

HAYES URBAN RESILIENCE

The 2026 Strategic Operating Model

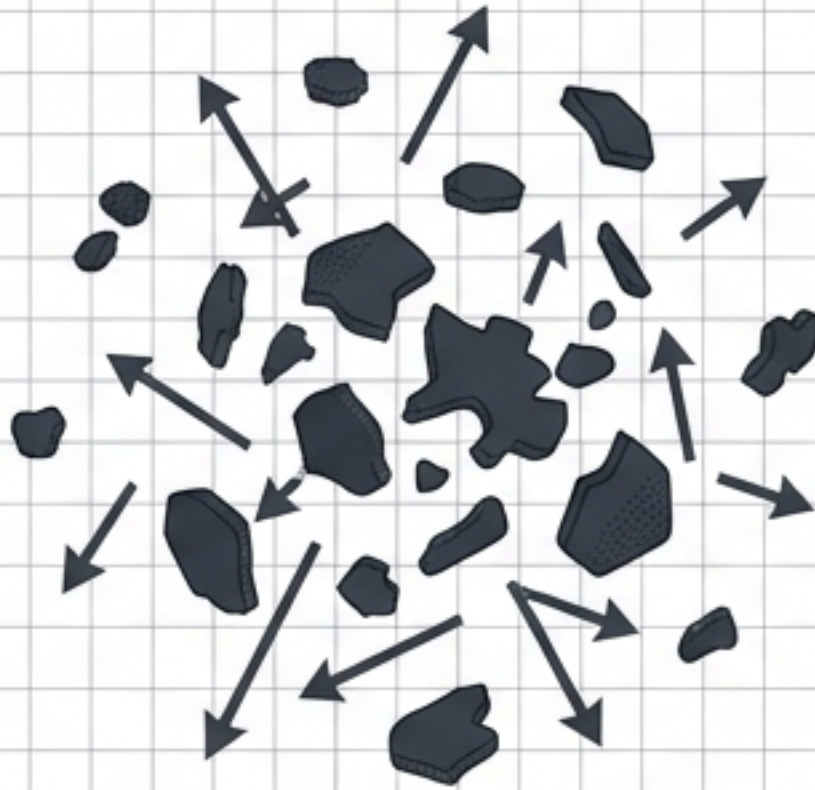

Operational Readiness, Ecosystem
Architecture, and The Path to Sole-Source.

THE STRATEGIC PIVOT: FROM SERVICES TO INTELLIGENCE OS

THE OLD WAY

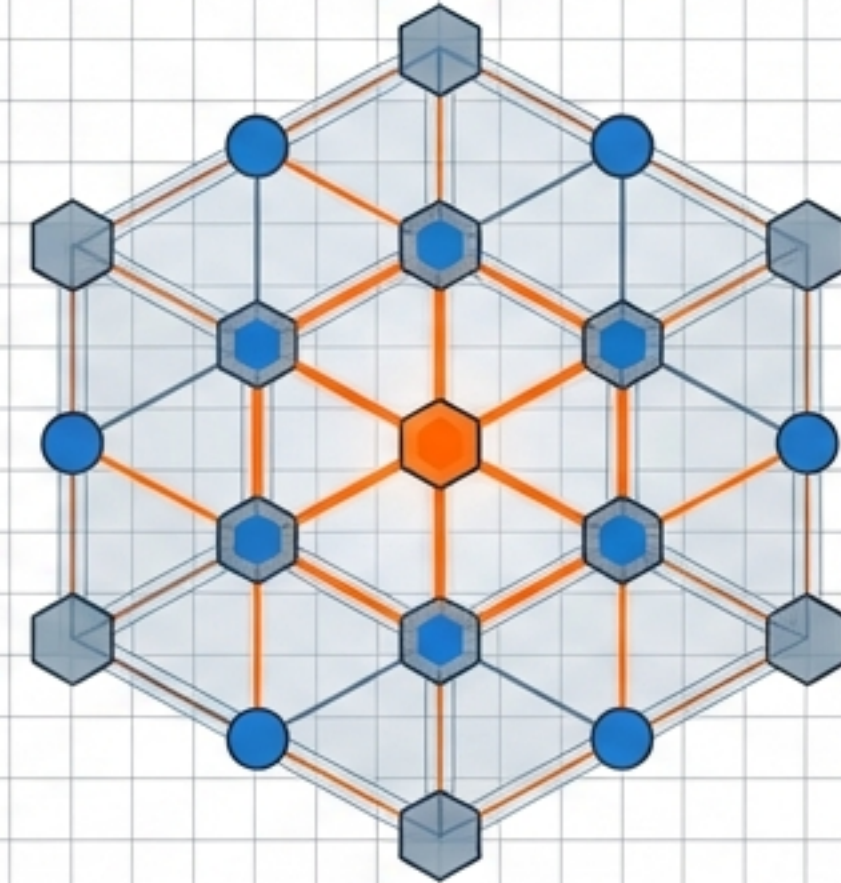

VALUATION KILLERS
Manual Providers

- ☐ **STRUCTURE:** Disconnected Point Solutions
- ☐ **MOAT:** High Headcount / Manual Support
- ☐ **PERCEPTION:** Conglomerate Discount
- ☐ **STATUS:** Vision-led Growth (Fragile)

THE NEW WAY

VALUATION DRIVERS
Intelligence OS

- ☒ **STRUCTURE:** Integrated Application Layers
- ☒ **MOAT:** Evidence Ledger (System of Record)
- ☒ **PERCEPTION:** Non-Linear Valuation Growth
- ☒ **STATUS:** Production-Proven (Antifragile)

Goal: Establish a Sole-Source Capability for Federal/Municipal Authorities.

The Four-Zone Operating Model

Governance, Data Sovereignty & The Separation of Powers

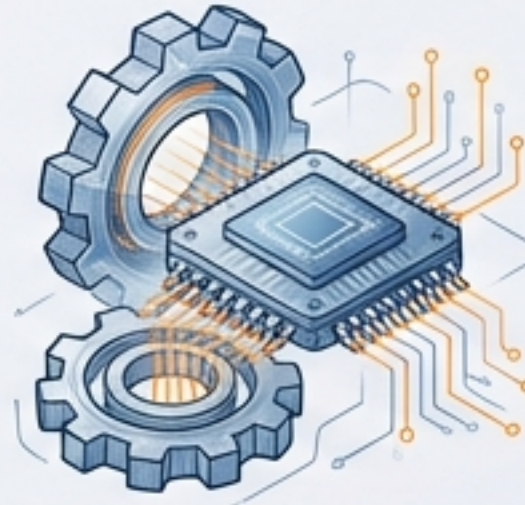

ZONE 1: RESILIENT REACH

IP Holding & Chimera.
Establishes core proprietary
data backbone and
sovereignty.

ZONE 2: FOUNDATION

Academic Consortium
(MIT, Stanford, ASU).
The "Living Learning Lab"
for R&D.

ZONE 3: NOVATELabs.ai

Technical Engineering.
Implementation heart and
certification engine.

