

HAYES 2026

THE INTELLIGENCE OPERATING SYSTEM

Operational Readiness, Product
Ecosystem, & Valuation Strategy.

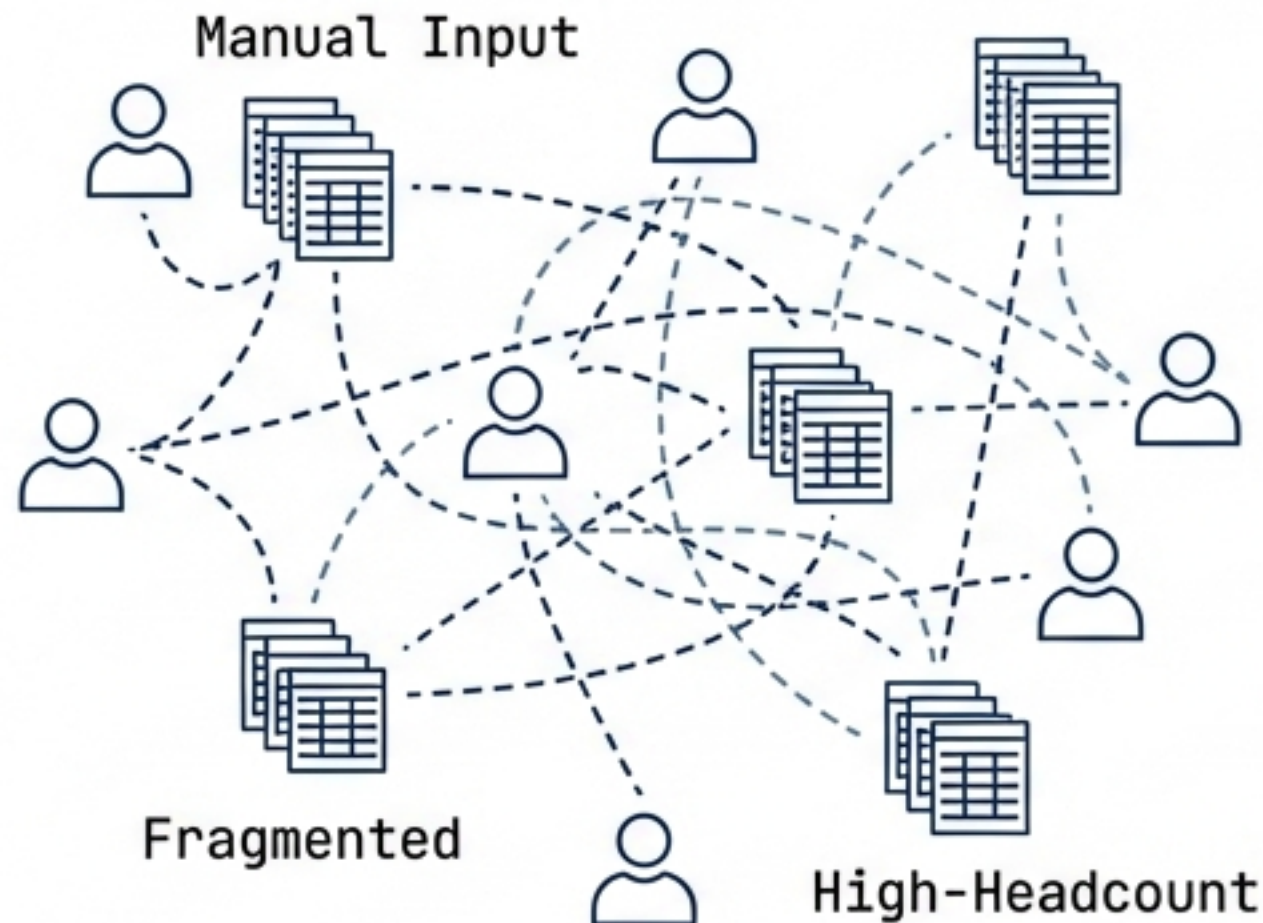

TRANSITION PROTOCOL: FROM SERVICE PROVIDER TO CRITICAL INFRASTRUCTURE.

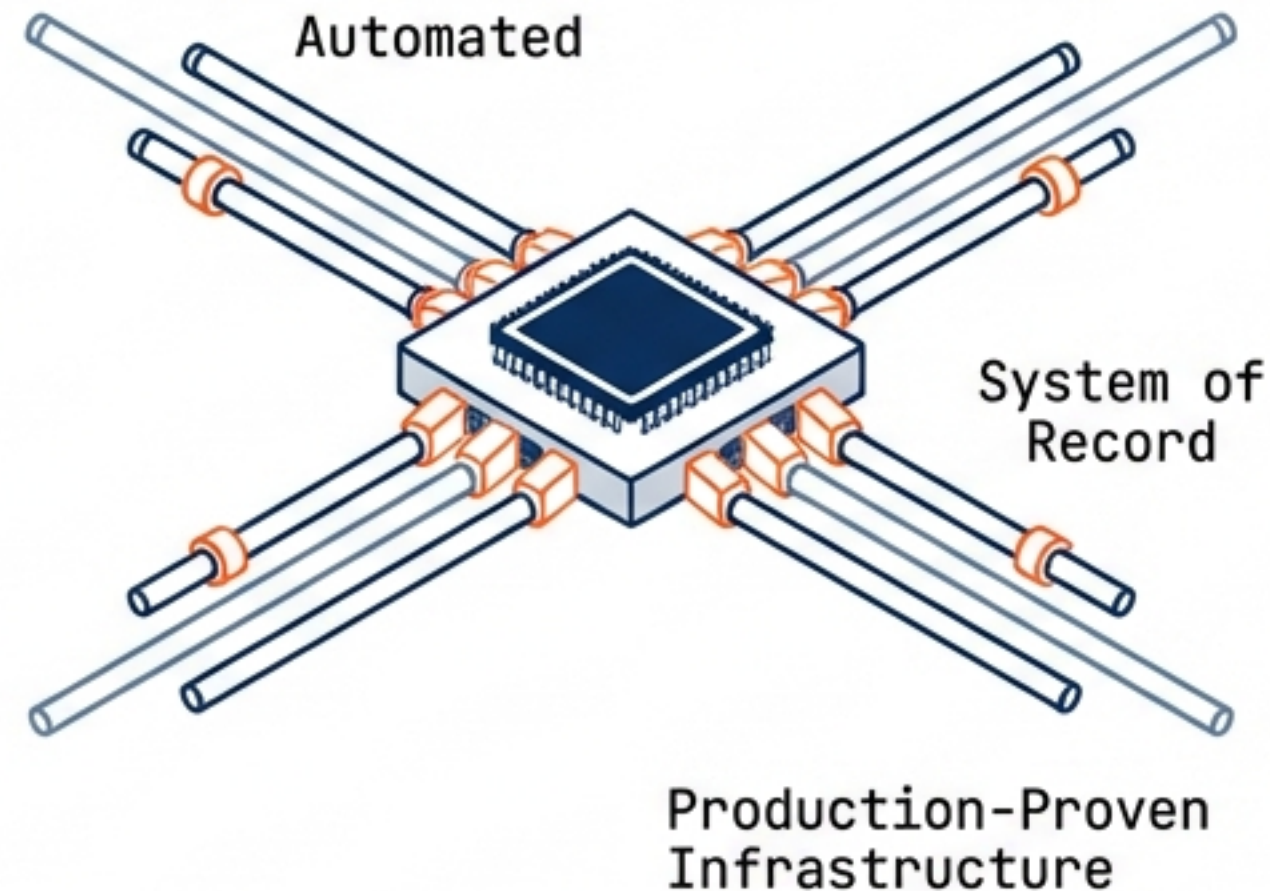

THE ARCHITECTURE OF URBAN RESILIENCE

The Strategic Pivot

FROM: LEGACY STATE

TO: FUTURE STATE

VALUATION
DRIVER:

The pivot from
low-margin
consultancy
to "Anti-fragile"
critical
infrastructure

PROTOCOL SHIFT: SERVICE VS. SYSTEM

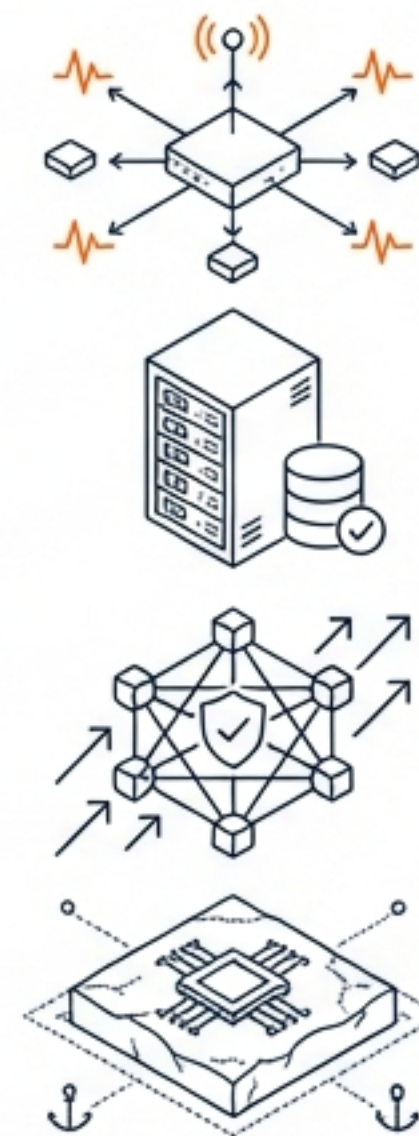

LEGACY STATE (SERVICES)

- Predictive Modeling
- Manual Support / High Headcount
- Fragmented Point Solutions
- Vulnerable to Market Fluctuation

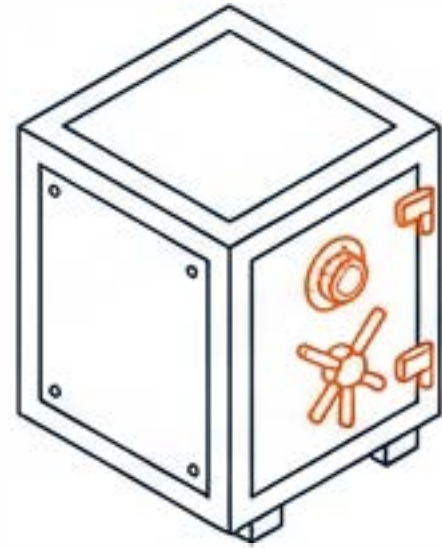

FUTURE STATE (INTELLIGENCE OS)

- Real-time Safety Orchestration
- Automated Systems of Record
- Antifragile Market Positioning
- Non-Displaceable Infrastructure

VALUATION DRIVER: Replacing manual support with an immutable OS for insurance and board defense.

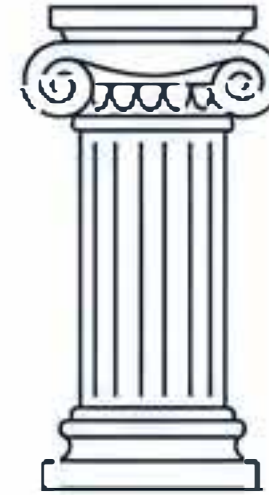

THE FOUR-ZONE OPERATING MODEL

ZONE 1: RESILIENT REACH

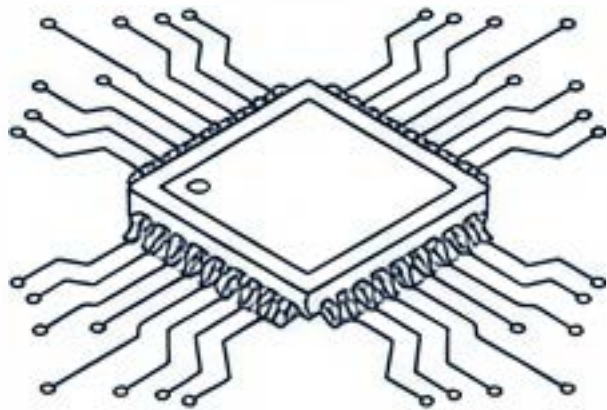

IP Holding & Chimera Data Backbone.

Ensures absolute sovereignty.

ZONE 2: FOUNDATION

Academic Consortium & R&D.
Validated by Stanford, MIT,
Harvard, Georgia Tech.

ZONE 3: NOVATELABS.AI.

Technical Engineering.

The implementation heart.

ZONE 4: SENTRAIS.

Compliance & Licensing.

Neutral Party Status.

STRUCTURED TO REMOVE REGULATORY FRICTION WHILE MAINTAINING IP SECURITY.

