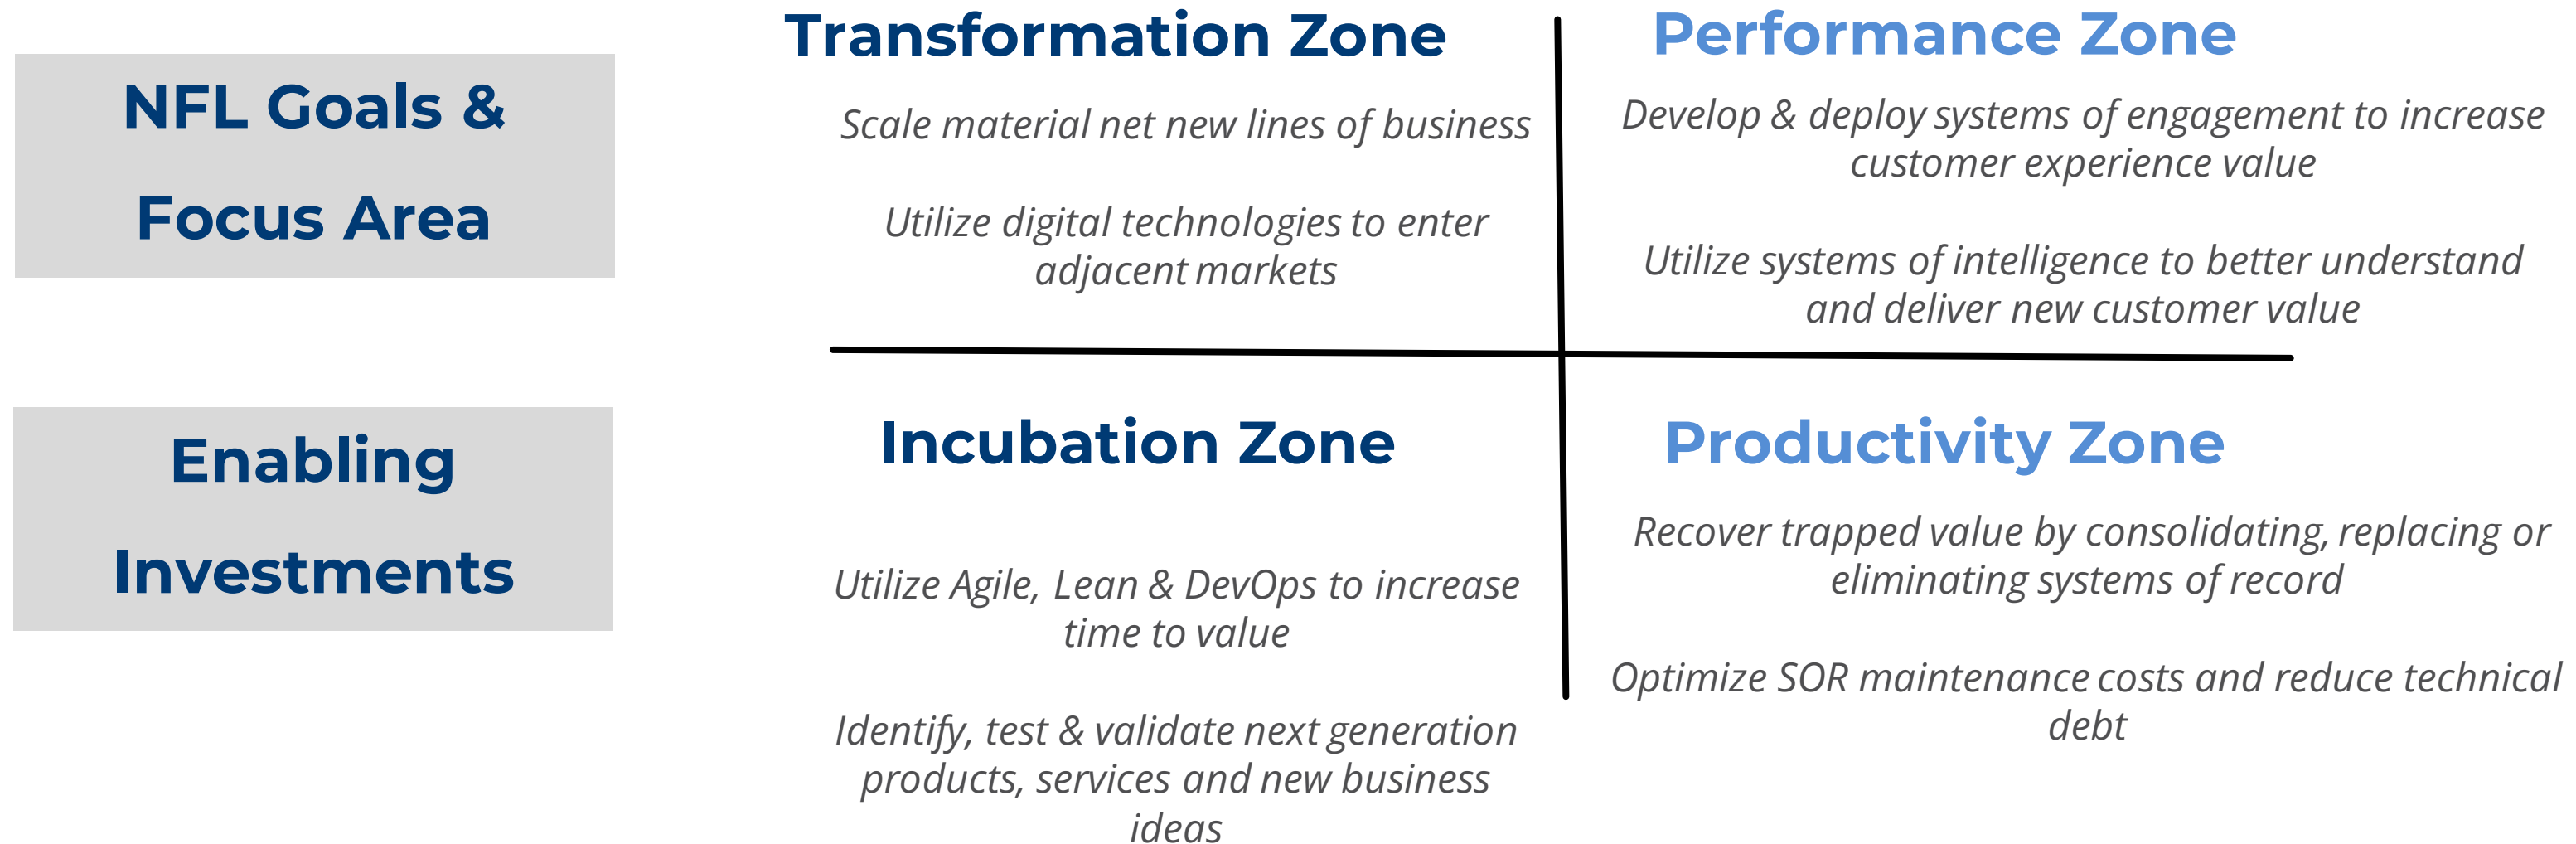

NFL Strategic Goals +

NFL Tech Innovation Framework:

ZONE TO WIN

4 Zones Model: Business Value Creation

Sustaining innovation: extension and improvements to already existing innovations inside the organizations

Disruptive innovation: new business models and operating models

NFL Tech Innovation HUB - The Next Big Wave

In the rapidly evolving technological landscape, businesses need a nucleus of innovation to drive competitive advantage. The **NFL Tech Innovation HUB** is conceived as a cutting-edge initiative integrating disruptive technology with business strategy, offering an environment for incubating future business ideas while ensuring robust governance (**NFL Innovation Framework**) and a collaborative approach.

Disruptive Innovation: *Grow the Business*

Transformation Zone

Increase Consumption |
Fan Growth | Grow Key
Demographics

- The goal is to undertake a transformational initiative to put the NFL on a significantly different trajectory

Incubation Zone NFL Innovation Tech HUB

- New offers and products in emerging and/or fast-growing markets that could someday be a game changer for the business.
- Charged with exploring new products, services and businesses that can leverage new digital technologies and potentially have a significant impact on future business growth opportunities. It also serves as the staging area for all innovation projects. Includes: project prioritization, demand management and governance processes.

