

NFL_IP Protection STRATEGIC INFRASTRUCTURE - & IP Protection Framework

CHIMERA Architecture | Three-Project Delivery | Annual Certification Model

EXECUTIVE SUMMARY

3

Strategic Projects

Unified delivery framework

4

CHIMERA Zones

IP protection architecture

Project 1 commitment

STRATEGIC OBJECTIVES

- ▶ Protect NOVATE/Sentra's intellectual property through black-box SaaS delivery model
- ▶ Establish annual certification dependency for sustainable recurring revenue
- ▶ Deliver NFL innovation capability while retaining orchestration intelligence
- ▶ Create clear IP boundaries between NFL operational data and NOVATE algorithms

THREE-PROJECT DELIVERY STRUCTURE

0 1 GDA Certification & Dashboard

EVERGAME360

Delivery: Sentrais Inc

Zone 4 - Commercial

SCOPE

- IT GameDay readiness
- Executive dashboard
- Certification engine
- Evidence ledger

0 2 Innovation HUB Dashboard

Portfolio & Simulator

Delivery: NOVATELabs

Zone 3 - Development

SCOPE

- Innovation portfolio
- Vendor-neutral harness
- Certification program
- Cross-zone learning

Scoped separately

0 3 Innovation Hackathon System

NFLDraft Challenge 2026

Delivery: NOVATELabs

Zone 3 - Development

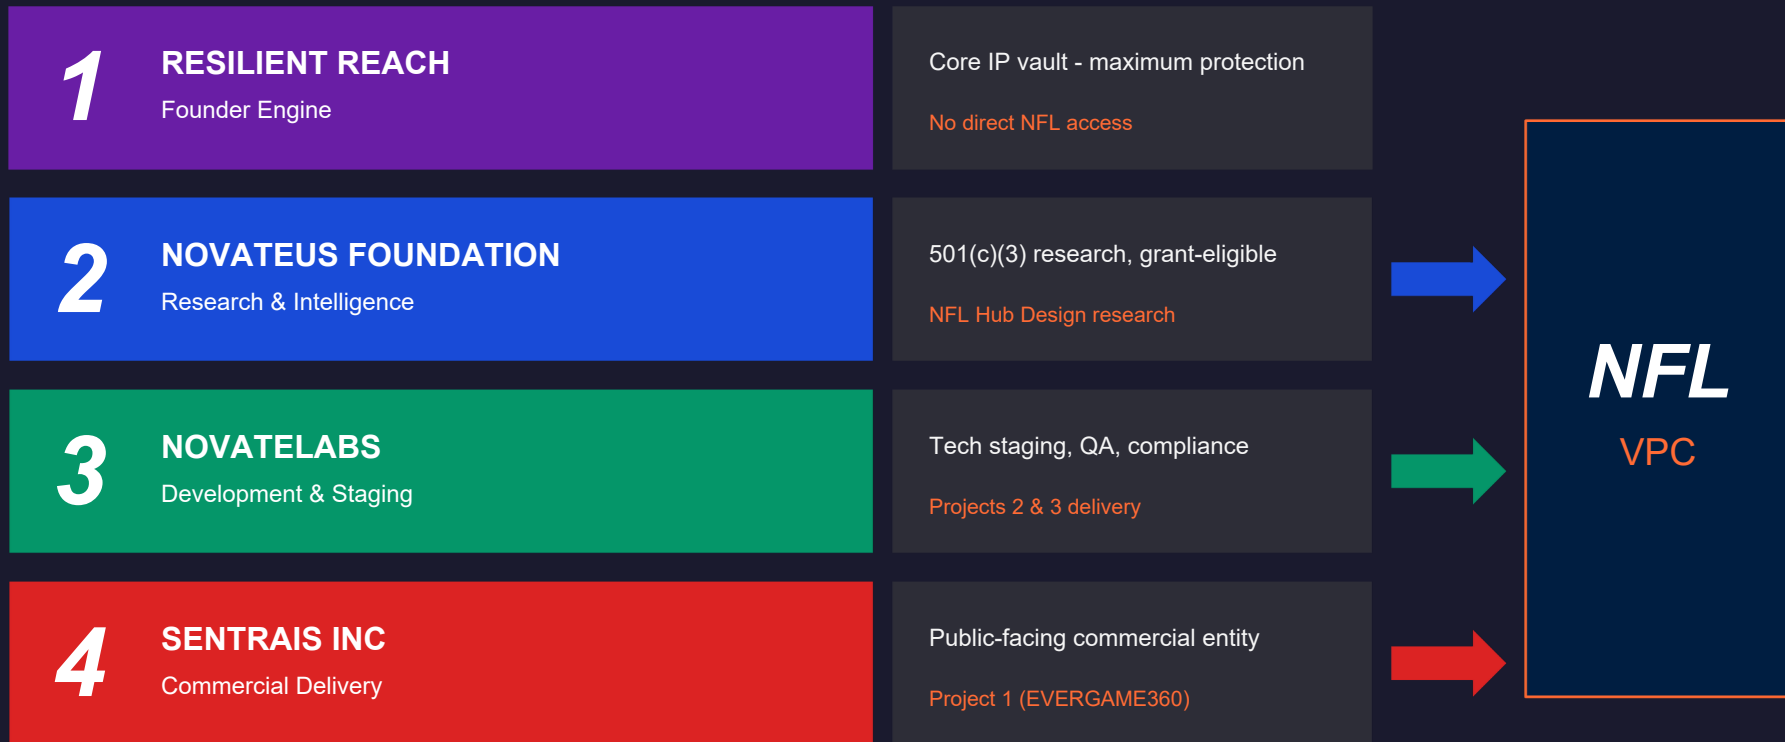

SCOPE

- Challenge intake
- Multi-stage orchestration
- Community portal
- Think Tank integration

Scoped separately

CHIMERA FOUR-ZONE ARCHITECTURE

Layered IP Protection & Delivery Model

Protection Level: Zone 1 = Maximum ← → Zone 4 = Client-Facing

IP PROTECTION BOUNDARIES

Black Box SaaS Model

NFL RECEIVES

- ✓ **API access to intelligence outputs**
Result only - no algorithms
- ✓ **Dashboard interfaces & reports**
Compiled, obfuscated delivery
- ✓ **Integration documentation**
API specs, webhook configs
- ✓ **Full ownership of operational data**
Game day events, personnel
- ✓ **Evidence ledger read access**
Audit trail for compliance