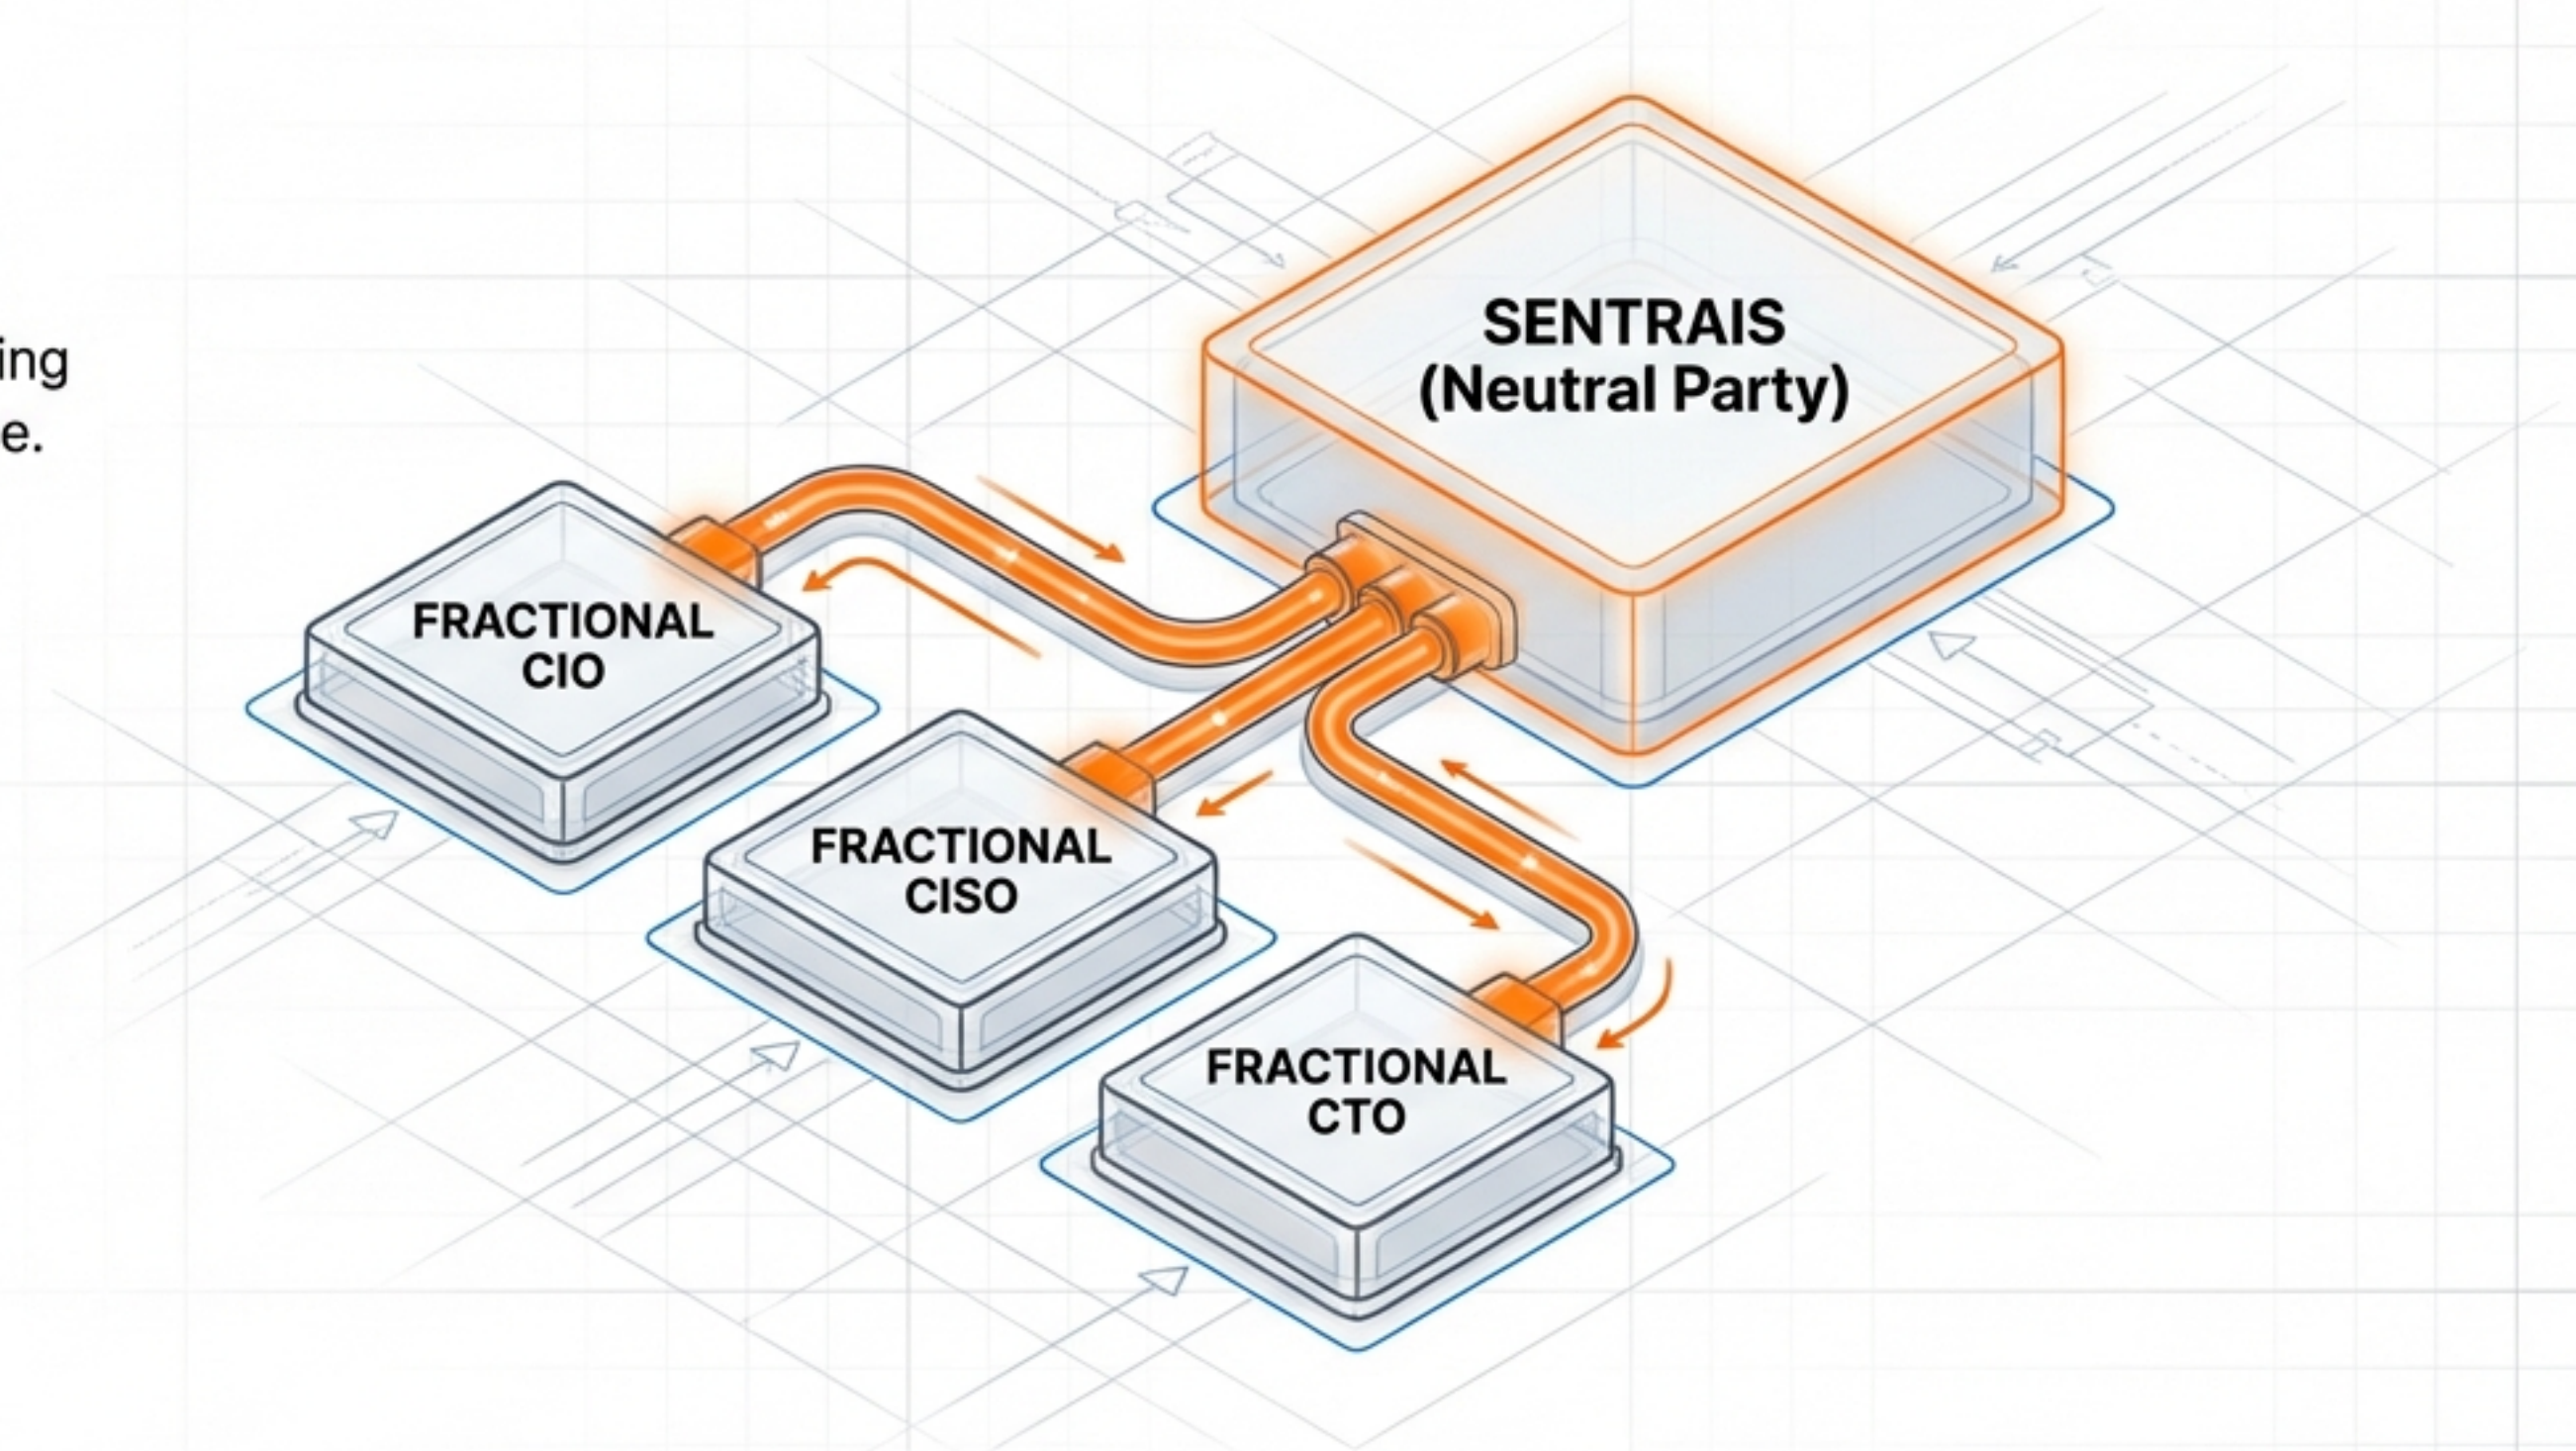

ZONE 4: SENTRAIS

Compliance & Licensing.
The "Simply Comply"
mandate.
Neutral party status.

ZONE 4 DEEP DIVE: THE "SIMPLY COMPLY" MANDATE

THE SERVICE MODEL

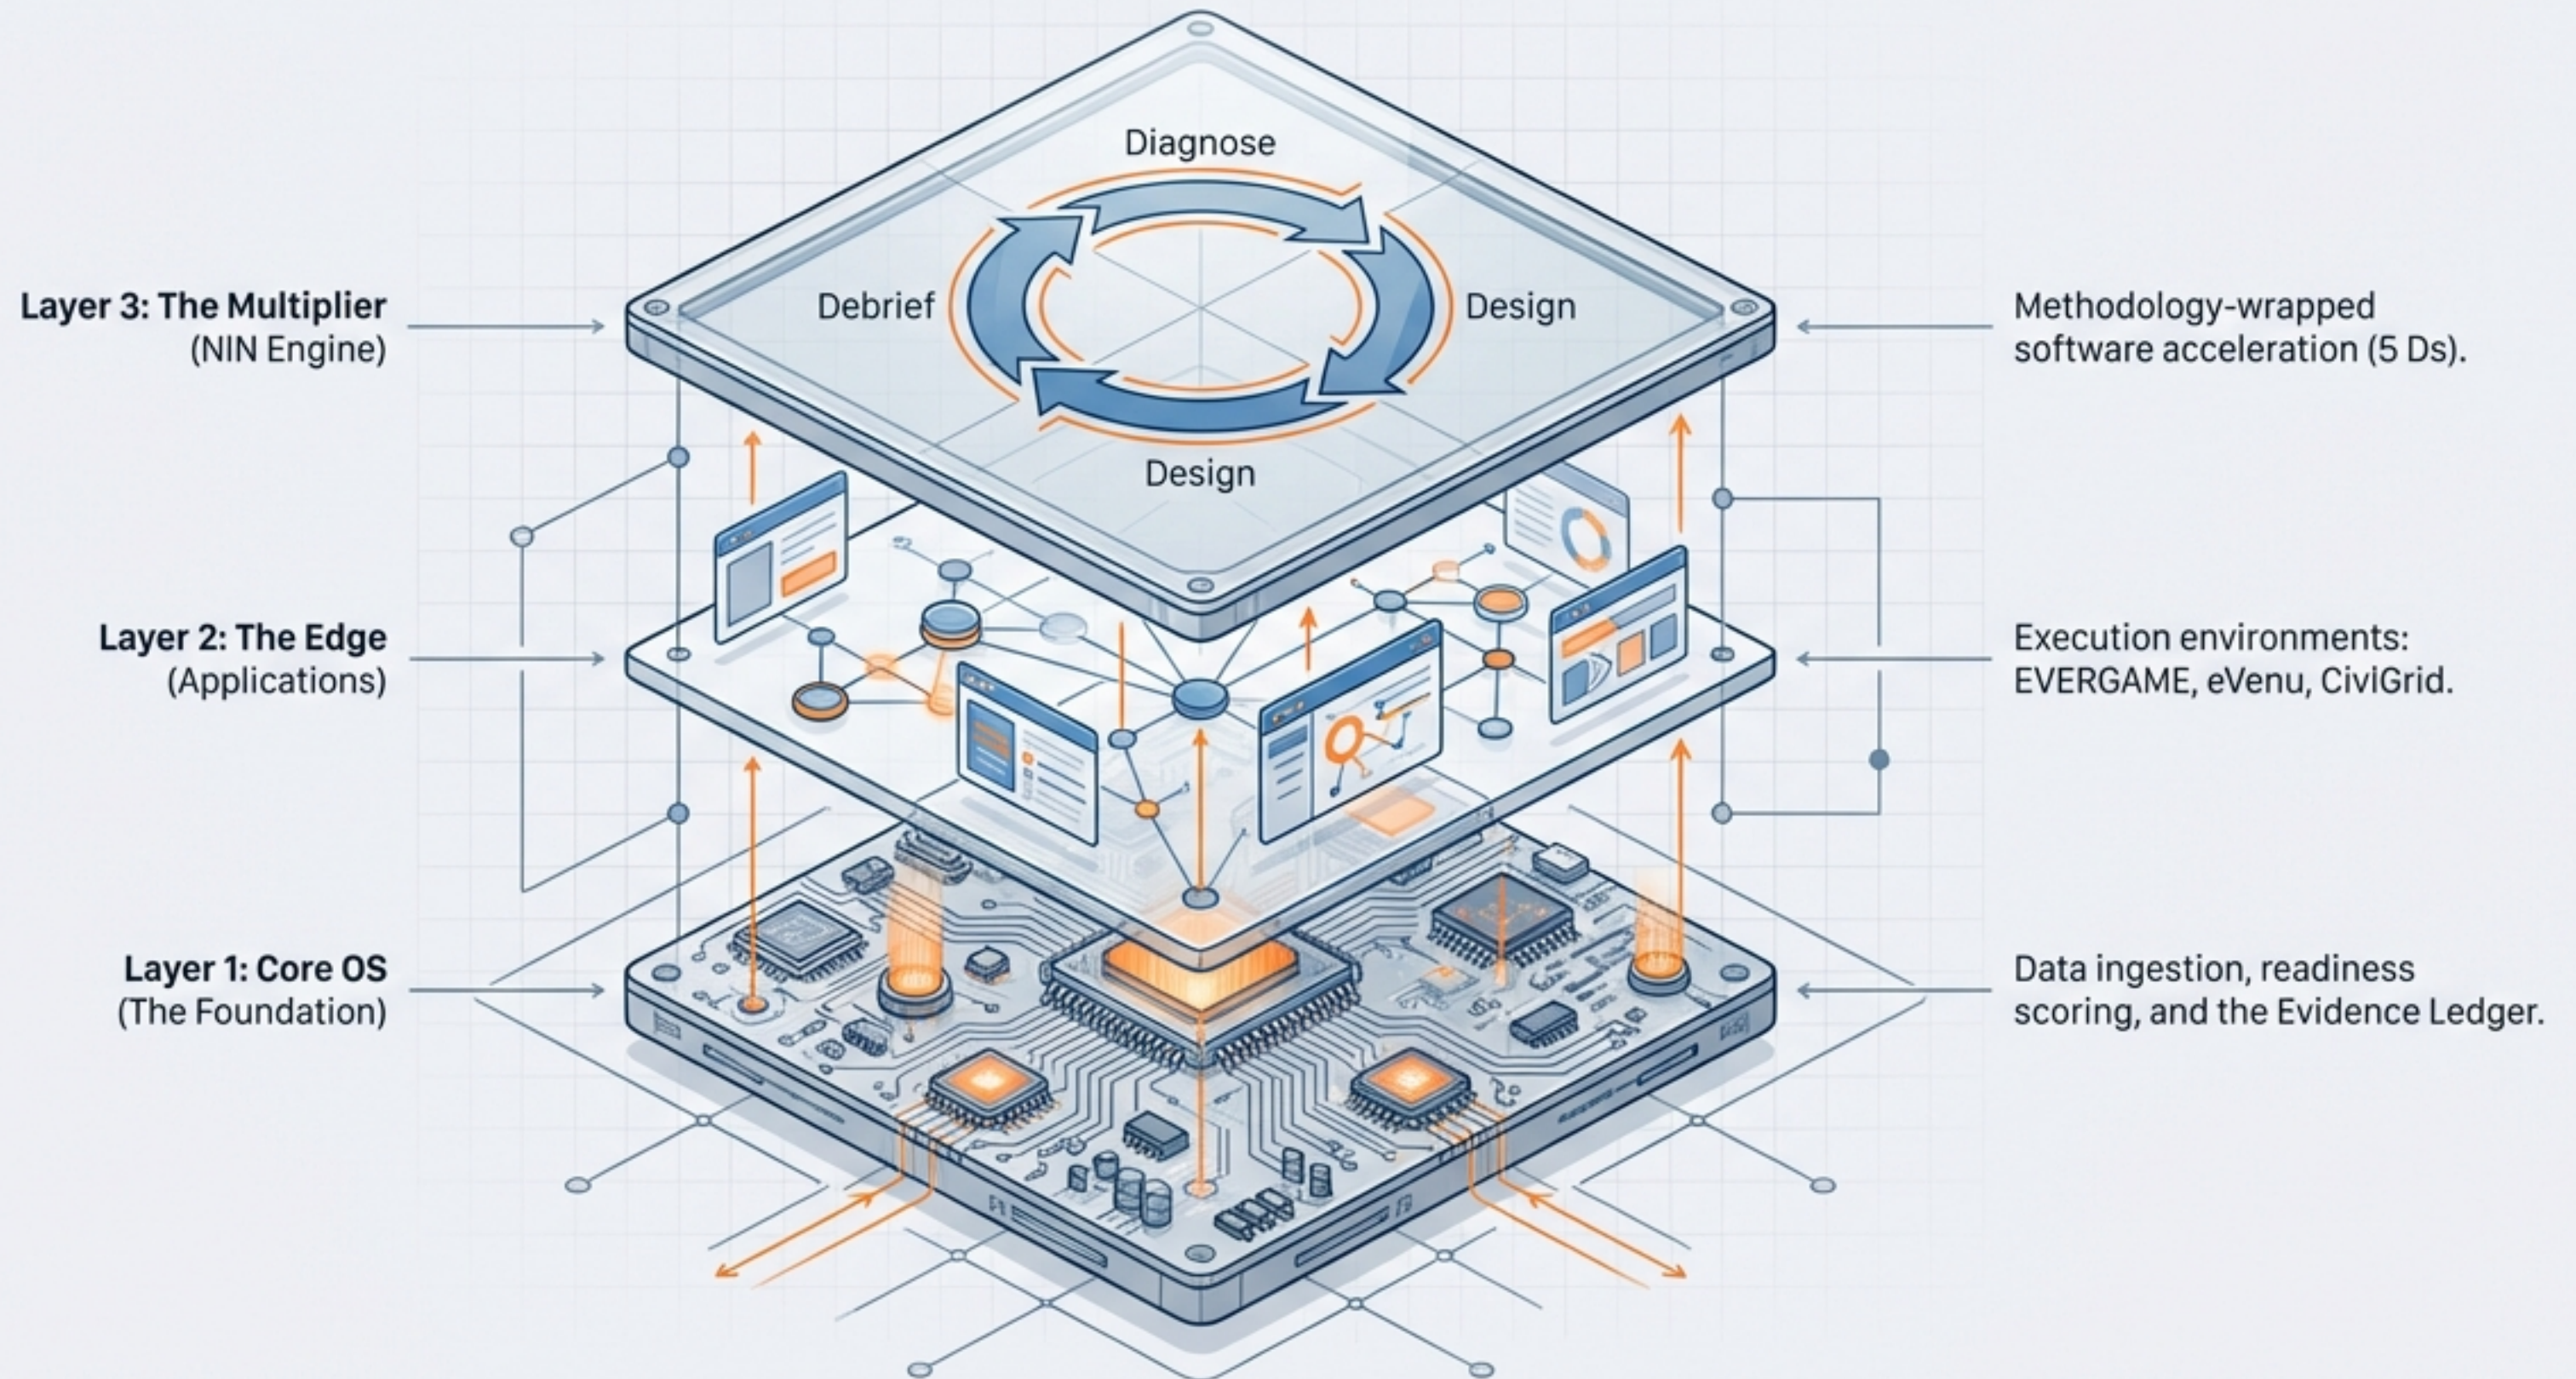

Productized, Monthly Recurring (MR) Compliance as a Service.

