

Appendix A: Blueprint360 Proof of Concept – Statement of Work

1. Purpose

This Statement of Work (SOW) Appendix defines the scope, deliverables, roles, and commercial terms for the Blueprint360 Proof of Concept (POC). The POC establishes a security and operational maturity baseline and provides an evidence-backed readiness assessment prior to execution deployment.

2. Scope of Work

- Conduct stakeholder interviews and documentation review
- Assess security and operational maturity across people, process, technology, and governance
- Develop an end-to-end operational blueprint and dependency map
- Identify critical risks, gaps, and remediation priorities
- Establish Go / Conditional Go / No-Go readiness determination

3. Deliverables

- Blueprint360 Security & Operational Maturity Scorecard
- Maturity heatmap with prioritized gaps
- Operational blueprint and dependency analysis
- Executive-ready POC Close-Out Report
- Execution roadmap aligned to Sentrais products

4. Out of Scope

- Production system implementation or configuration
- Live operational control or command center activation
- Custom software development
- Full product deployment (EVERGAME, eVenu, CiviGrid, SEARGrid)

5. Engagement Timeline

The Blueprint360 POC is delivered over a 6–10 week period, subject to client stakeholder availability and data access. A detailed project plan will be finalized at kickoff.

6. Client Responsibilities

- Provide access to relevant stakeholders, documentation, and systems
- Designate an executive sponsor and project liaison
- Participate in scheduled working sessions and reviews
- Review and approve deliverables in a timely manner

7. Sentrais Responsibilities

- Provide Blueprint360 orchestration and maturity assessment methodology
- Conduct analysis, scoring, and documentation
- Deliver executive-ready artifacts and recommendations
- Maintain confidentiality and data security standards

8. Commercial Terms

Investment for the Blueprint360 Proof of Concept ranges from \$250,000 to \$500,000 depending on scope and ecosystem complexity. Fees are fixed-price and payable according to the master agreement.

9. Acceptance Criteria

The POC will be deemed complete upon delivery of the defined deliverables and presentation of findings to executive stakeholders.

10. Transition to Execution

Upon completion of the POC, the client may elect to proceed with execution deployment through the appropriate Sentrais product (EVERGAME, eVenu, CiviGrid, or SEARGrid) under a separate agreement.
