

Sentrais: The Intelligence Operating System for the Global Live Event Economy.

From Reactive Chaos to Predictive Revenue. Validated by the NFL.

FRAGMENTED / REACTIVE

UNIFIED / PREDICTIVE

PRODUCTION PROVEN ACROSS ALL 32 NFL CLUBS

Fragmented Systems Are Bleeding Millions in Revenue and Creating Liability Gaps.

**\$2M–
\$4M**

ANNUAL REVENUE
LEAKAGE PER VENUE

Losses driven by traffic bottlenecks, positioning failures, and “invisible inefficiencies” inherent in manual systems.

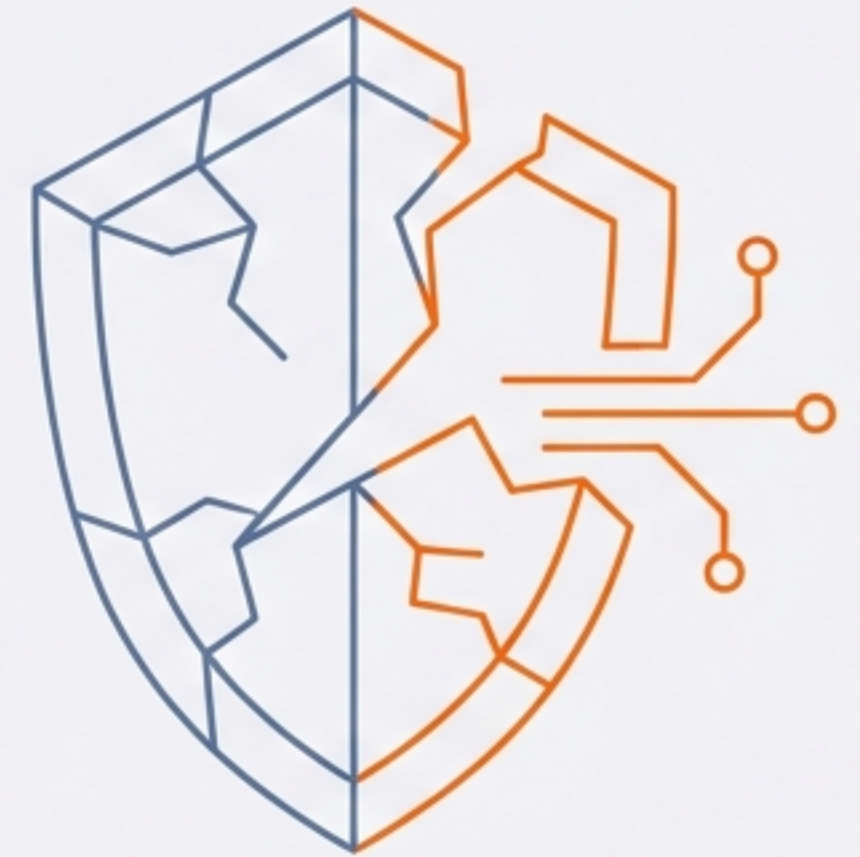

**\$200
Million**

MONTHLY GLOBAL
OPPORTUNITY COST

Sector-wide cost of sub-optimal asset availability. Assets not charged, not ready, or wrongly positioned.

The Liability Gap

32+ different approaches to safety standards create a defenseless liability surface during audits. Fragmented data offers no protection.

The Survival Requirement: Evolving from “Looking Back” to “Seeing the Field”

DIMENSION	REACTIVE (OLD WORLD)	PREDICTIVE (SENTRAIS)
Data Visibility	Post-hoc forensic analysis. Looking at what happened yesterday.	Real-time situational awareness (IoT/Early Warning).
Decision Making	Siloed stacks. WhatsApp threads, Radio chatter, Static Google Drives.	Unified Command Hub. Interoperable data across all departments.
Risk Management	Incident-driven & Manual. Reacting to crises after they escalate.	Pattern-recognition & AI-Driven. Stopping incidents before they start.

BOTTOM LINE: Resilience is no longer about notification. It is about predictive intelligence.

The First 'Resilience OS' for High-Stakes Environments.

Recognized by Gartner (2025 Market Guide) as a leader in "Resilience Management".