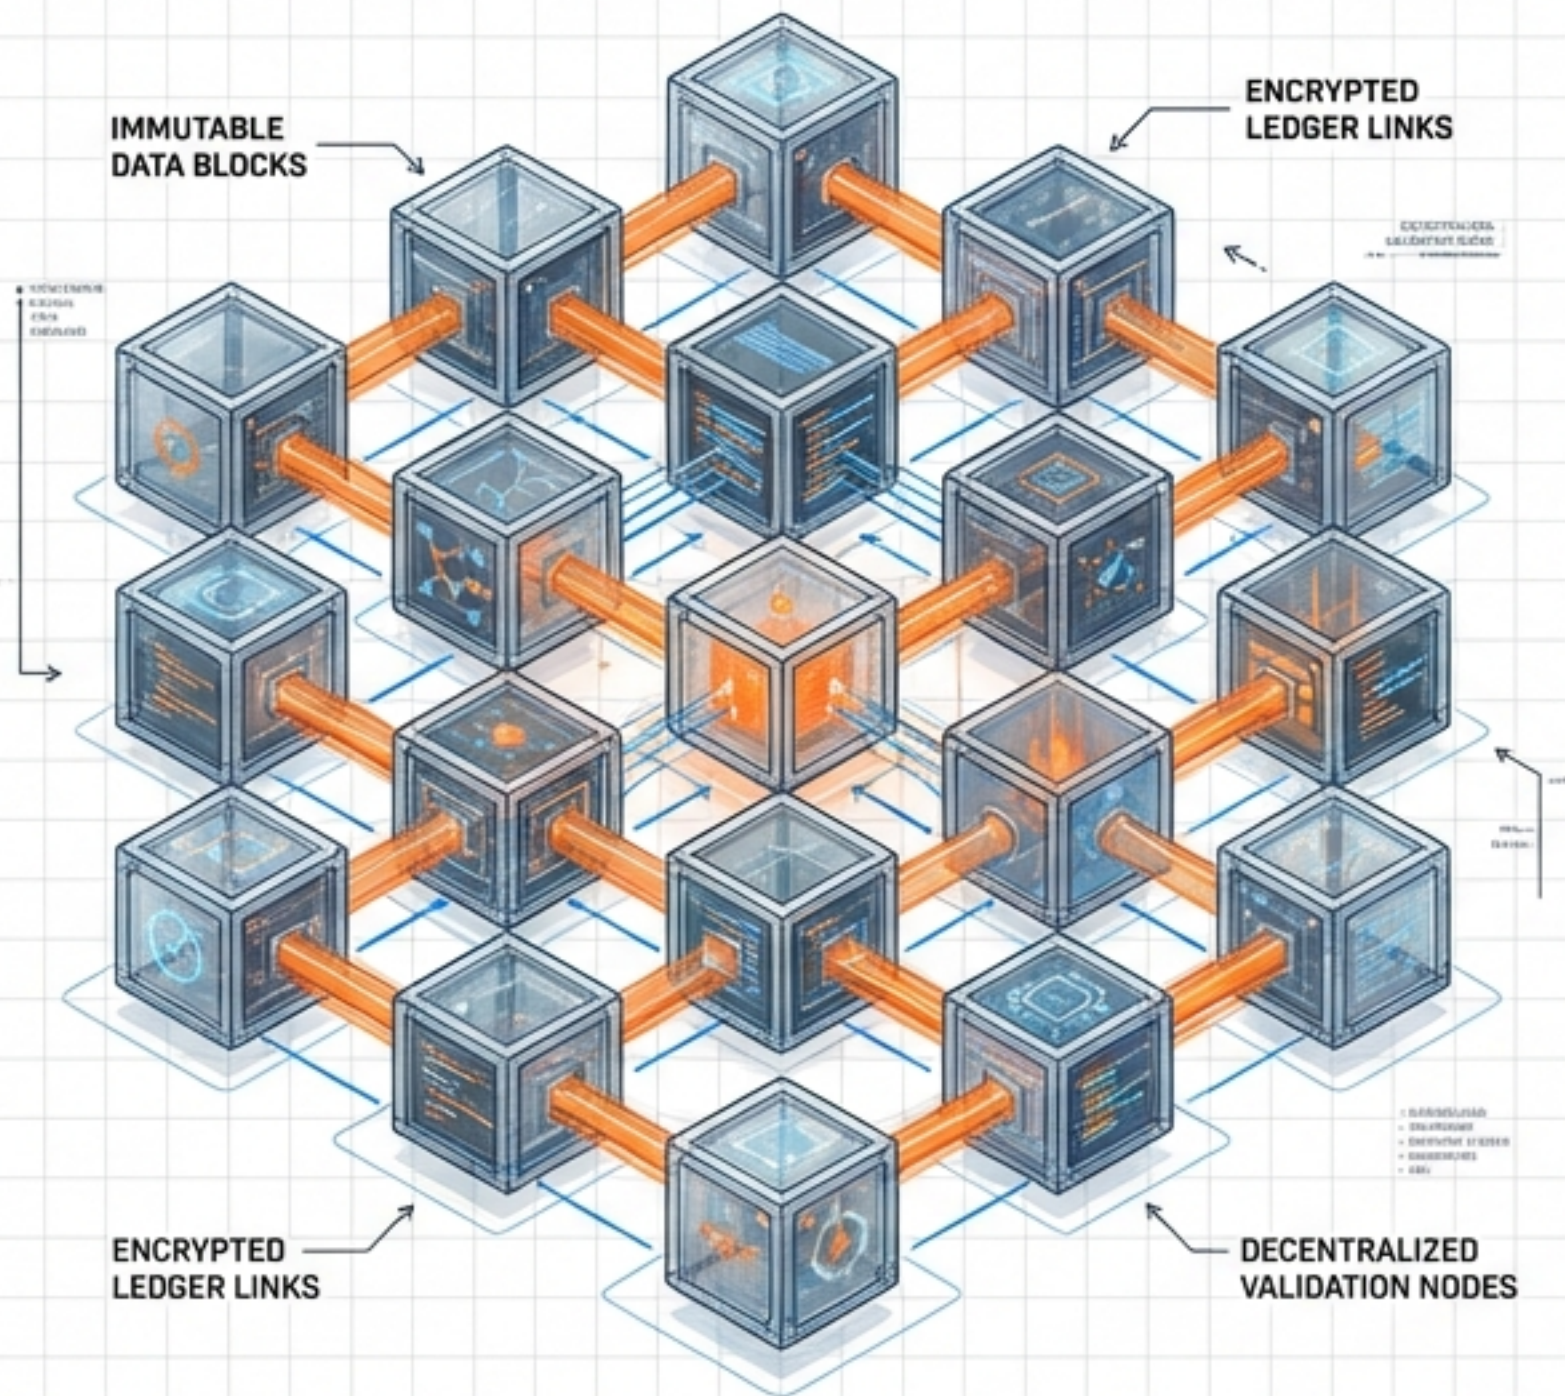

- 1. Neutral Party Status: Preserves certification authority within complex ecosystems (NFL/FIFA).
- 2. Liability Navigation: Removes administrative burden from clubs while delegating technical execution.
- 3. Standards: Ensures every deployment meets rigorous multi-agency SOC 2 standards.

THE CORE 3-LAYER ARCHITECTURE OF INEVITABILITY

Preventing displacement through deep infrastructure integration.

LAYER 1: THE EVIDENCE LEDGER & IMMUTABLE DATA FOUNDATION

HASH ALGORITHM: SHA-256 | CONSENSUS: PoS | BLOCK TIME: 2s

[1]

SYSTEM OF RECORD

An immutable audit trail for compliance, insurance, and Board Defense. Captures every decision. (Data Integrity: 100% Verifiable).

[2]

THE REGULATORY LOCK

Mandatory infrastructure for insurance reporting. Once installed, the OS becomes critical infrastructure.

[3]

