

SENTRAIS Operational Intelligence OS

Gartner-Certified Orchestration Architecture

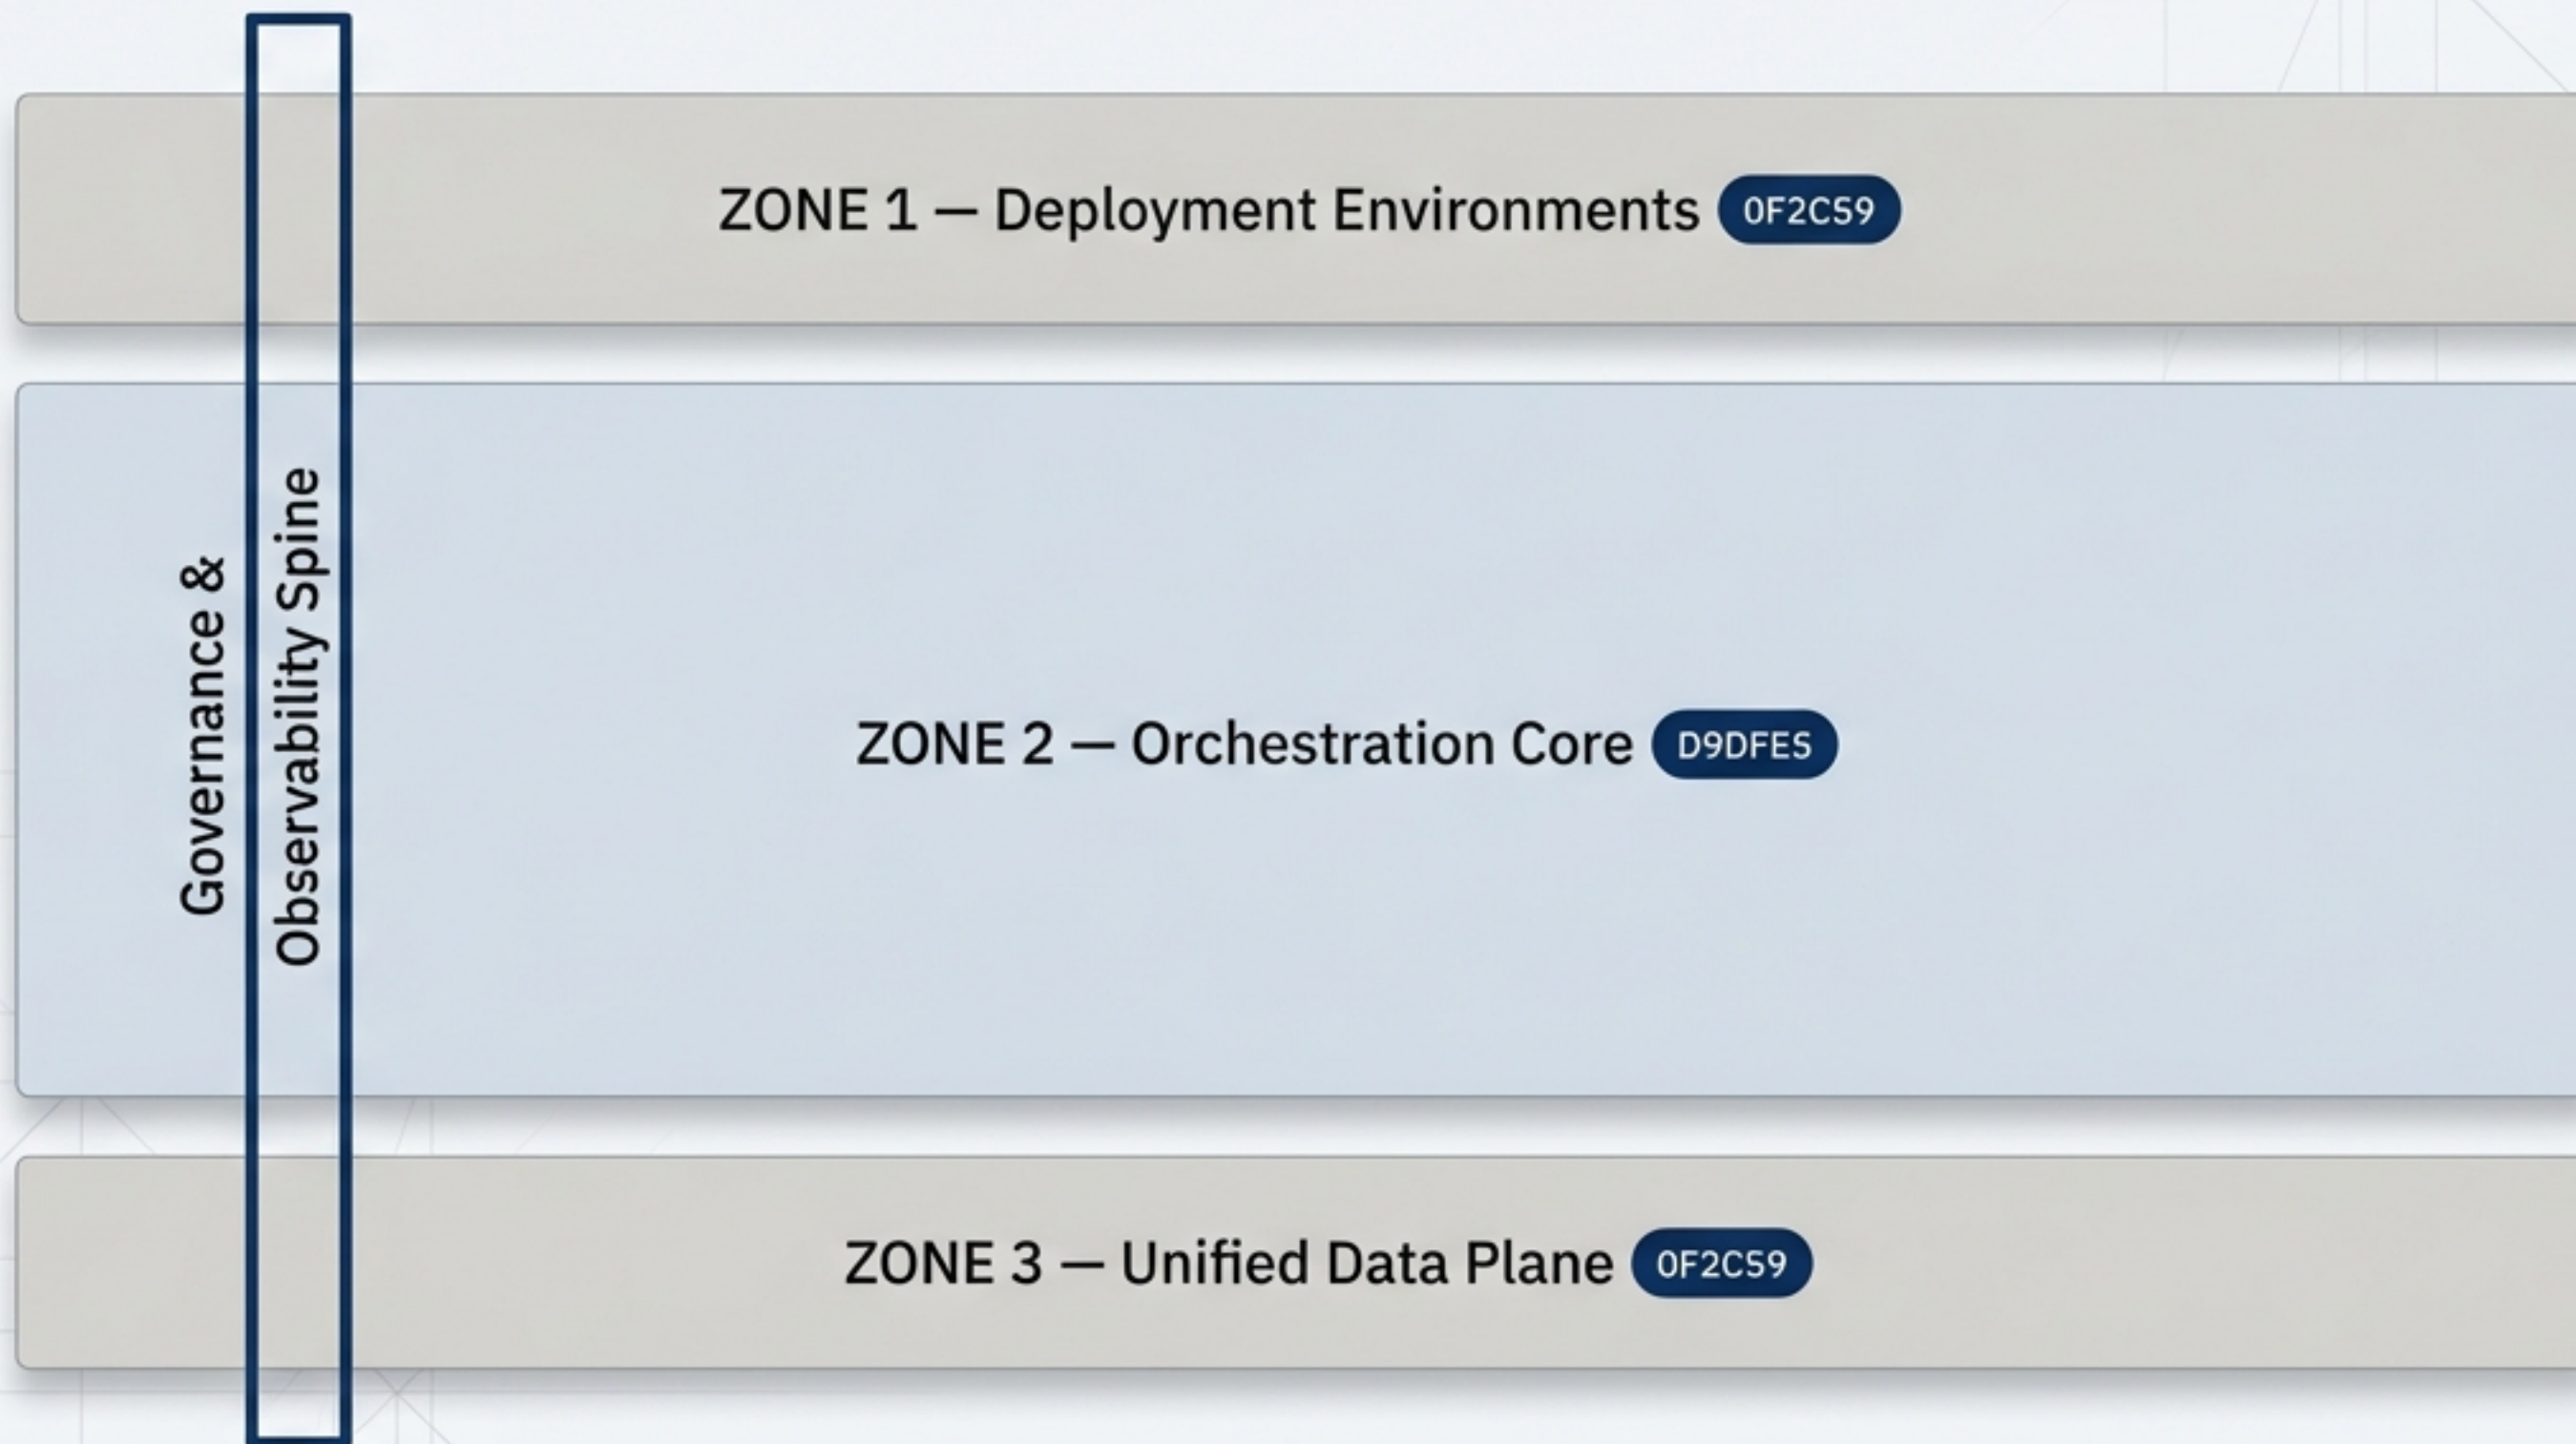

Activating infrastructure for high-stakes environments

SENTRAIS is not competing with hyperscalers. It activates and governs their infrastructure in high-stakes environments.