Gartner

SENTRAI'S INTELLIGENCE OS

Unified Checklists

Preventing process drift with real-time, league-wide protocols.

Real-Time Readiness Scoring

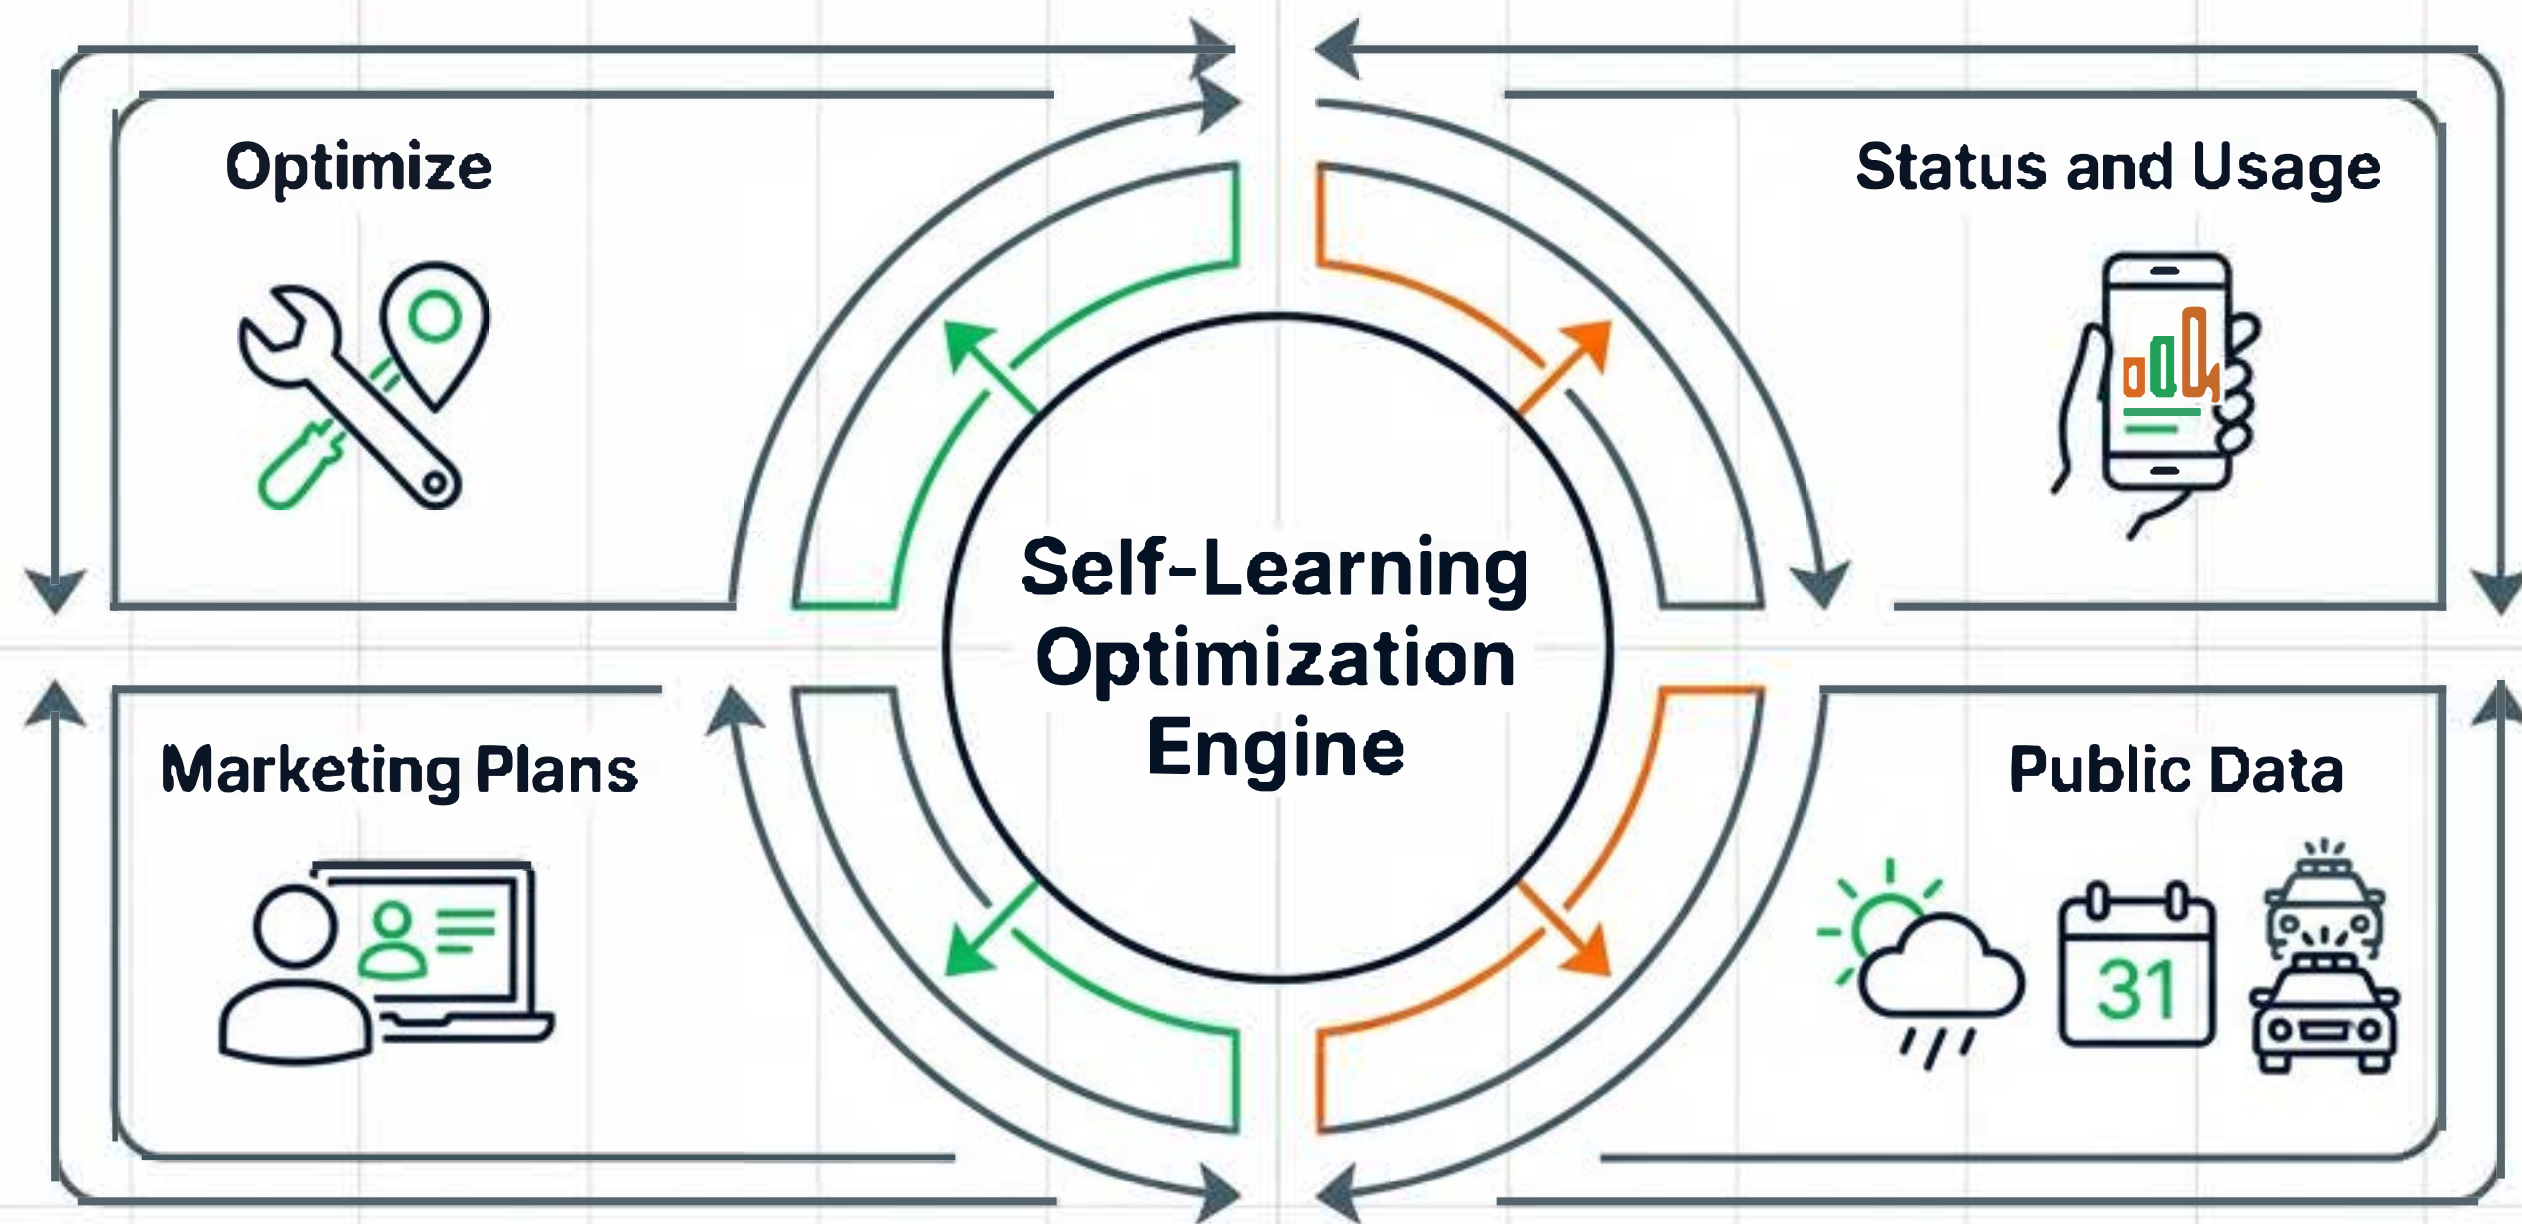

A live 'Green/Red' dashboard utilizing time-based SLAs to give leadership total visibility.

Immutable Evidence Ledger

A timestamped, tamper-proof audit trail. The primary source of truth for board defense and insurance compliance.

Cyber-Physical Fusion: Integrating Assets, IoT, and Revenue Data.

EverGame360: Production-proven readiness and command layer (Currently in 32 NFL clubs).

eVenu (Revenue Engine): Digital Twin blueprinting to optimize fan flow and per-capita spend.

The NIN Methodology: Crisis-Tested Delivery for Rapid ROI.

Short Time to Value

Installation: **<24 HOURS** (Remote)

Transformation: **3–5 MONTHS**
(vs. 18–24 months legacy)

ROI: **90 DAYS**

Origin Story

Born from actual command experience—transforming Atlanta's cyber recovery into Super Bowl success.

We Aren't "Testing." We Are the NFL's Standard of Excellence.

\$6.3M Contract

Covering all 32 NFL Clubs. The league-wide standard for operations.

Super Bowl Tested

Orchestrating the most complex live event in the world with zero downtime.