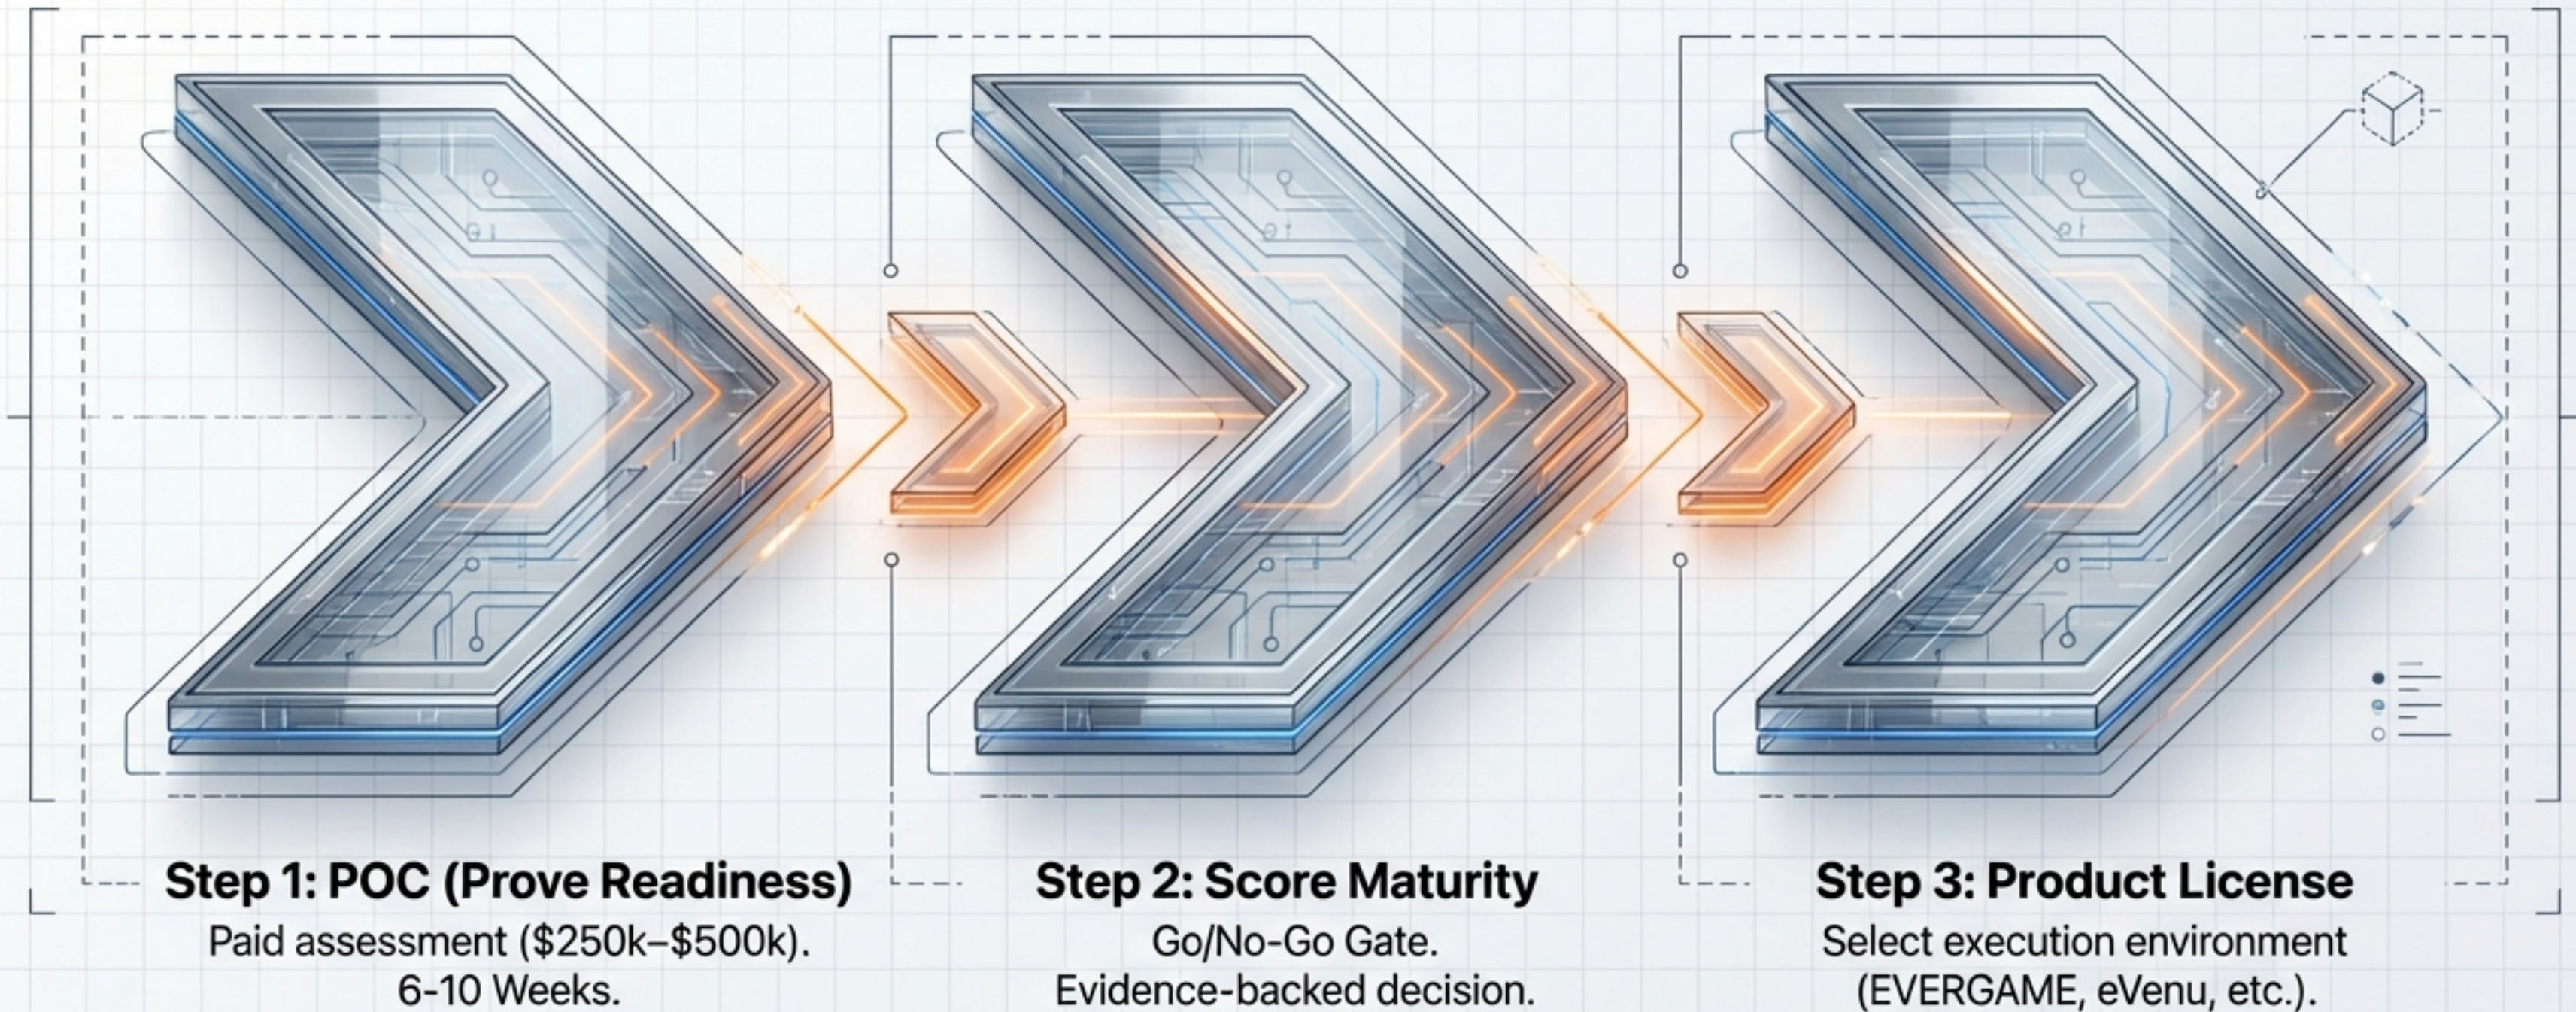

VALUATION IMPACT

Eliminates the 'Conglomerate Discount' by creating a non-linear valuation shift based on data asset accumulation.

Layer 2: The Commercial Wedge

We do not deploy tools into unproven environments. We prove maturity first.

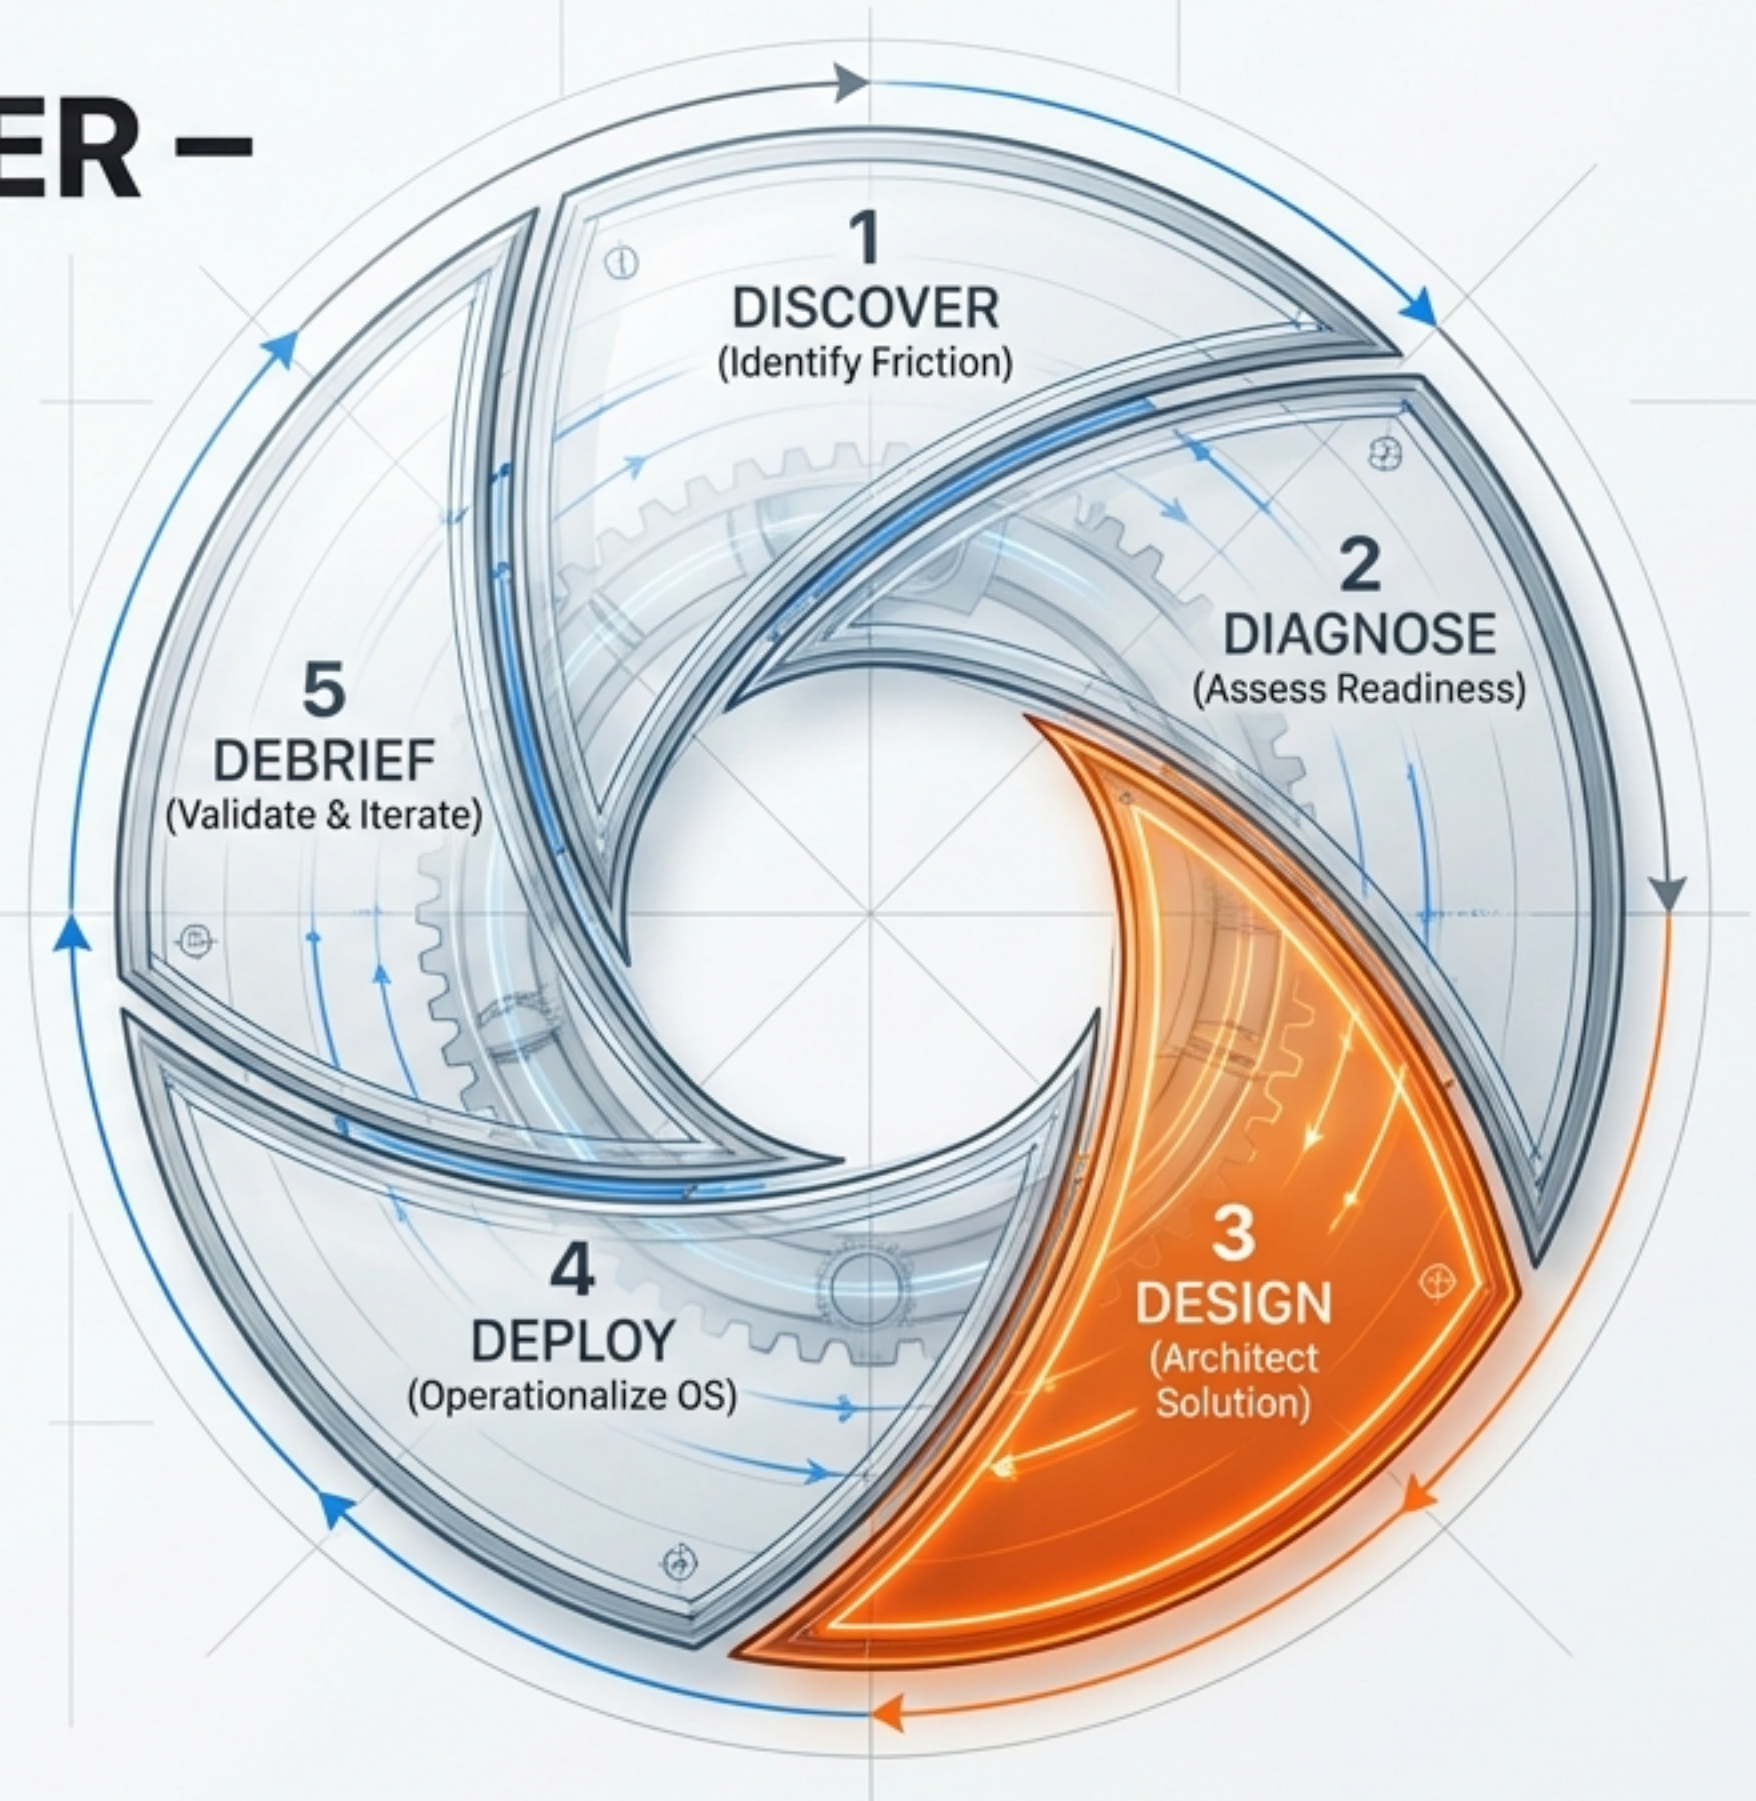

Context: Most organizations are not "Ready for Readiness." Blueprint360 aligns timelines, dependencies, and accountability **before** go-live.