THE 3-LAYER TECH STACK

LAYER 3: THE MULTIPLIER (NIN ENGINE)

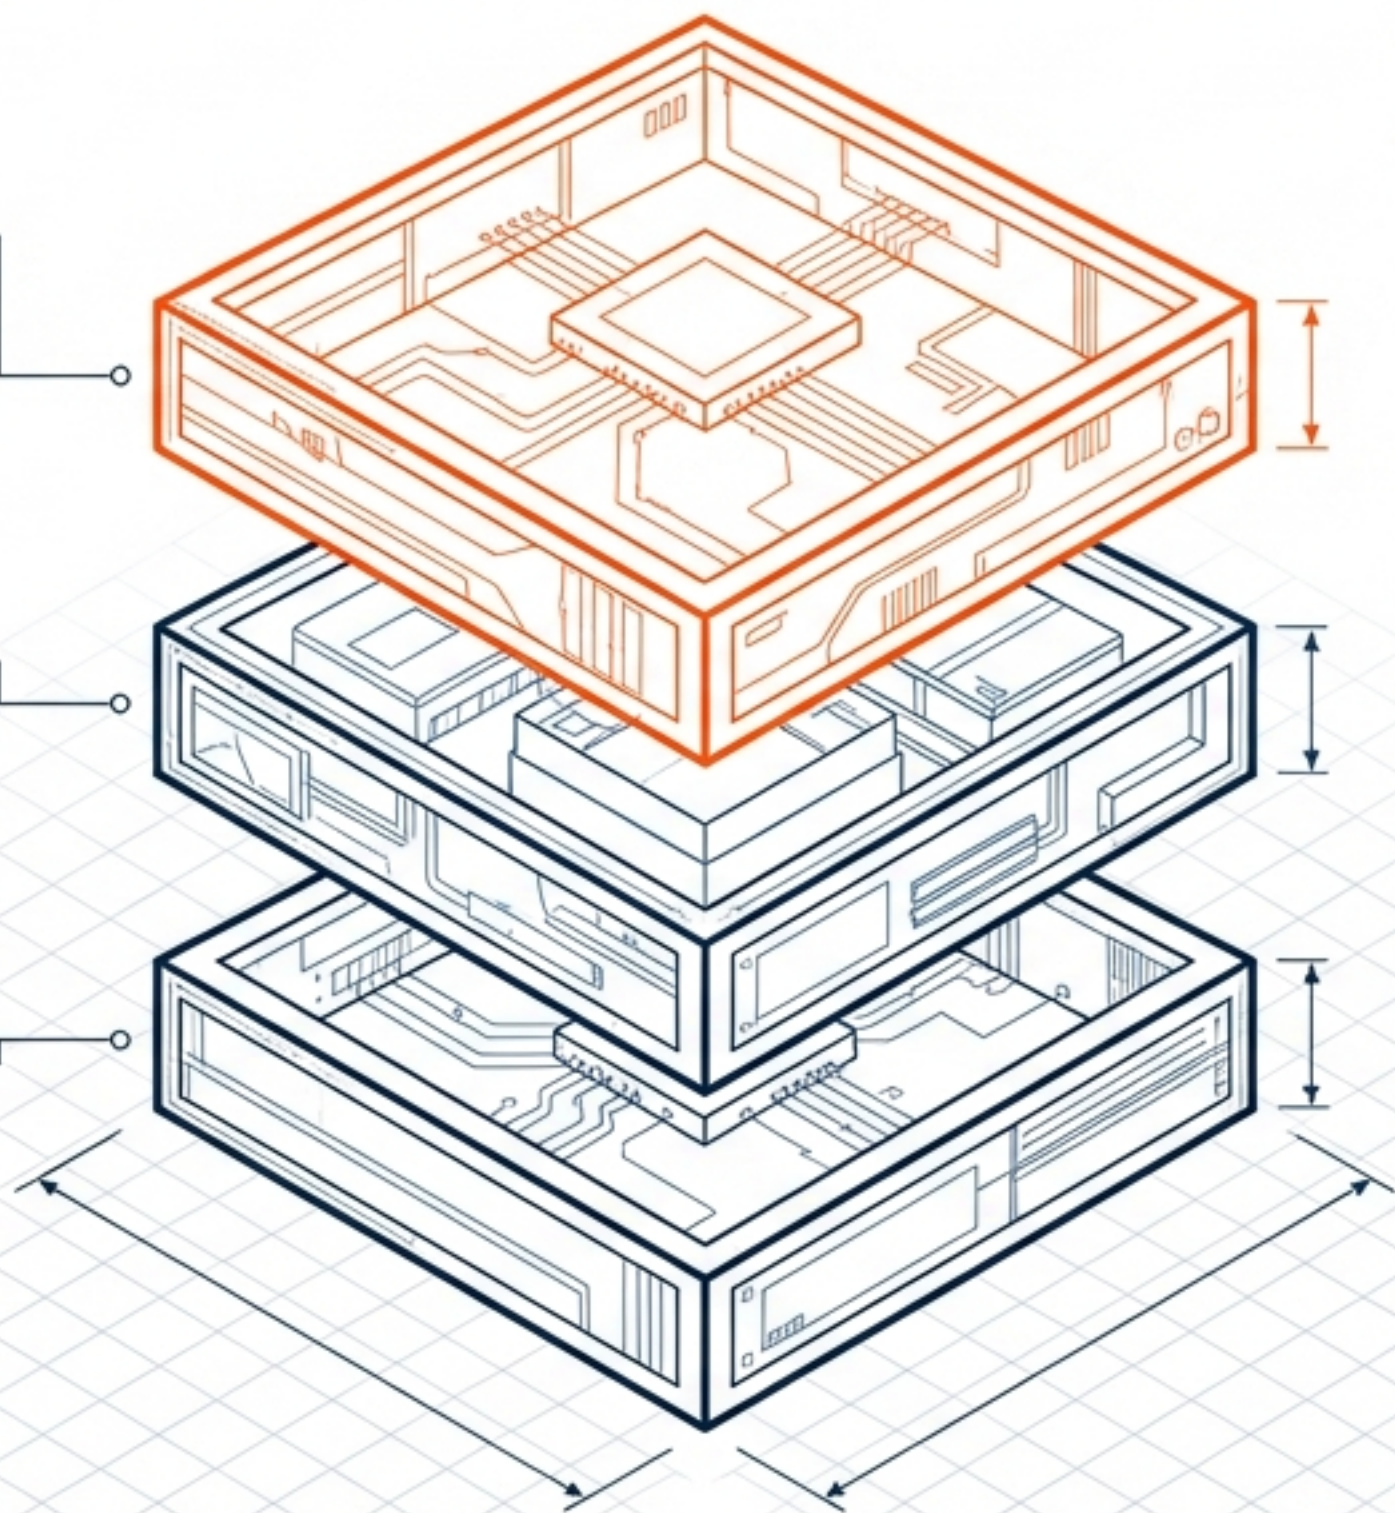

Methodology-wrapped
software acceleration.

LAYER 2: THE EDGE (APPLICATIONS)

Execution environments:
EVERGAME, eVenu, CiviGrid,
SEARGrid.

LAYER 1: THE CORE OS

Data ingestion, readiness
scoring, Evidence Ledger.

