

SIPE TECH STACK & WORK-FLOW ARCHITECTURE

Visual Guide for Team Understanding

Version: 1.0 | **Date:** November 23, 2025

Purpose: Help team visualize how SIPE systems connect and automate workflows

DOCUMENT PURPOSE

This document provides **text-based diagrams** that can be:

1. Shared directly with team (text format)
2. Converted to professional diagrams in Framer/Canva
3. Used in presentations and training materials
4. Referenced during implementation

DIAGRAM 1: SIPE THREE-LAYER ARCHITECTURE

Key Takeaways:

- **Layer 1** = All your existing tools + new collaboration tools
- **Layer 2** = SIPE methodology, playbooks, and automation
- **Layer 3** = Machine learning that predicts and optimizes
- **n8n** = The glue that makes everything talk to everything

DIAGRAM 2: COMPLETE SYSTEM INTEGRATION MAP

DATA FLOW LEGEND:

- ▶ Automated data flow (via n8n)
- - - - -▶ Manual input/interaction
- =====> Bi-directional sync

Key Takeaways:

- **Every system talks to n8n** = One integration hub, not point-to-point spaghetti
- **HubSpot triggers** most workflows (deal close, contact update)
- **Nextcloud** is secure collaboration hub for all documents
- **Sentra** is source of truth for project intelligence

DIAGRAM 3: CLIENT ONBOARDING AUTOMATION (DETAILED)

TRIGGER: Deal Closed in HubSpot

```

|
├─ STEP 1: Extract Deal Data (n8n)
|   |
|   └─ Client Name: "NFL Innovation HUB"
|   └─ Client Email: stakeholder@nfl.com

```

- | └ Deal Value: \$150,000
- | └ Engagement Type: INCUBATION-CHALLENGE
- | └ Phase: P1 (Discovery)
- |
- | └ STEP 2: Create Nextcloud Folder Structure (Parallel)
- | |
- | | └ Create: /Clients/NFL_Innovation_HUB/
- | | |
- | | | └ /Discovery (P1)/
- | | | └ /Blueprinting (P2)/
- | | | └ /CoDesign (P3)/
- | | | └ /Pilot (P4)/
- | | | └ /Operationalization (P5)/
- | | | └ /Measurement (P6)/
- | | | └ /Deliverables/
- | | | |
- | | | | └ /Client_Facing/ ← (Client gets access here)
- | | | | └ /Internal/ ← (Team only)
- | |
- | | └ Time: 15 seconds
- |
- | └ STEP 3: Generate Secure Client Share Link
- | |
- | | └ Create share link for: /Deliverables/Client_Facing/
- | | └ Permissions: Read-only for client
- | | └ Expiration: 90 days
- | | └ Link: <https://nextcloud.novatelabs.com/s/xY4k2m...>
- | | └ Time: 5 seconds
- |
- | └ STEP 4: Create Sentrais Project Entry (Parallel)
- | |
- | | └ Project Name: NFL Innovation HUB
- | | └ Tags: [INCUBATION] [CHALLENGE] [P1]
- | | └ Deal Value: \$150,000
- | | └ Nextcloud Path: /Clients/NFL_Innovation_HUB/
- | | └ Status: Active
- | | └ Time: 5 seconds
- |
- | └ STEP 5: Send Welcome Email to Client
- | |

```

|   |   | To: stakeholder@nfl.com
|   |   | Subject: "Welcome to NOVATE - Your Project Portal"
|   |   | Body:
|   |   |   | Welcome message
|   |   |   | Portal access link (from Step 3)
|   |   |   | What's inside (documents, tracking, etc.)
|   |   |   | Next steps (kickoff meeting scheduled)
|   |   |   | NOVATE branding
|   |   | Time: 10 seconds
|
| STEP 6: Post Slack Notification
|
|   |   | Channel: #new-clients
|   |   | Message:
|   |   |   | 🎉 New Client Onboarded!
|
|   |   | Client: NFL Innovation HUB
|   |   | Type: INCUBATION-CHALLENGE
|   |   | Value: $150,000
|   |   | Phase: P1 - Discovery
|
|   |   | Nextcloud: /Clients/NFL_Innovation_HUB/
|   |   | Portal: [link]
|
|   |   | Next Steps:
|   |   |   | - Engagement Lead: Schedule kickoff (within 24hrs)
|   |   |   | - PM: Populate P1 templates
|   |   |   | - All: Review in Sentrais
|
|   |   | Time: 5 seconds
|
| STEP 7: Log to Evidence Ledger
|
|   |   | Project ID: [from Sentrais]
|   |   | Entry Type: Automation
|   |   | Phase: P1
|   |   | Description: "Client onboarding automated via n8n"
|   |   | Evidence:
|   |   |   | {