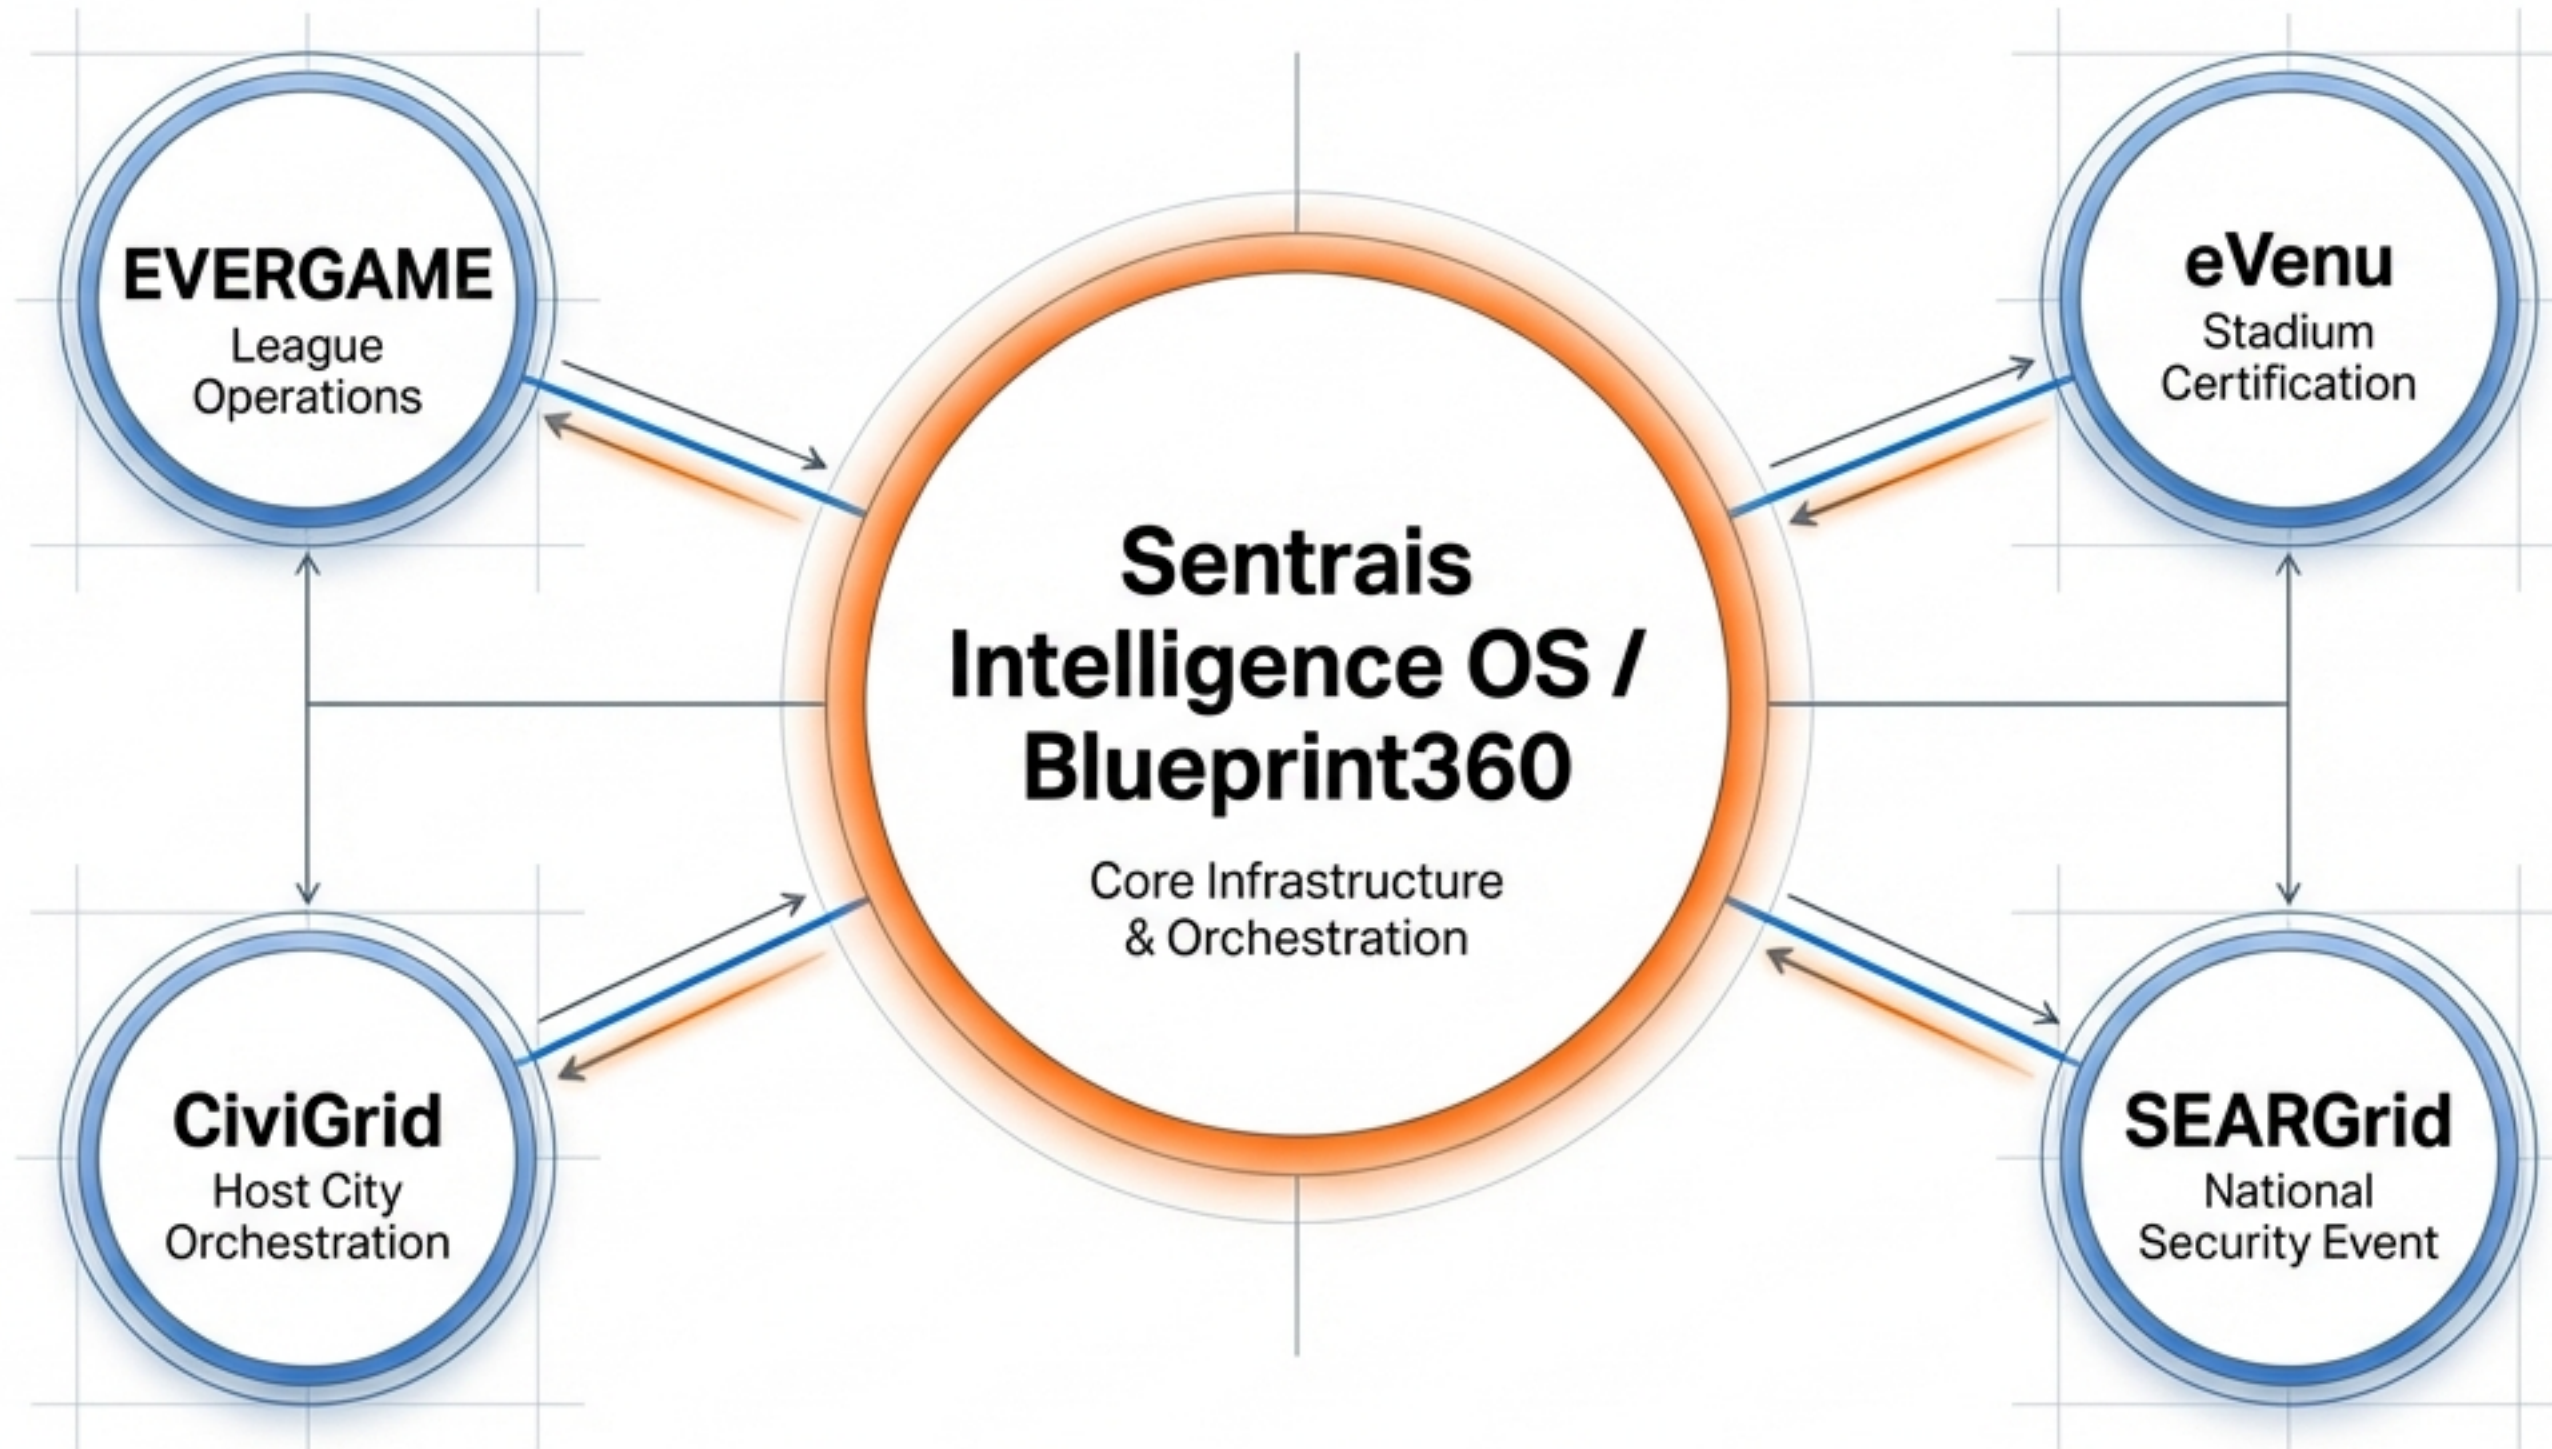

LAYER 3: THE MULTIPLIER – THE NIN ENGINE

SIPE (Sentrais Innovation Playbook Engine)
– Methodology-as-Software.

Software alone fails
without methodology.
The NIN Engine
ensures customer
success, moving clients
from concept to Series
A/Operation.