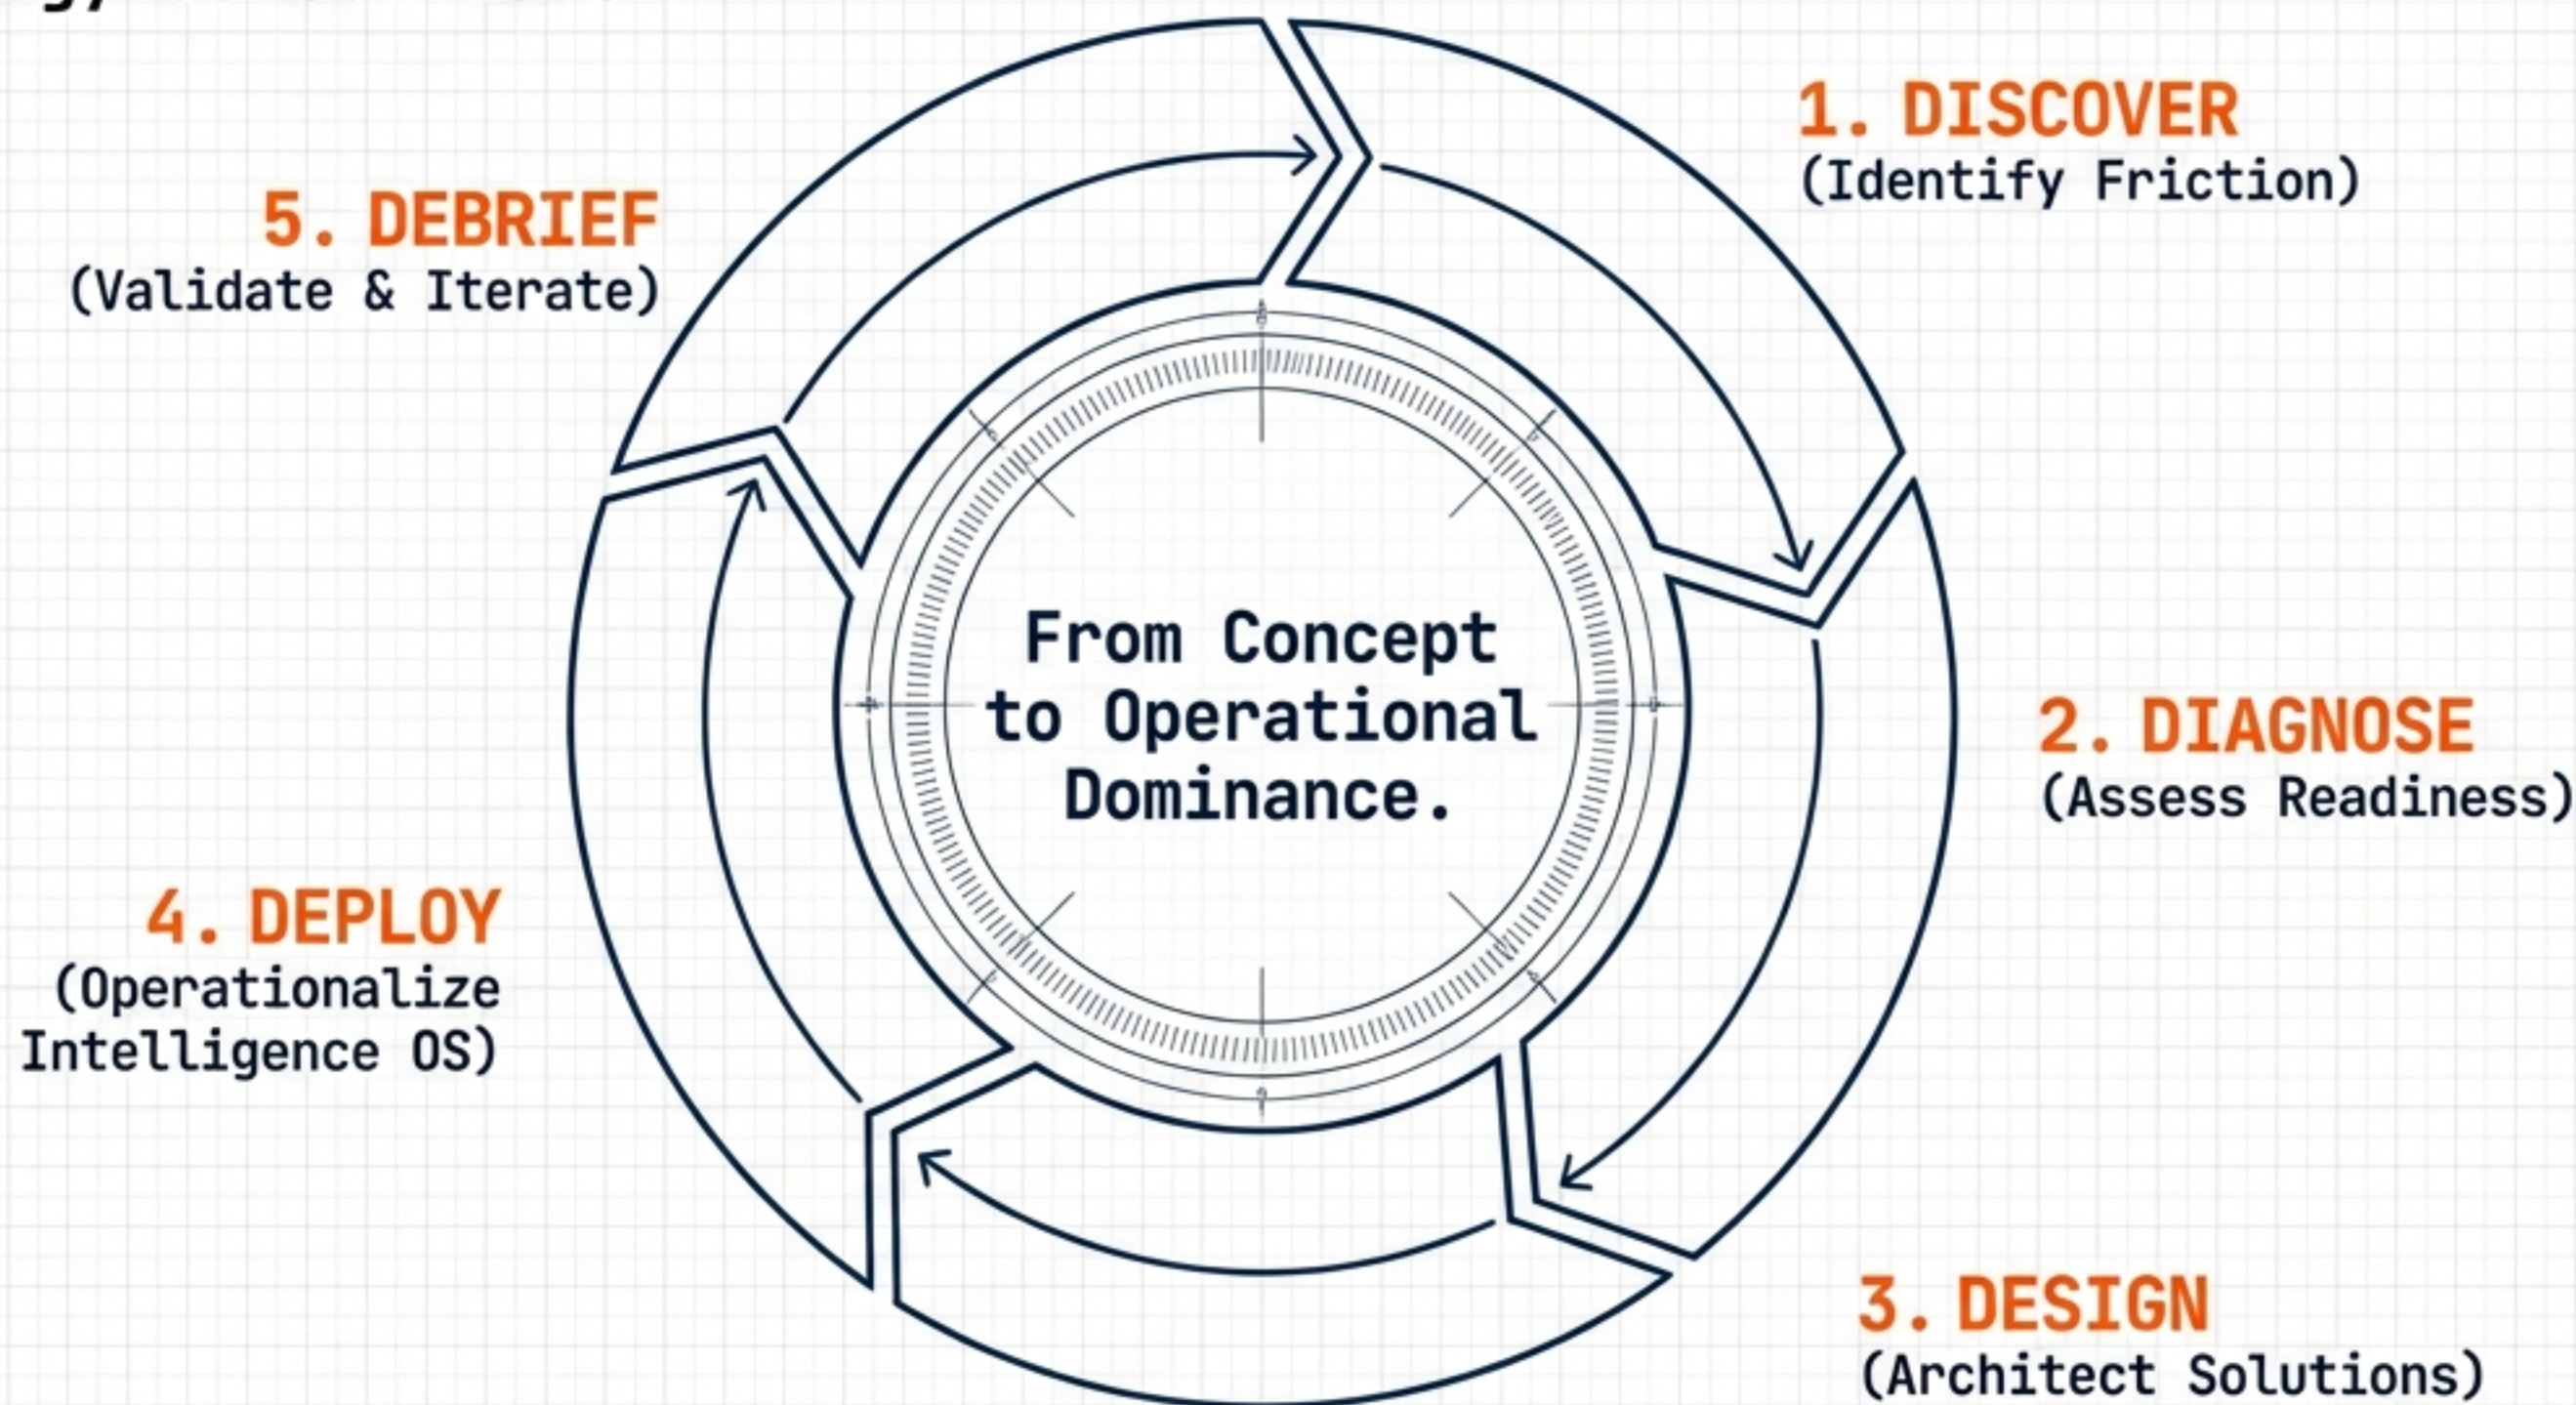

KEY INSIGHT:

Methodology is embedded
directly into the software,
providing required
diagnostic rigor.

THE DELIVERY ENGINE: NIN

Methodology-as-Software

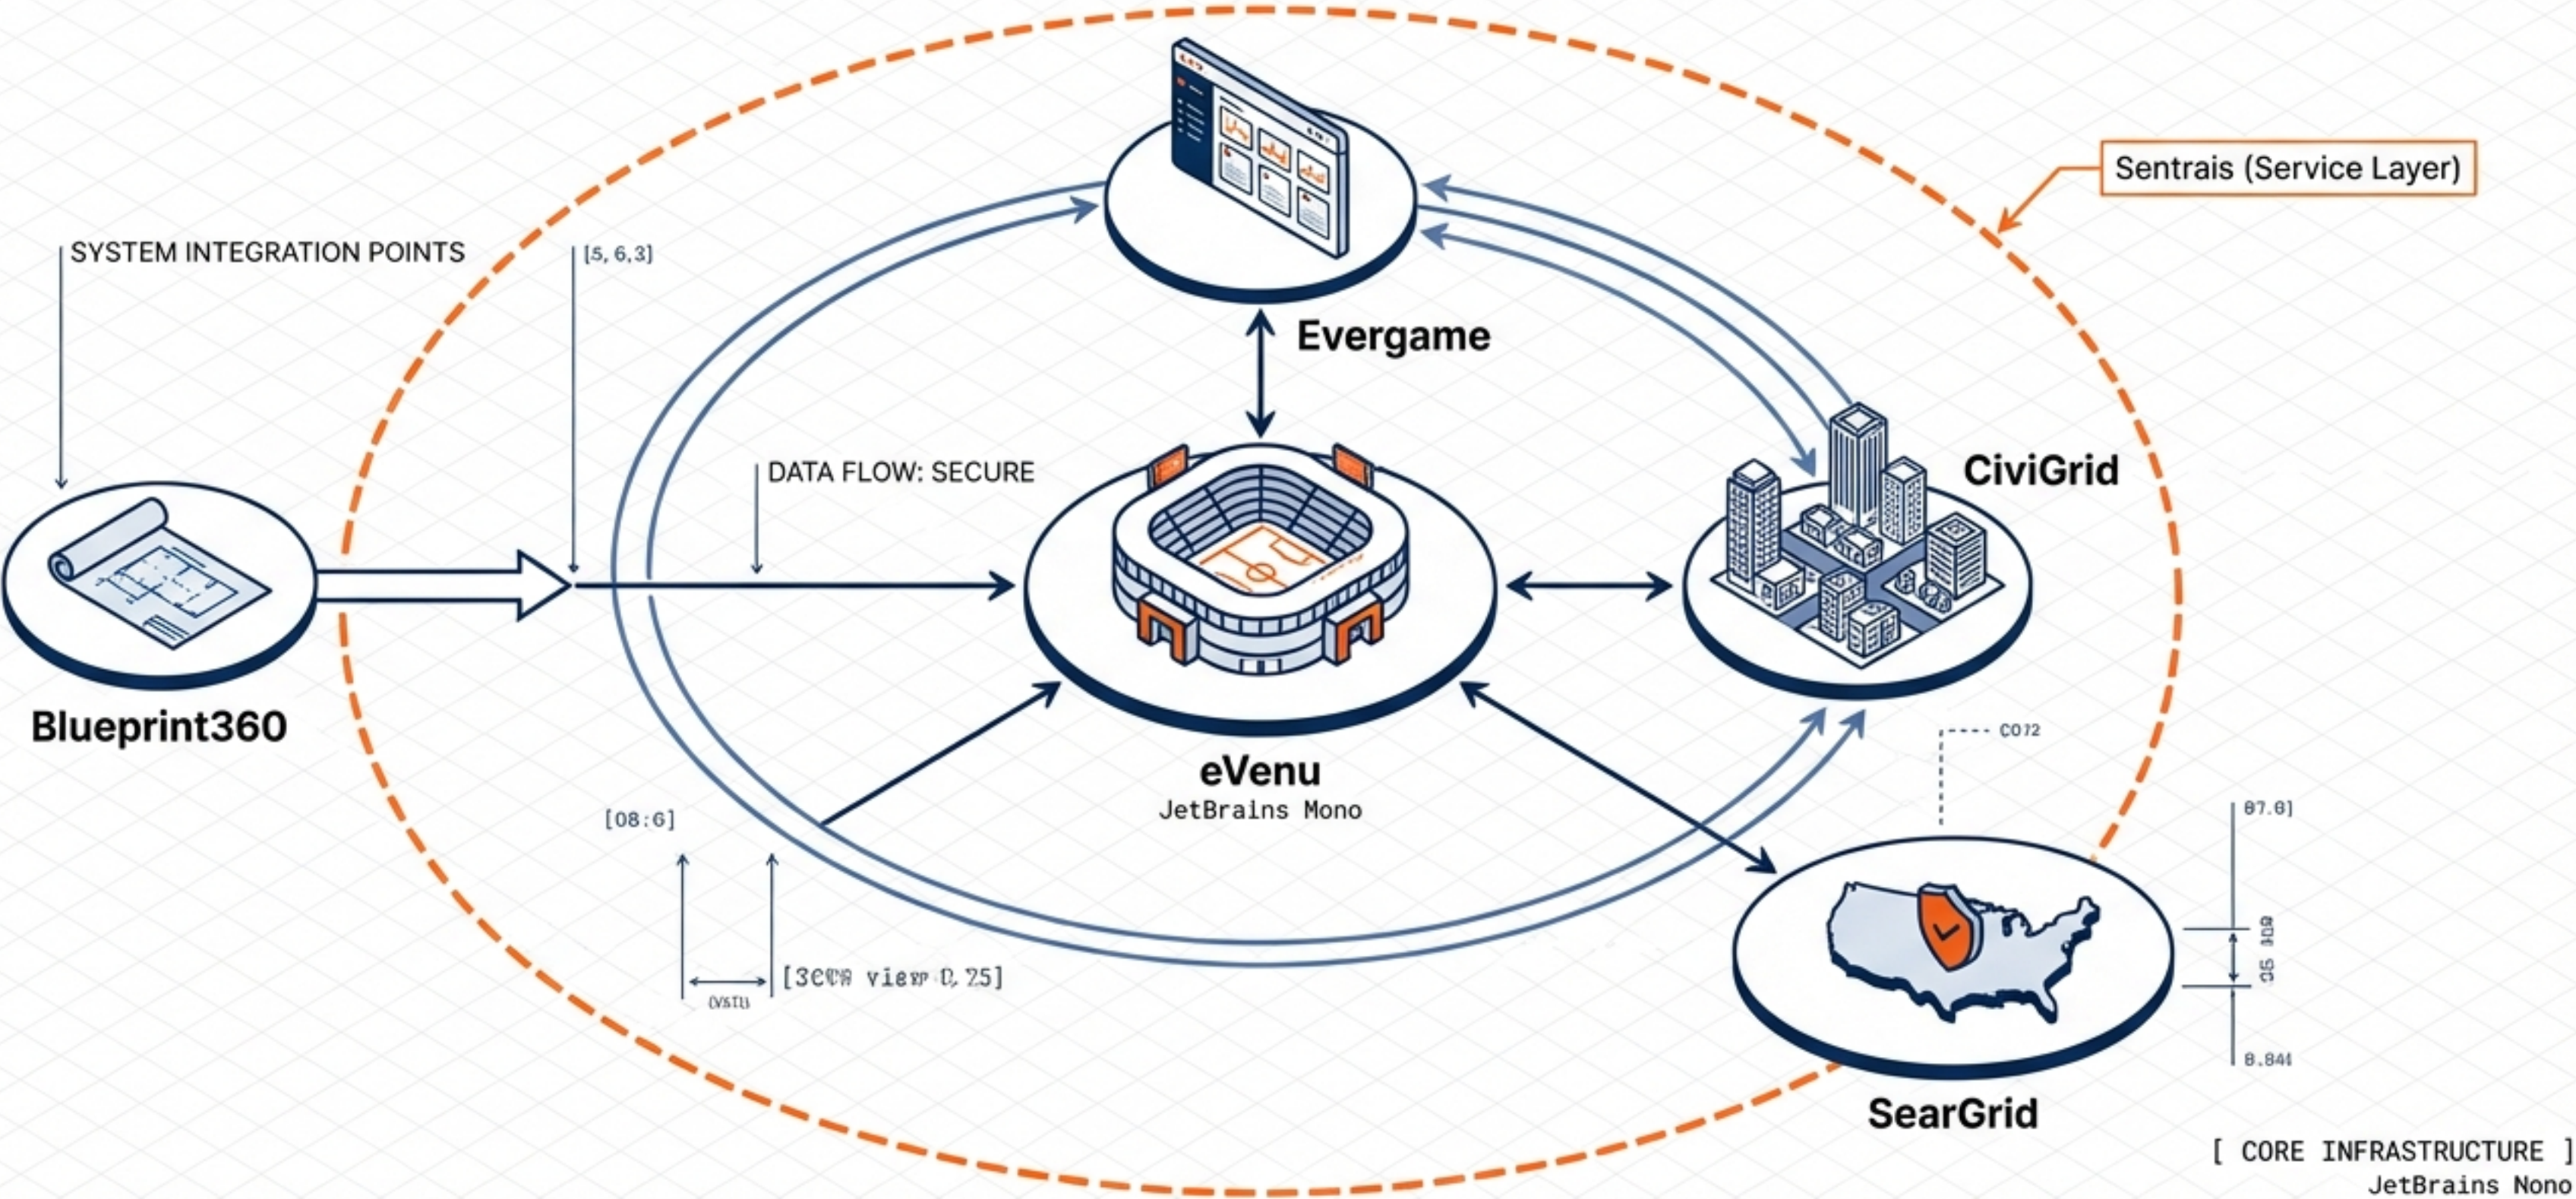

[DATA FLOW: ACTIVE]

[DATA FLOW: ACTIVE]

[SYSTEM STATUS: SECURE]

THE PRODUCT ECOSYSTEM

PRODUCT I: BLUEPRINT360 (THE ENTRY POINT)