```

```
|      "workflow_execution_id": "n8n_12345",  
|      "nextcloud_path": "/Clients/NFL_Innovation_HUB/",  
|      "share_link": "https://nextcloud.novatelabs.com/s/...",  
|      "welcome_email_sent": true,  
|      "slack_posted": true,  
|      "timestamp": "2025-12-02T14:32:18Z"  
|    }  
└─ Time: 5 seconds
```

TOTAL EXECUTION TIME: 45 seconds (vs. 2-5 days manual)
SUCCESS RATE: 99.5% (with error handling & fallbacks)
HUMAN INTERVENTION REQUIRED: 0 minutes

WHAT HAPPENS NEXT (MANUAL):

- Engagement Lead schedules kickoff meeting (24 hours)
- PM populates P1 Discovery templates in Nextcloud
- Team reviews project in Sentrais
- Kickoff meeting held (Week 1)

Key Takeaways:

- **7 steps** that used to take 2-5 days now happen in 45 seconds
- **Zero errors** because automation follows exact process every time
- **Client delight** because they get access before they expect it
- **Evidence Ledger** automatically logs everything for audit trail

DIAGRAM 4: WEEKLY STATUS REPORT AUTOMATION

TRIGGER: Every Friday at 4pm (n8n schedule)

```

└─ Issues resolved

└─ STEP 3: Generate Report (Claude API)
  └─ Send to Claude Projects API:
    {
      "project_context": [all data from Step 2],
      "template": "Weekly Status Report",
      "client_name": "NFL Innovation HUB",
      "report_date": "2025-12-06"
    }
  └─ Claude generates:
    └─ Executive Summary (3-4 sentences)
    └─ Progress This Week (bullet points)
    └─ Key Achievements (2-3 highlights)
    └─ Challenges & Mitigations (if any)
    └─ Next Week Focus (top priorities)
    └─ Shared Accountability Metrics
      └─ Stakeholder Engagement: 85% ↑
      └─ Scope Stability: 92% ↑
      └─ Timeline: On track ✓
      └─ Budget: $45K of $150K spent (30%)
    └─ Next Steps with Owners

└─ STEP 4: Save to Nextcloud
  └─ Path: /Clients/[Name]/Deliverables/Client_Facing/
  └─ Filename: Weekly_Status_Report_2025-12-06.pdf
  └─ Also save: .docx version for internal editing
  └─ Set permissions: Client read-only, Team read-write

└─ STEP 5: Send Email to Client
  └─ To: Client stakeholders
  └─ CC: Engagement Lead, PM
  └─ Subject: "NFL HUB Weekly Update - December 6, 2025"
  └─ Body:

```

```

| | | | "Hi [Stakeholder],
| | | |
| | | | Your weekly project update is ready. This week's
| | | | highlights: [top 2 achievements].
| | | |
| | | | View full report: [Nextcloud link]
| | | |
| | | | Questions? Reply to this email or ping me on Slack.
| | | |
| | | | Best,
| | | | [Engagement Lead name]"
| | | |
| | | | └ Attachment: Weekly_Status_Report_2025-12-06.pdf
| | |
| | └ Time: 10 seconds per email
|
└ STEP 6: Log to Evidence Ledger
  |
  | └ Entry: "Weekly status report auto-generated and sent"
  | └ Evidence: Report PDF + email confirmation
  | └ Timestamp: 2025-12-06T16:05:32Z

```

TOTAL TIME PER REPORT: 2-3 minutes (vs. 45-60 min manual)
 WEEKLY TIME SAVED: 8 projects × 45 min = 6 hours/week
 ANNUAL TIME SAVED: 312 hours/year = 7.8 work weeks

Key Takeaways:

- **Every Friday at 4pm**, reports auto-generate for all active projects
- **PM doesn't write a single word** - AI synthesizes from all systems
- **Client gets consistent updates** - no more "sorry, running late on status report"
- **312 hours saved annually** - that's 2 months of PM time freed up

DIAGRAM 5: STAGE GATE WORKFLOW

TRIGGER: Engagement Lead clicks "Ready for Stage Gate Review"
in Sentrais (e.g., P2 → P3 transition)

Include: criteria checklist, evidence summary, recommendations, client sign-off template."

└ Claude generates comprehensive report:

└ EXECUTIVE SUMMARY

"Phase 2 (Blueprinting) substantially complete.
5 of 6 exit criteria met. Pending: client
sign-off on Operating Baseline. Recommend
expedited review meeting this week."

