

SENTRAIS DASHBOARD SPEC

- World Cup 2026 - Host City

SEAR Readiness

I. HOST CITY READINESS DASHBOARD

(Single-City Operational Truth)

Primary User

Mayor, Governor, OEM Director, FIFA City Lead

Purpose

Answer one question in under 10 seconds:

"Is this city ready for its next World Cup match?"

A. Top Context Bar (Persistent)

Elements

Event: FIFA World Cup 2026

Host City: (Dropdown selector)

Match Window: (Next Match | Date | Venue)

SEAR Posture: SEAR-2 | SEAR-1 Ready | SEAR-1 Active

Countdown: T-XX Days / T-XX Hours

Alert Status: Green / Amber / Red

This bar defines reality for the user. It never scrolls.

B. Hero Tile: Overall Readiness Index (ORI)

Centerpiece Gauge

ORI Score (0-100)

Color banding:

Green: 90-100

Amber: 75-89

Red: <75

Below the Score

Trend arrow (↑ ↓ →)

Last validated timestamp

Next validation gate (T-7, T-24)

C. Readiness Dimension Breakdown (6 Cards)

Six equal KPI cards arranged in a 2×3 grid:

Governance & Command

Agency Coordination

Venue & Match Operations

Systems & Infrastructure

Risk & Threat Preparedness

Evidence & Compliance

Each Card Displays

Score vs max weight

Status indicator

Top blocking issue (1 line max)

“View Detail” drill-down

This prevents leaders from asking for “more detail” prematurely.

D. Blocking Issues Panel (Right Rail)

Title: “Issues Requiring Attention”

Content

Max 5 items

Sorted by severity and time to match

Each item shows:

Issue type

Owner

Impacted dimension

Escalation risk (Yes / No)

This is the action surface for leadership.

E. Escalation Readiness Strip (Bottom)

A thin horizontal strip with three indicators:

Escalation Armed: Yes / No

Federal Liaison Engaged: Yes / No

Evidence Lock Ready: Yes / No

This makes escalation visible, not dramatic.

F. Drill-Down Behavior (Key Rule)

From this dashboard:

Leaders can drill down, never sideways

No task-level views for executives

Every click answers: "What is blocking readiness?"