NFL Tech Innovation Framework - Incubation Zone

- The ***NFL Tech Innovation HUB*** is charged with exploring new products, services and businesses that can leverage new digital technologies and potentially have a significant impact on future business growth opportunities. It also serves as the staging area for all major projects and includes project prioritization, demand management and resource allocation governance processes.
- Accelerate the organization's ability to identify, test and validate next generation product and service ideas and leverage digital technology enabled innovation to develop and deliver them
- Learning faster for sustainable competitive advantage

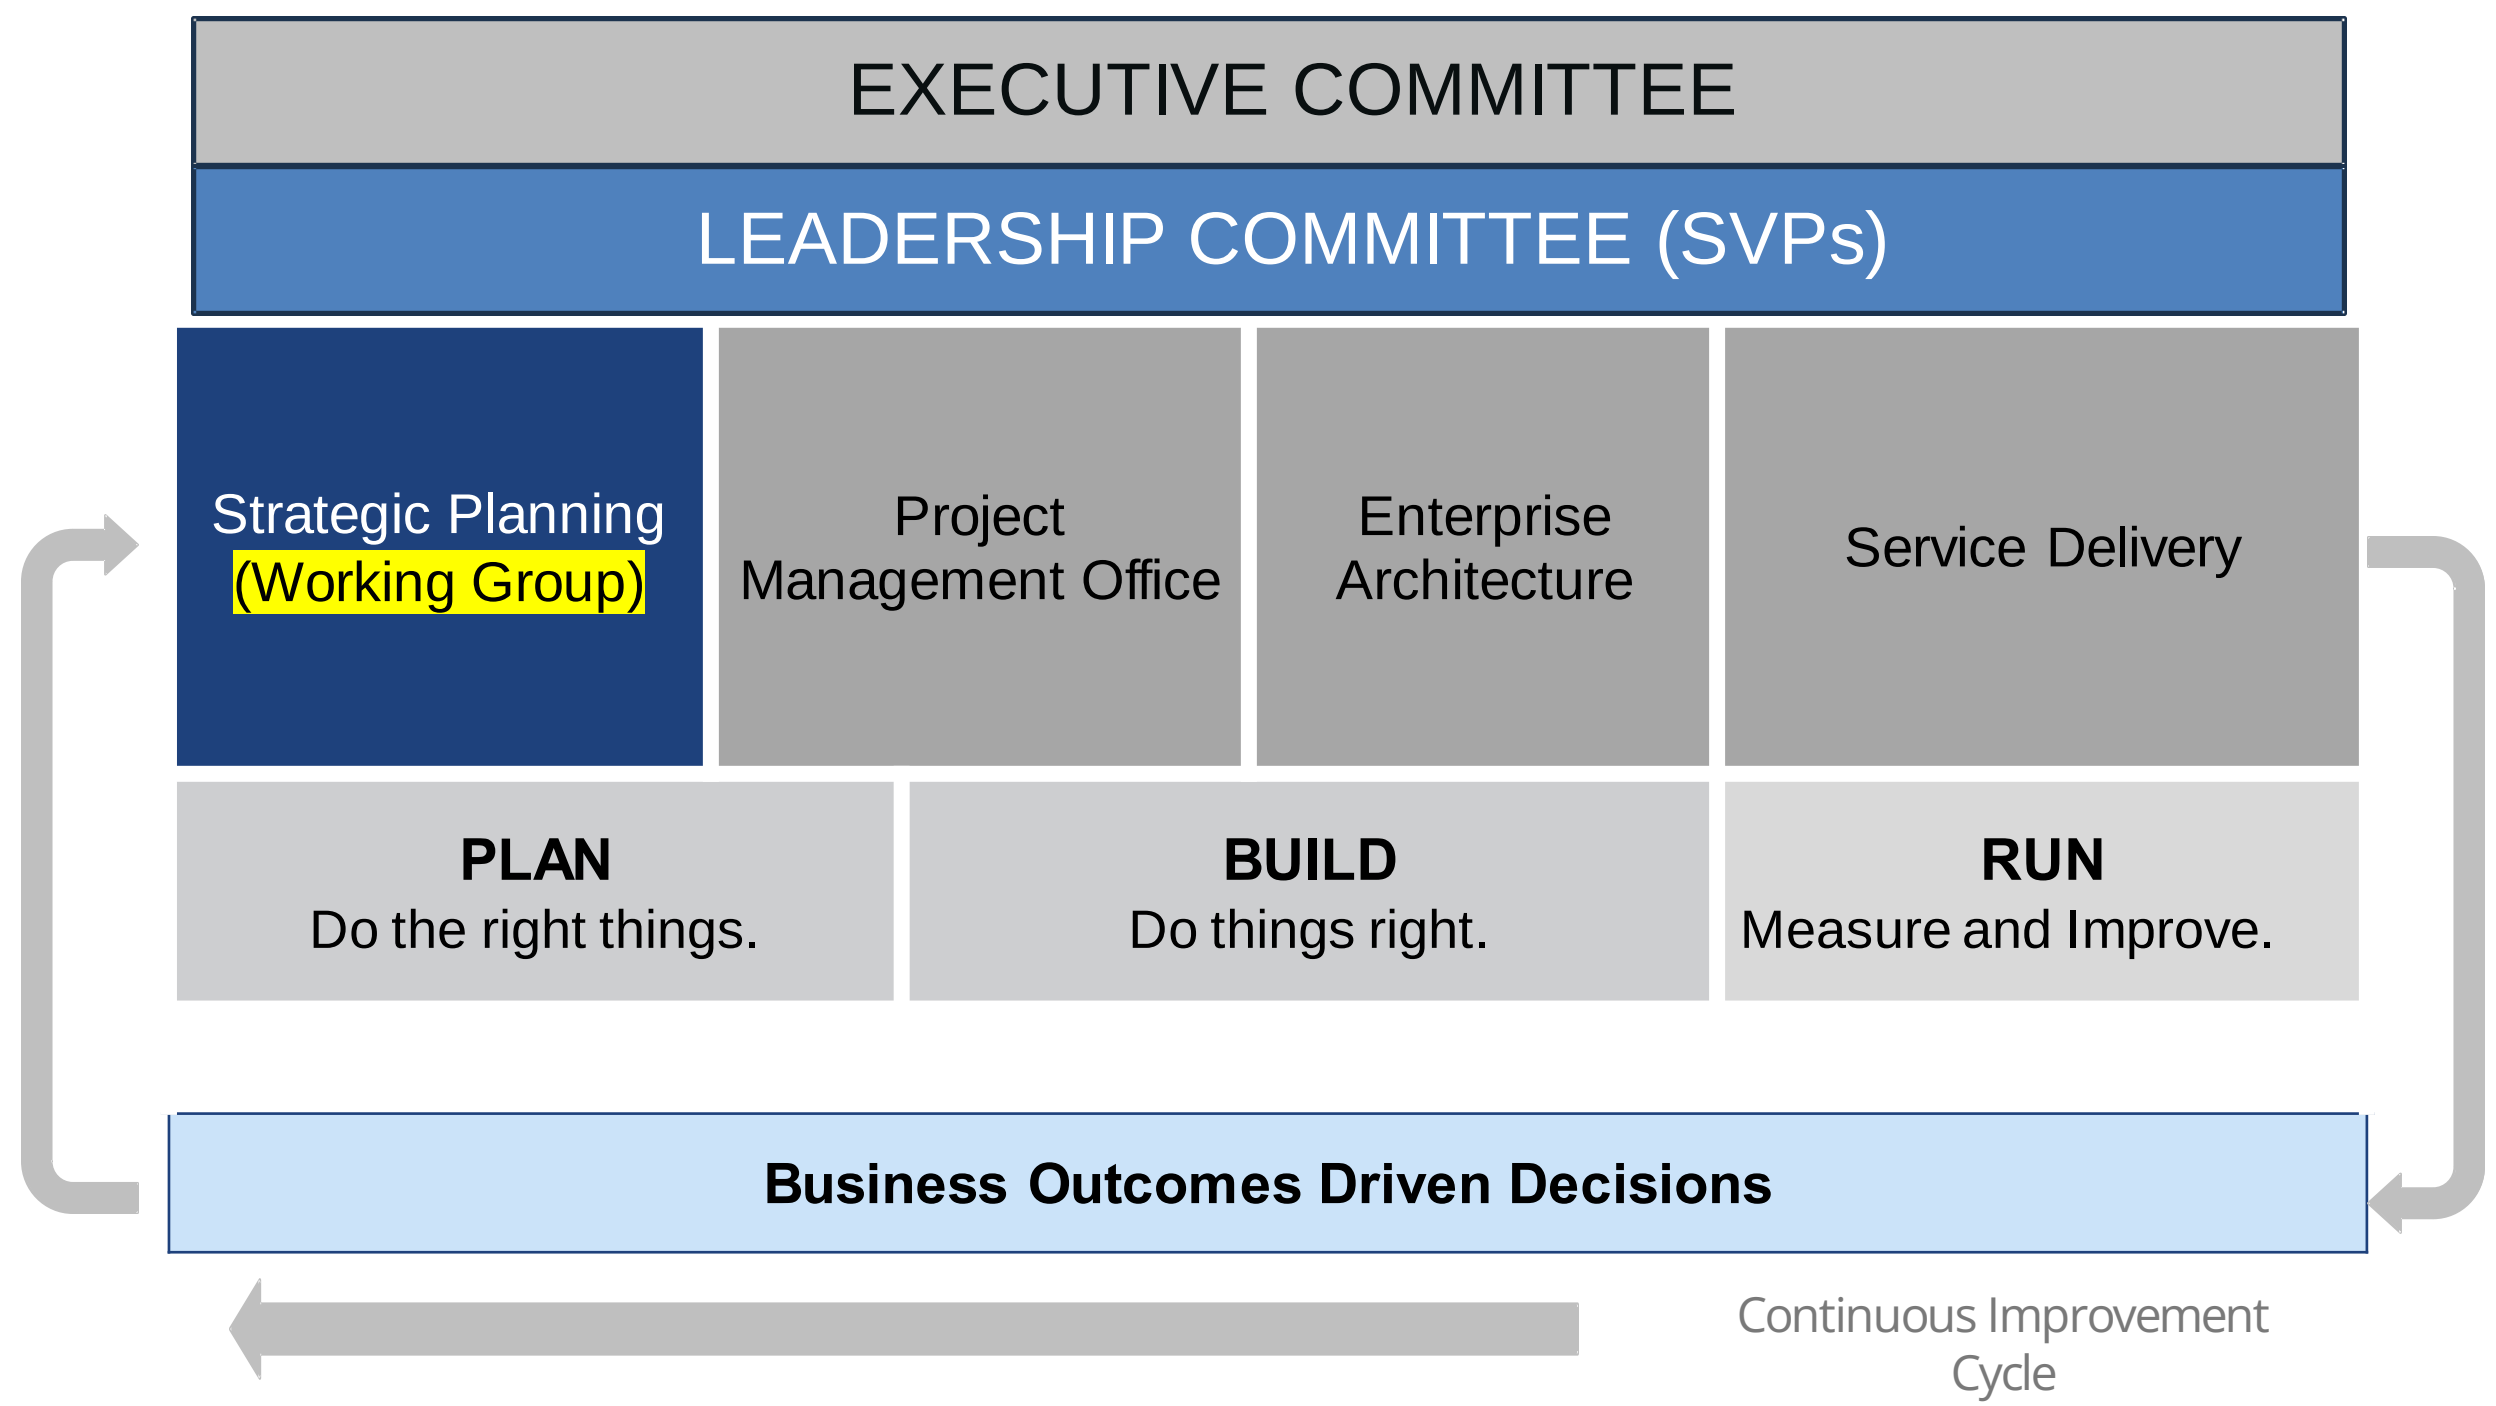

NFL Tech Innovation HUB - Strategic Outcomes