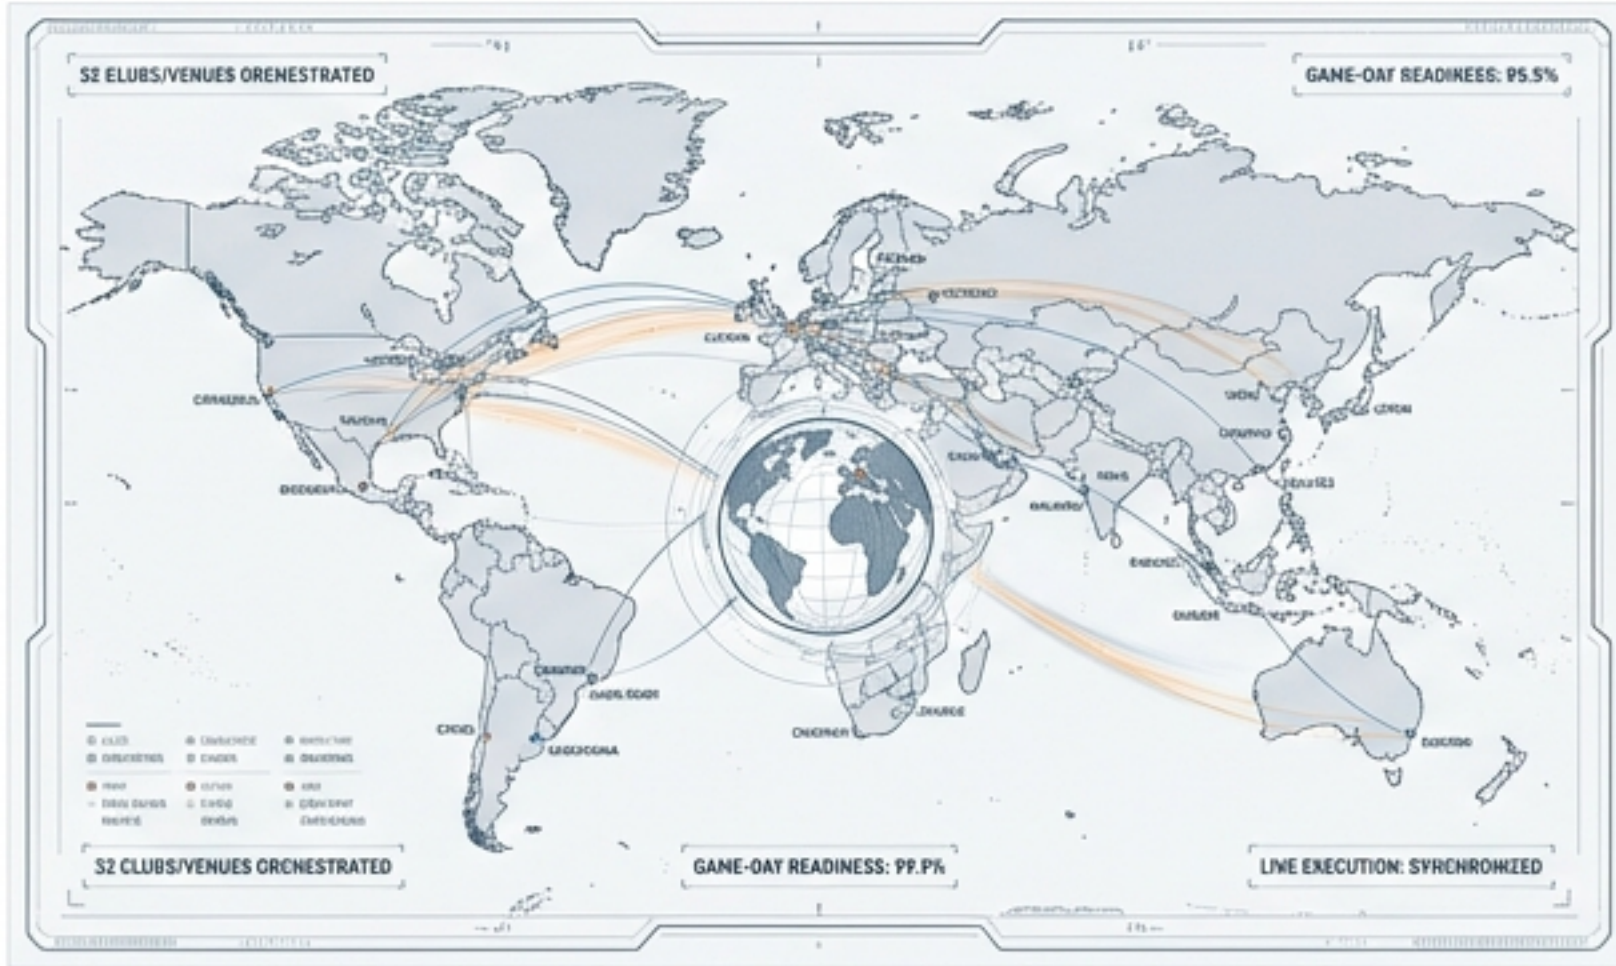

The Product Ecosystem: Hierarchy of Value

All products embed the Sentrai OS and Blueprint360. They are not sold separately; they are execution environments for the OS.

League & Venue Solutions: EVERGAME & eVenue

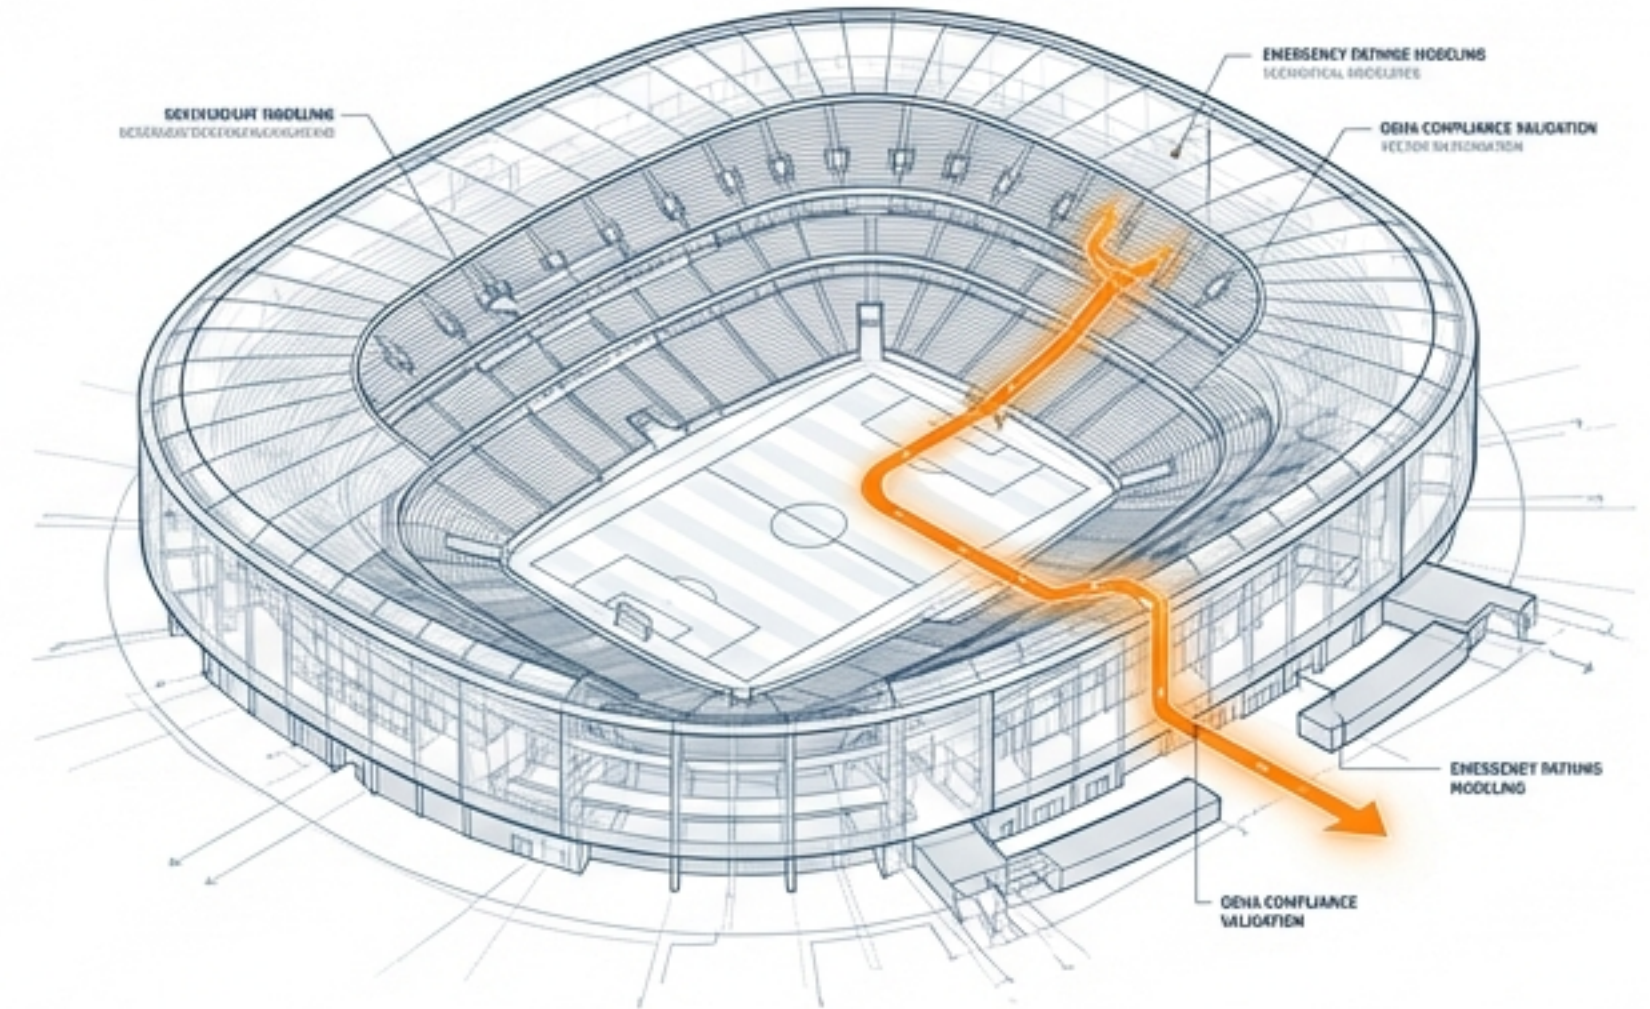

EVERGAME

Value: Single operational truth across 32 clubs. Game-day readiness.

Pricing: Platform License \$750k–\$1.5M per season.

eVenue

Value: Venue 360 – Modeling evacuation flows and OSHA compliance virtually.

Pricing: \$150k–\$350k per venue annually.

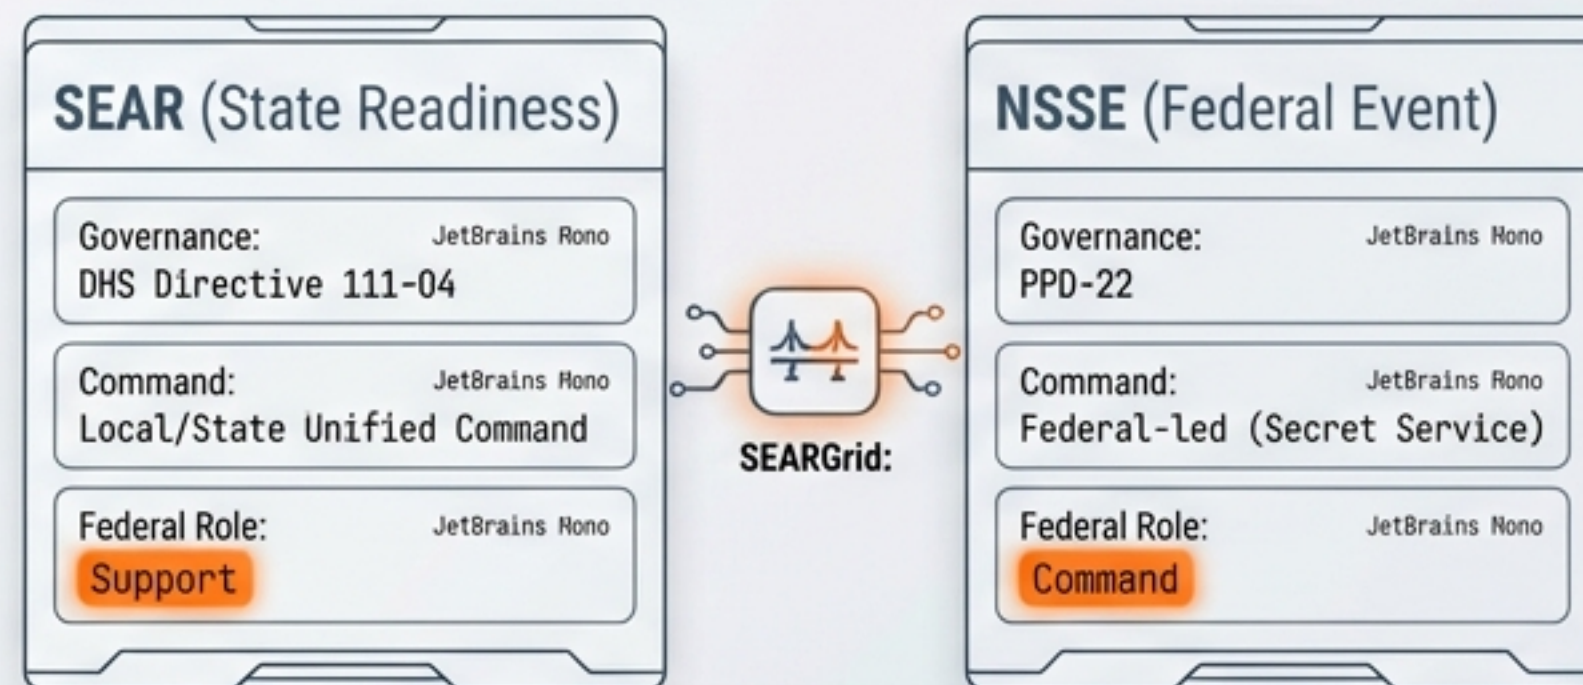

Civil & Federal Solutions: CiviGrid & SEARGrid

CiviGrid

Target: Mayors, Emergency Management.
Unified operational picture for the Host City.