\$1.9M Committed ARR

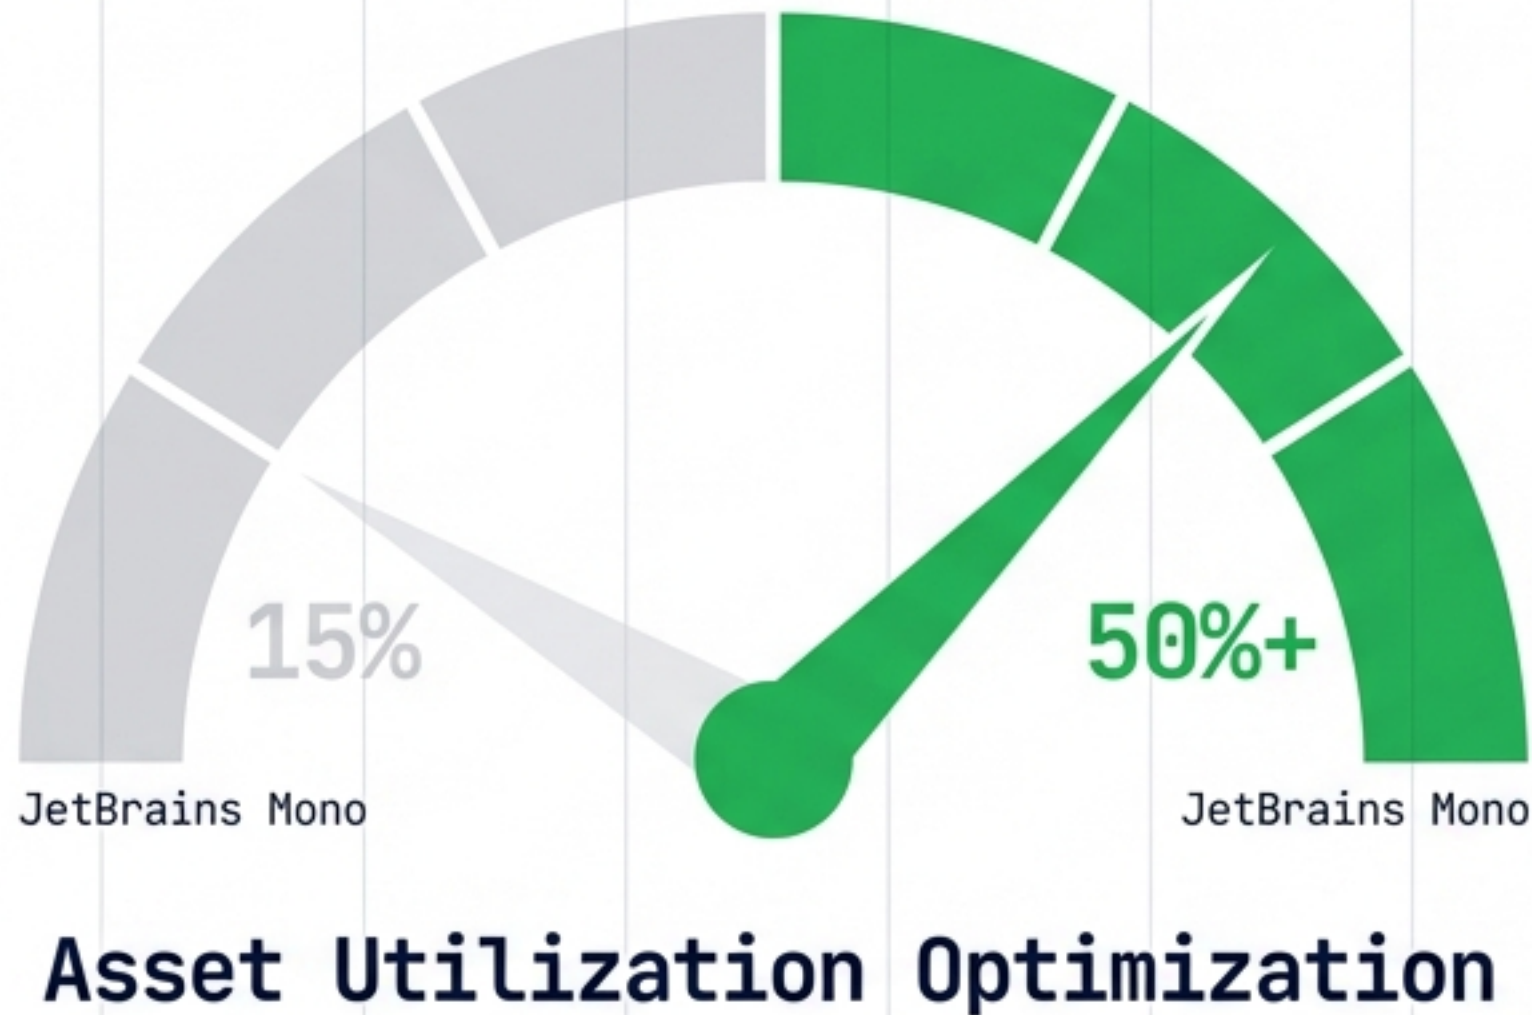

With a clear path to expansion in adjacent verticals.

Gartner Validated

One of ~35 Representative Vendors globally (out of 100+).

"I know the motions that work every time... It opens the door." — The encoded playbook advantage.