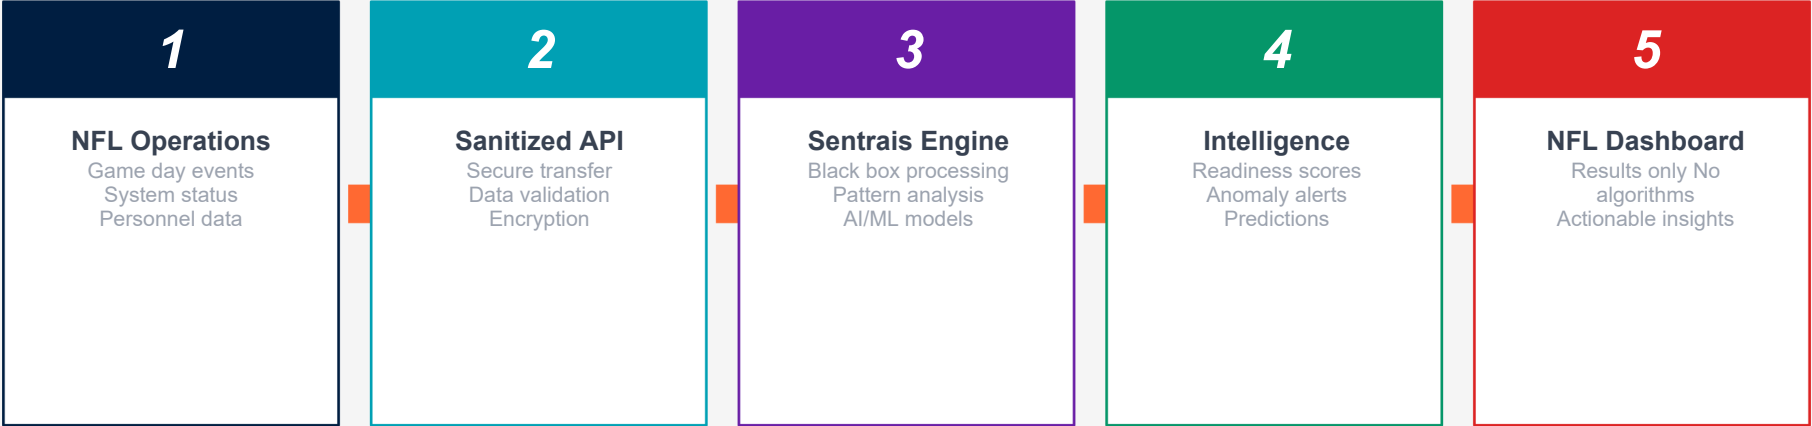

NOVATE/SENTRAIS RETAINS

- 🔒 **All source code & algorithms**
Zero NFL visibility
- 🔒 **AI/ML model weights**
Encrypted, NOVATE-managed keys
- 🔒 **NIN methodology & frameworks**
Proprietary process IP
- 🔒 **Sentrais Intelligence Engine**
Blackbox processing
- 🔒 **Evidence Chain technology**
Patent-protected authentication

KEY PRINCIPLE: NFL benefits from intelligence outputs without accessing underlying IP.

Compounding intelligence creates increasing value that cannot be replicated without NOVATE partnership.

NFL360 DATA FLOW ARCHITECTURE

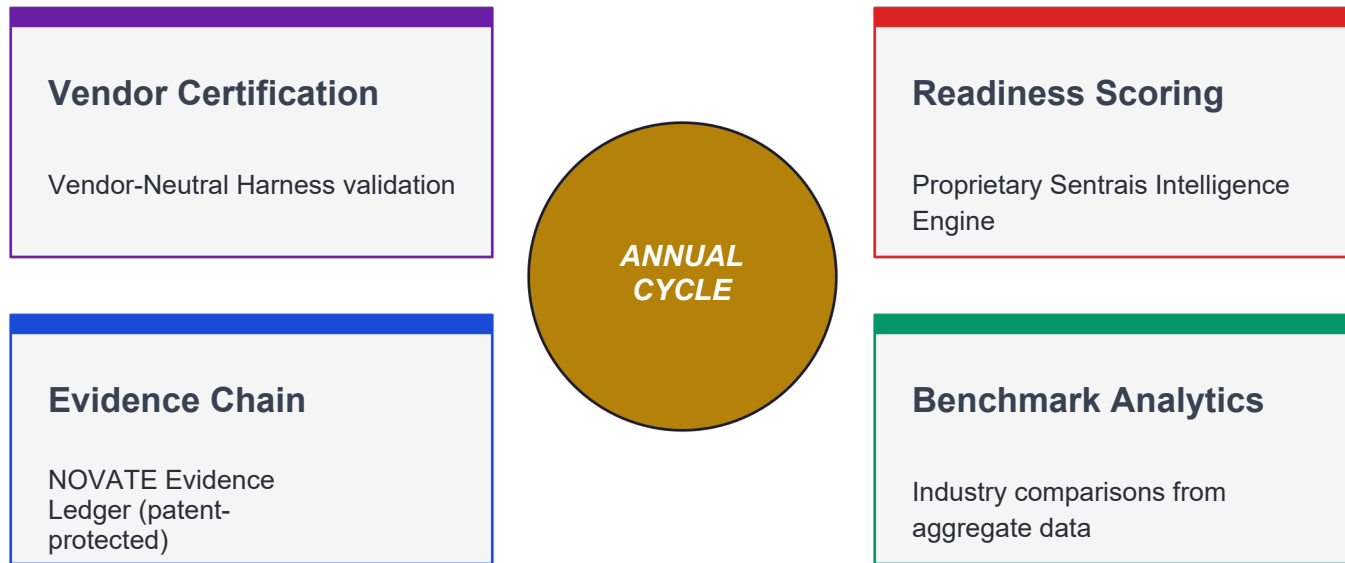

← Learning insights feed Zone 2 research for continuous improvement →

DATA CATEGORY OWNERSHIP

Category	NFL Access	NOVATE Retention
Game Day Events	Full ownership	Anonymized patterns only
Intelligence Scores	Results only	Full algorithm ownership
Source Code	Zero access	Full ownership, perpetual
AI/ML Models	Zero access	Encrypted, NOVATE-managed

ANNUAL CERTIFICATION

Dependency Model

DEPENDENCY MECHANISMS

- Certification renewal requires Sentrais Intelligence Engine validation
- Compounding intelligence creates increasing value over time
- Industry benchmarks evolve from cross-deployment learnings

NON-RENEWAL CONSEQUENCES

- × Real-time intelligence terminates immediately
- × Dashboards revert to static reporting
- × Vendor certification status lapses
