

FIFA WORLD CUP 2026 - Host City SEAR Readiness Scorecard

Powered by Sentrais | CiviGrid + eVenu

1. Purpose of the Scorecard

The Host City Readiness Scorecard provides a single, defensible view of operational readiness for World Cup 2026 matches.

It is designed to:

Replace subjective readiness claims with verified indicators

Support SEAR-2 baseline readiness

Enable SEAR-1 escalation decisions

Provide executive-level clarity without operational noise

This scorecard is reviewed on a rolling basis and formally validated at T-30, T-7, and T-24.

2. Overall Readiness Index (ORI)

Overall Readiness Index (ORI): 0-100

Band Meaning

90-100 Ready - No material risk

75-89 Ready with Attention Areas

60-74 At Risk – Mitigation Required

< 60 Not Ready – Escalation Review

The ORI is a weighted composite, not an average.

3. Readiness Dimensions (Weighted)

A. Governance & Command Readiness (15%)

What this measures

Authority clarity

Decision rights

Unified Command readiness

Indicators

Executive lead formally designated

Unified Command structure documented

Federal liaison confirmed

Escalation authority validated

Score Guidance

15: Clear authority, no ambiguity

10: Minor role or documentation gaps

<10: Command ambiguity exists

B. Agency & Partner Coordination (20%)

What this measures

Multi-agency participation

Cross-jurisdiction alignment

Indicators

All agencies onboarded in CiviGrid

Named operational owners

Dependency mapping complete

Participation cadence established

Score Guidance

20: All agencies active and accountable

15: Participation uneven

<15: Key agencies not engaged

C. Venue & Match Operations Readiness (20%)

What this measures

Stadium and match execution preparedness

Indicators

Venues onboarded in eVenu

Match milestones defined

Staffing confirmed

Vendor readiness validated

Score Guidance

20: All venues match-ready

15: Minor venue gaps

<15: Material venue risks

D. Systems & Infrastructure Resilience (20%)

What this measures

Critical system continuity

Systems Covered

Communications

Power & backup power

Transportation

Access control

Surveillance

Cyber posture

Indicators

Redundancy validated

System owners assigned

Test evidence logged

Score Guidance

20: Full redundancy verified

15: Partial redundancy

<15: Single-point failures present

E. Risk & Threat Preparedness (15%)

What this measures

Ability to anticipate and mitigate risk

Indicators

Risk register active

Probability × impact assessed

Mitigation plans assigned

Federal coordination understood

Score Guidance

15: Risks actively managed

10: Risks identified but not mitigated

<10: Unknown or unmanaged risks

F. Evidence, Compliance & AAR Readiness (10%)

What this measures

Accountability and defensibility

Indicators

Evidence ledger populated
Decision logging process validated
AAR process defined
Federal reporting pathways confirmed
Score Guidance
10: Audit-ready
7: Partial evidence
<7: Informal or missing documentation

4. Scorecard Summary View (Executive)

Host City: _____

Match Window: _____

SEAR Posture: ☐ SEAR-2 ☐ SEAR-1 Ready ☐ SEAR-1 Active

Dimension Score Status

Governance & Command ____ / 15   

Agency Coordination ____ / 20   

Venue & Match Ops ____ / 20   

Systems & Infrastructure ____ / 20   

Risk Preparedness ____ / 15   

Evidence & Compliance ____ / 10   

Overall Readiness Index ____ / 100   

5. Escalation Triggers (Scorecard-Driven)

Escalation review is mandatory when any of the following occur:

ORI < 75 inside T-7

Any single dimension < 60% of its weight

Systems & Infrastructure score < 15 inside T-24

Risk & Threat score < 10 inside T-24

SEAR-1 escalation is required if:

ORI < 70 inside T-24

Any hard-stop threat indicator is validated

6. How Leaders Should Use This Scorecard

Mayor / Governor

Focus on ORI trend, not point-in-time score

Ask: "What is blocking readiness and who owns it?"

Support escalation when thresholds are met

FIFA / Tournament Leadership

Compare readiness across host cities

Identify systemic risks early

Ensure consistency and fairness

Federal Partners

Validate escalation posture

Confirm SEAR readiness

Ensure defensible evidence trail

7. Why This Scorecard Works

Objective, not subjective

Comparable across cities

Defensible after the event

Aligned to SEAR doctrine

Encodable directly into Sentrais

This scorecard ensures no city is surprised, no leader is blind, and no escalation is improvised.