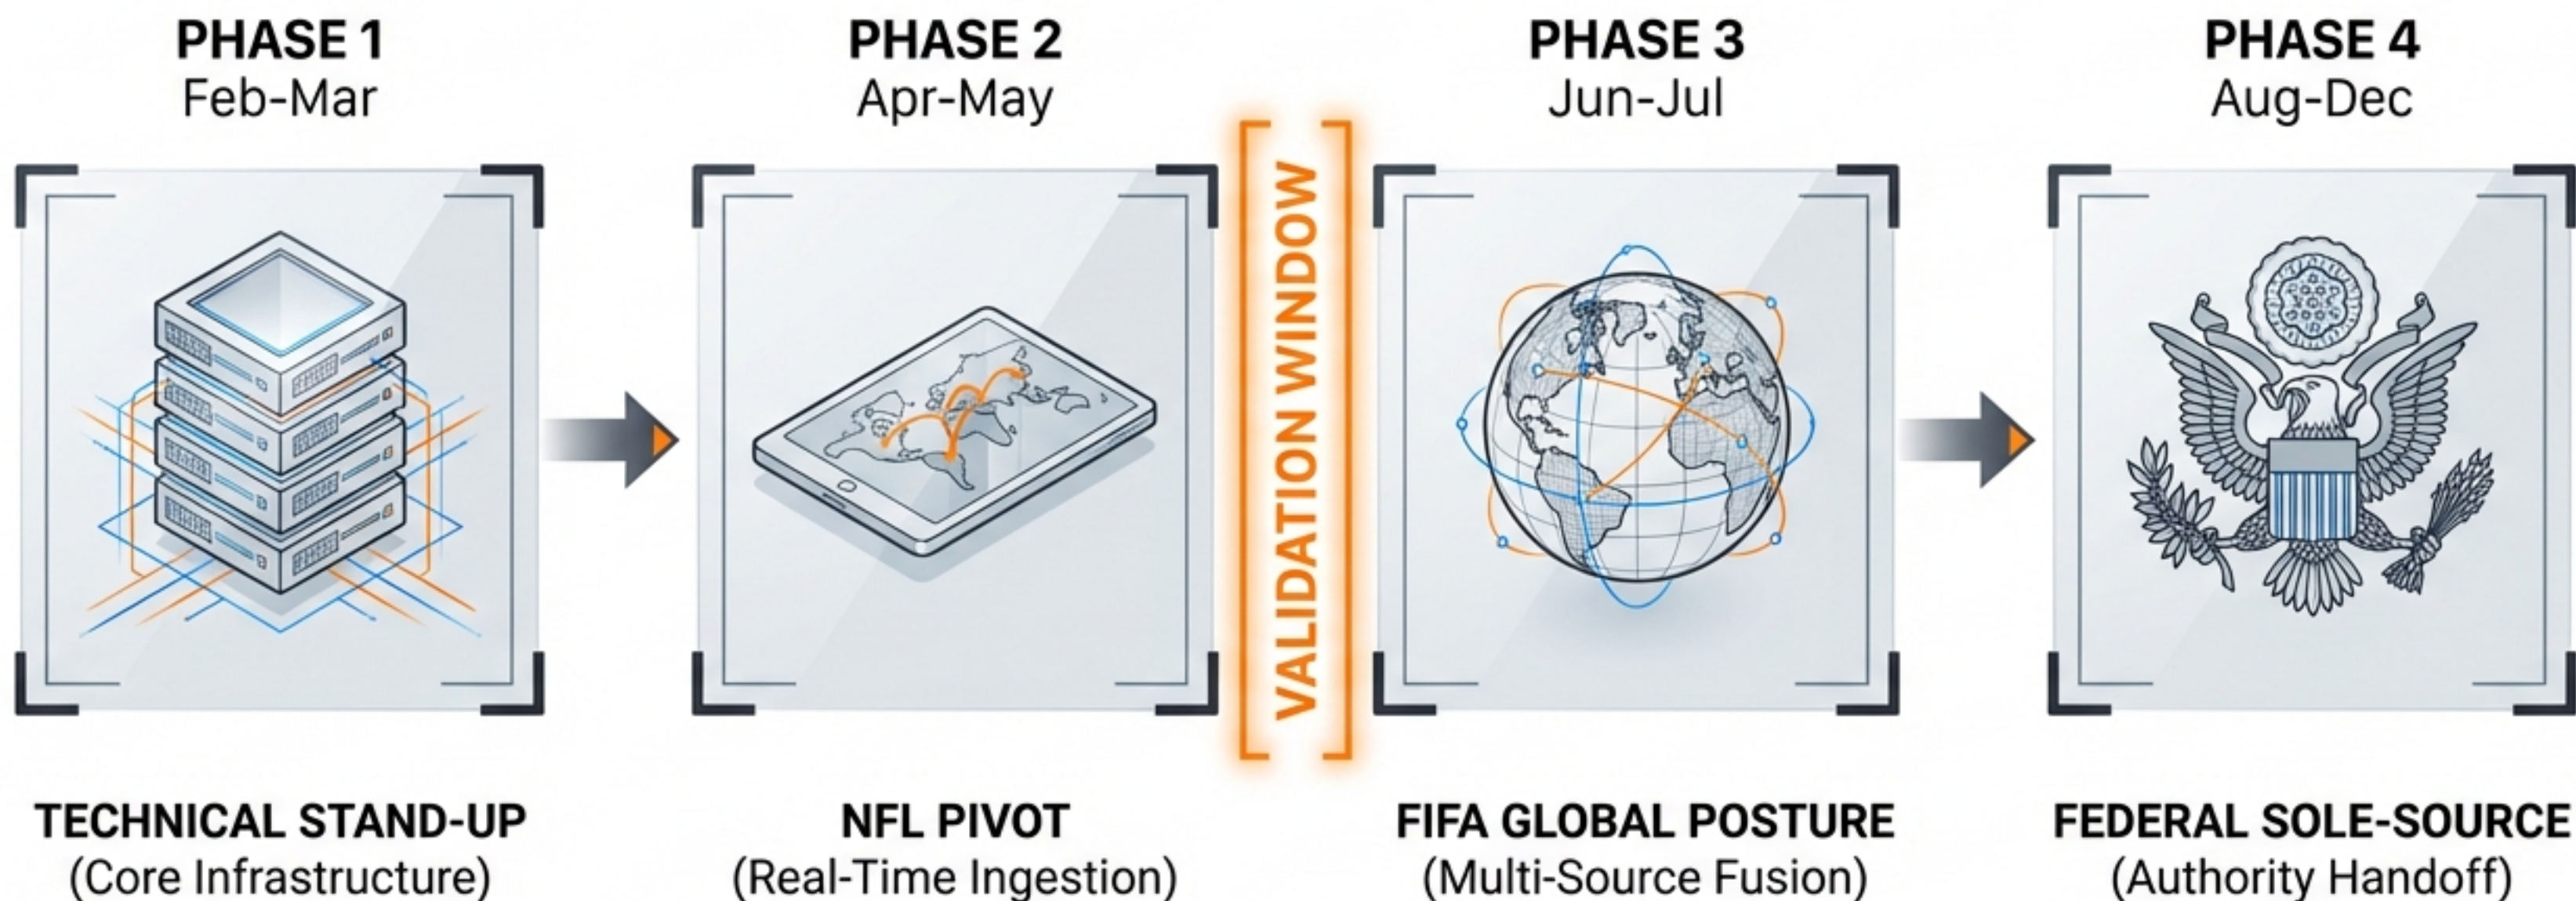

SEARGrid

The Seam of Responsibility: Bridges the gap
between local police and Secret Service.

THE 2026 VALIDATION WINDOW: LIVE LABS

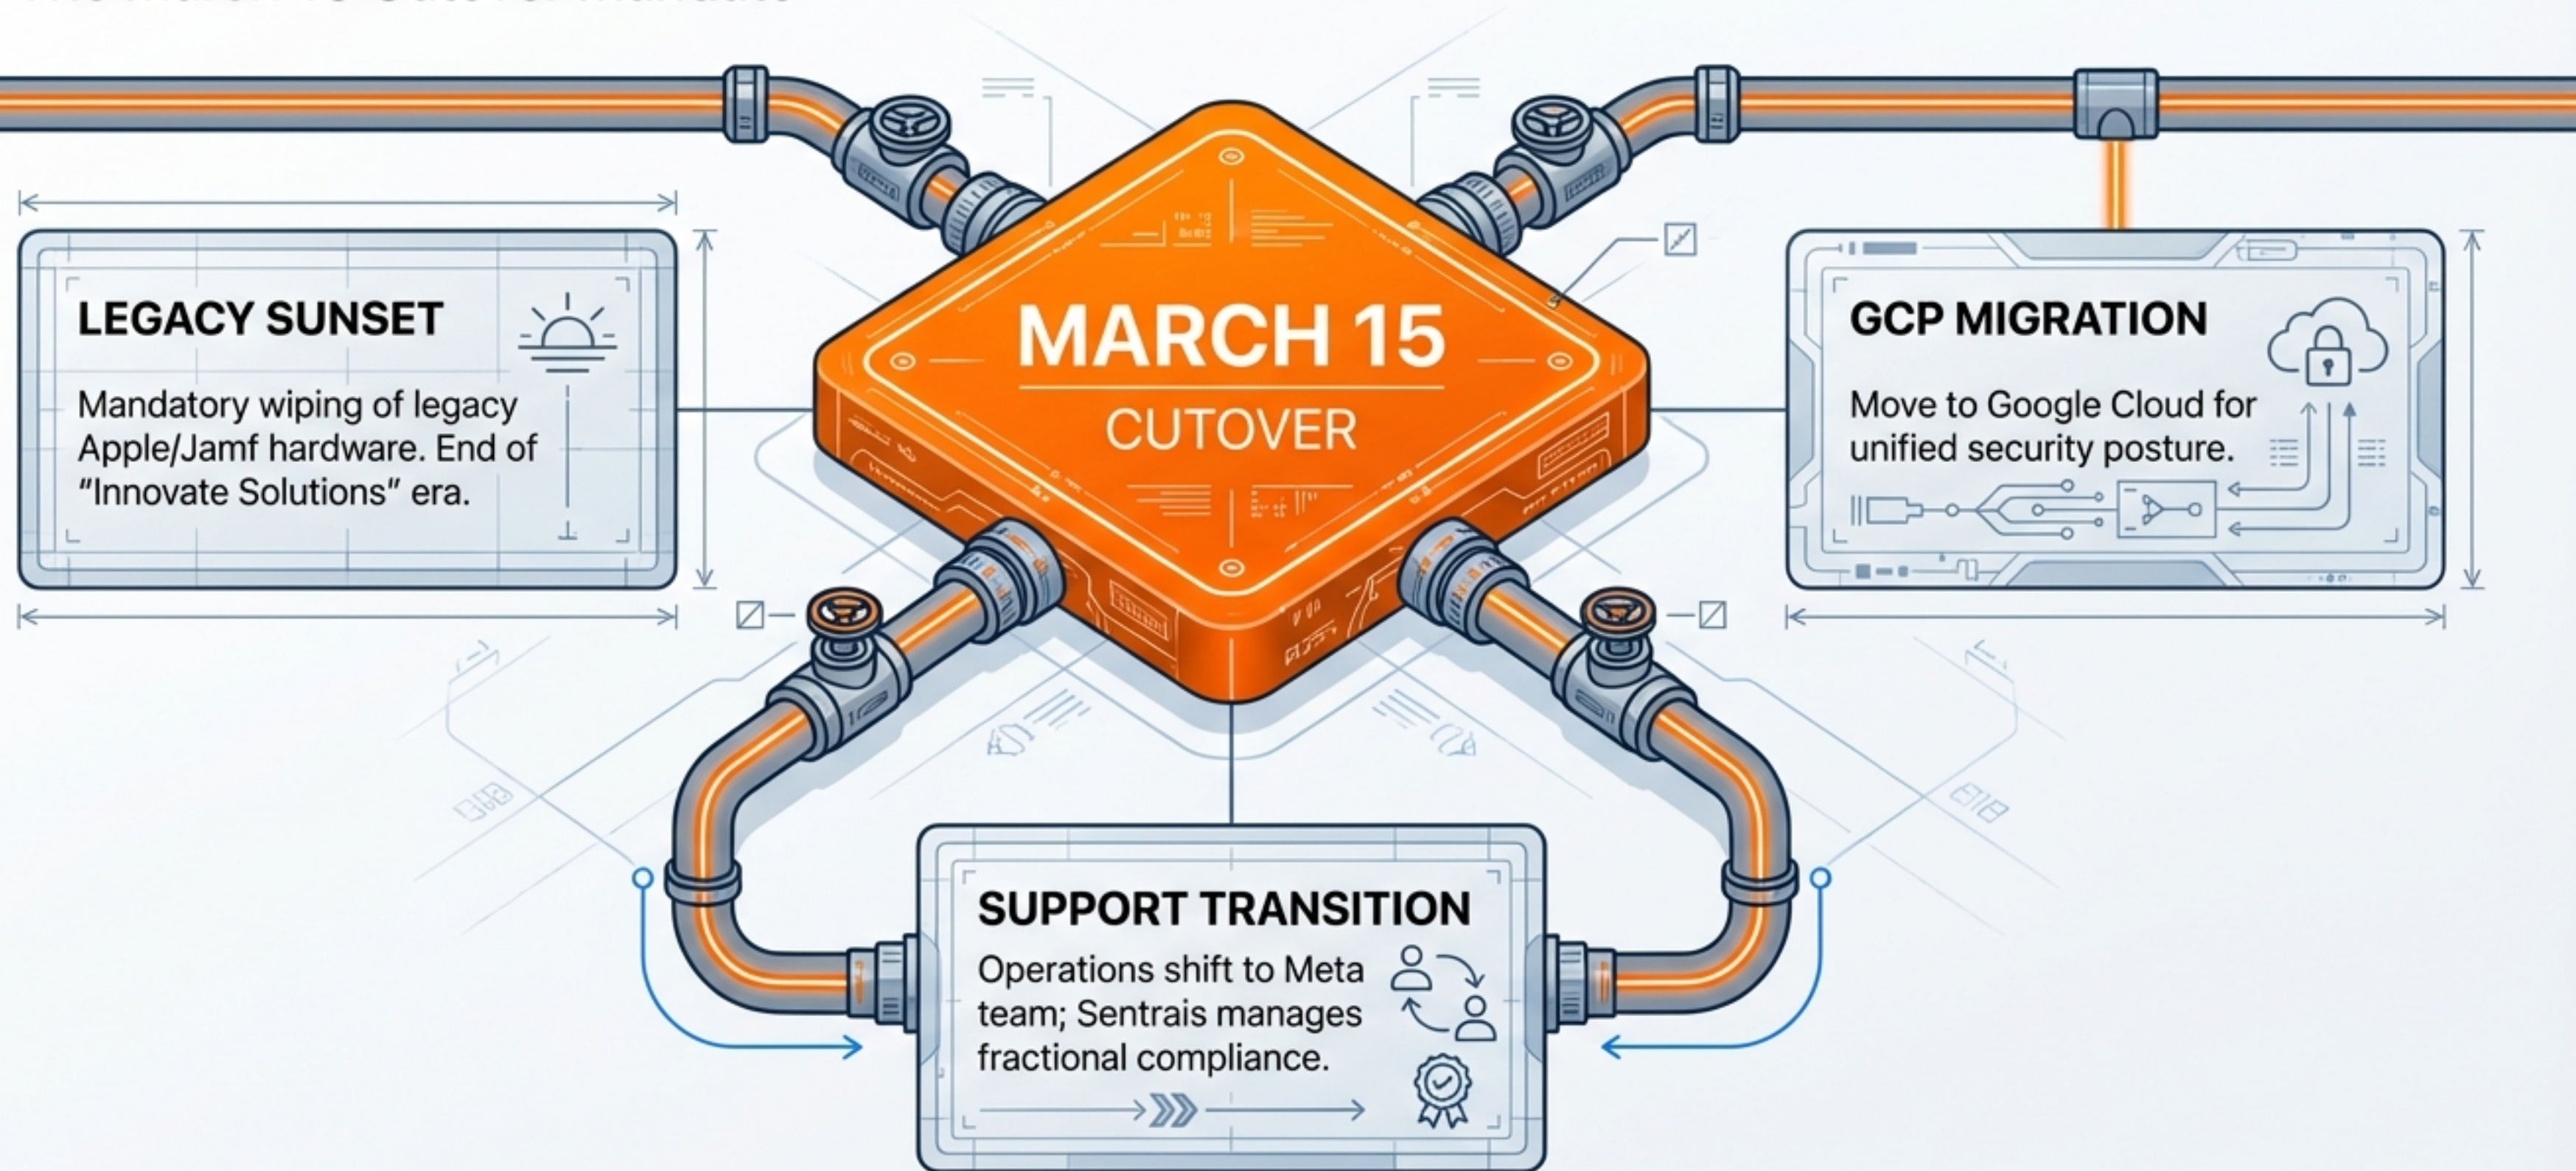

The Validation Window

Goal: Prove Virtual Private Cloud (VPC) model can ingest high-velocity data at international scale to secure Sole-Source Capability.

