

Blueprint360 Security & Operational Maturity Model

Scoring Framework (Client-Facing)

Maturity Dimensions (Assessed End-to-End)

- 1. Governance & Accountability**
Decision rights, escalation clarity, ownership
 - 2. People & Roles**
Training, staffing, role clarity, surge capacity
 - 3. Process & Playbooks**
Documented procedures, rehearsals, execution fidelity
 - 4. Technology & Systems**
System readiness, integration, resilience, visibility
 - 5. Data, Evidence & Assurance**
Auditability, proof, after-action learning
-

Maturity Levels

Level 1 – Fragmented

Ad hoc processes, informal coordination, undocumented risk

Level 2 – Defined

Documented processes, limited validation, siloed execution

Level 3 – Operationalized

Cross-functional coordination, rehearsed execution, basic assurance

Level 4 – Measured

Readiness scoring, evidence-backed decisions, live visibility

Level 5 – Orchestrated

Predictive readiness, real-time intelligence, continuous learning

POC Outputs

- Overall maturity score (Level 1–5)
- Dimension-level scoring heatmap
- Critical gap prioritization
- Target maturity state definition
- Time-phased remediation roadmap

This model aligns directly to enterprise risk, audit, and board oversight expectations.