The Orchestration Architecture Blueprint

Three horizontal zones +
one vertical control plane

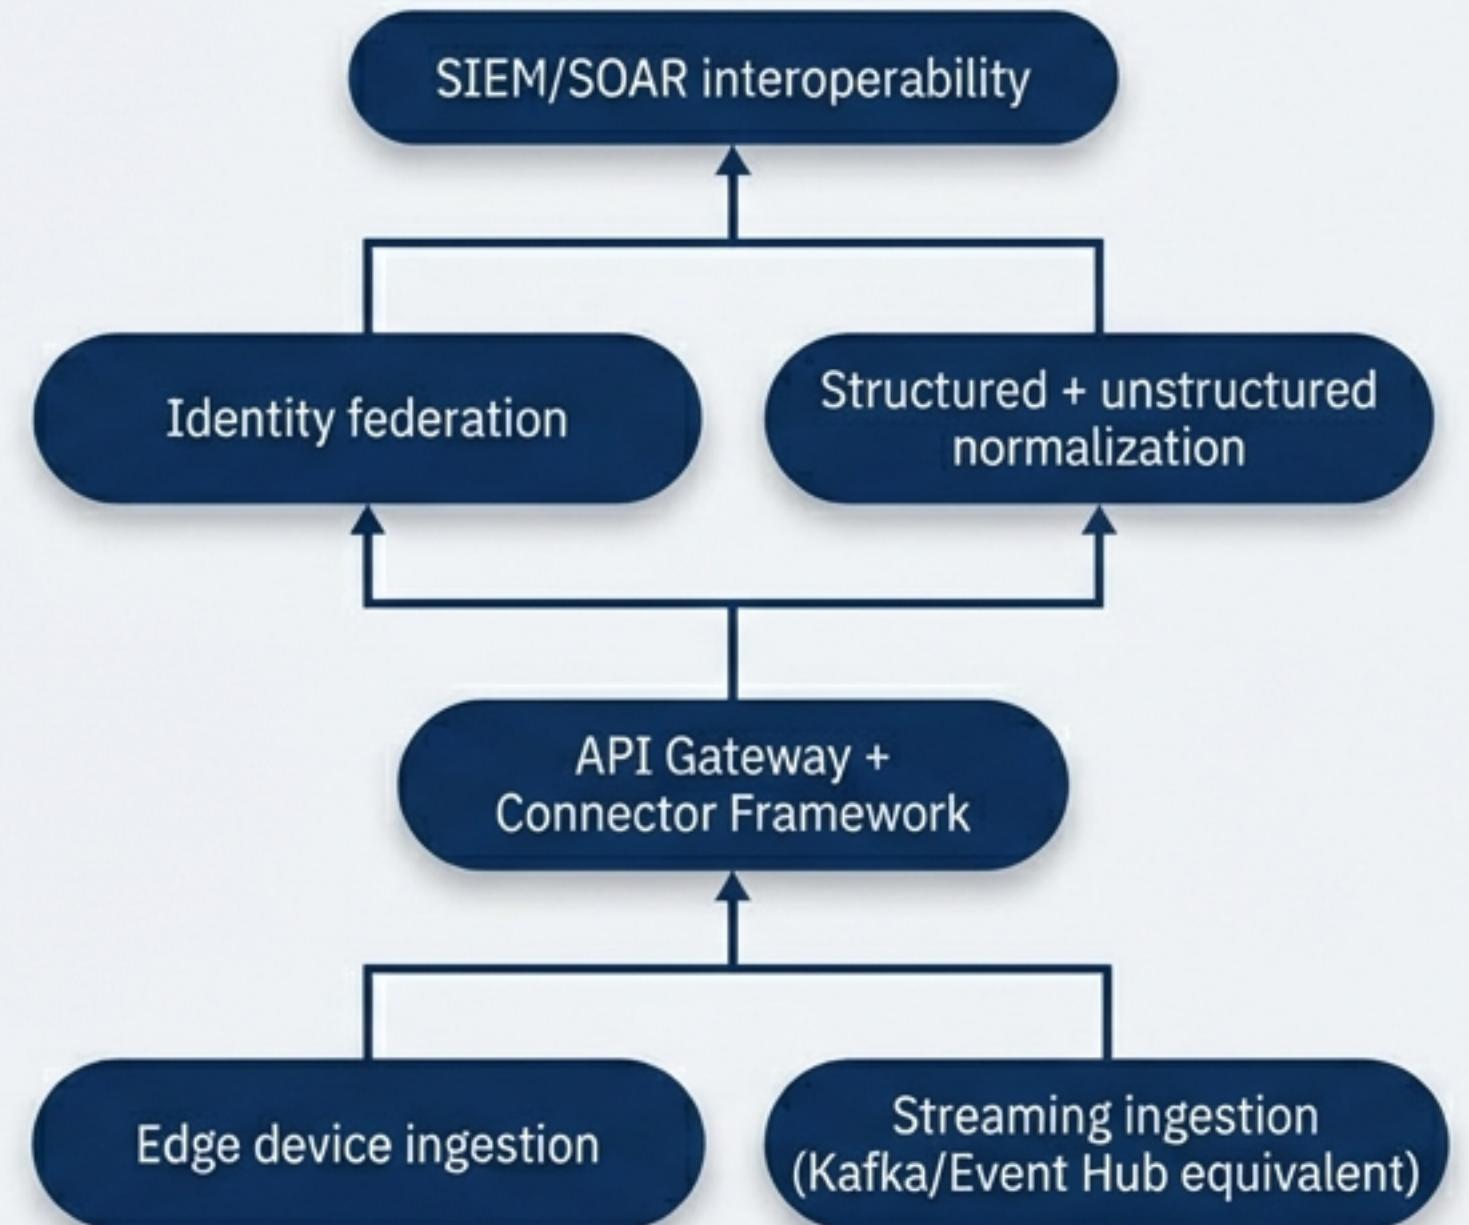

Zone 3 establishes secure data interoperability

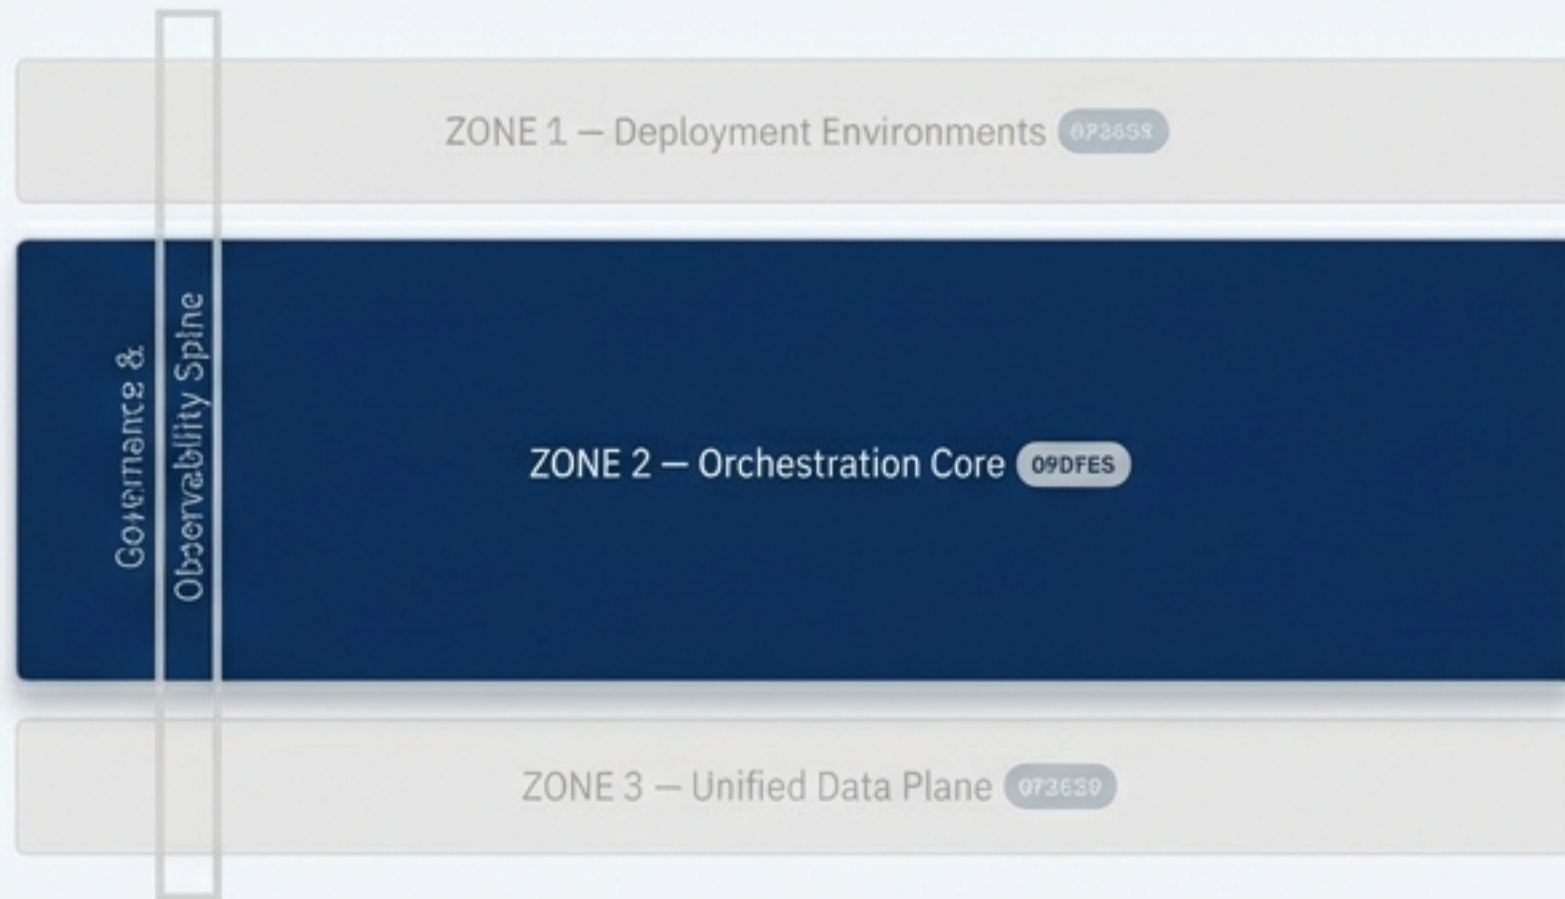

Secure Interoperability Layer

IBM Plex Sans

Cloud-agnostic | Extensible | Certified integration pathways