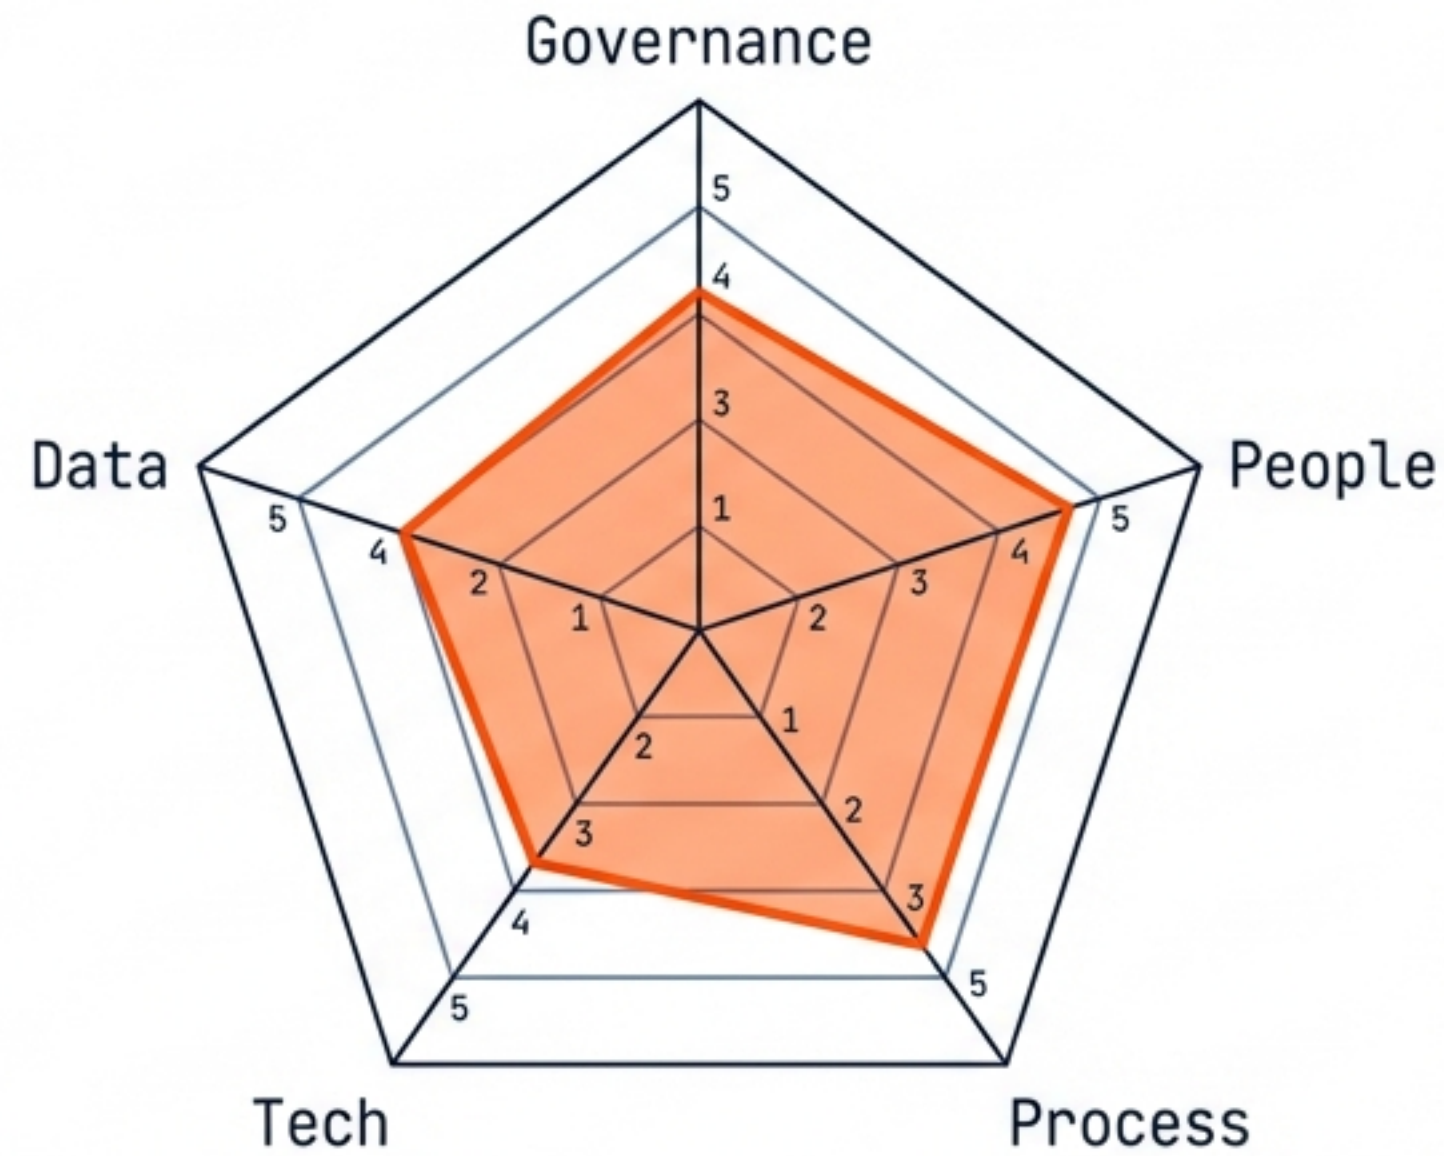

IDENTITY

Target Buyer:
Executives / CISOs

Core Function: Security
& Operational Maturity
Assessment

MECHANICS VISUAL

ECONOMICS

\$250K – \$500K

Fixed Fee

- Deliverables: Standardized Level 1-5 maturity score
- Board-ready 'Go/No-Go' readiness gate

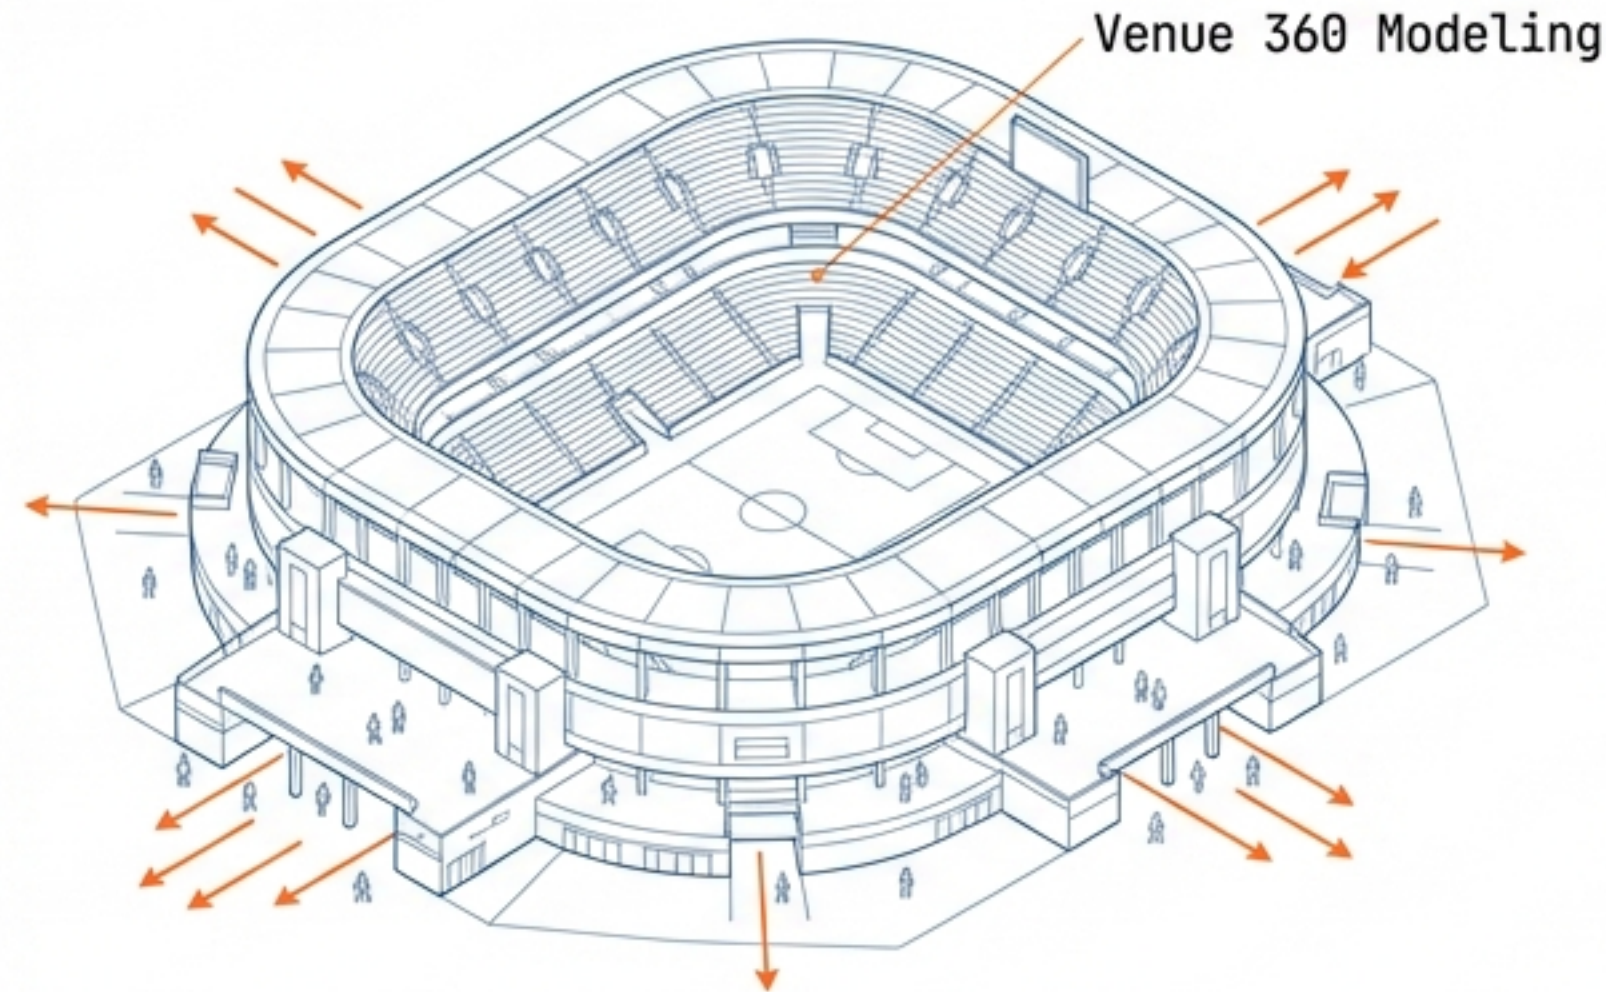

PRODUCT II: eVENU (THE VENUE LAYER)

IDENTITY

Target Buyer:
Stadiums / Venue
Owners

Core Function:
Digital Certification
& Compliance

MECHANICS VISUAL

ECONOMICS

\$150K – \$350K

Annual Licensing +
Certification Fees

Certification Tiers
(\$25K-\$100K)

Value Prop: Creates a “Live Intelligence” moat. Models 80% of issues before go-live.

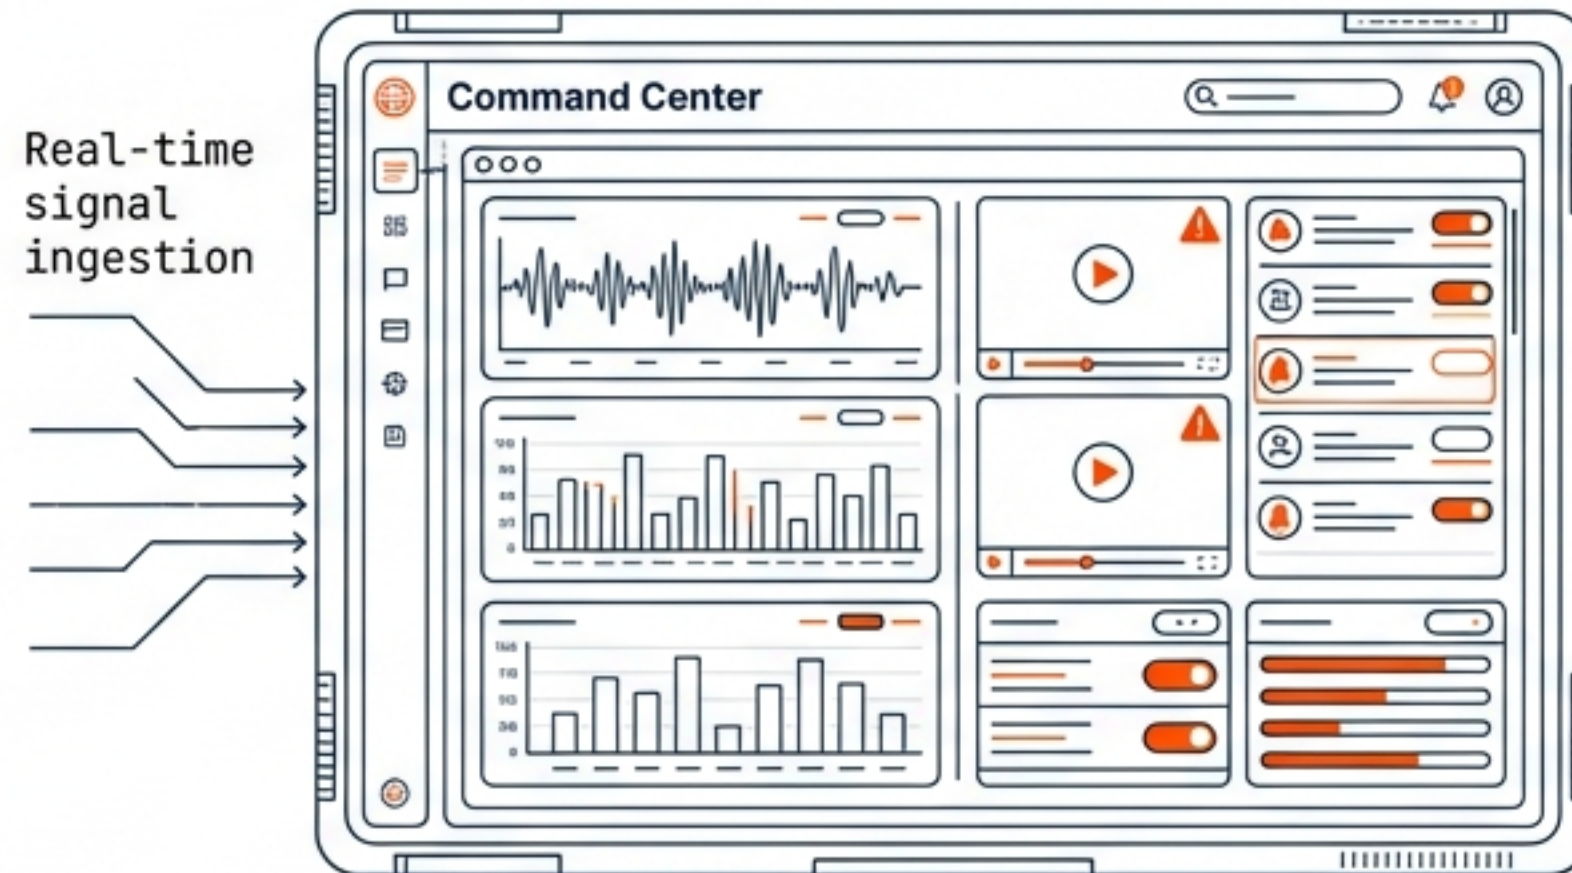

PRODUCT III: EVERGAME (THE EVENT LAYER)

IDENTITY

Target Buyer:
Leagues / Major
Tournament
Organizers

Core Function:
Season Planning &
Game-Day
Orchestration

MECHANICS VISUAL

ECONOMICS

\$750K – \$1.5M

Per Season

Optional Services
(\$250K-\$750K)

Value Prop: Unified source of truth. Includes Game Day Readiness Dashboard.

