VETERAN-OWNED | BLACK-OWNED | FEMALE-OWNED | SDVOSB

CONFIDENTIAL STRATEGY BRIEFING

The Insight

# Calm is Not Accidental. It is Designed.

Modern operations do not fail due to a lack of technology. They fail due to a lack of coordination.

As complexity scales, organizations rely on fragmented signals—spreadsheets, emails, and isolated dashboards.

The Consequence: Operations that rely on hope rather than evidence.

The Proof

**\$51M**

Cost of Atlanta Ransomware Attack

**\$75K**

Cost per 15-minute concert curfew overrun

**40+**

Agencies per SEAR Event with no shared picture

**0%**

Predictive capability in legacy systems

# The Missing Layer Between Planning and Execution

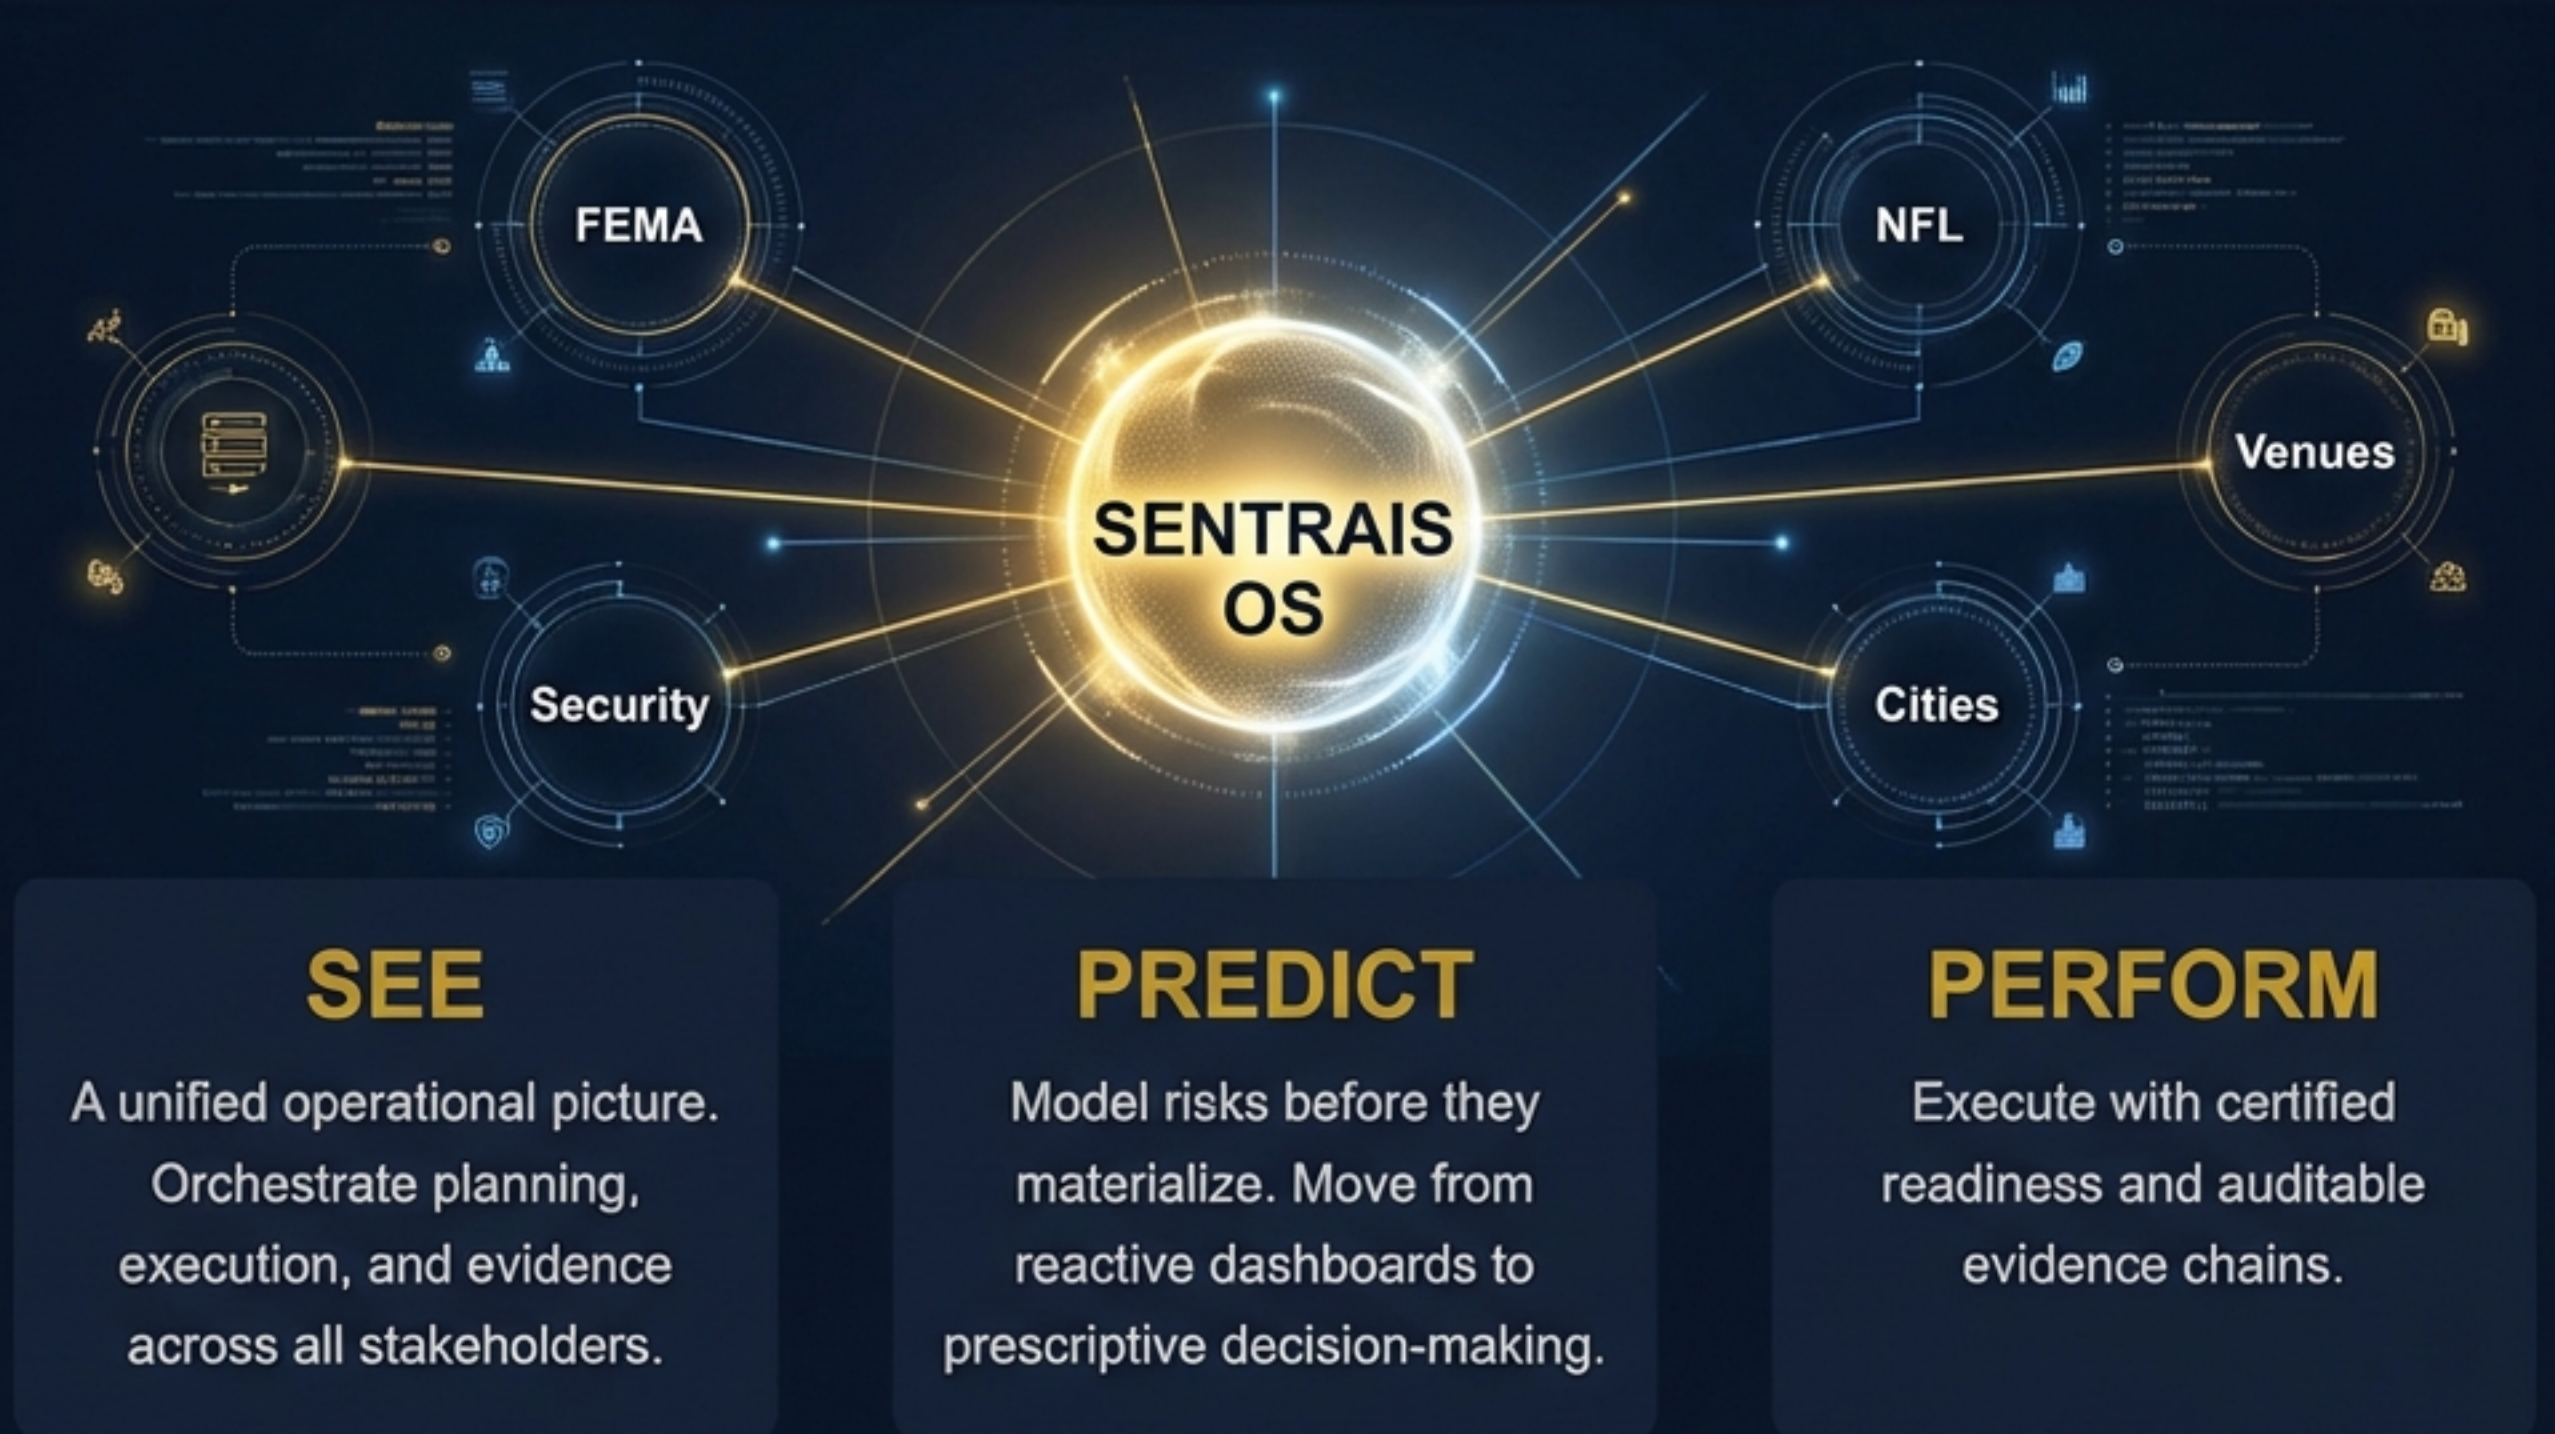

- **Resilience Gap:** Emergency plans sit in PDFs while crises unfold in real-time.
- **Innovation Gap:** Technology pilots fail to integrate with operational realities.
- **The Reality:** No single source of truth for operations.

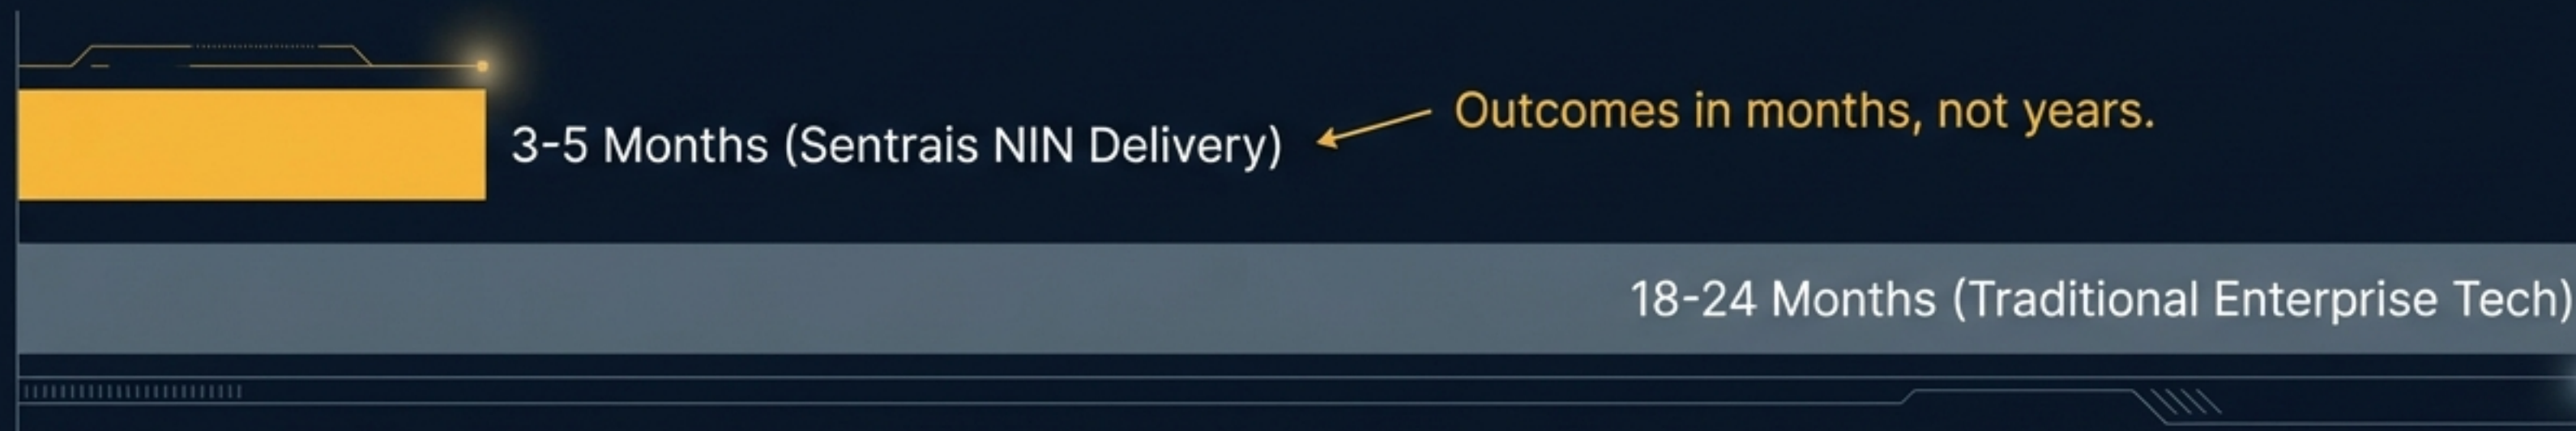

# SENTRAIS: The Intelligence Operating System.

Systems, Not Platforms.