└ CRITERIA CHECKLIST (detailed breakdown)

└ EVIDENCE REVIEW (from Evidence Ledger)

└ PHASE 3 READINESS (team prepared, resources)

└ RISKS & MITIGATIONS

└ RECOMMENDATIONS & NEXT STEPS

└ STEP 3: Create Review Tasks (Jira)

└ Create Jira Epic: "P2→P3 Stage Gate - NFL HUB"

└ Create Tasks:

└ [] Schedule client sign-off meeting (Eng. Lead)

└ [] Present Operating Baseline (PM)

└ [] Obtain formal approval (Eng. Lead)

└ [] Update Sentrais to P3 (PM, after approval)

└ [] Kickoff P3 planning (Team, next Monday)

└ Assign to: Engagement Lead (owner)

└ STEP 4: Send Notifications

└ Slack #stage-gates channel:

" 🚦 STAGE GATE: NFL HUB (P2→P3)

Status: HOLD (pending client sign-off)

Criteria Met: 5/6 (83%)

Blocker: Client approval on Operating Baseline

- | | Action Required:
- | | @[Eng.Lead] - Schedule sign-off meeting this week
- | |
- | | View Report: [Nextcloud link]
- | | Jira Epic: [link]"
- | |
- | └ Email to Engagement Lead:
- | | Subject: "Action Required: NFL HUB Stage Gate P2→P3"
- | | Body: Summary + report link + Jira tasks
- | |
- | └ Dashboard Update (Sentrais):
- | | Status badge: "Stage Gate In Progress" (yellow)
- | |
- | └ STEP 5: Monitor & Follow-Up
- | |
- | └ n8n checks daily:
- | | "Is client sign-off task complete in Jira?"
- | |
- | └ If No after 3 days:
- | | └ Send reminder to Engagement Lead
- | | | "Still pending: NFL HUB client sign-off.
- | | | Blocking P3 transition. Need assistance?"
- | |
- | └ If Yes:
- | | └ Proceed to Step 6
- | |
- | └ STEP 6: Approve & Transition (Manual → Automated)
- | |
- | └ Engagement Lead clicks: "Approve Stage Gate"
- | |
- | └ n8n automation:
- | | |
- | | └ Update Sentrais: Phase = "P3" (Co-Design)
- | | └ Update Jira: Close P2 tasks, create P3 sprint
- | | └ Nextcloud: Create P3 folder structure (if needed)
- | | └ Evidence Ledger: Log stage gate approval with
- | | | all evidence (report, sign-off, criteria met)
- | | |
- | └ Send success notification (Slack):

```
| | "✅ APPROVED: NFL HUB now in Phase 3 (Co-Design)
| |
| | Transition approved by: [Eng. Lead]
| | Date: 2025-12-08
| | All criteria met: 6/6 ✓
| |
| | P3 kickoff: Monday 9am (calendar invite sent)"
| |
| └─ Client email:
|     "Exciting news! We're advancing to Phase 3..."
|
| └─ ML Model Update:
|     "Successful P2→P3 transition for INCUBATION-CHALLENGE
|     engagement. Update churn prediction model with
|     positive outcome data."
```

RESULT: Stage gate that used to take 1-2 weeks of back-and-forth now completes in 2-3 days with clear tracking

Key Takeaways:

- **Stage gates are now systematic**, not ad-hoc "when we remember"
- **Criteria automatically checked** against real data, not PM guessing
- **Evidence Ledger enforces** documentation before progression
- **Churn prevention works** because unclear transitions are biggest risk

DIAGRAM 6: DATA FLOW SUMMARY

DATA FLOW TYPES:

1. CLIENT → NEXTCLOUD
 - Client uploads feedback/docs
 - Client views deliverables
2. HUBSPOT → n8n → ALL SYSTEMS
 - Deal close triggers onboarding
 - Contact updates sync everywhere
3. SENTRAIS → n8n → NEXTCLOUD/SLACK
 - Project status changes notify team
 - Stage gates trigger reviews
4. CLAUDE → NEXTCLOUD
 - Generated content saved automatically
 - Templates populated with data
5. ALL SYSTEMS → EVIDENCE LEDGER
 - Every action logged for audit

- Decisions tracked with evidence

6. ML MODELS → SENTRAIS → SLACK

- Churn predictions alert team
- Portfolio optimization recommendations

DIAGRAM 7: TEAM WORKFLOW (ENGAGEMENT LEAD PERSPECTIVE)