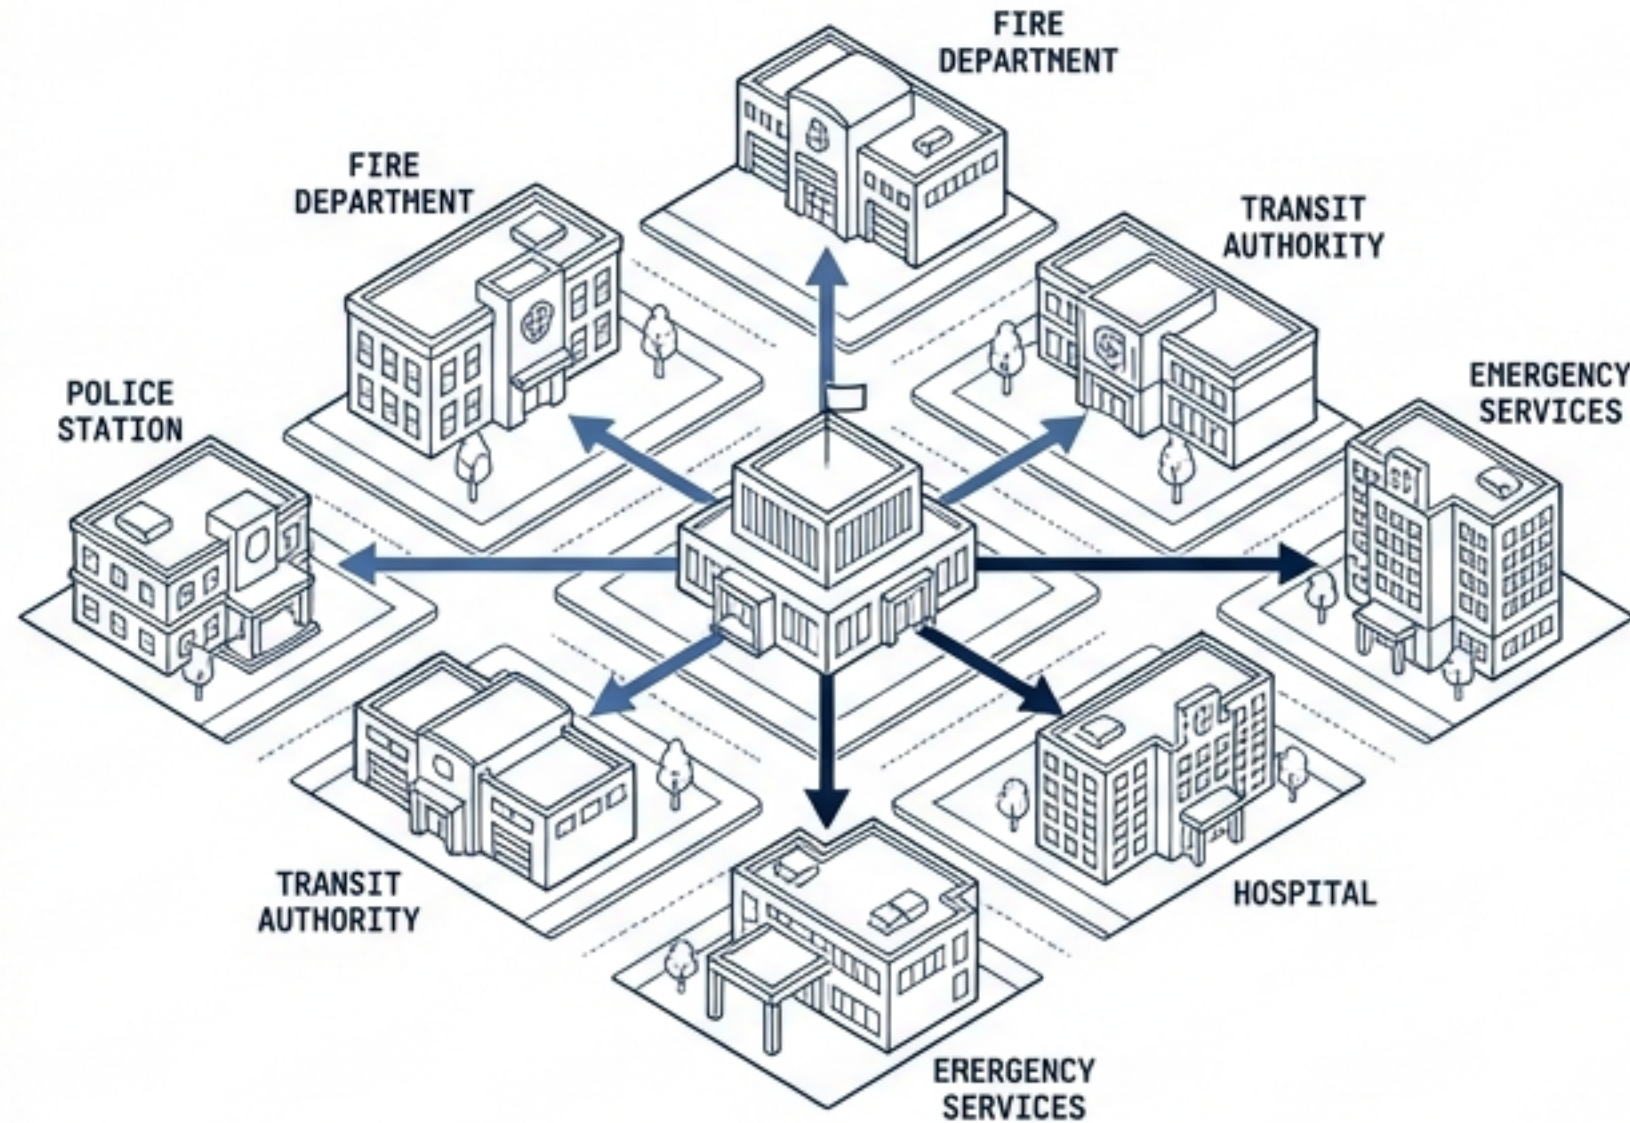

PRODUCT IV: CIVIGRID (THE CITY LAYER)

IDENTITY

Target Buyer:
Host Cities / Mayors

Core Function:
Multi-Agency City
Coordination

MECHANICS VISUAL

Cross-agency intelligence models.

ECONOMICS

**\$1M –
\$2.5M**

Annual License

Single Event:
\$500K – \$1.25M

Value Prop: Manages the 'Seam of Responsibility' between local command and federal support. Deconflicts agency overlap.

PRODUCT V: SEARGRID (THE NATIONAL LAYER)

IDENTITY

Target Buyer:
Federal / State
Authorities
(FEMA/DHS)

Core Function:
National Security
Event Orchestration

MECHANICS VISUAL

ECONOMICS

\$3M – \$7.5M

Programmatic /
High-Value Contract

Single Event:
\$1.5M – \$3.5M

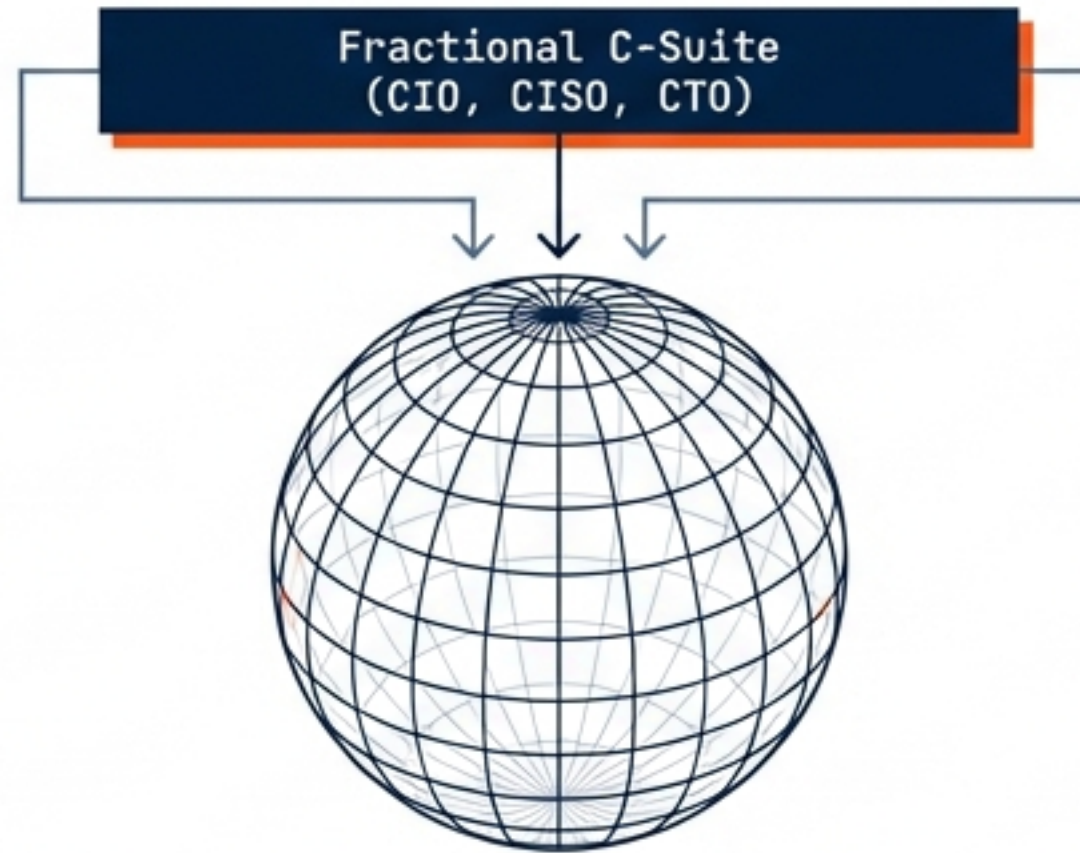

Value Prop: Sole-source capability for federal response. Validates federal funding models.

PRODUCT VI: SENTRAIS (THE SERVICE LAYER)

IDENTITY

Target Buyer:
Compliance/Staffing
Support
Core Function:
"Simply Comply"
Managed Services