Zone 2 drives the operational intelligence control plane

Operational Intelligence Control Plane

IBM Plex Sans

Ecosystem
Graph Engine

Ledger

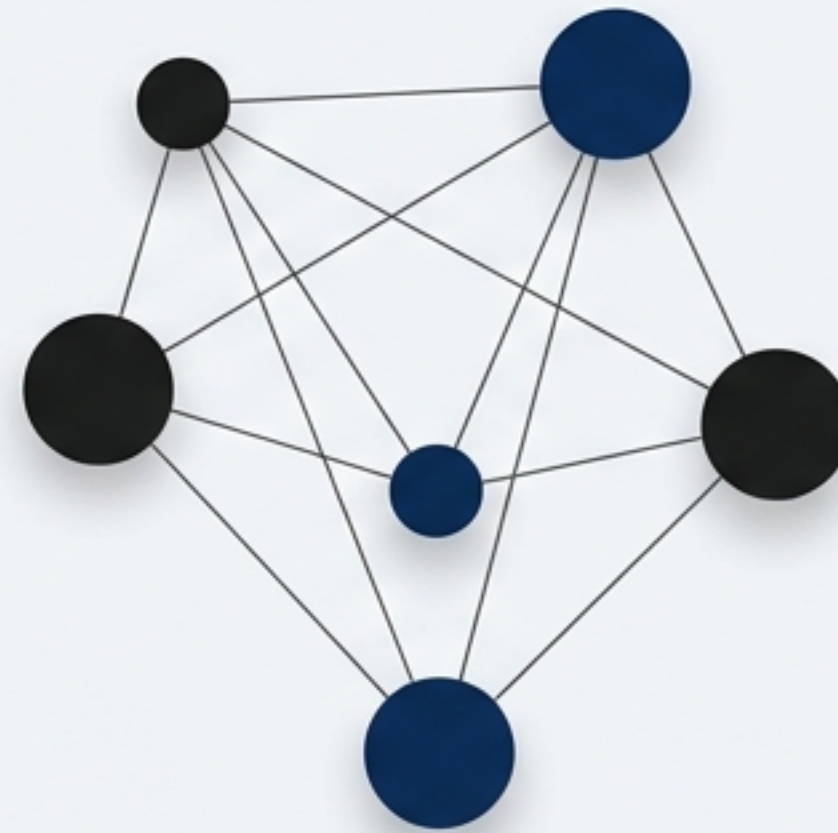

AI Governance
Layer

Blueprint360 maps ecosystem dependencies and risk

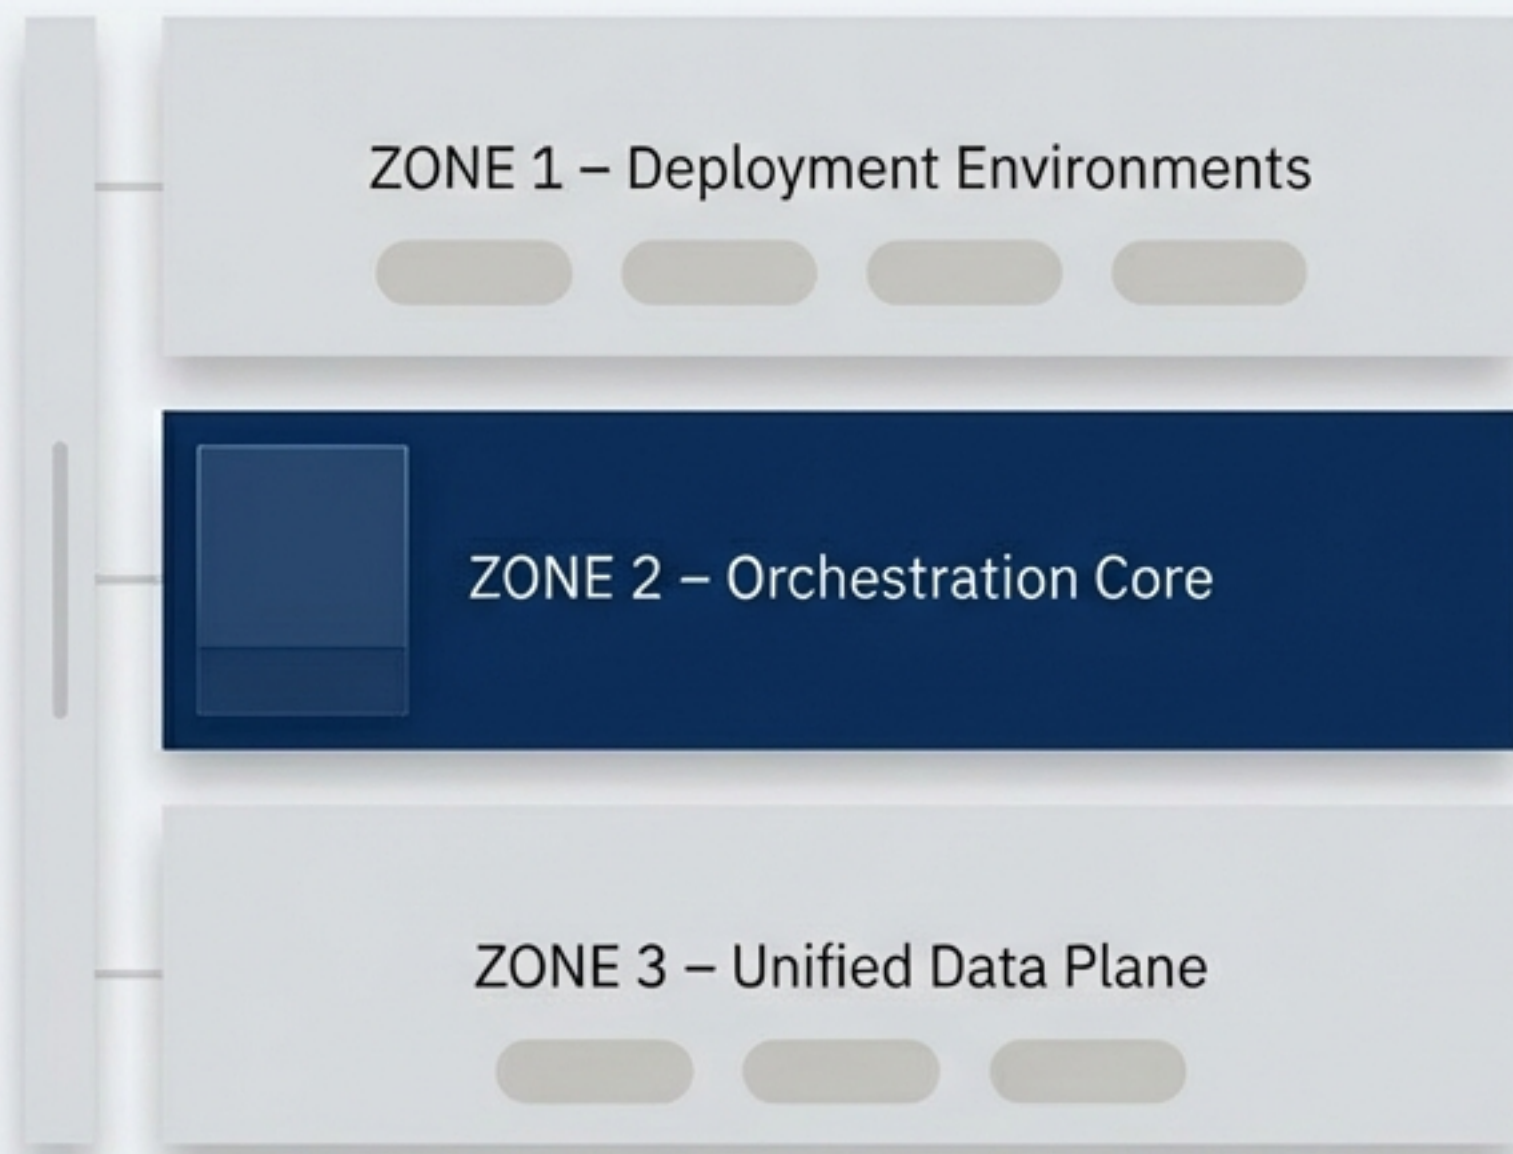