- 1. Alignment of Technology and Business Strategy:** The hub ensures that technological advancements are congruent with business goals, offering a seamless path for businesses to adopt, adapt, and scale new technologies effectively.
- 2. Incubation of Future Business Strategies:** By serving as a birthplace for innovative ideas, the hub fosters an environment where fledgling business strategies can be tested, refined, and matured, using technology as a driving force.
- 3. Collaborative Ecosystem for Innovation:** The introduction of innovation committees guarantees that stakeholders, including tech innovation partners, are aligned, have a voice, and work collaboratively towards shared objectives.
- 4. Robust Governance Model:** The hub's customized framework ensures that the adoption and adaptation of disruptive technologies are executed within a structured, risk-aware environment, ensuring compliance, security, and optimal utilization.

NFL Technology Innovation Hub POC

Program Goals

- **Identification:** Identify and assess the potential of three projects at different maturity levels.
- **Selection:** Choose projects for further development based on its viability, impact, and alignment with organizational goals.
- **Preparation:** Equip the selected project team with the tools, mentorship, and resources to create a compelling pitch and Minimum Viable Product.
- **Funding and Approval:** Support the chosen project team in securing the necessary funding and approval from the Executive Committee.
- **Framework Demonstration:** Test the model within the culture of the NFL

Next Steps

9/19 In Person NYC – 3-hour workshop