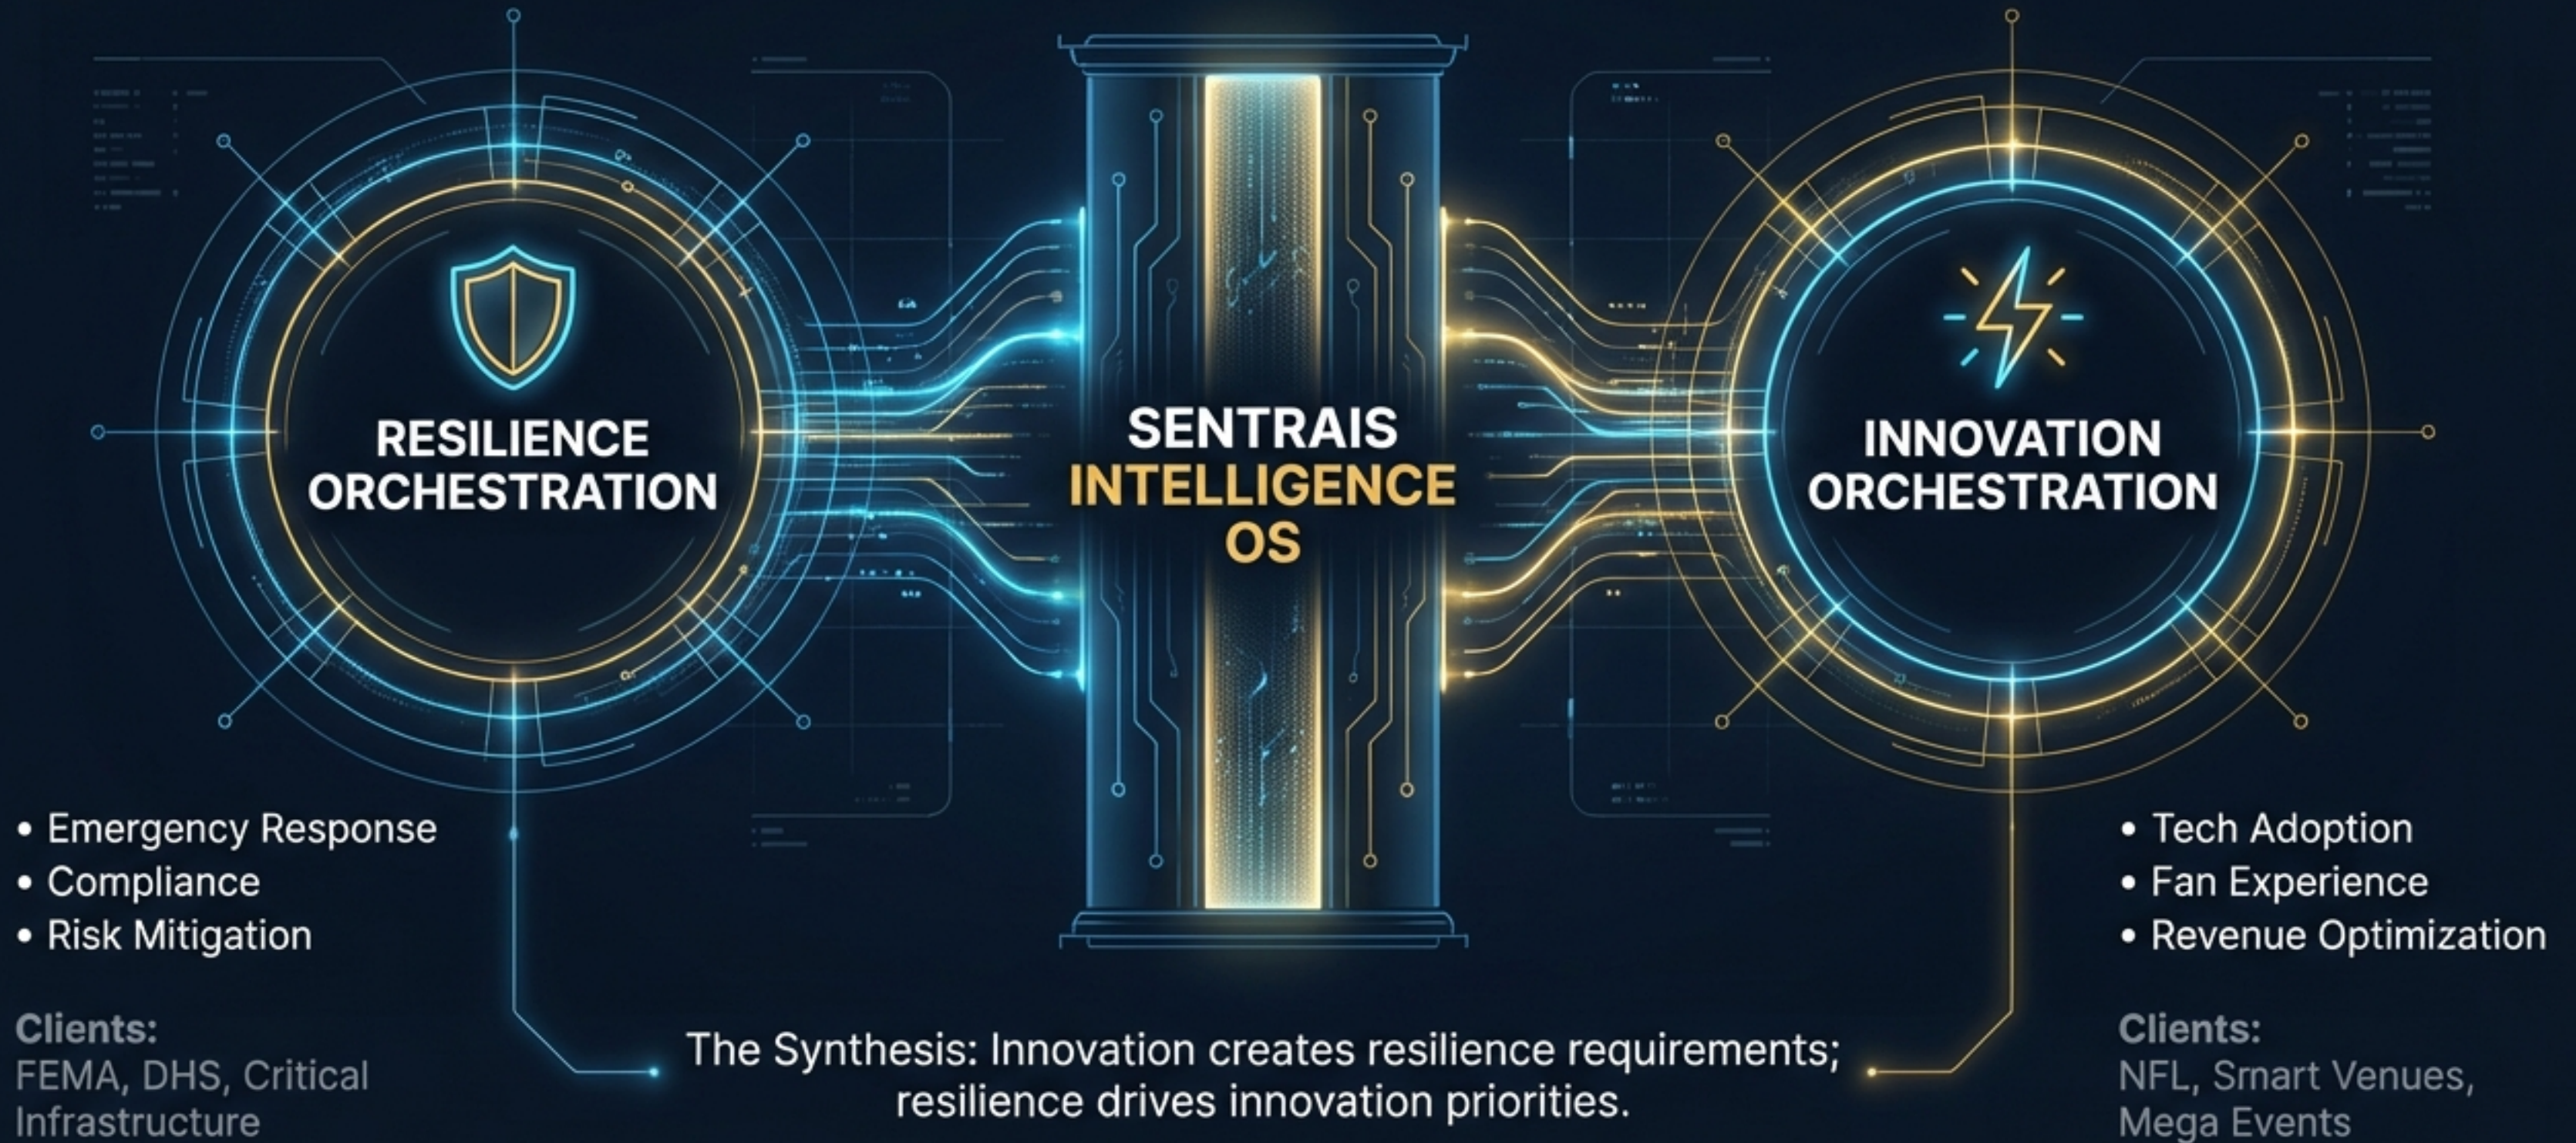

# NIN Forensics: Modeling Operational DNA

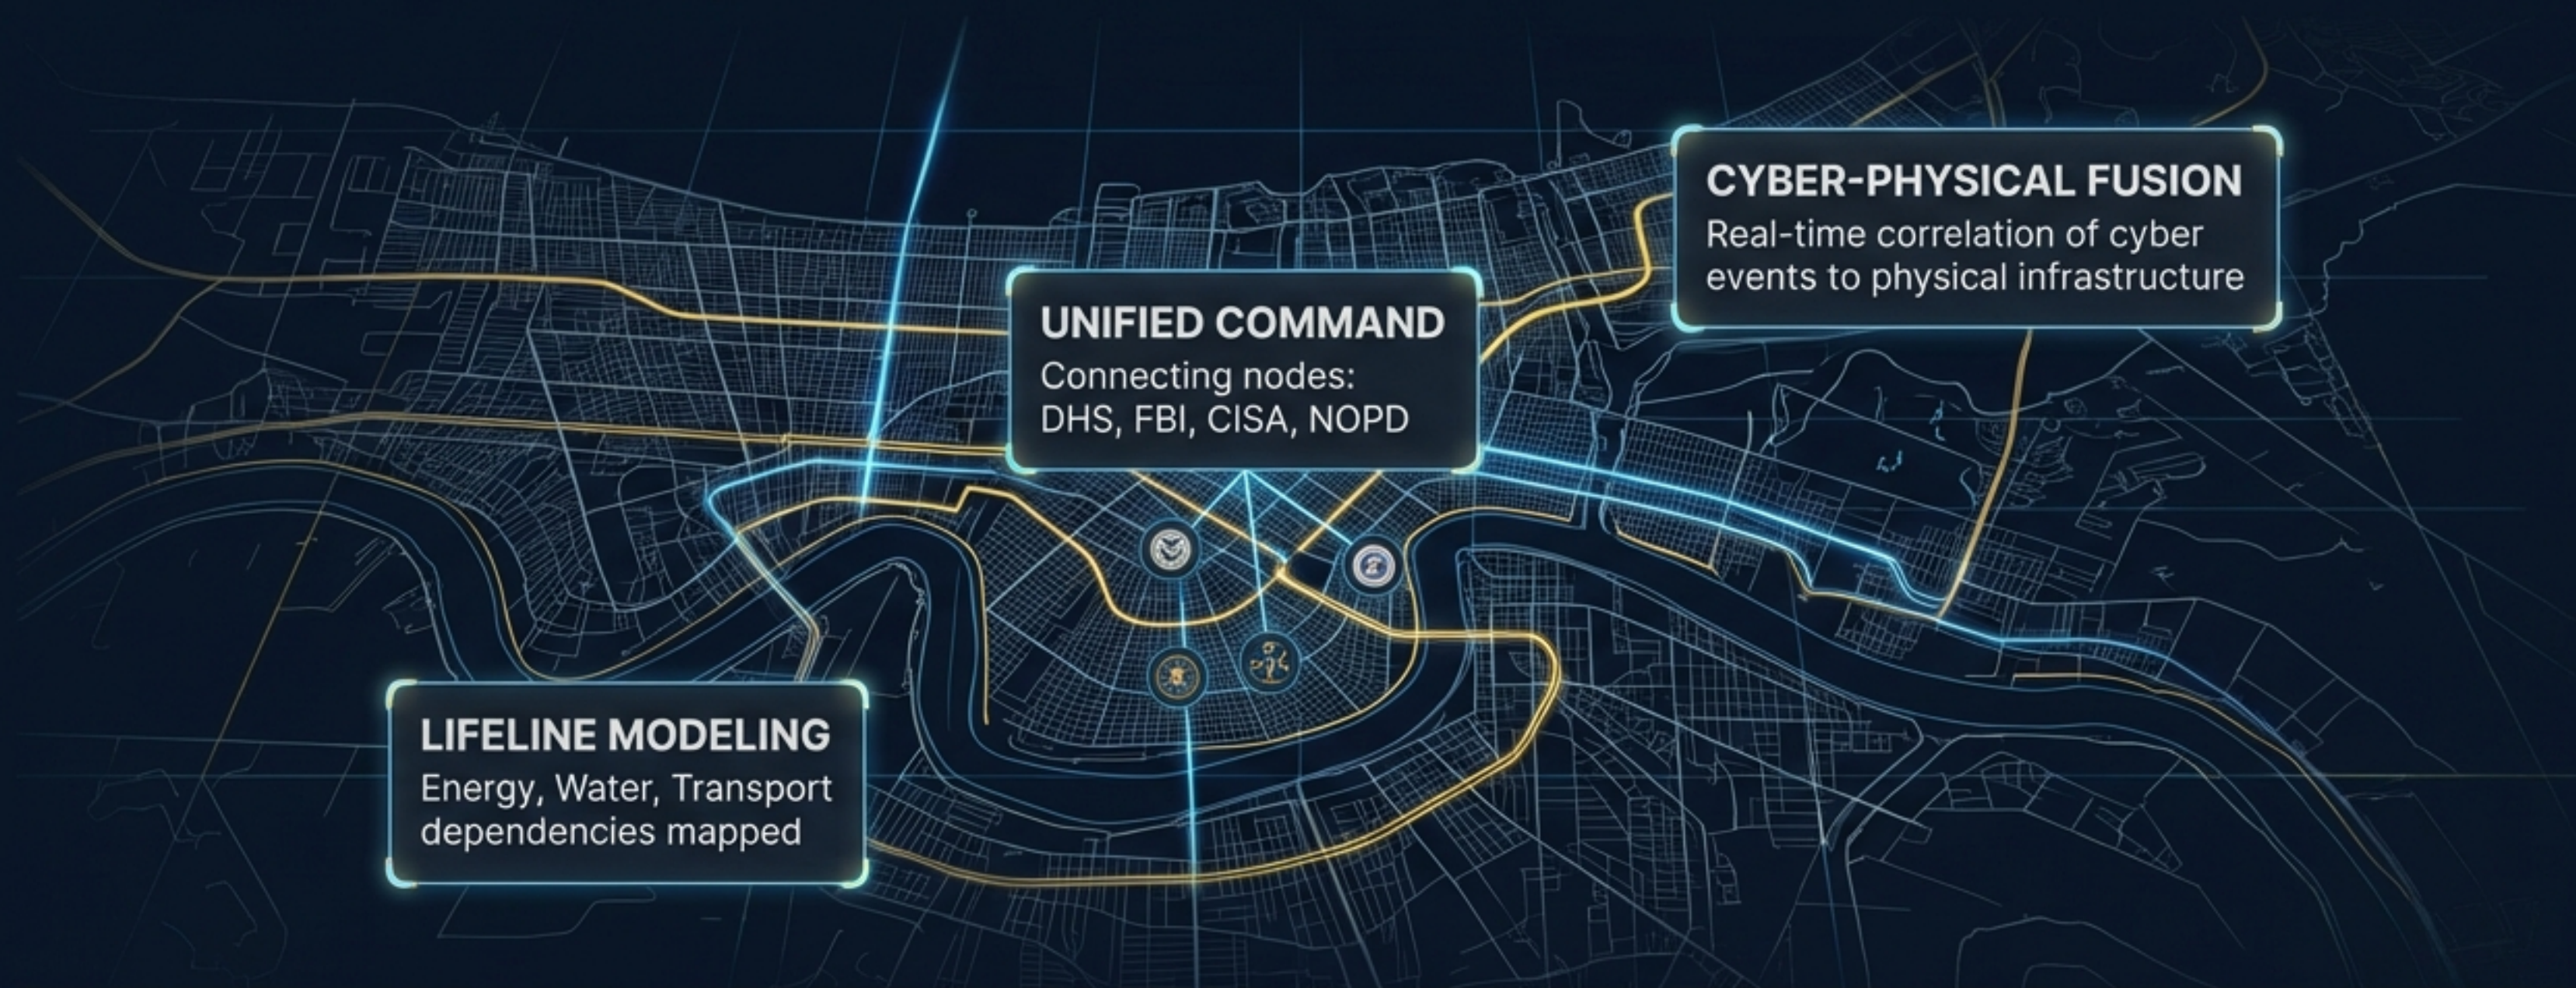

# Two Domains. One Operating System.

# Proven in Operations That Cannot Fail

**Case Study:** National Critical Infrastructure Cyber Command (NCICCC) & FEMA

**STRATEGIC IMPLICATION:** Establishes Sentrais as the architect for World Cup 2026 and LA Olympics 2028

# Orchestrating the Complexity of the NFL

Case Study: EVERGAME360 powered by SentraisOS

## EVERGAME360 DASHBOARD

### Resilience Orchestration Framework

Off-Season

Live Operations

Post-Season

Pre-Season

### STAGE 2: LIVE OPERATIONS - DETAILED METRICS

**32**  
CLUBS

**272**  
GAMES EXECUTED

**100%**  
ADOPTION RATE

COMPLIANCE SCORE:

**94.2**

AVG RESPONSE TIME:

**2.3 MIN**

INCIDENTS MANAGED

**234**

OPERATIONAL SAVINGS

**\$4.8M**

**IMPACT:** Automated compliance reduces liability exposure by \$3.2M annually.

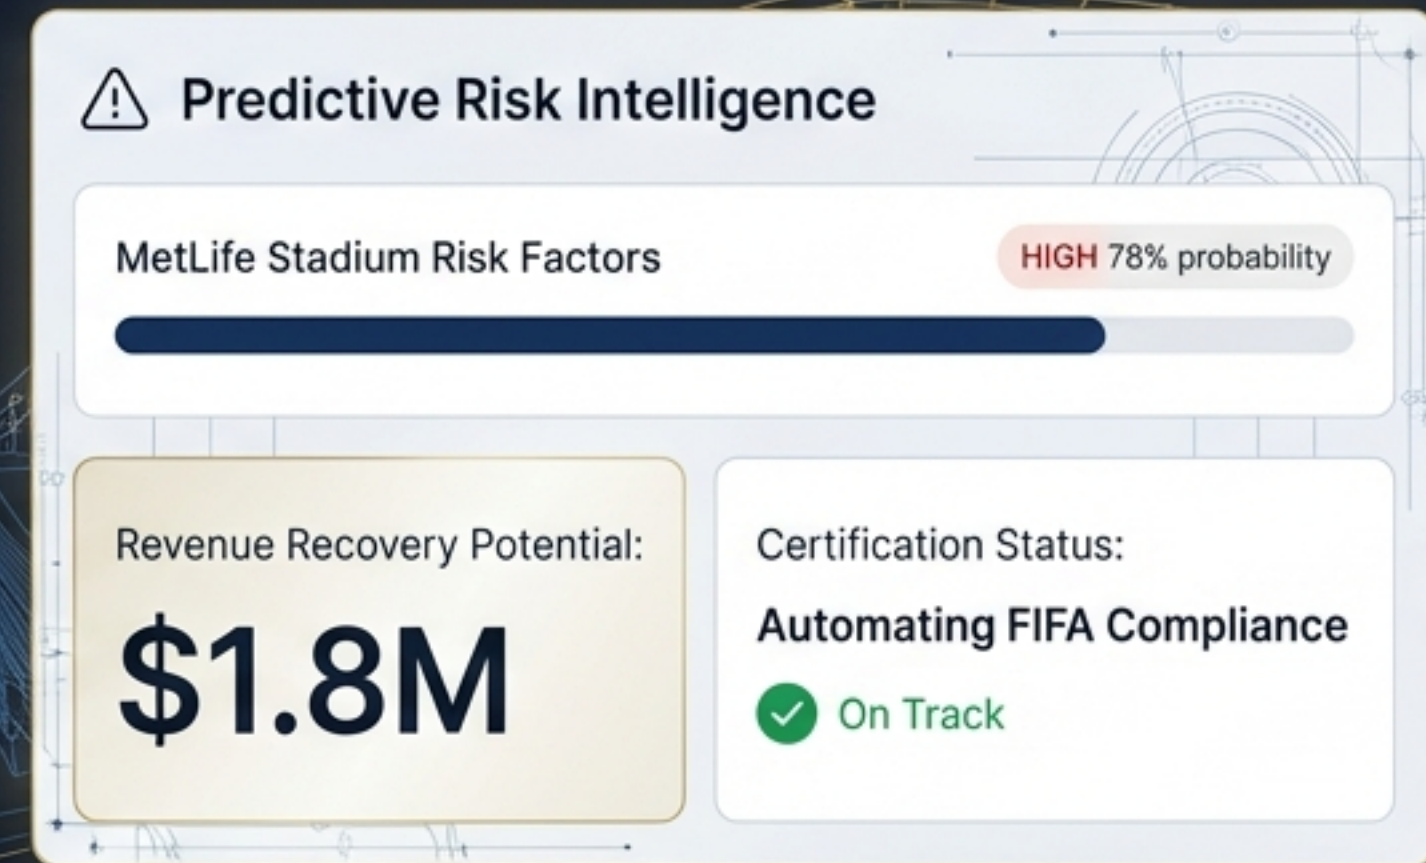

# Transforming Venues: From Cost Centers to Intelligent Assets.

## The Problem: Revenue Leakage.

- \$2-4M annual loss per venue (Traffic/Congestion).
- \$350K+ lost annually from failed repeat purchases.
- FIFA 2026 Mandate: LEED Silver Certification Required.