Module: Ecosystem Graph Engine (Blueprint360)

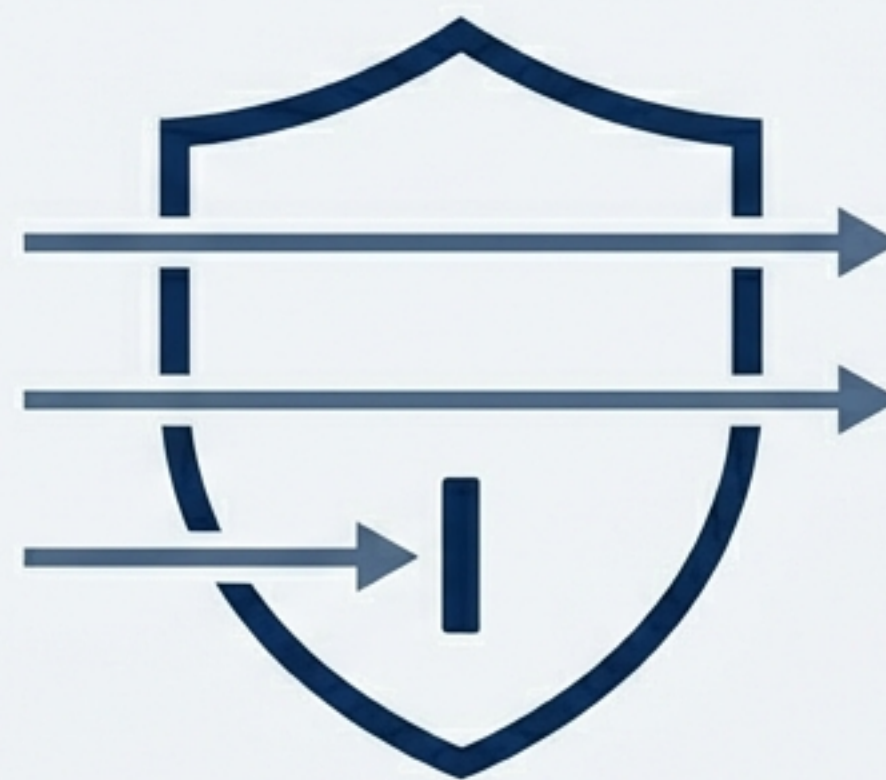

- ✓ Dependency modeling
- ✓ Asset topology mapping
- ✓ Risk surface scoring

The Decision Rights Engine enforces zero-trust authority

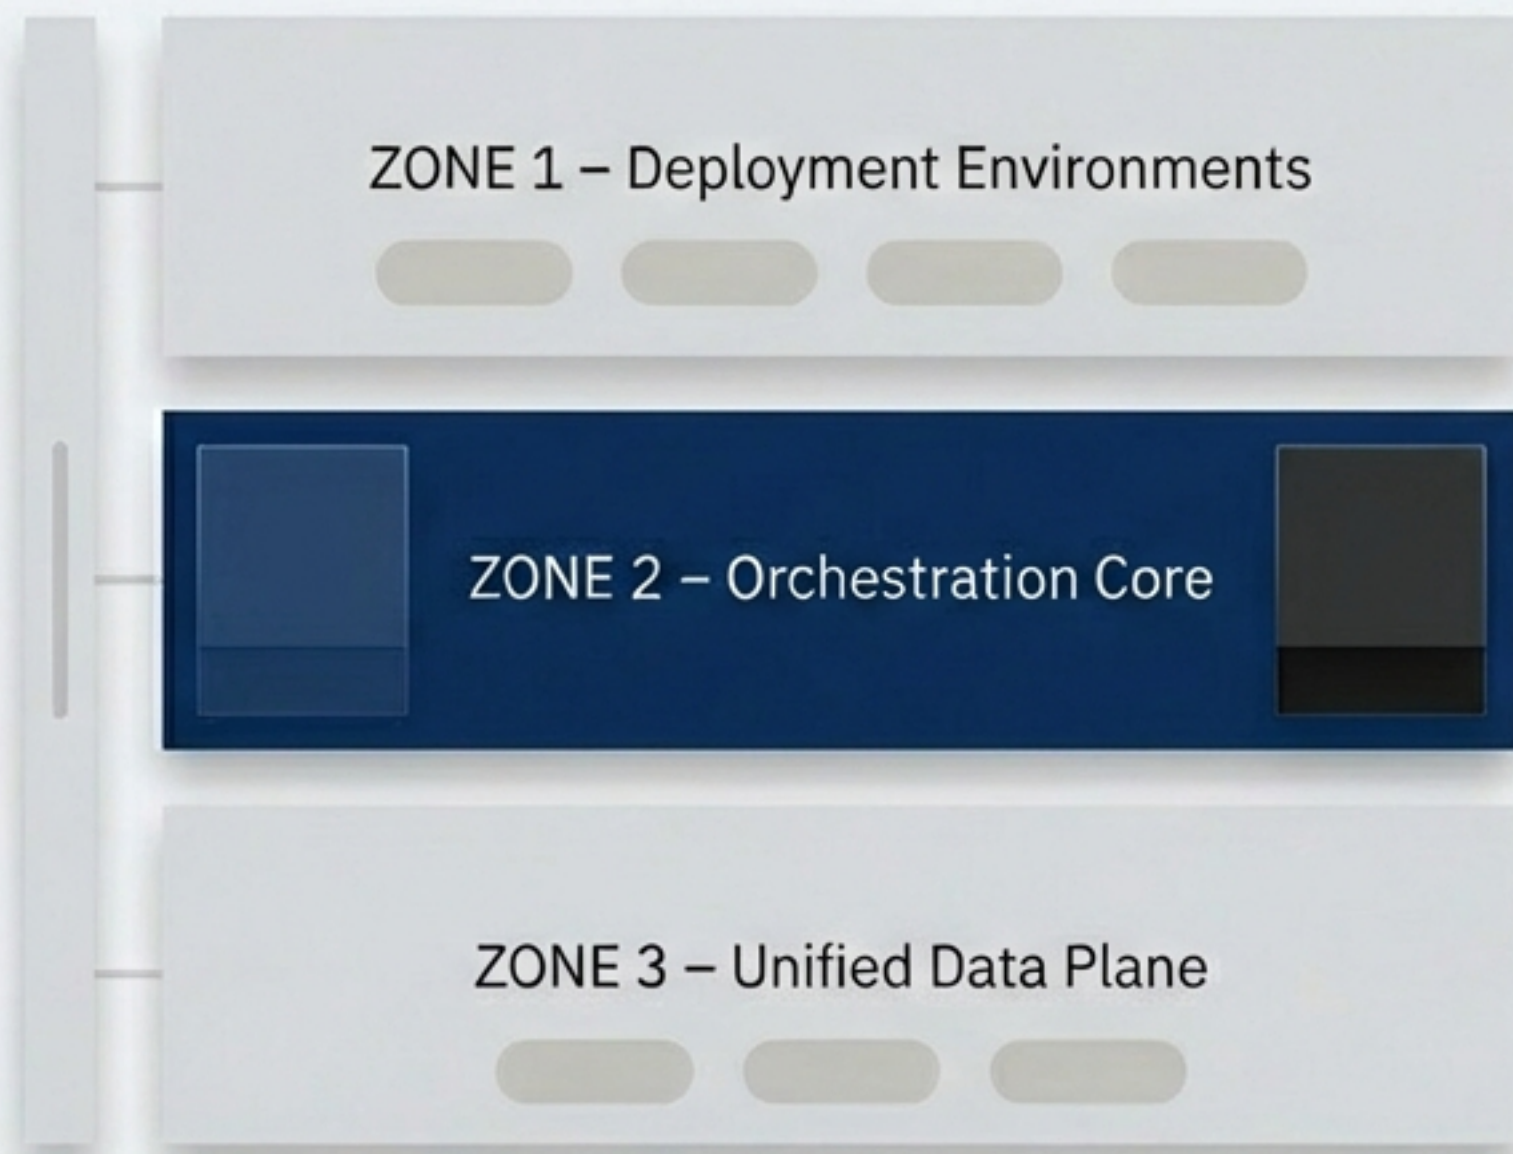

Module: Policy & Authority Engine (Decision Rights Engine)