MECHANICS VISUAL

Silicon Savannah (Kenya) - 24/7 Monitoring

ECONOMICS

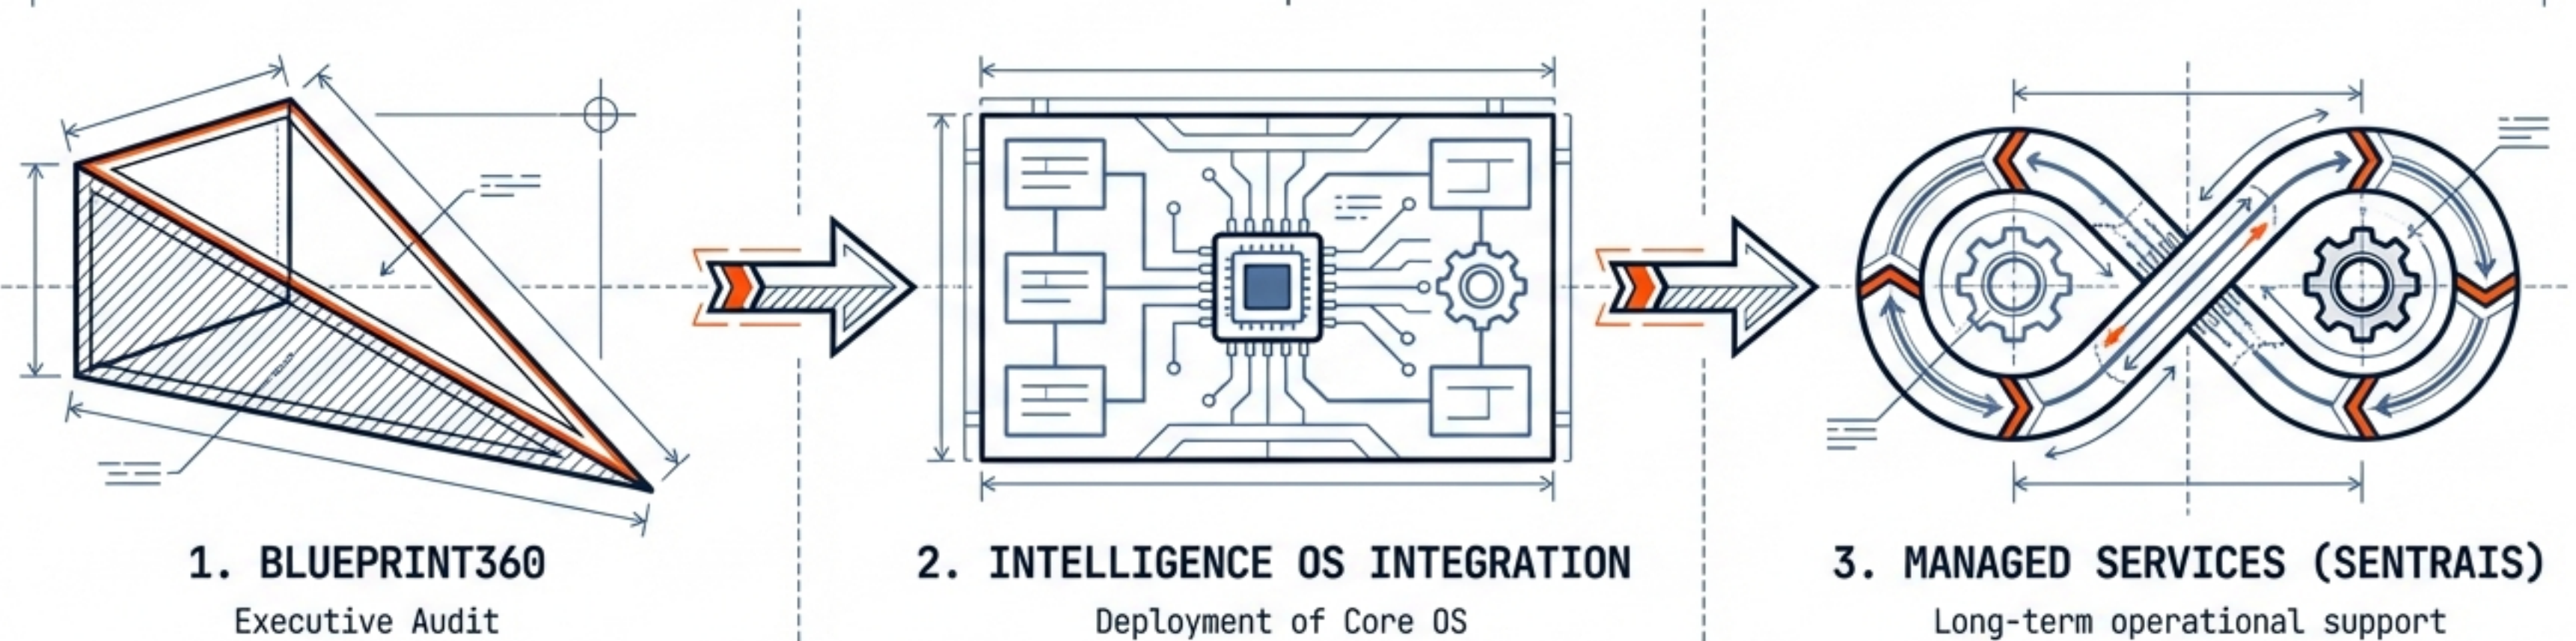

**MONTHLY
RECURRING
(MR)**

Arbitrage Model for
Cost-Effective Global
Scaling.

Value Prop: Removes regulatory friction. Neutral Party status essential for certification.

THE COMMERCIAL 'WEDGE' STRATEGY

"We do not deploy tools into unproven environments. We prove maturity first."