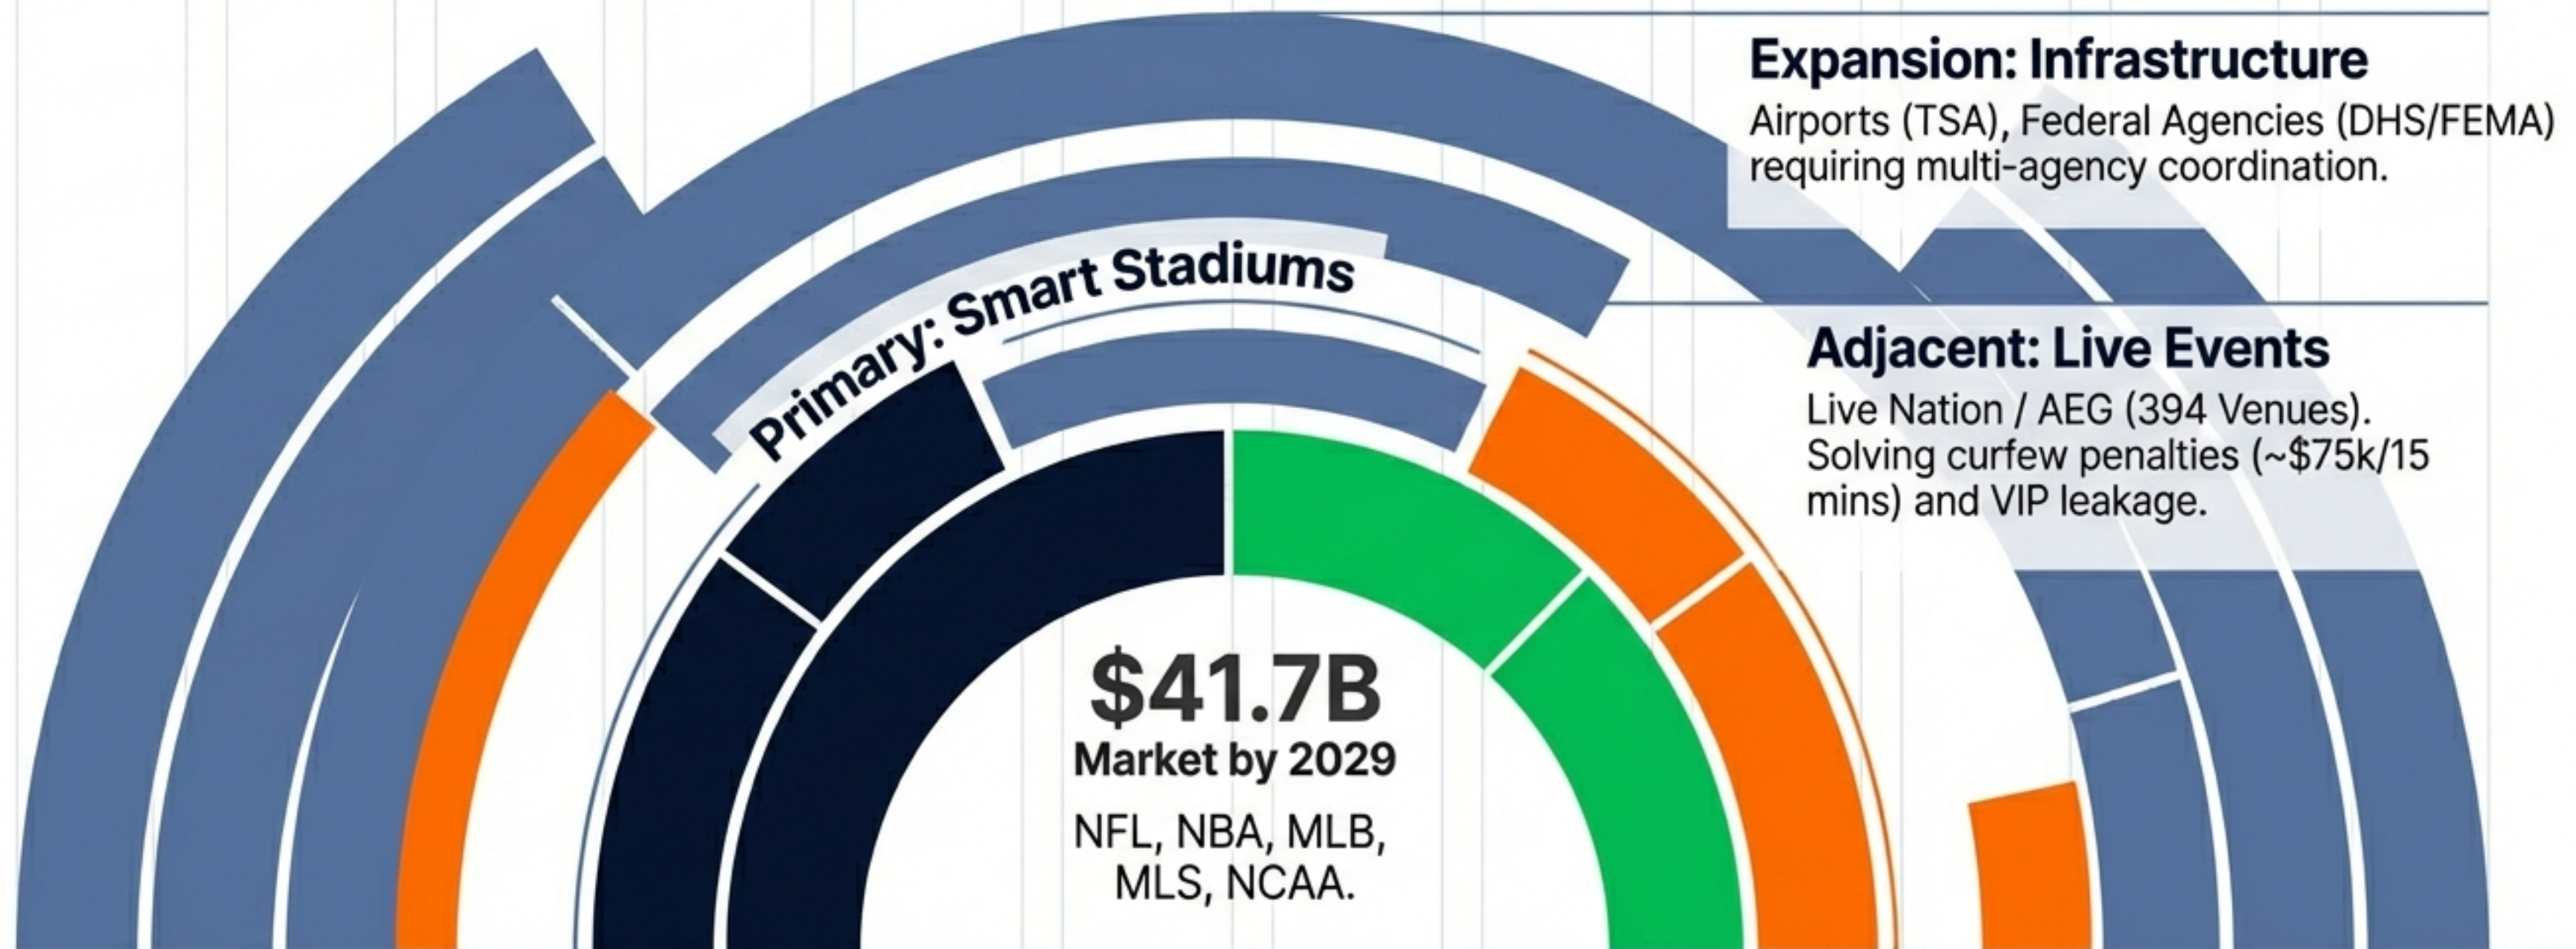

Turning Operational Excellence into Financial Recovery

- **Utilization:** Moving asset utilization from 15% to 50%+.
- **Recovery:** Recapturing millions in lost revenue via predictive positioning and eliminating traffic bottlenecks.
- **Efficiency:** 70–80% savings in planning via Digital Twin blueprinting vs. manual methods.

The 'One-Time Fan' Solution: Transforming single-visit users (60% churn) into repeat customers via documented experience analytics.

A \$1.16 Trillion Opportunity in the Live Event Event & Infrastructure Economy.

Strategy: A 'Blue Ocean' shift—moving from crowded 'Notification' markets to 'Resilience Management'.

Why Legacy Notification Systems Cannot Compete with Resilience Intelligence.