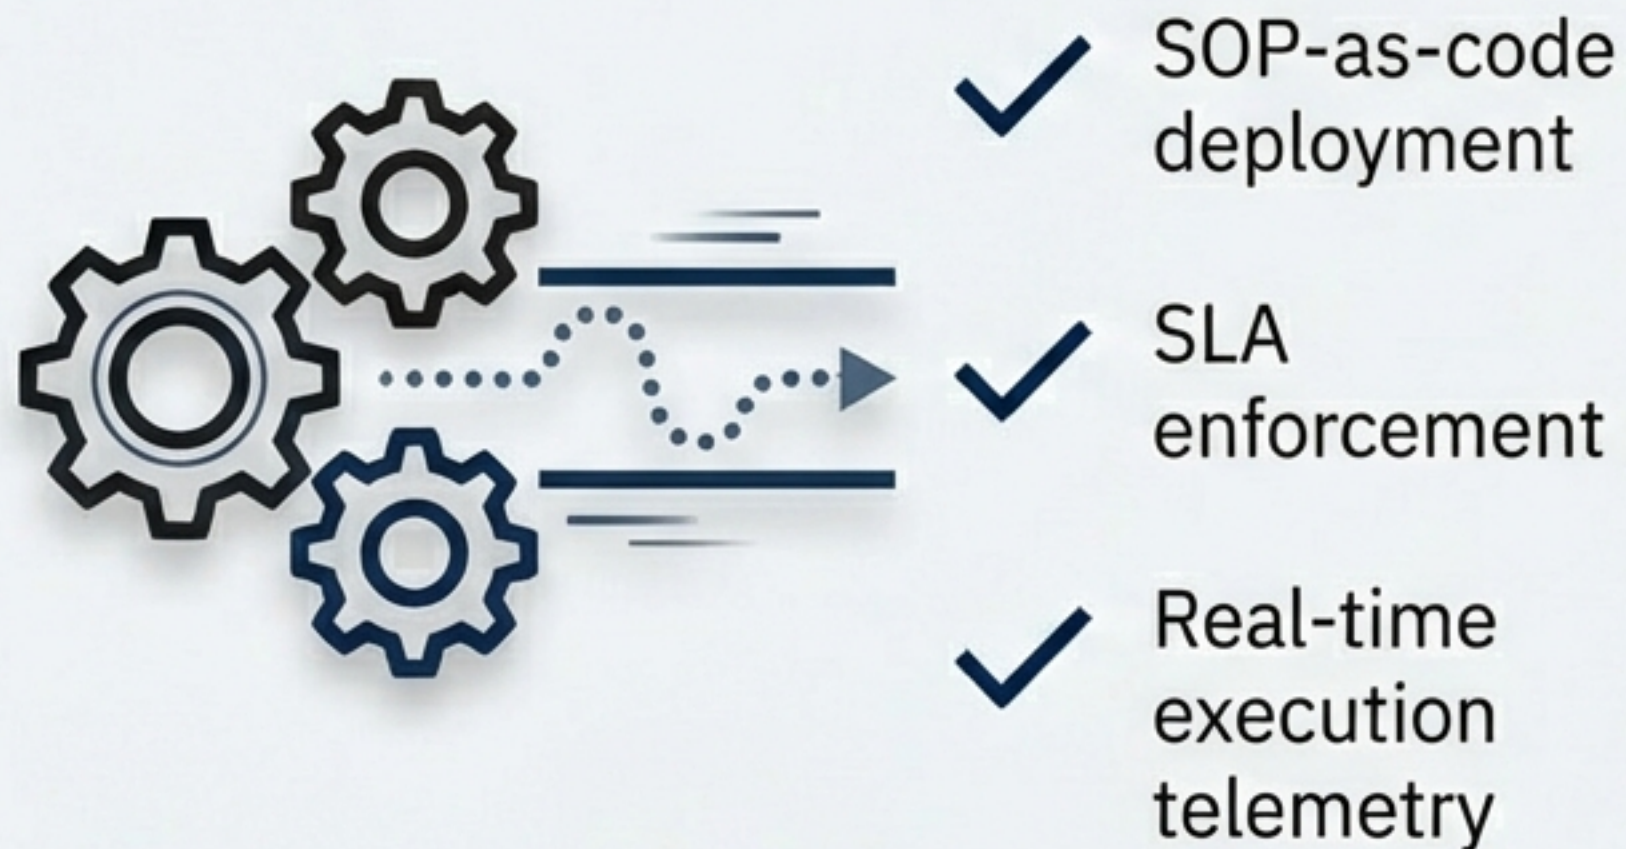

- ✓ RBAC / ABAC enforcement
- ✓ Escalation workflow automation
- ✓ Zero-trust operational gating

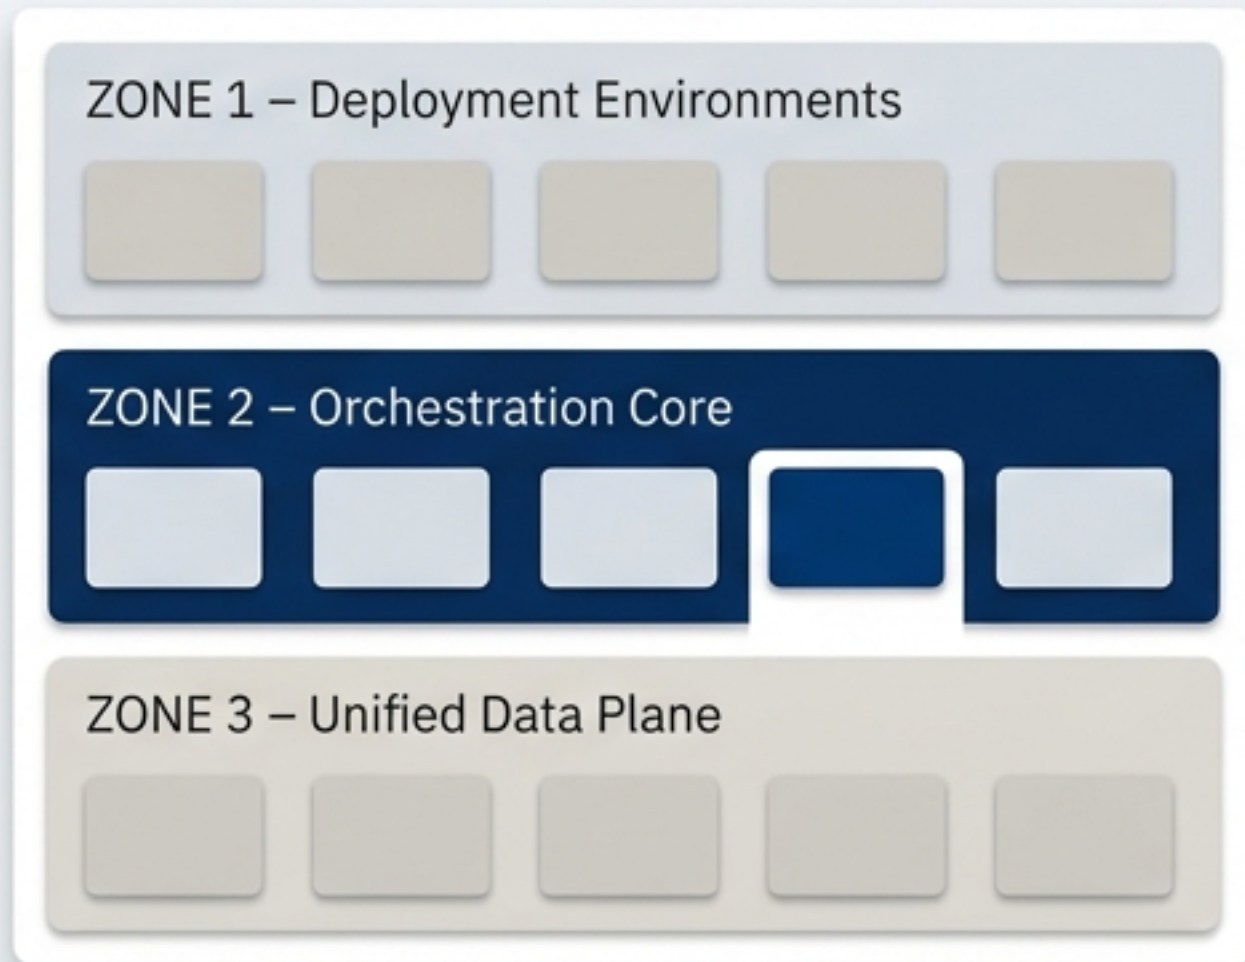

The Playbook Engine executes SOPs as code

Module: Execution Runtime (Playbook Engine)