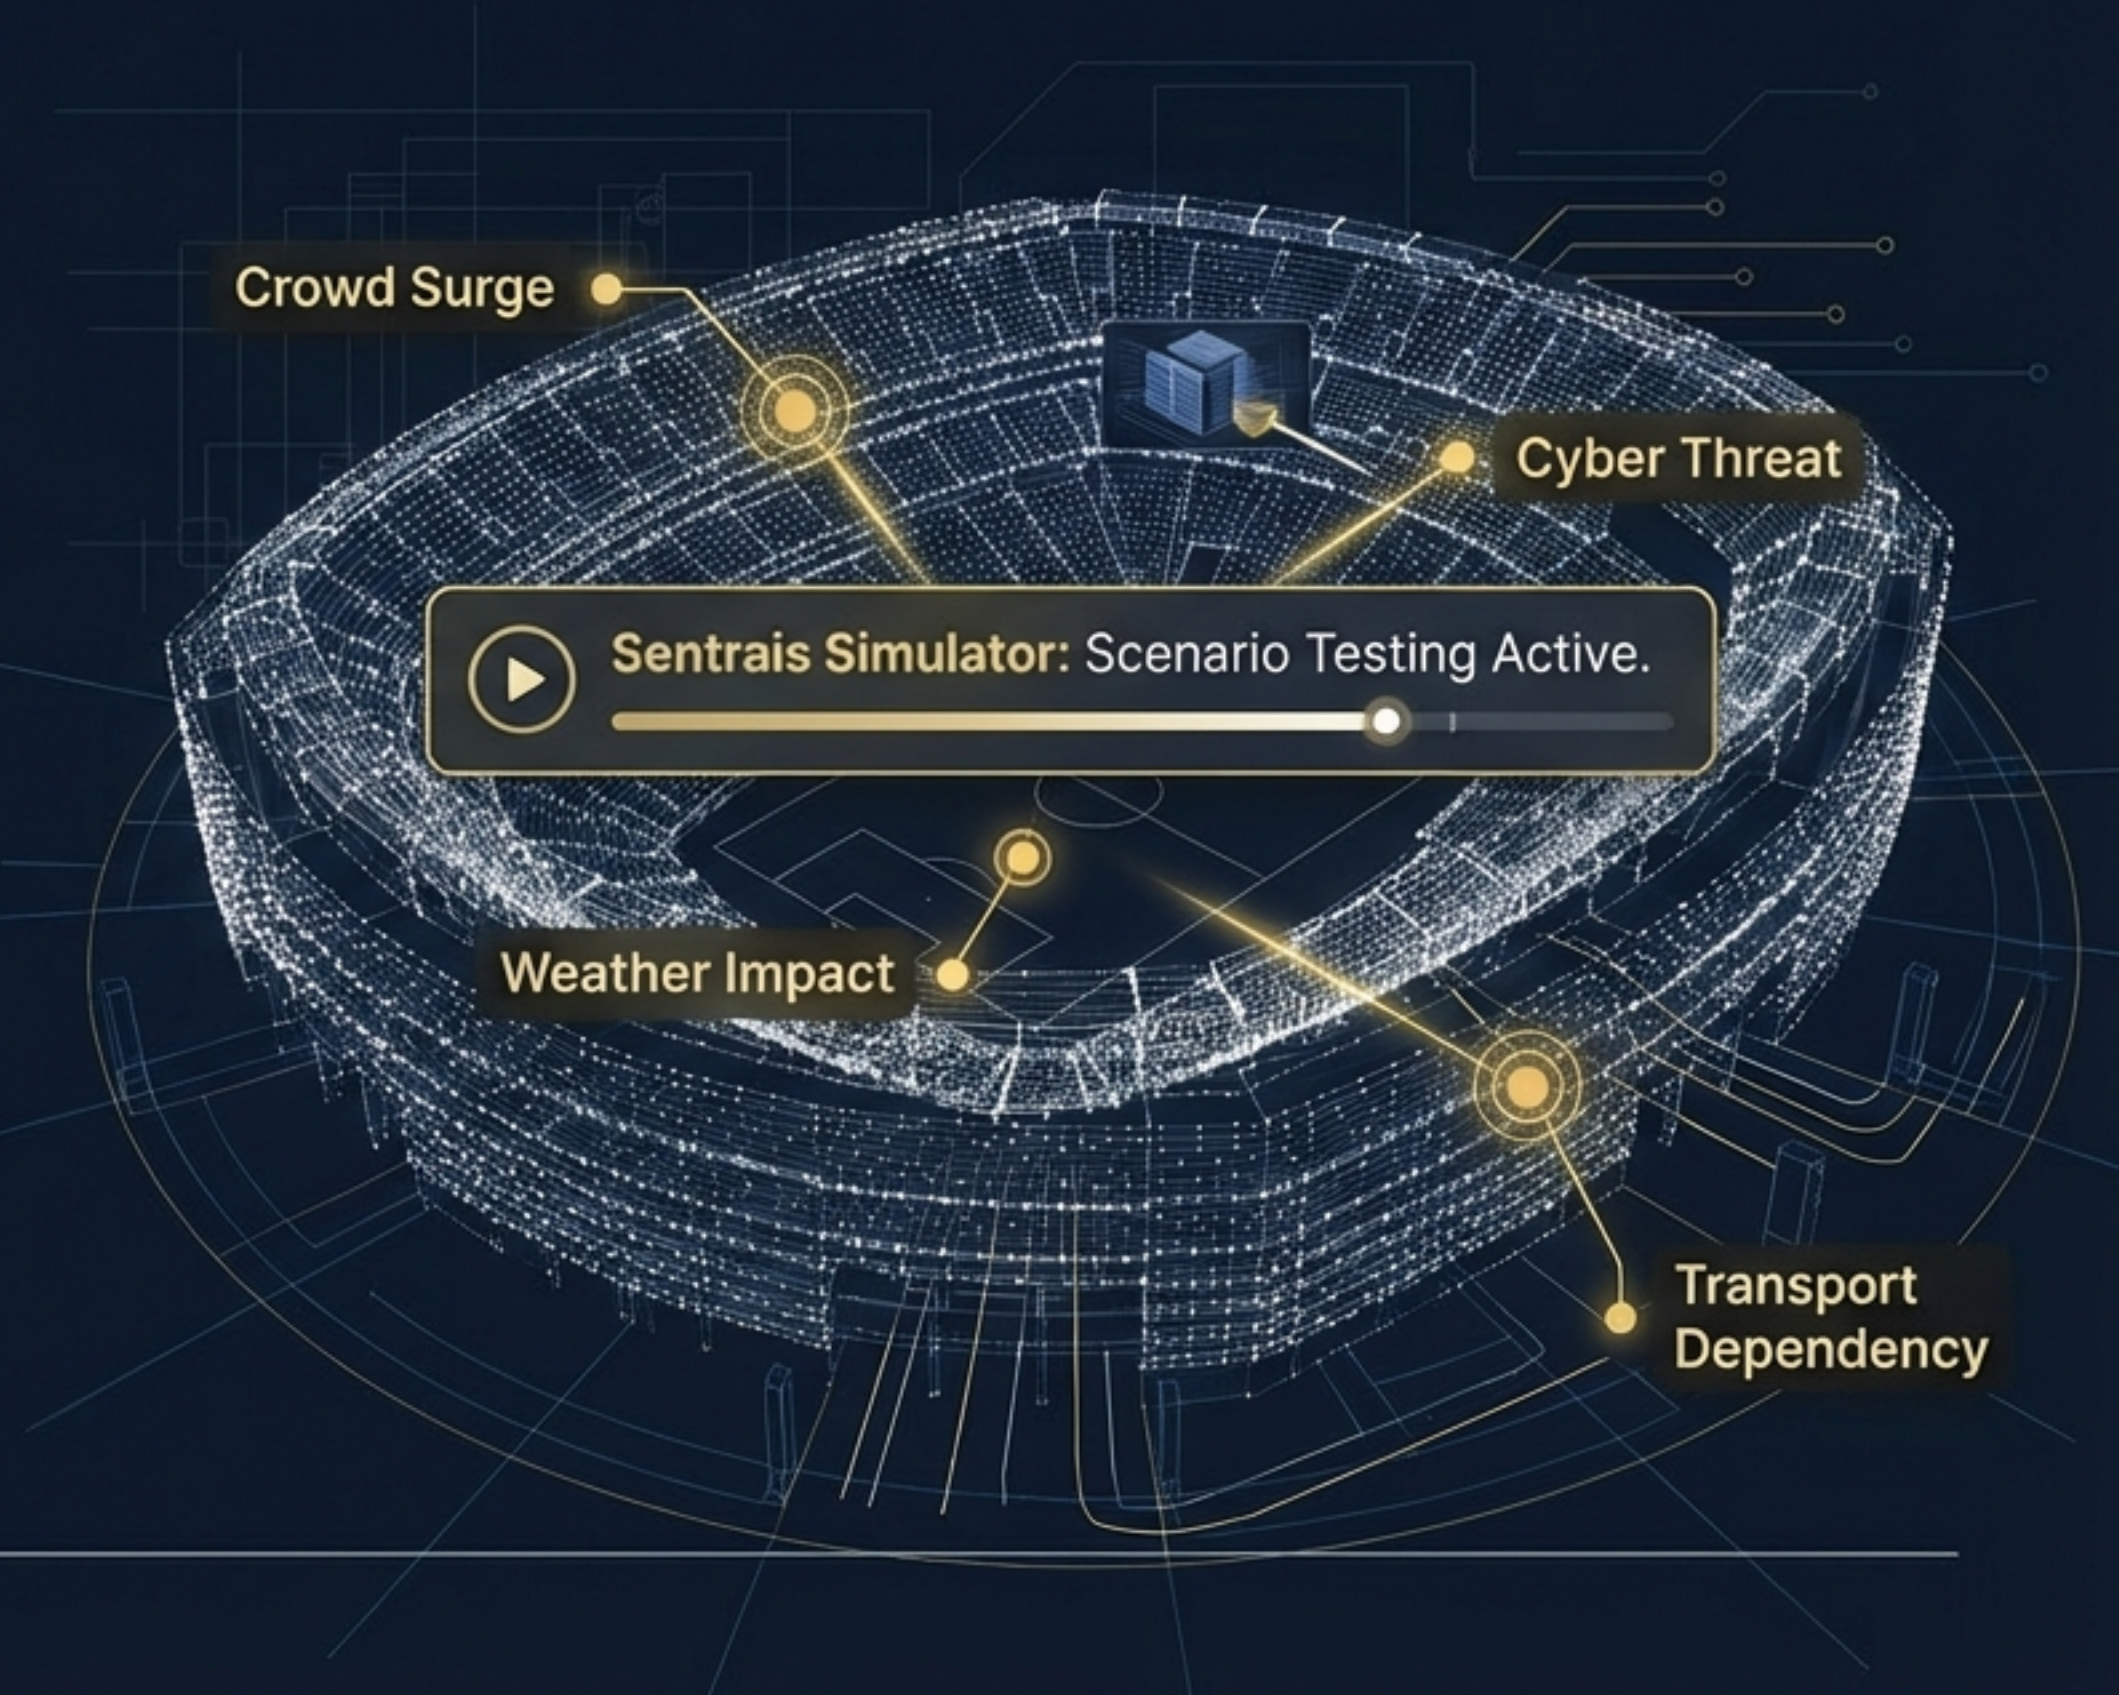

## The Solution: eVenu Intelligence.

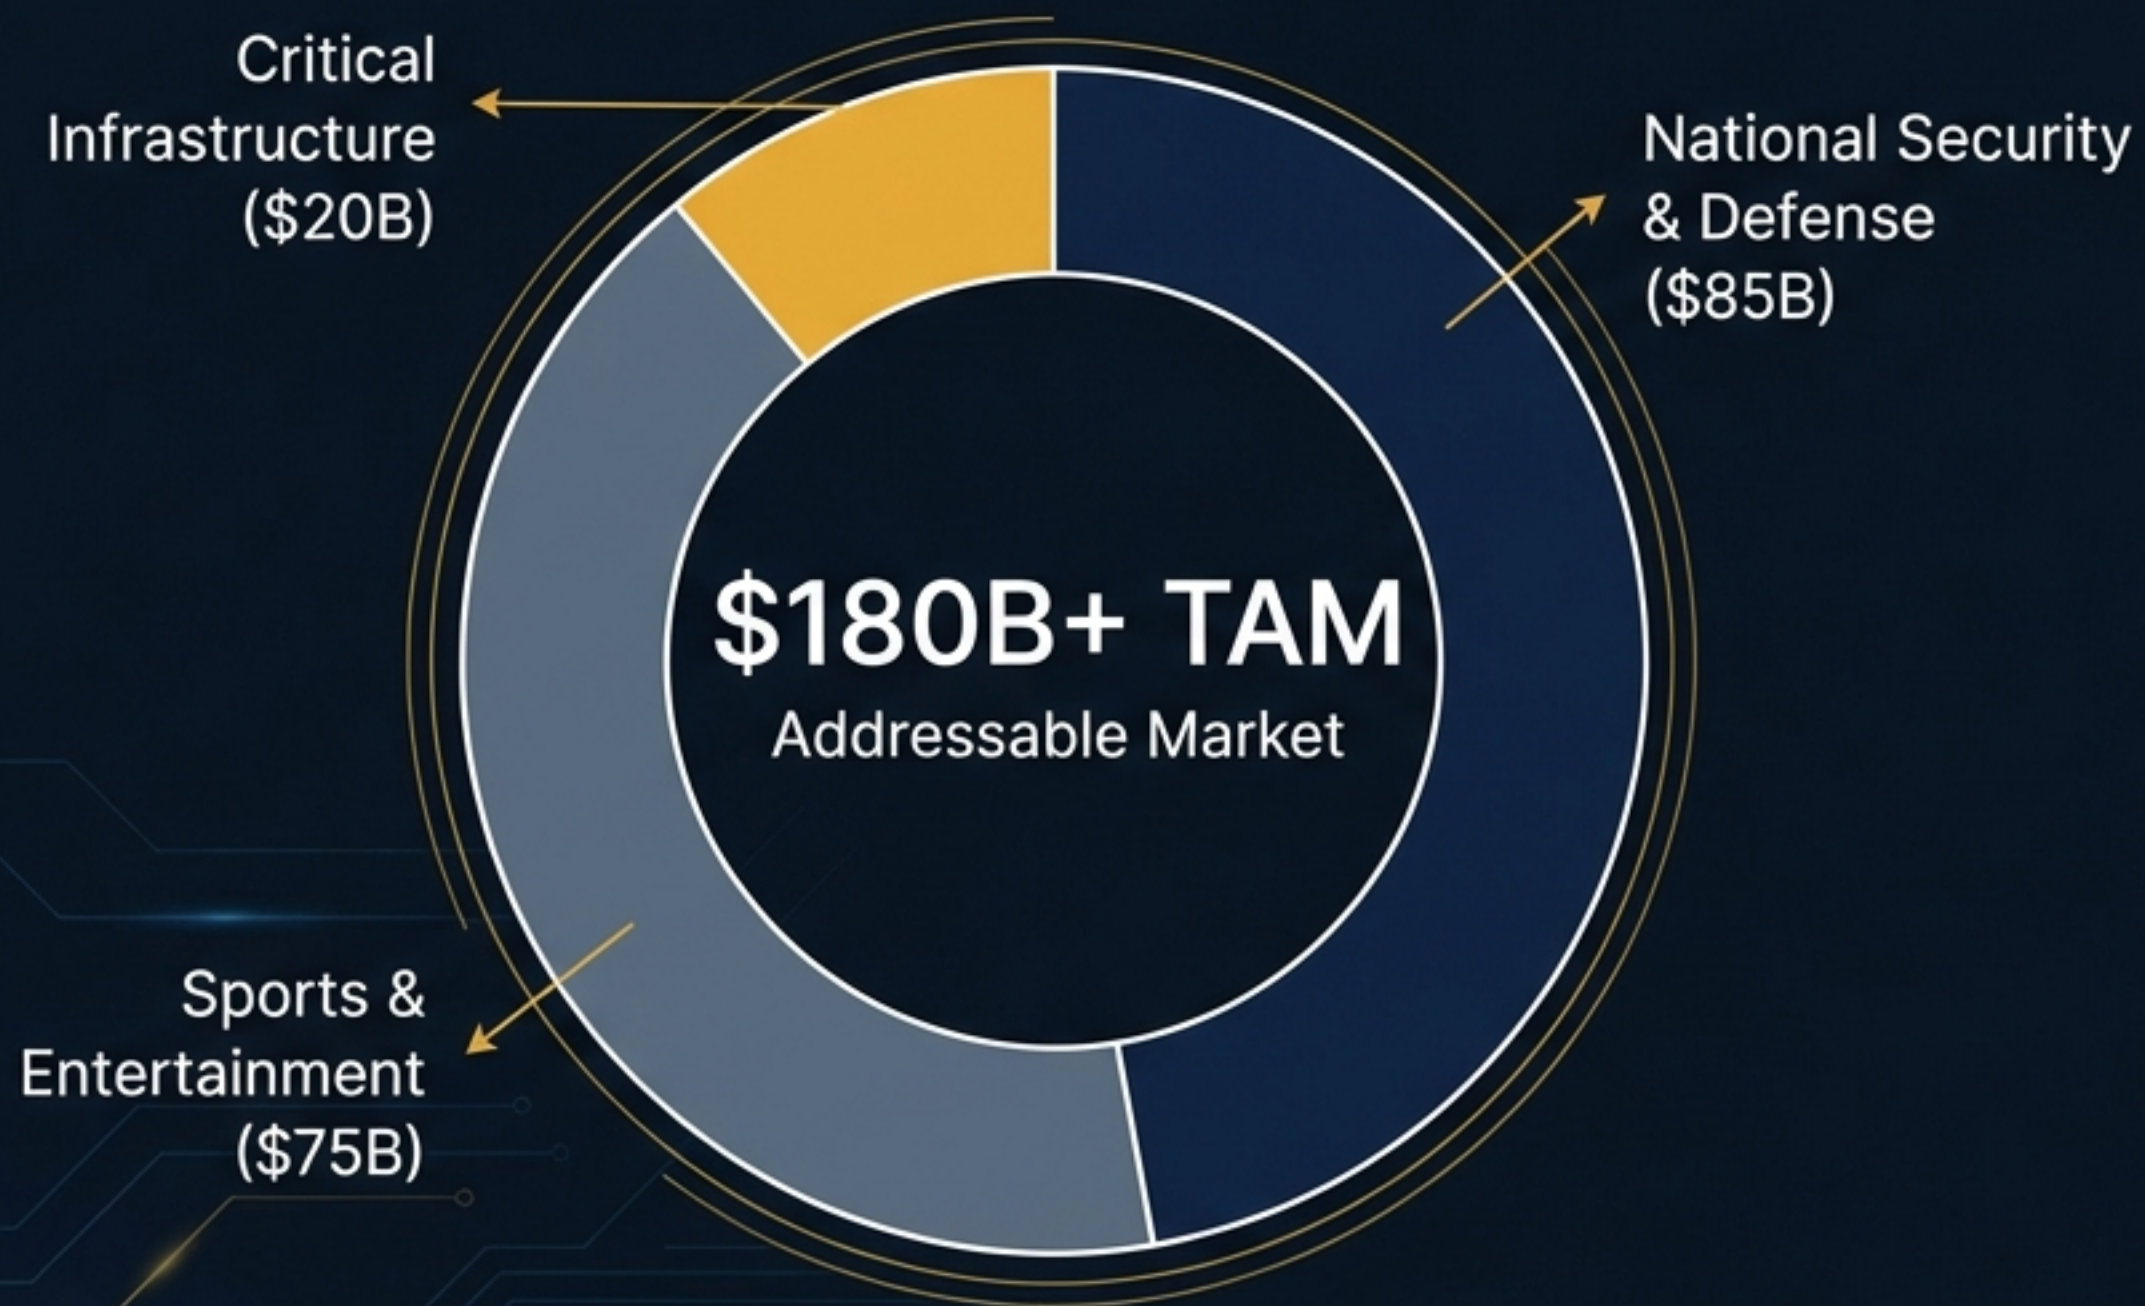

# Simulation Before Execution.

- **Virtual Private Cloud (VPC):** High-fidelity security for proprietary data.
- **The Simulator:** Stress-testing playbooks against “What If” scenarios 3-5 days before event day.
- **Predictive Intelligence:** Moving from reactive dashboards to prescriptive decision-making.