LEGACY NOTIFICATION

(e.g., Everbridge, AlertMedia)

- Reactive
- Manually Trained
- Batch Notifications
- Emergency Only

Generic Asset

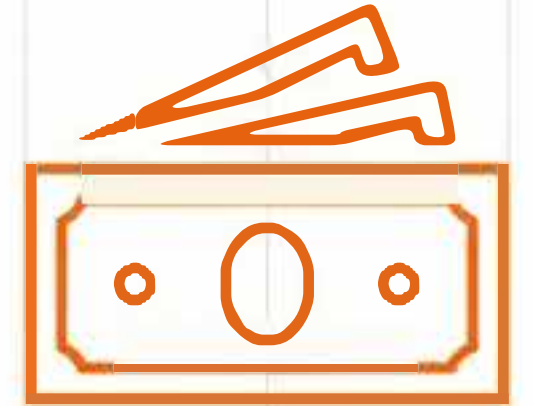

SENTRAIS INTELLIGENCE

- Predictive
- Self-Learning AI
- Real-Time Cyber-Physical Fusion
- Revenue & Resilience

THE MOAT: The **Evidence Ledger**. A barrier to exit by becoming the legal standard for insurance compliance.

A Frictionless SaaS Model with 'Success-Based' Upside.

1. SaaS Base Fee

Recurring subscription for the core Intelligence OS.

2. Usage & Expansion

Scaling based on venue size, complexity, and number of assets.

3. Success Fee (The Upside)

10% of 'Revenue Recovery' generated by the optimization engine.

Targeting the \$2M-\$4M leakage per venue.

Strategy: High-margin recurring revenue + upside participation in client success.

Land and Expand: From League-Wide Adoption to Global Standard.

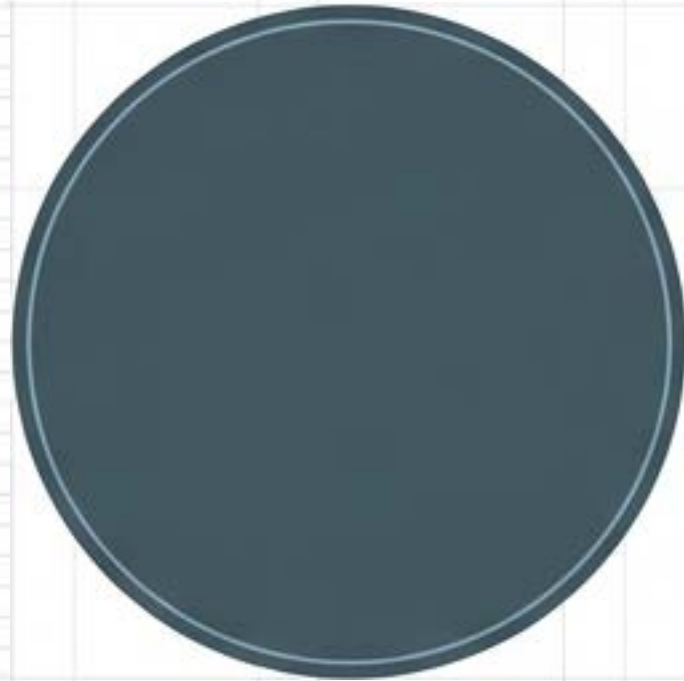

Tactic: The 'One-Time Fan' solution—helping venues turn single-visit fans into repeat customers.

24-Month Trajectory to Market Leadership

Growth Drivers: Land and expand within current accounts + rapid new logo acquisition in adjacent markets.

Built by Commanders, Not Consultants.

Tye Hayes (CEO)

- **SERVICE-DISABLED VETERAN:** Service-Disabled U.S. Navy Veteran.
- **CRISIS-TESTED:** Architected Atlanta's cyber recovery.
- **PRODUCTION-HARDENED:** Production-Hardened: Super Bowl command experience.

“ We are encoding the playbook of elite commanders into a scalable software system.

Tye Hayes

Capitalizing on the ‘Resilience Mandate’.

SEEKING \$12M–\$15M SERIES A

Valuation Context: \$50M–\$80M Pre-money.

Use of Funds

R&D Scaling the eVenue Digital Twin and AI capabilities.	Sales Building dedicated teams for Federal and International markets.	Operations Automating the “NIN” delivery for mass scale.