Phase I: Technical Stand-Up & The March 15 Cutover

The March 15 Cutover Mandate

Security Mandate: Mandatory Endpoint protection & VPNs active.

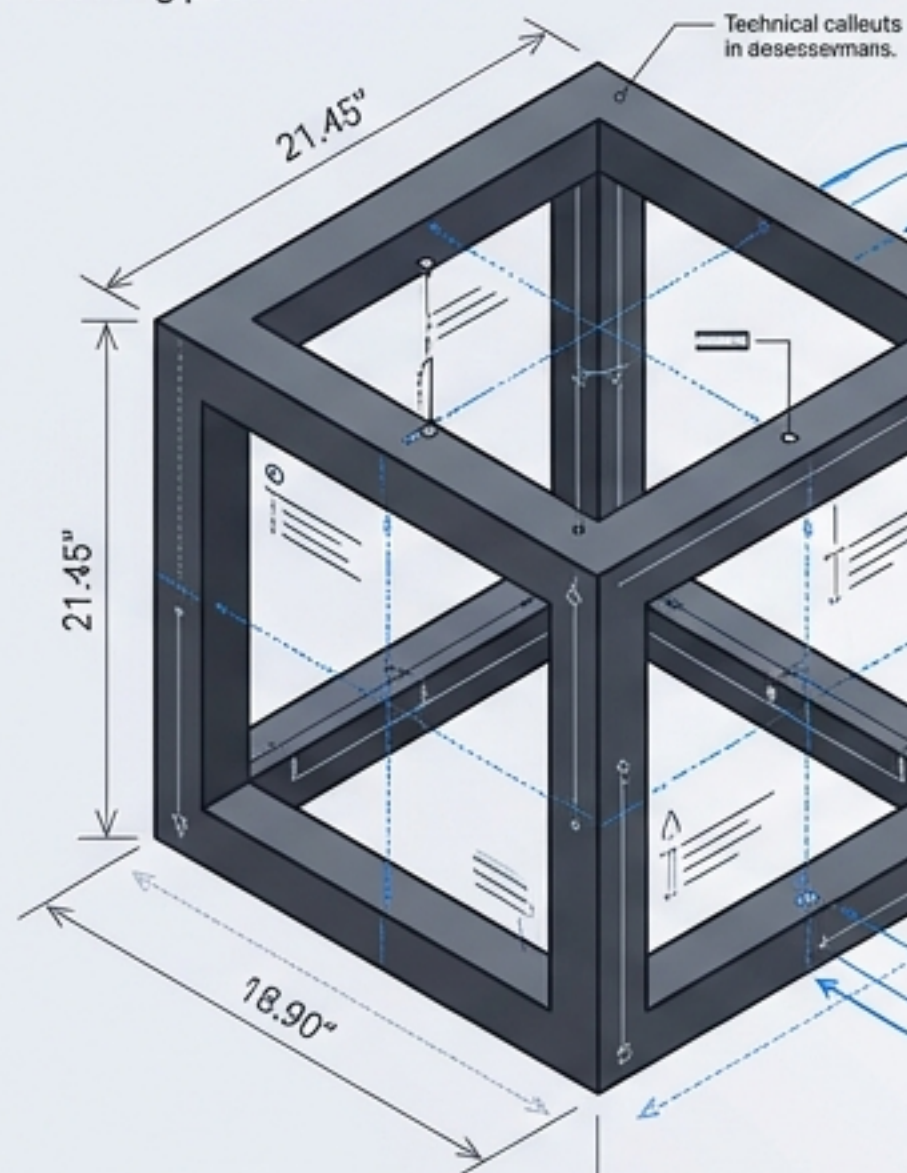

Global Scale: From NFL Signal Data to FIFA Federal Validation

THE UN-KILLABLE MOAT: FROM ASSESSMENT TO DOMINANCE

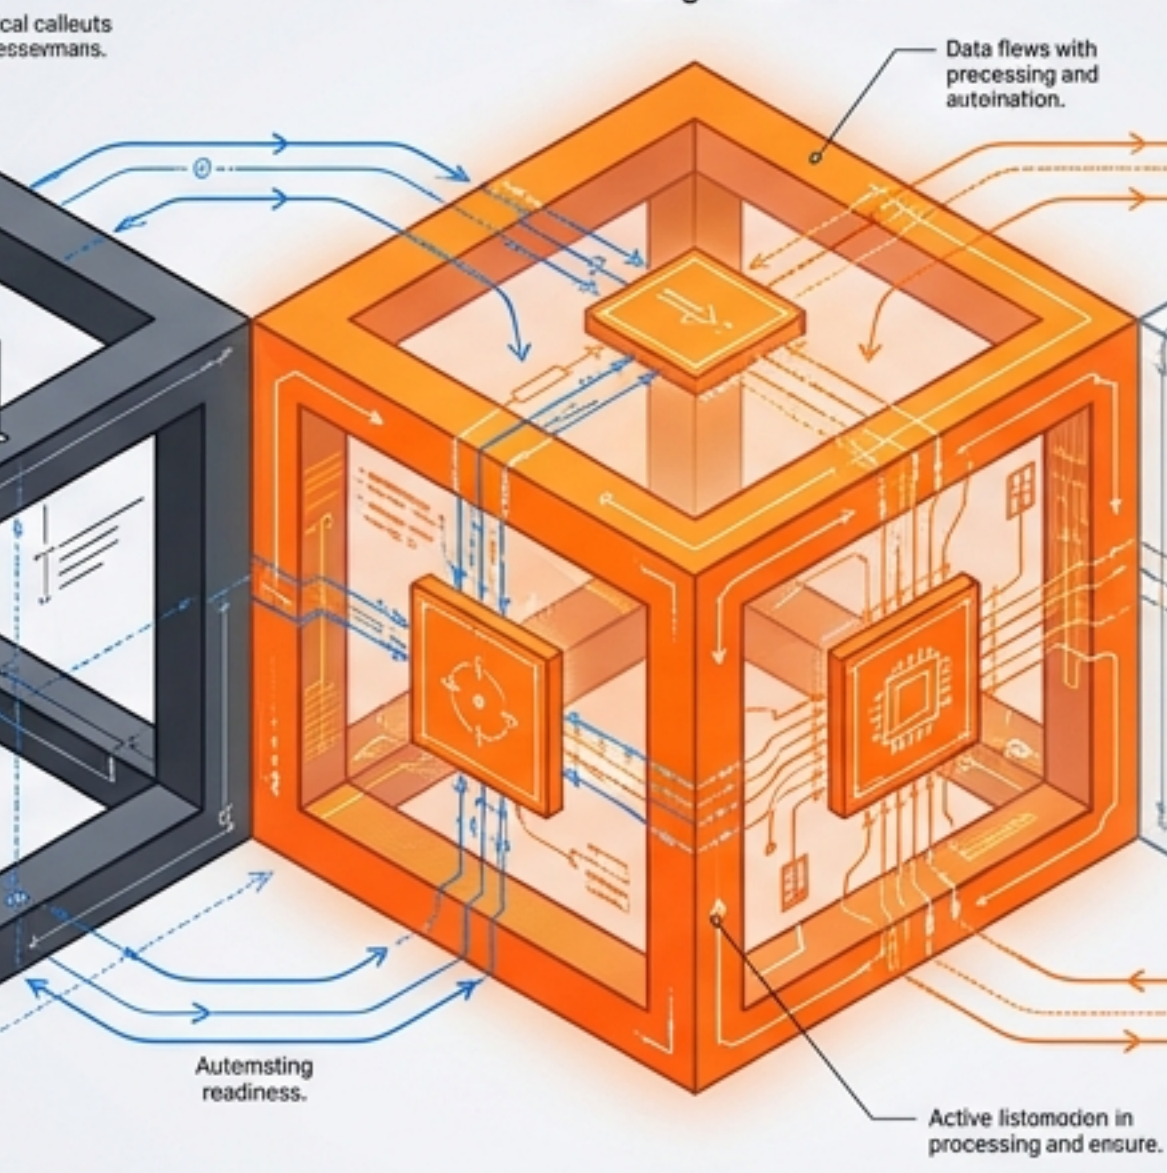

SEE (THE BLUEPRINT)

Assessing posture.

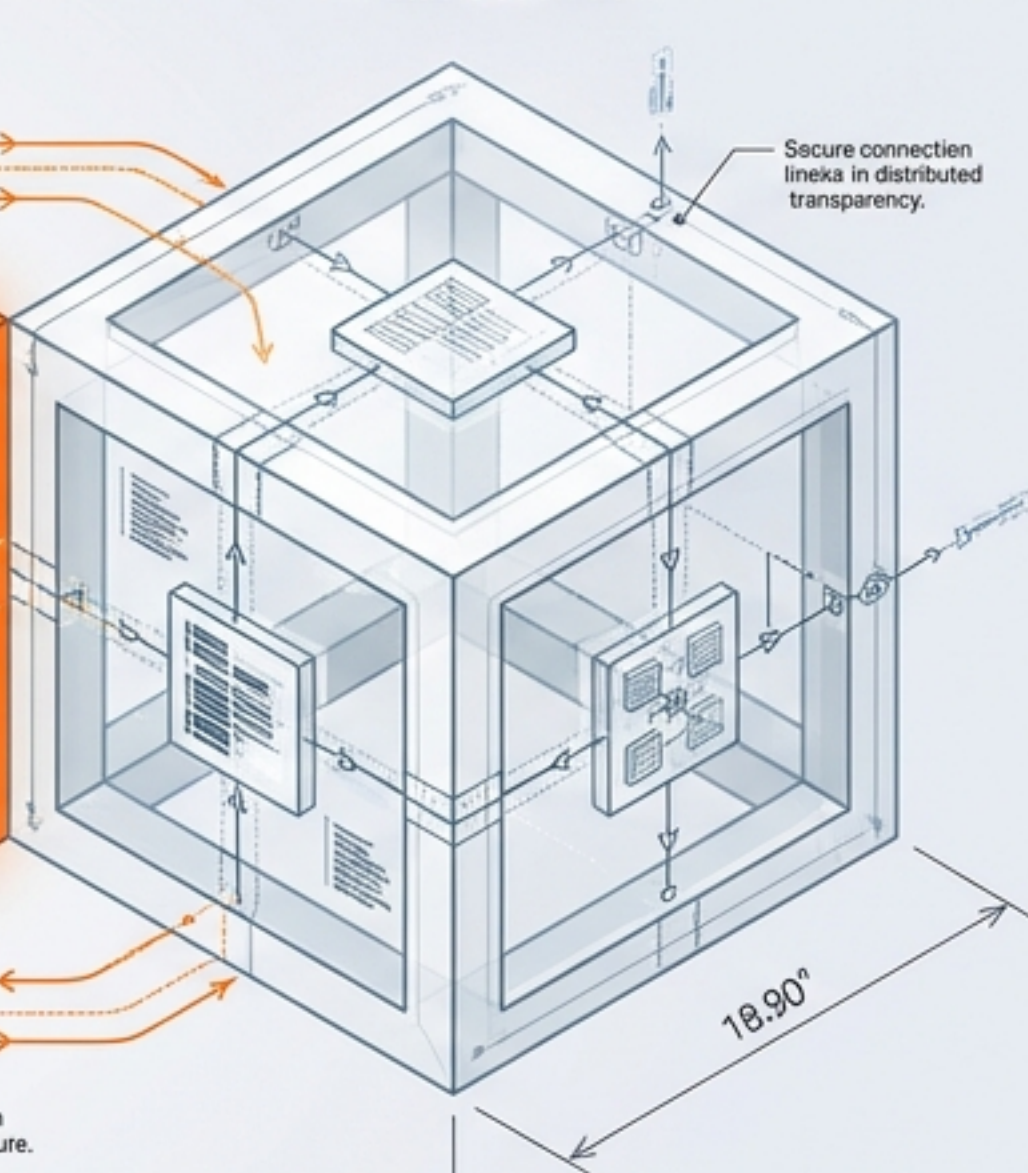

SEAR (THE ENGINE)

Automating readiness.

SOLV (THE LEDGER)

Immutable audit trail.

51.72"

THE 2026 WINDOW IS CLOSING. ASSESSING POSTURE IS THE FIRST STEP TO DOMINANCE.