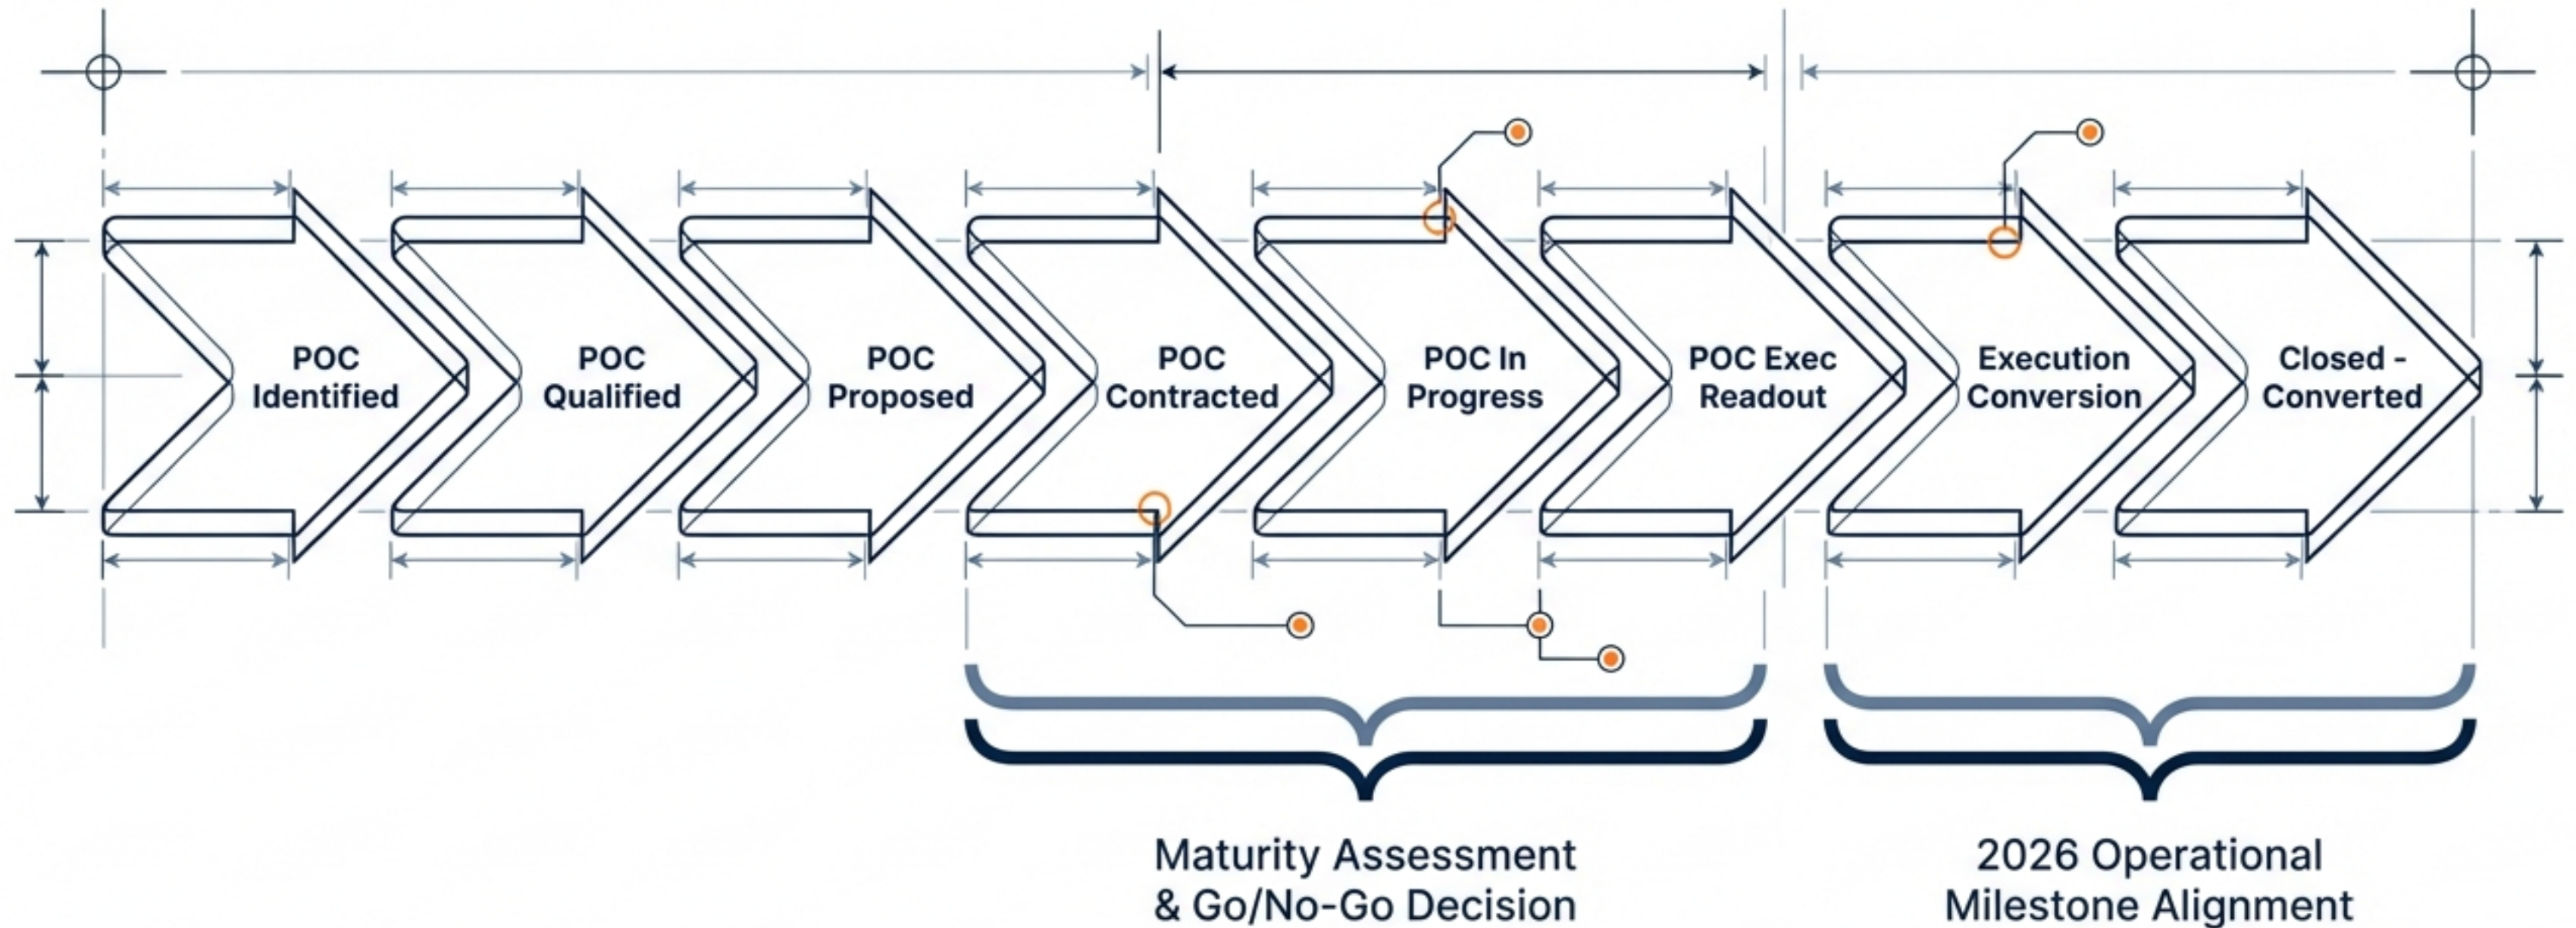

STRATEGIC OUTCOME

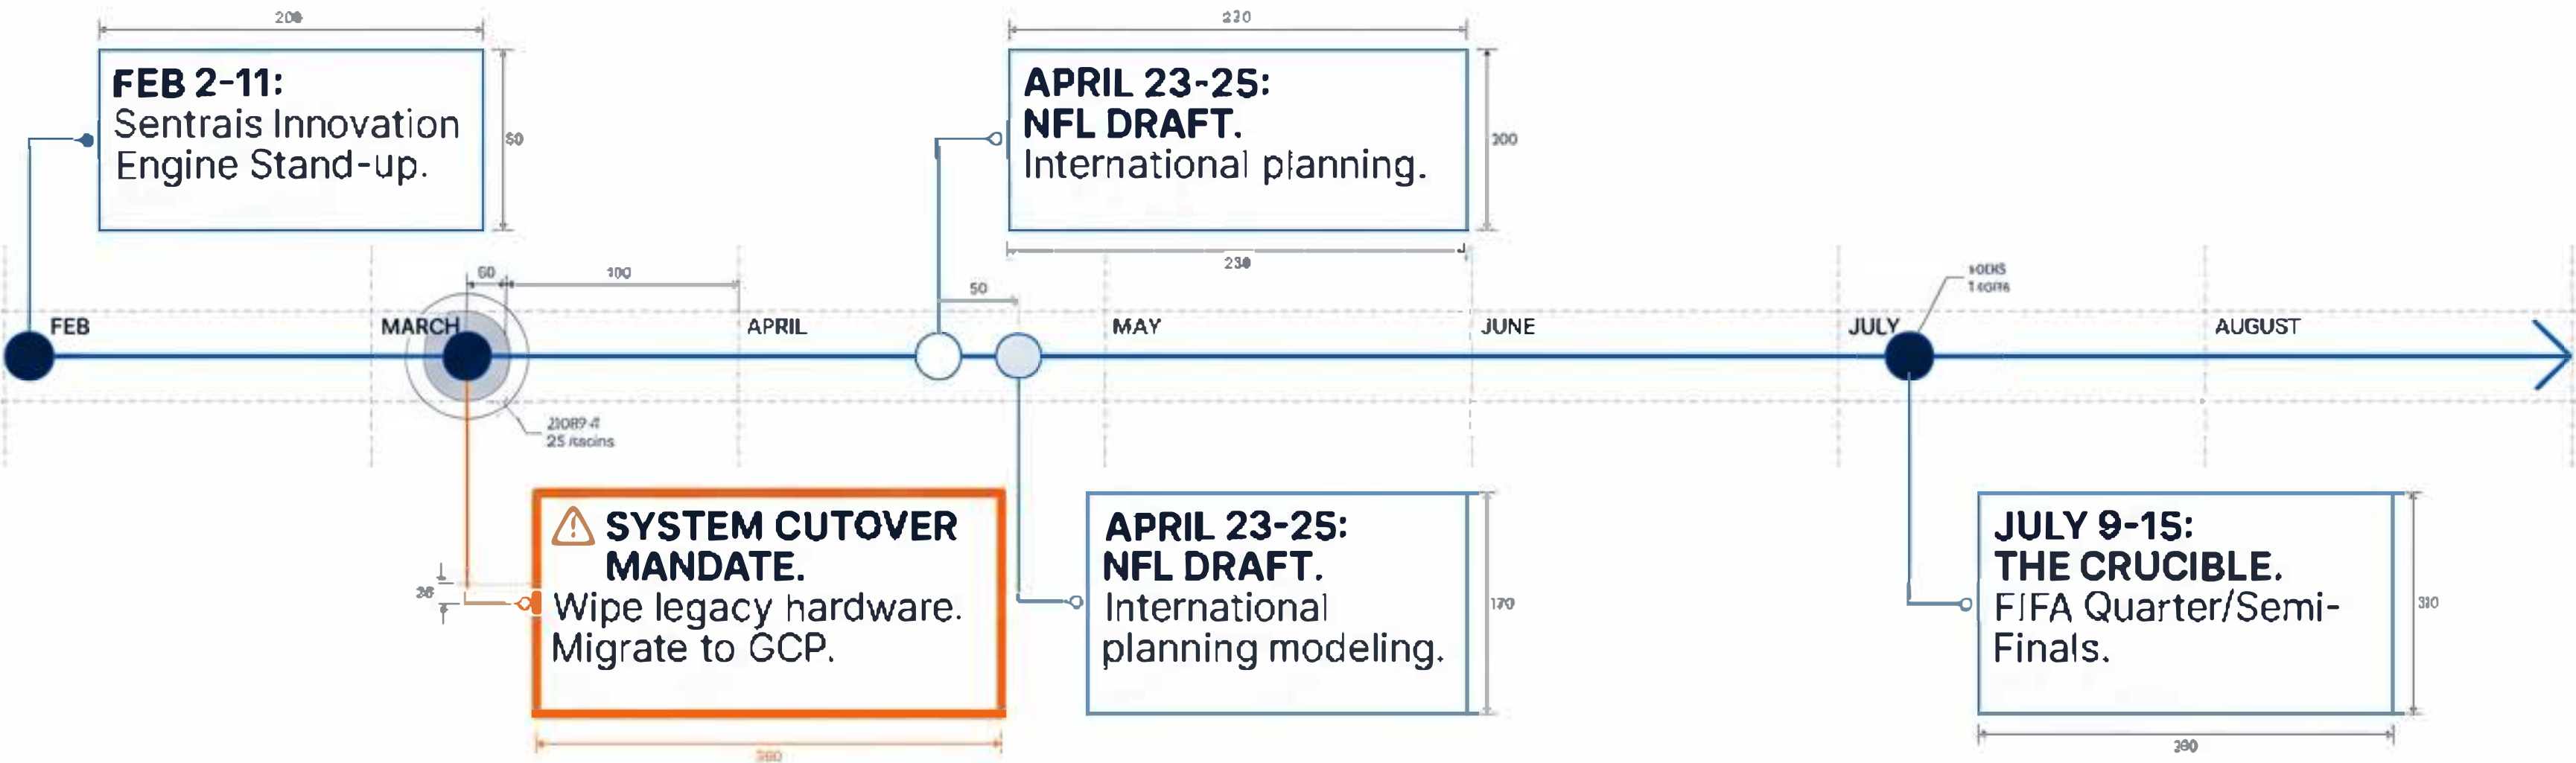

Client capital anchored to validated operational needs

COMMERCIAL RIGOR: THE 8-STAGE CONVERSION

Process-as-System

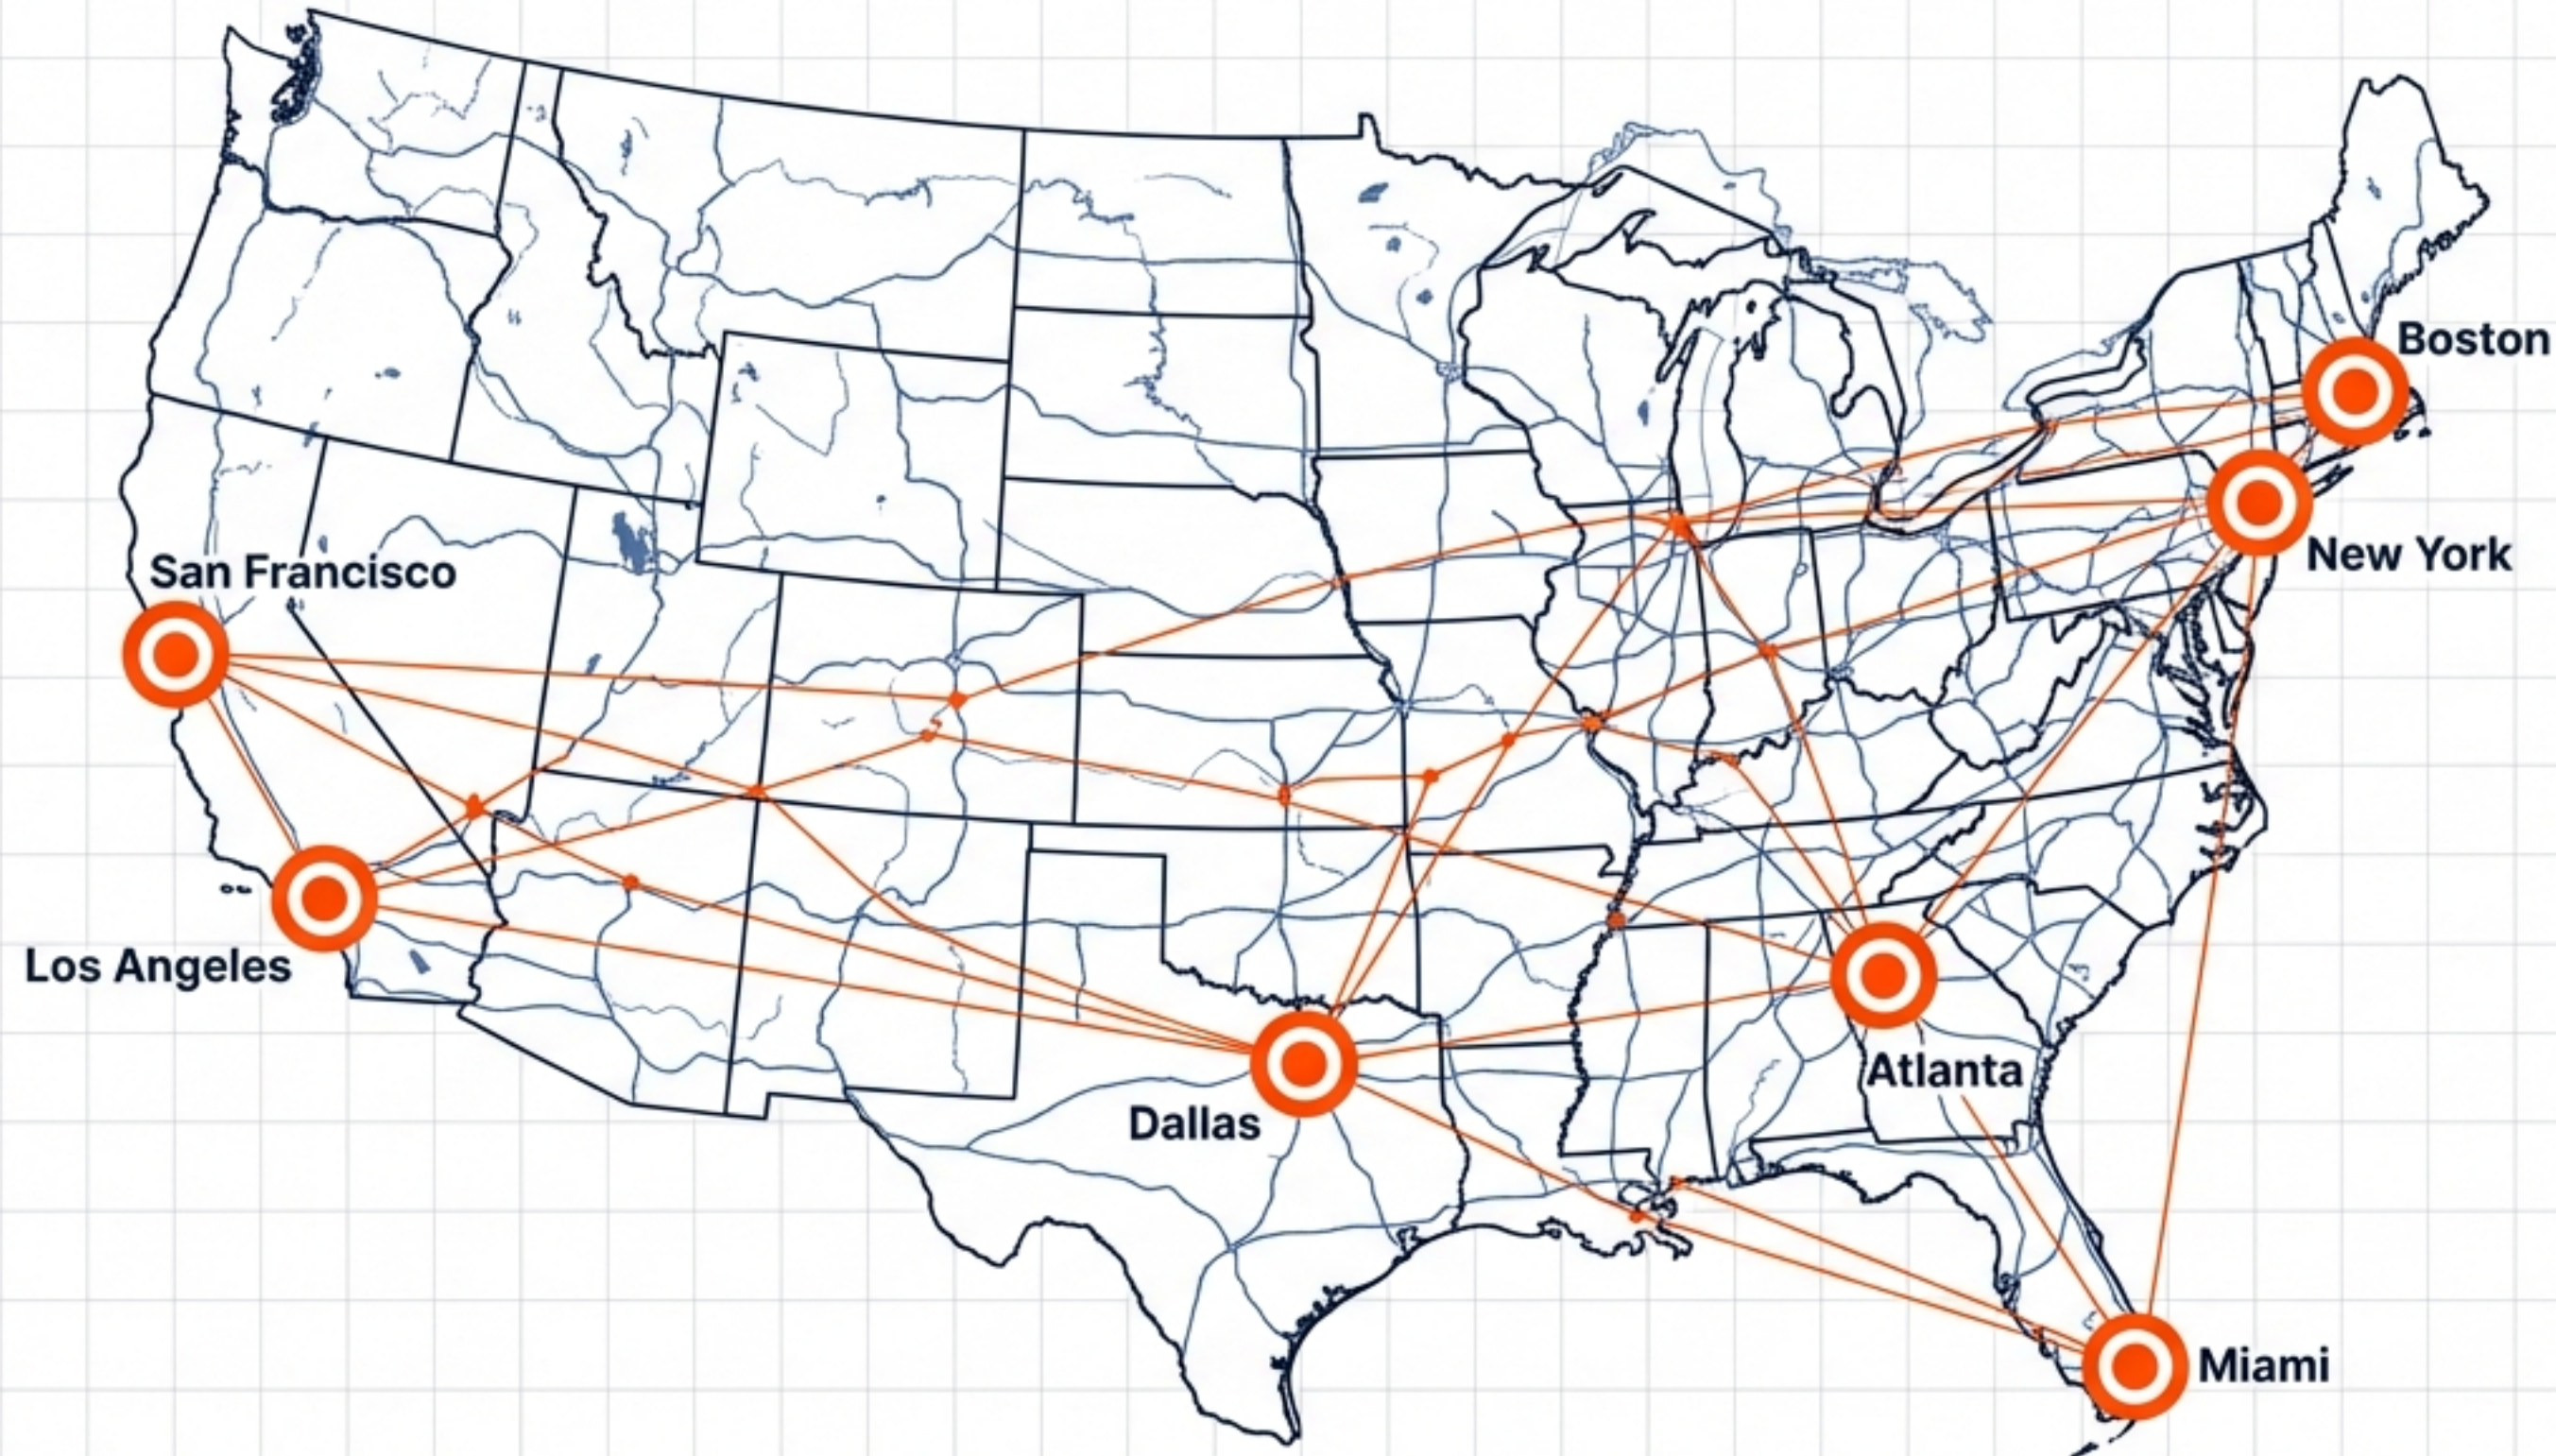

2026 STRATEGIC TIMELINE: THE “LIVE LAB”

These events provide the non-negotiable stress test for the Chimera backbone.