# A Multi-Vertical Category Leader.

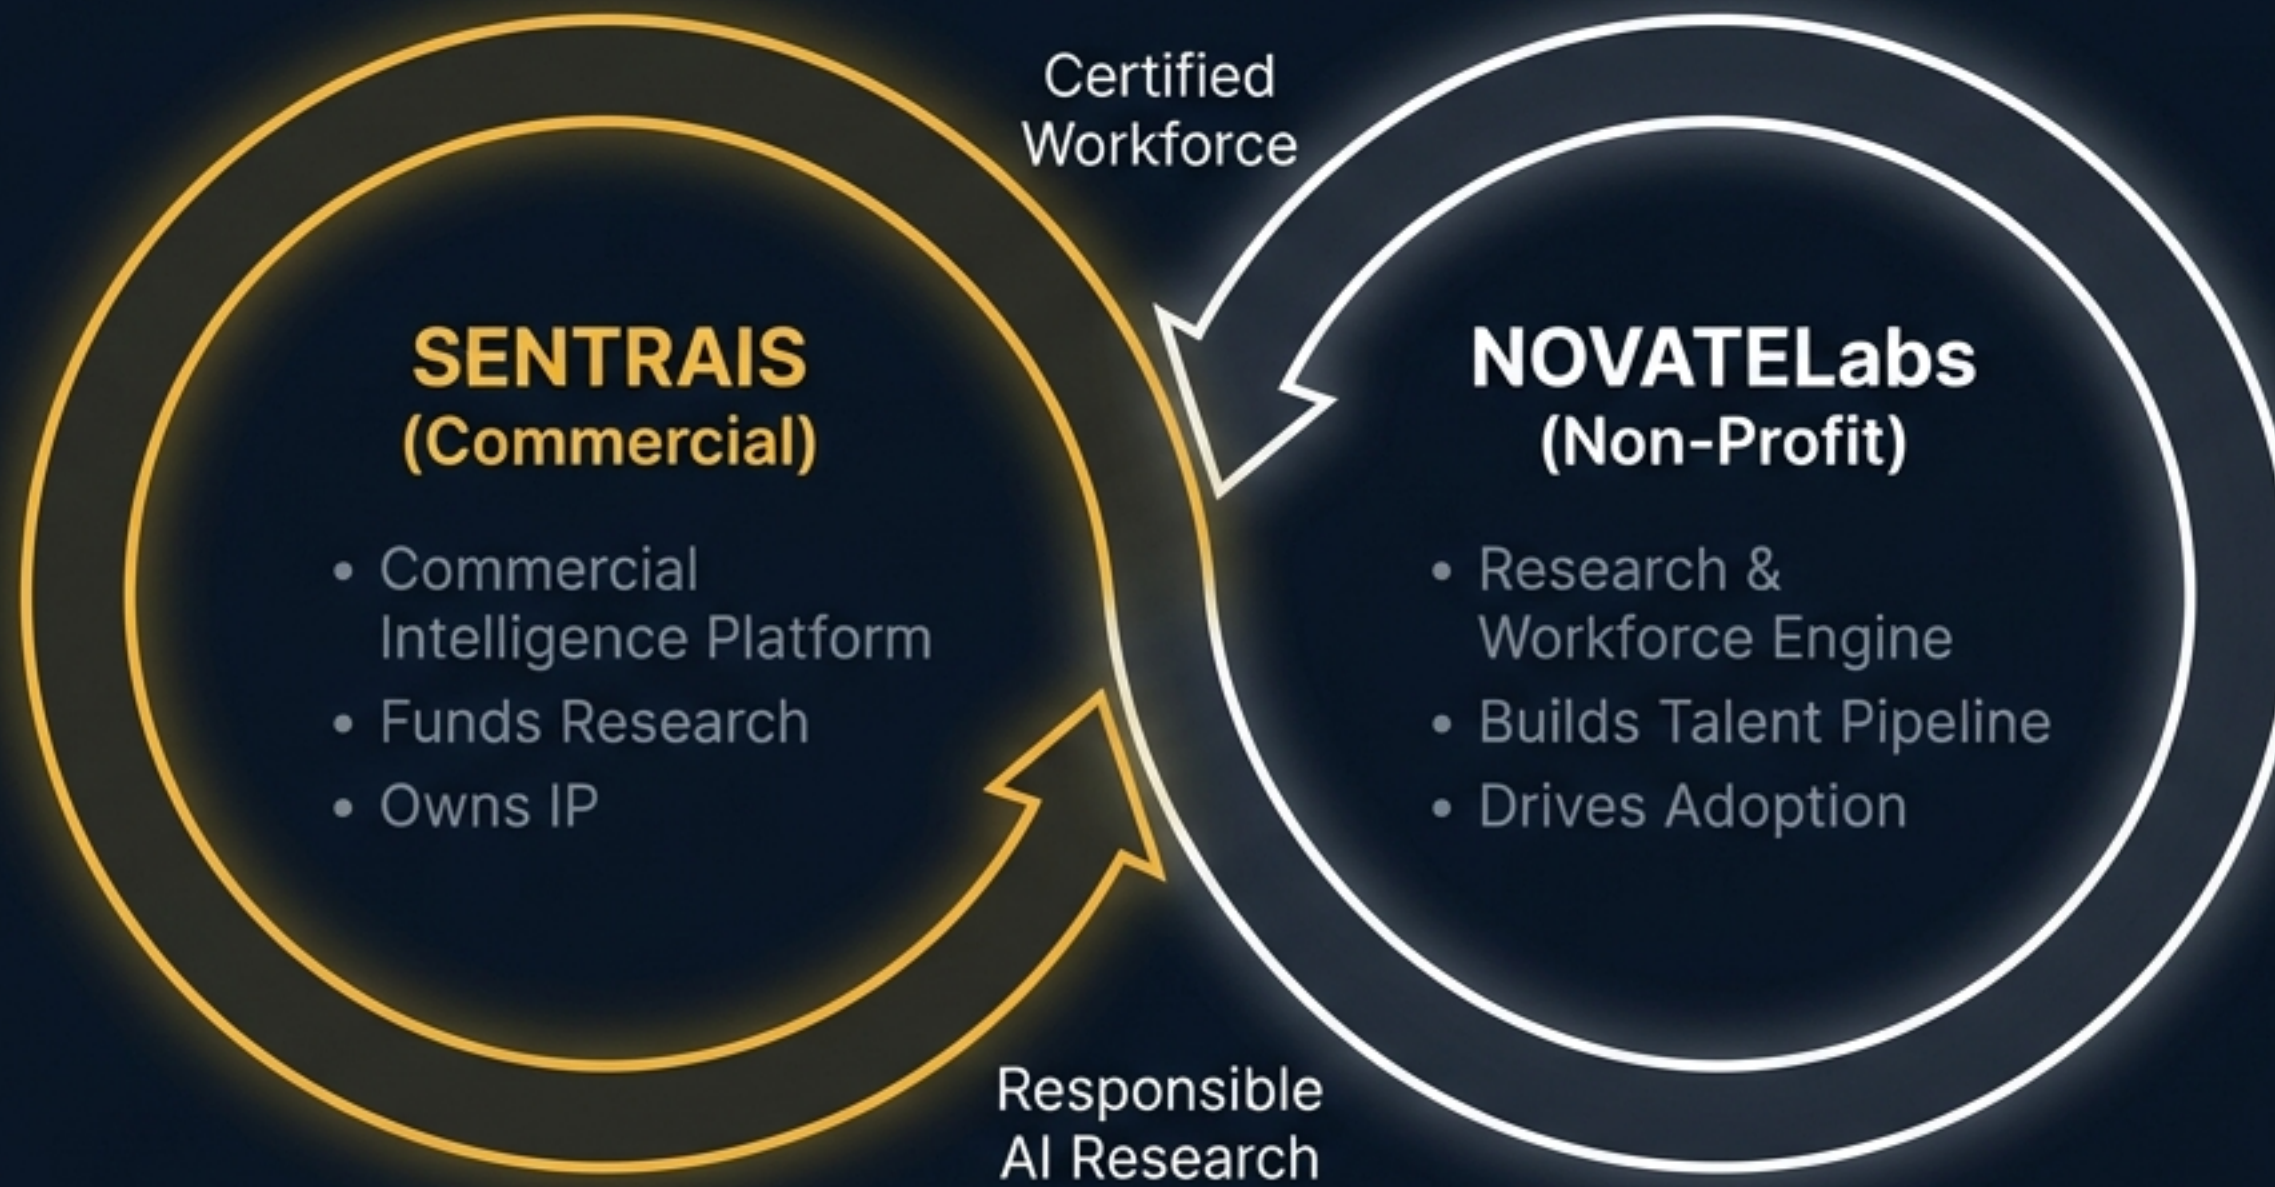

**Sentrais Position:** The only unified intelligence layer spanning these verticals.

Zero existing competitors for operations that cannot fail.

# The Compounding Advantage.

Result: A continuous pipeline of certified practitioners (\$2.5B grant pipeline) that de-risks enterprise adoption

**Architected by Those Who Have Commanded the Crisis.**

# TYE HAYES

**Founder & CEO** | Service-Disabled U.S. Navy Veteran

## **Battle-Tested** The Crisis Commander

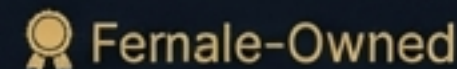

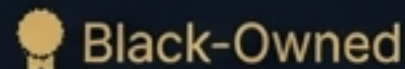

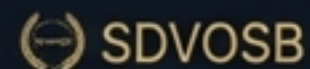

- Former Atlanta CIO during 2018 Ransomware Attack.
- Coordinated FBI, DHS, NSA response.

## **Battle-Tested** The Infrastructure Leader

- Former Innovation Lead, Hartsfield-Jackson Int'l Airport.
- World's Busiest Airport Operations.

## **Battle-Tested** The Category Creator

- Architect of the NIN Methodology.
- Built Evergame from zero to league-wide adoption.

# The Convergence of Catalysts

## 2026

### FIFA World Cup (Atlanta Host City)

Atlanta Host City, \$625M FEMA grant program deadline, workforce training subgrant position.

## 2028

### LA Olympics (National Security Mega-Event)

National security mega-event, multi-venue operational intelligence, NCICC model at Olympic scale.

## 2029

### Super Bowl (Return to Atlanta)

Atlanta Returns, NFL Foundation Legacy Grant Program, build on proven Super Bowl LIII recovery leadership.

## The Mandate: CISA Zero Trust & Federal Infrastructure Resilience Requirements

CISA requirements and Zero Trust mandates drive infrastructure resilience standards and secure federal systems.

## The Shift: Moving from Digital Transformation to Operational Orchestration

Transitioning from siloed digital tools to unified, intelligent operational layers for complex, mission-critical environments.