The Compliance Ledger captures immutable custody chains

Module: Evidence & Compliance Ledger

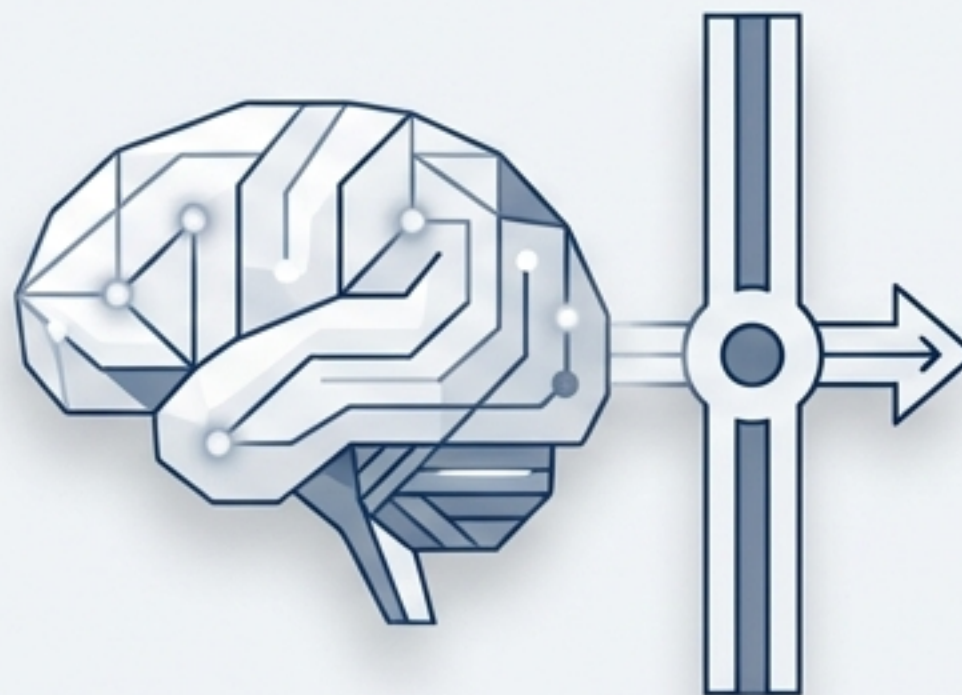

- ✓ Immutable event logging
- ✓ Chain-of-custody capture
- ✓ Regulatory traceability

AI Governance enforces human-in-the-loop validation

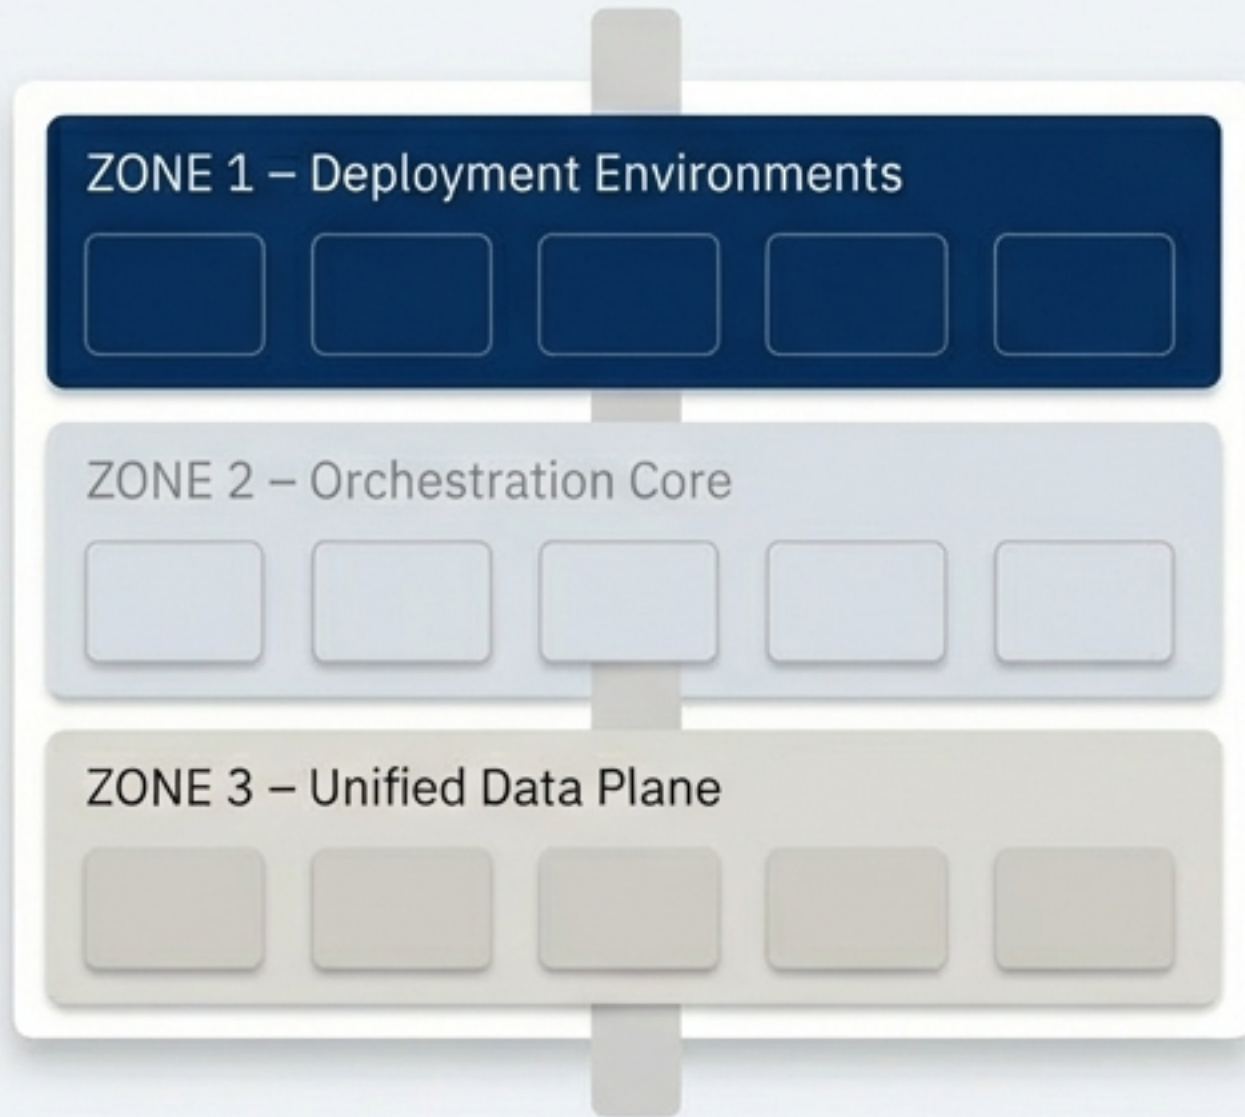

Module: AI Governance Layer

- ✓ Model validation gates
- ✓ Human-in-the-loop enforcement
- ✓ Drift detection + override protocol