FIFA INTENSITY & THE SEAR FRAMEWORK

Technical Blueprint / High-Fidelity Command Center

STRATEGY:

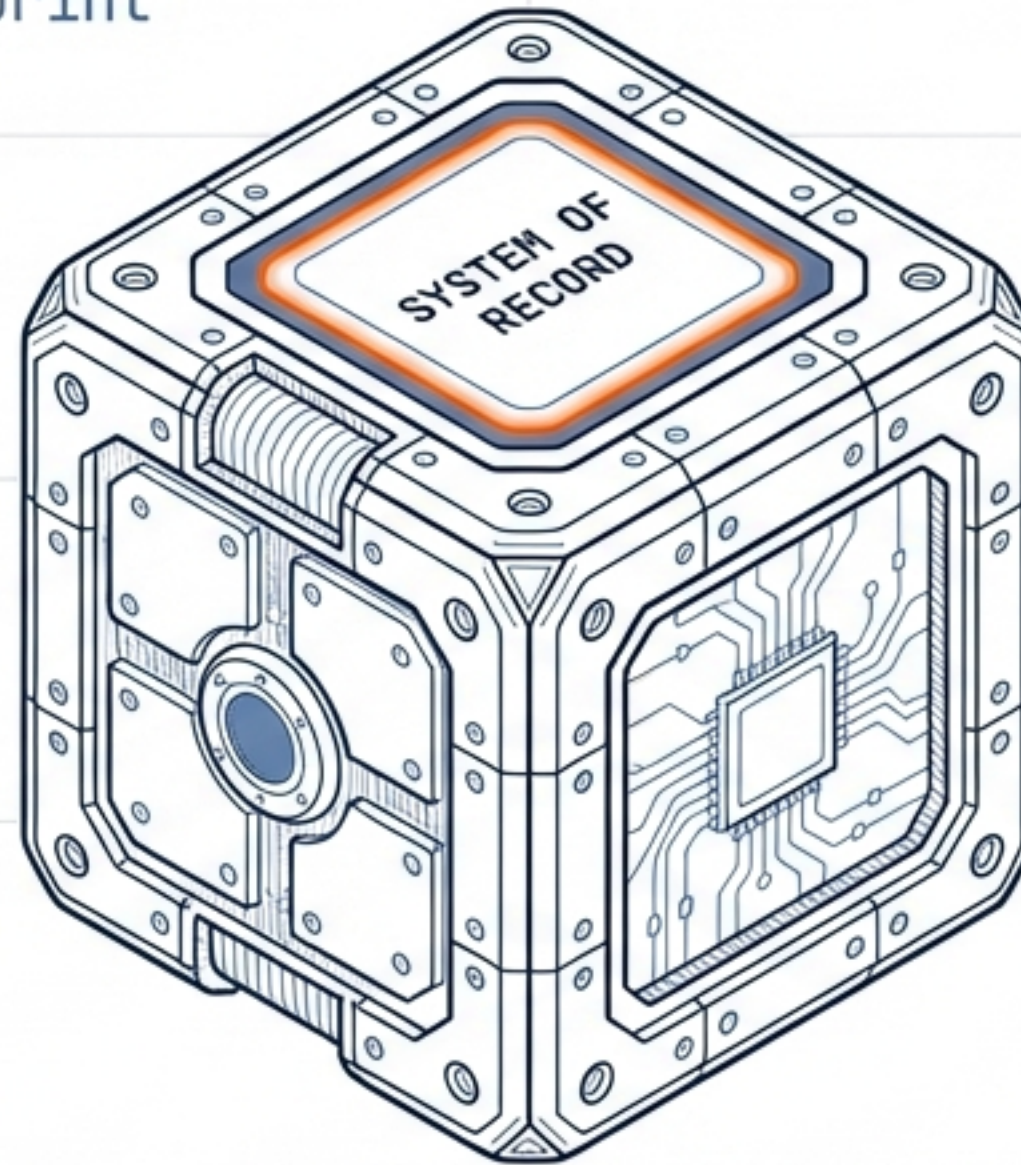

Testing the 'Statewide SEAR-2 baseline' elevating to 'SEAR-1 Ready' during match windows.

OBJECTIVE:

Manage the "Seam of Responsibility" between local and federal authorities.

VALUATION DRIVER: THE EVIDENCE LEDGER

Secure System of Record // Blueprint

1. IMMUTABLE AUDIT TRAIL

Defensible forensic history
for liability mitigation.

2 REGULATORY LOCK

Mandatory infrastructure
for insurance reporting.

3. SOLE-SOURCE DOMINANCE

Proved via FIFA "Seam of
Responsibility" validation.

The Evidence Ledger makes the OS
non-displaceable, securing a permanent moat.

OPERATIONAL NORMALIZATION

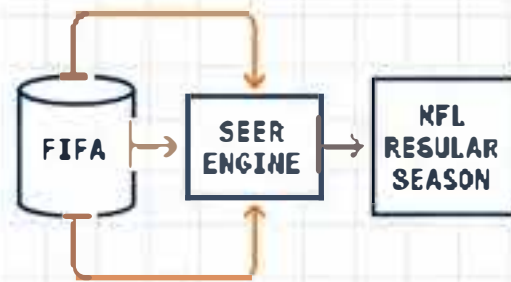

RISK MITIGATION

Mandatory endpoint protection (Post-3/15).

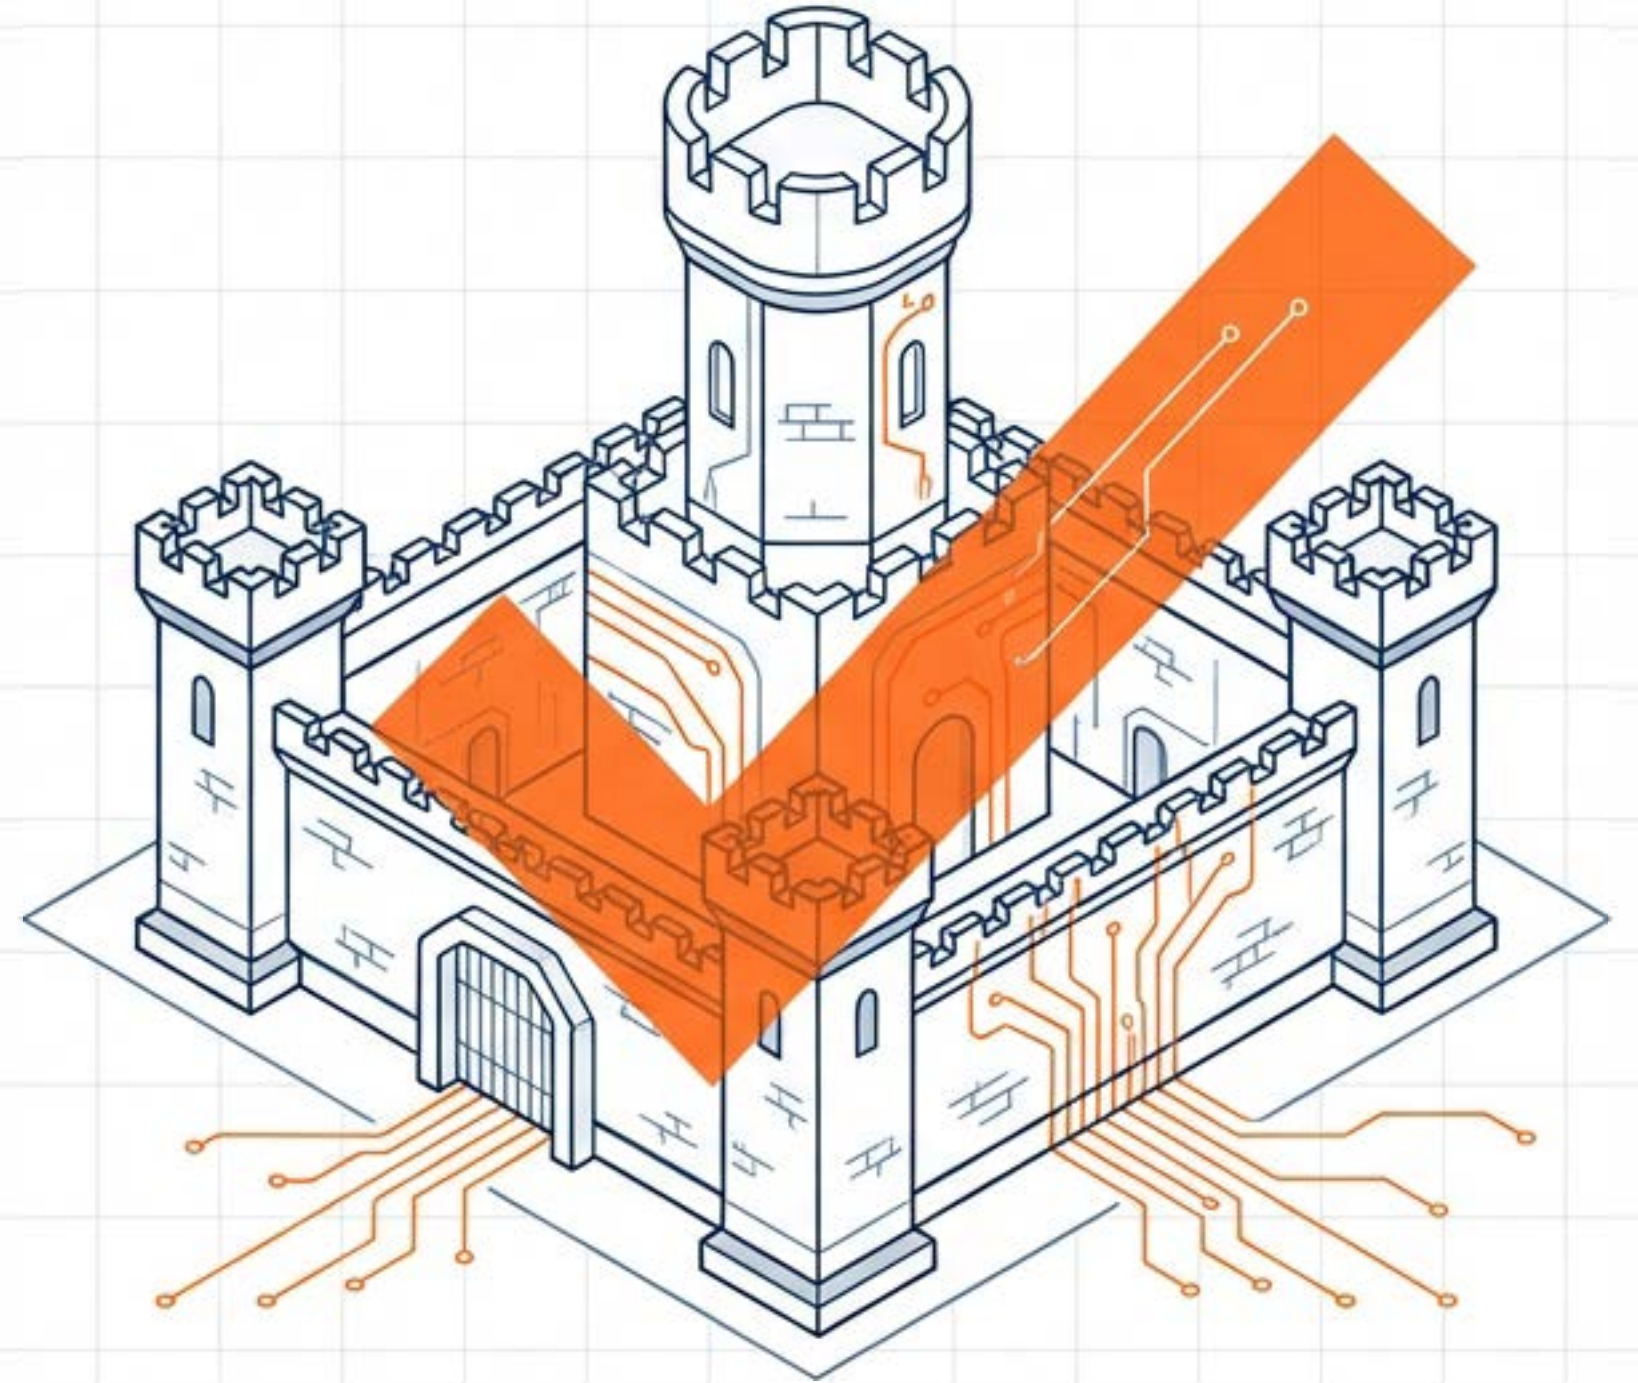

THE DESTINATION

Ingest FIFA data to optimize NFL Regular Season.

FINAL VISION

Transition to permanent "Managed Services" posture.

ANTIFRAGILE. SOLE-SOURCE. INEVITABLE.