Zone 1 targets high-stakes deployment environments

Sports & Live
Event Operations

Environments

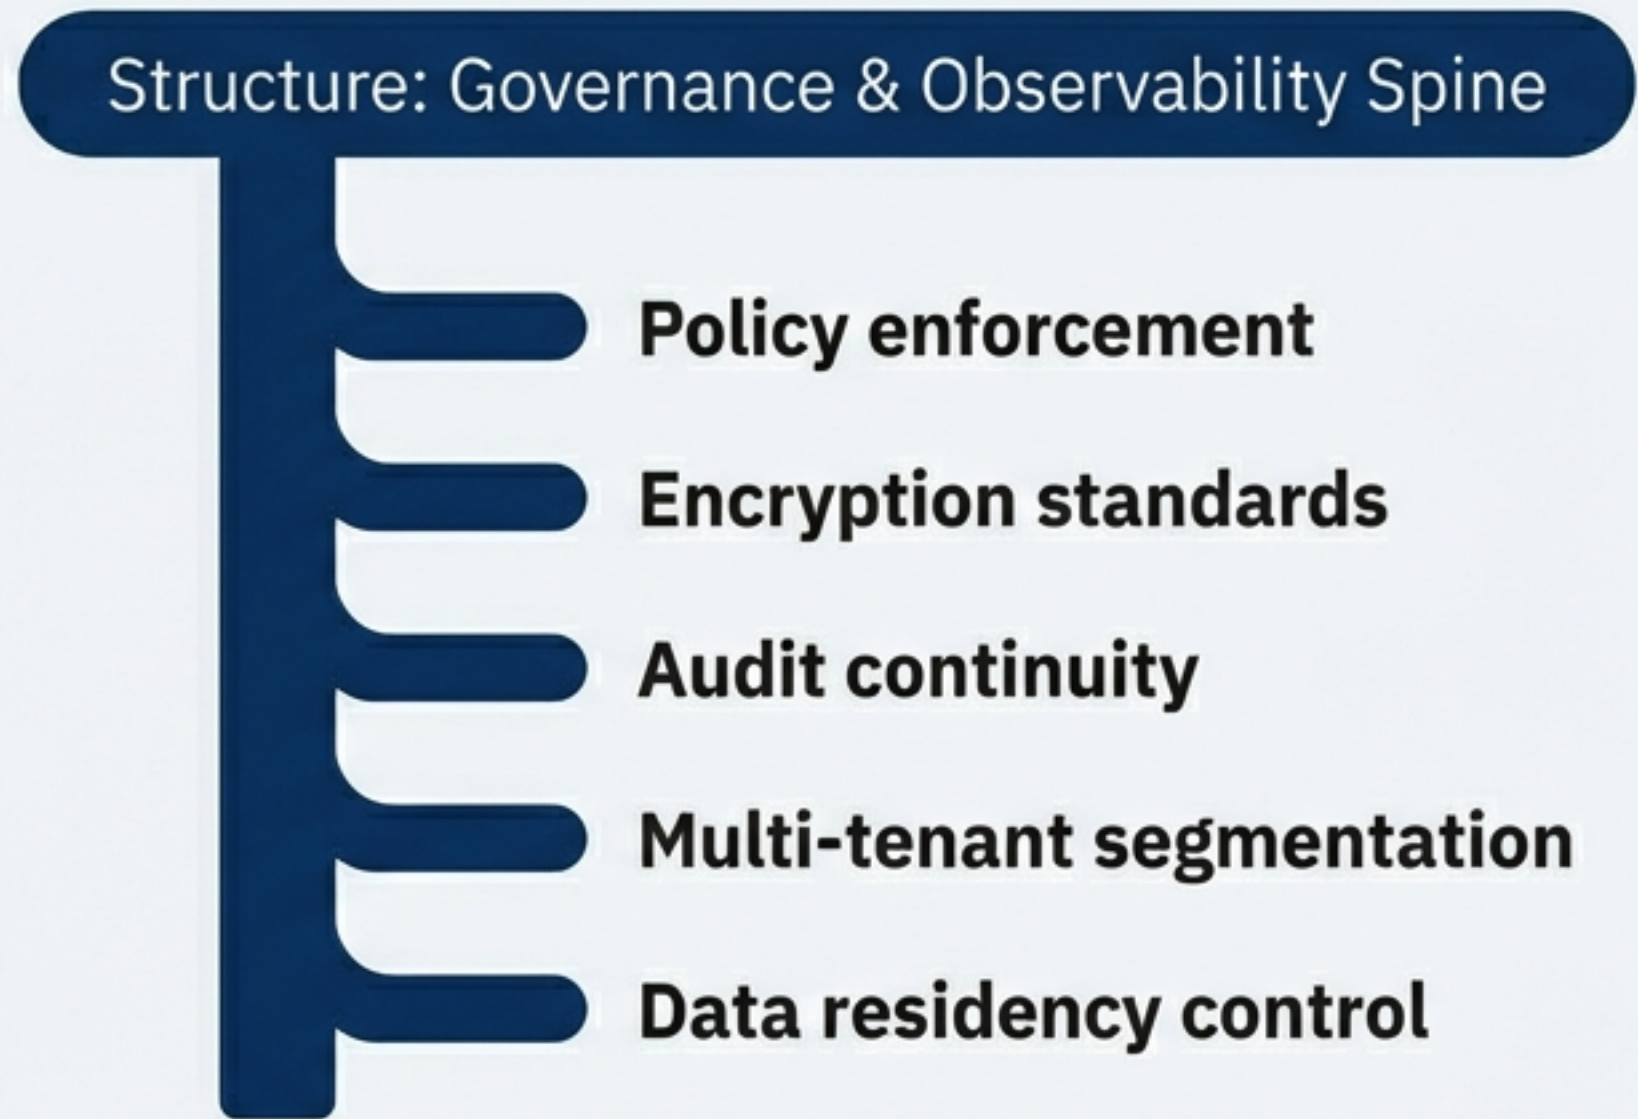

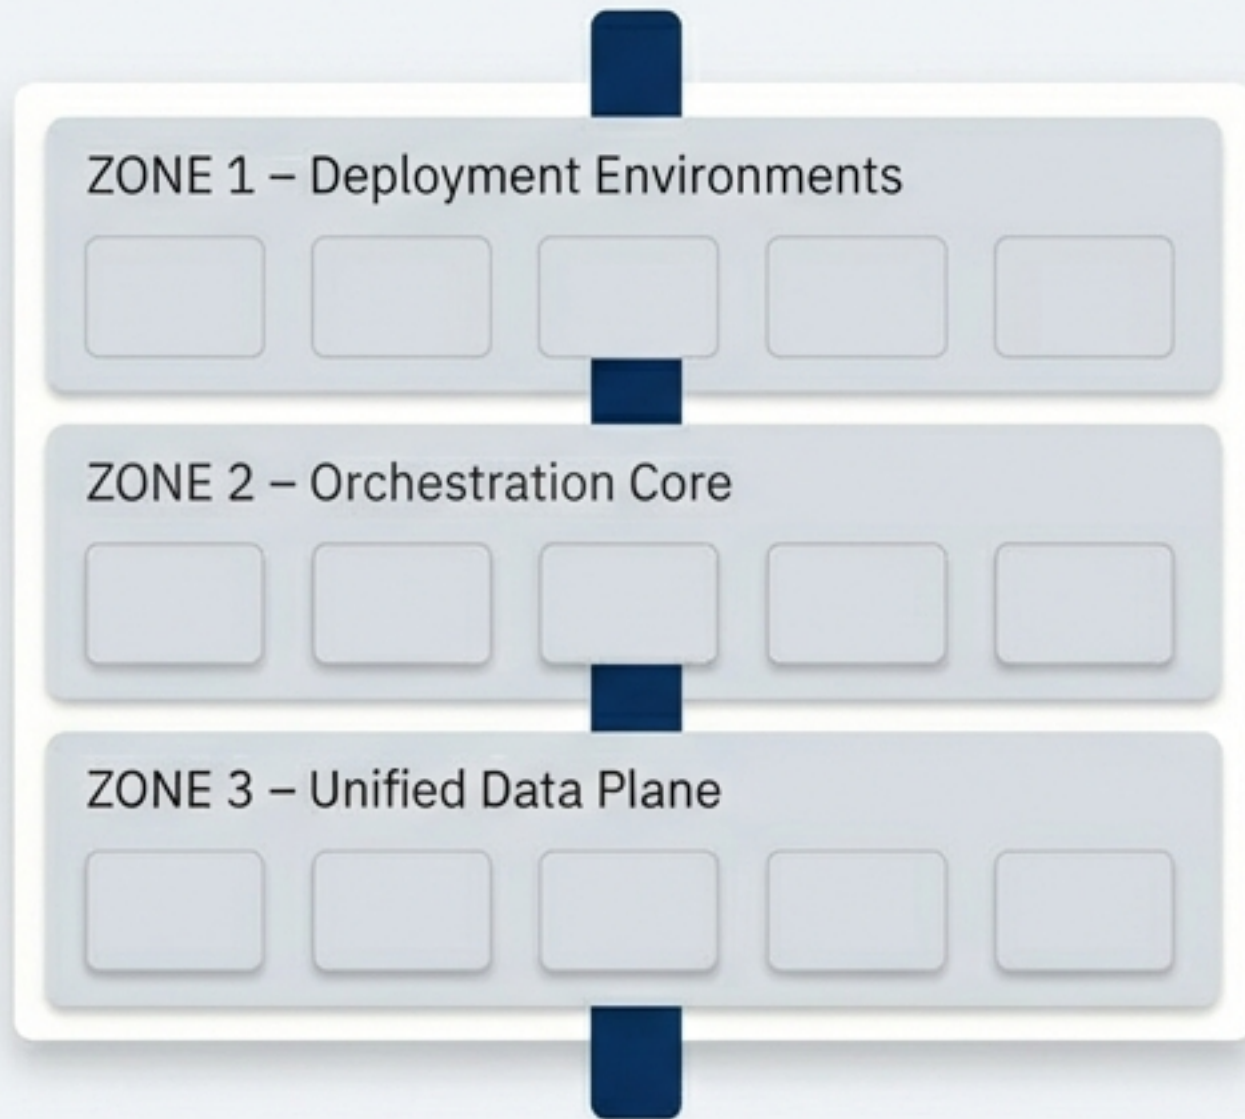

Venue &
Entertainment
Ecosystems

Boundless extensibility across the operational edge

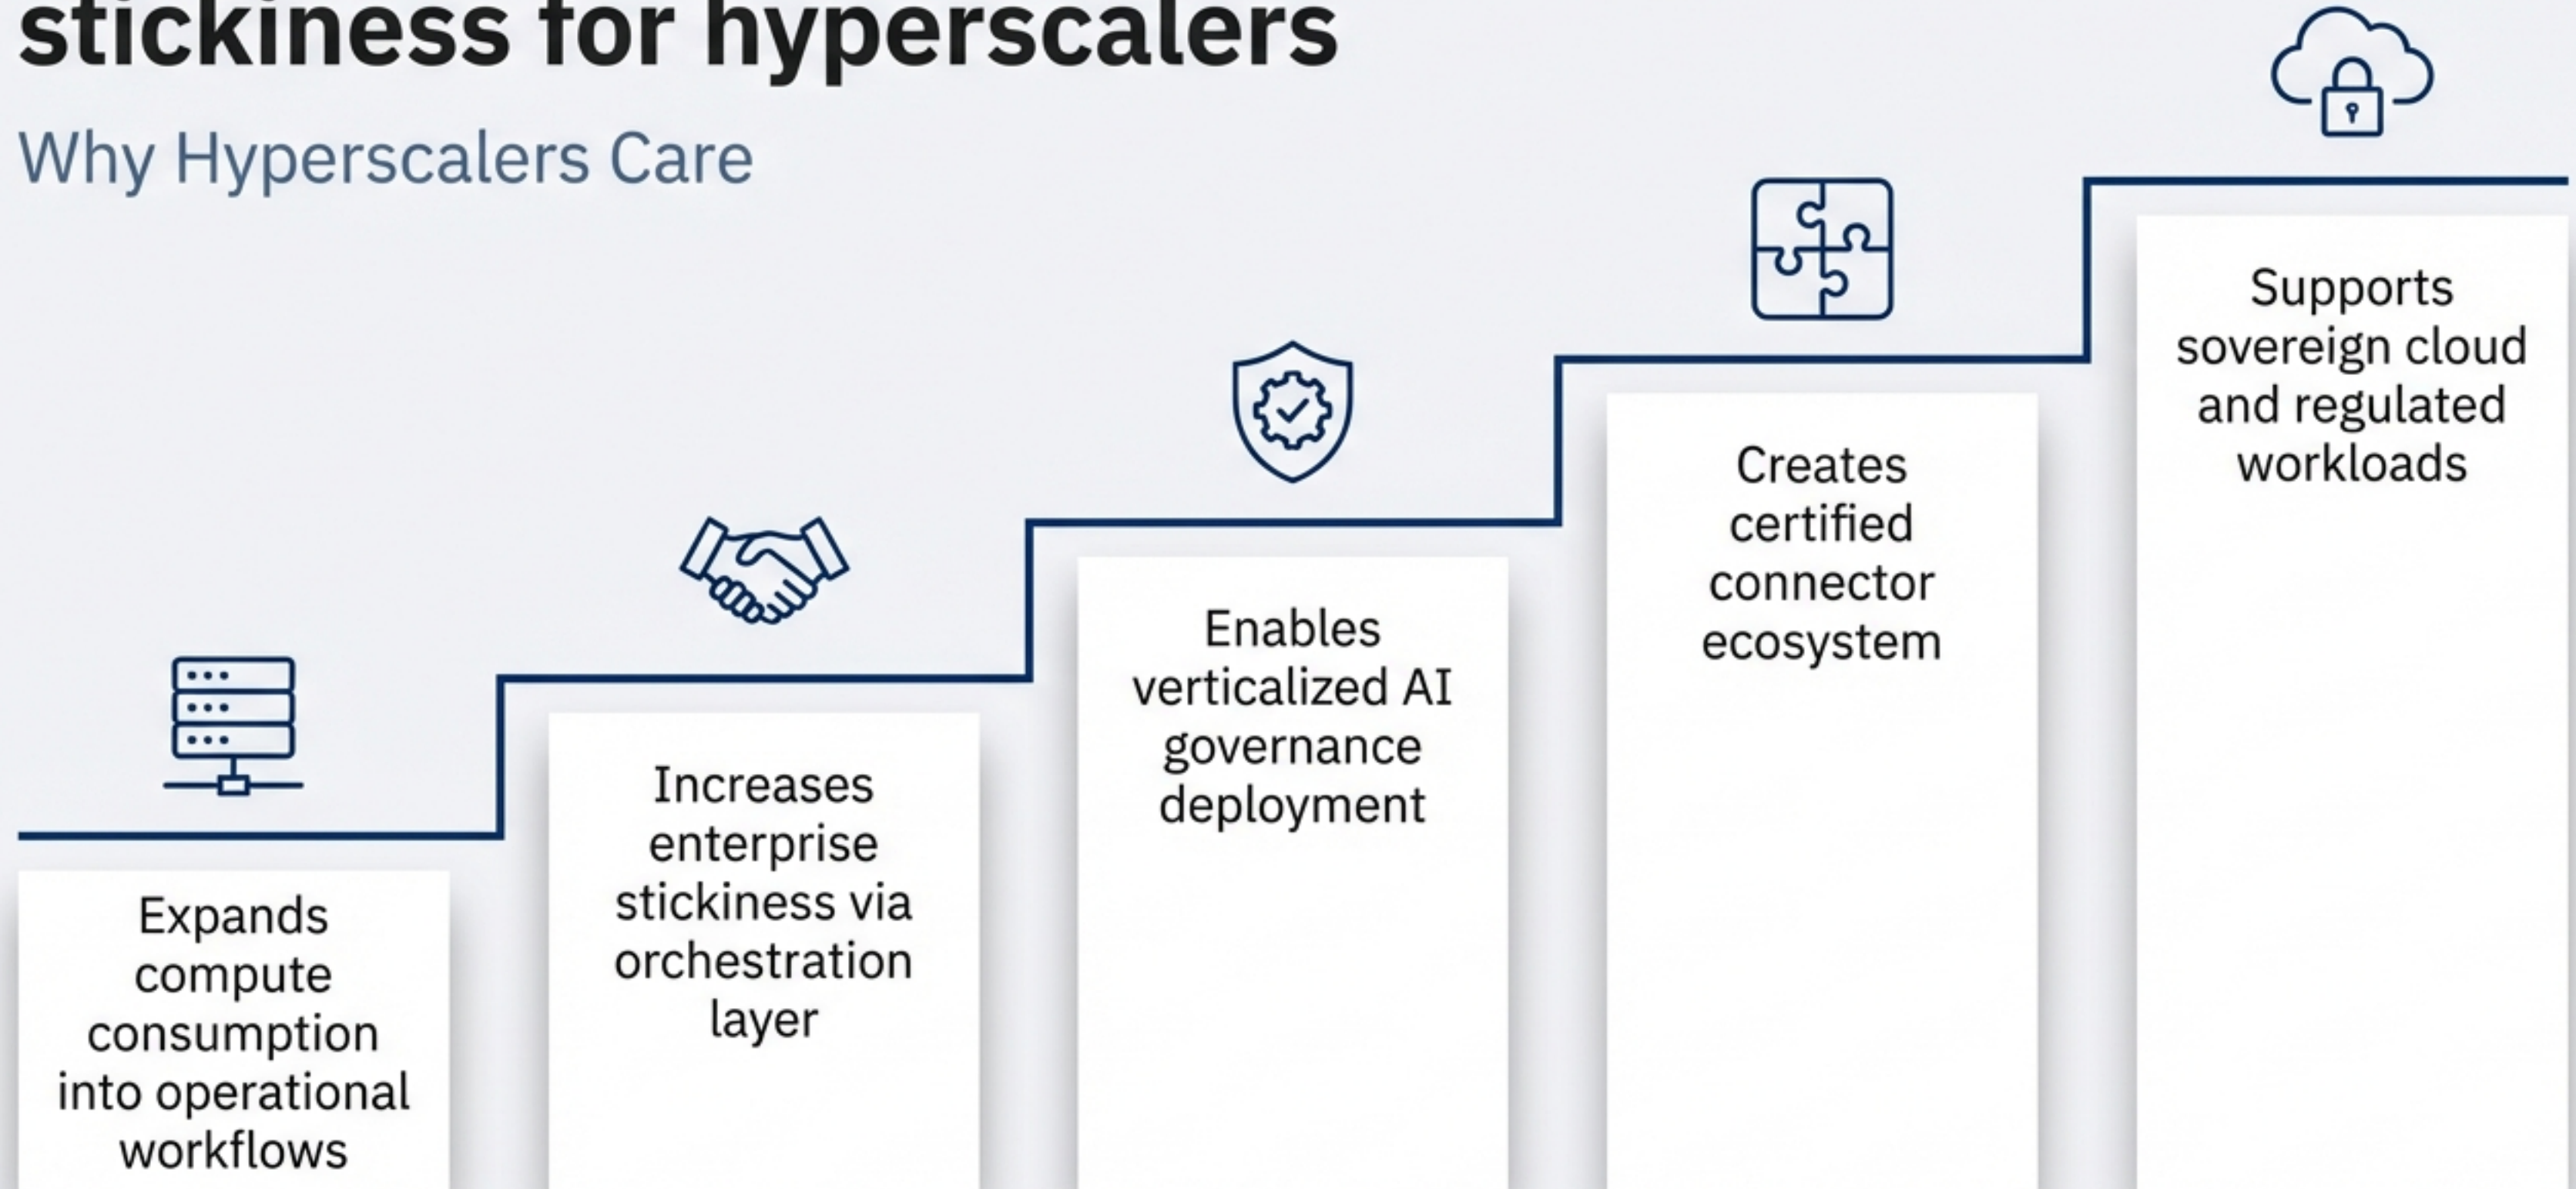

The Governance Spine guarantees compliance across all layers

Driving consumption and stickiness for hyperscalers

Why Hyperscalers Care

The essential orchestration layer for high-stakes environments

SENTRAIS delivers a Gartner-certified operational intelligence OS that transforms hyperscaler infrastructure into governed, actionable ecosystems.

Architecture ready for technical review.