MONDAY MORNING - ENGAGEMENT LEAD'S WEEK WITH SIPE

08:00 - Login to Sentrais Dashboard

- |
- |— View Portfolio Health:
 - | • 3 projects in Green (on track)
 - | • 1 project in Yellow (needs attention)
 - | • 🚨 ML Alert: "NFL HUB stakeholder engagement dropping"
- |
- |— Click ML Alert to investigate:
 - | • Stakeholder: CTO hasn't responded to 3 emails
 - | • Recommendation: "Schedule 1:1 this week"
 - | • Context: "Similar pattern preceded churn in Project X"
- |
- |— Action: Schedule CTO 1:1 for Wednesday (15 min manual work)

09:00 - Client Kickoff Meeting (New Project)

- |
- |— Before Meeting (Auto-Prepared by SIPE):
 - | • Kickoff deck auto-generated (Plus AI)
 - | • Stakeholder mapping pre-filled (from HubSpot)
 - | • Nextcloud folder ready with templates
 - | • Evidence Ledger initialized

- |
- |— During Meeting (Using SIPE):
 - | • Present kickoff deck (already branded)
 - | • Share Nextcloud portal link (already generated)
 - | • Walk through Phase 1 deliverables (playbook checklist)
- |
- |— After Meeting (Auto-Logged):
 - | • Meeting notes uploaded to Nextcloud
 - | • Action items automatically created in Jira
 - | • Evidence Ledger entry: "Kickoff complete, client aligned"

11:00 - Address NFL HUB Stakeholder Issue

- |
- |— Ask Claude Projects (SIPE Master):
 - | "CTO not responding for 2 weeks on TRANSFORMATION project.
 - | What's the playbook guidance?"
- |
- |— Claude provides:
 - | • Playbook: TRANSFORMATION-CHALLENGE-P2-Stakeholder-Management
 - | • Specific tactics for re-engaging executive stakeholders
 - | • Template: "Executive Re-Engagement Email"
 - | • Warning: "Resolve by EOW or escalate to Stage Gate hold"
- |
- |— Action: Send re-engagement email (5 min with template)

14:00 - Weekly Status Reports

- |
- |— Before SIPE: 3 hours writing 3 reports
- |
- |— With SIPE:
 - | • All 3 reports auto-generated Friday 4pm
 - | • Already sent to clients
 - | • Engagement Lead reviews for 15 min
 - | • Makes minor edits if needed
 - | • Done.
- |
- |— Time saved: 2 hours 45 minutes

16:00 - Stage Gate Review (Project Sigma)

|
└ Before SIPE: 2-3 weeks of prep, tracking, meetings
|
└ With SIPE:
|

- Stage gate report auto-generated
- All criteria auto-checked against data
- Evidence Ledger complete (auto-logged all quarter)
- Jira tasks created for remaining items
- Client sign-off template ready

└ Action: Review report (30 min), schedule client meeting

FRIDAY 16:05 - Automated Actions Complete

|
└ Slack notification:
|

- " All weekly status reports sent (3 projects)
-  Stage gate review ready (Project Sigma)
-  New client onboarded (Project Delta)
-  1 ML alert this week (NFL HUB - addressed)

|

Your week: 20 hours saved via automation ⚡ "

└ Engagement Lead goes home at 4pm instead of 7pm

ENGAGEMENT LEAD WEEKLY TIME BREAKDOWN:

Before SIPE:

- Status reports: 6 hours/week
- Stage gate prep: 4 hours/week
- Client onboarding: 3 hours/week
- Document creation: 5 hours/week
- Template hunting: 2 hours/week

TOTAL: 20 hours/week on admin = 50% of time

With SIPE:

- Status report review: 1 hour/week
- Stage gate review: 1 hour/week
- Client onboarding: 30 min/week

- Document review: 1 hour/week
- Template use: 0 hours/week
TOTAL: 3.5 hours/week on admin = 8.75% of time

RESULT: 16.5 hours/week freed for strategy, client work,
innovation = 41% time back for high-value work

Key Takeaways:

- **Engagement Leads** spend 50% less time on admin, 100% more on strategy
- **ML alerts are actionable** - not just "FYI" but "here's what to do"
- **Everything is pre-prepared** - meetings, reports, templates
- **Better work-life balance** - automation works while you sleep

DIAGRAM 8: SECURITY & IP PROTECTION LAYER (SIPL)

EXAMPLE: Architecture Team Dashboard

SYSTEM EFFICIENCY DASHBOARD (Architecture Team)
Automation Coverage: 75% ↑ (Target: 80% by Q1 2026)
Average Workflow Execution Time:

• Client Onboarding: 45 sec (vs 2-5 days manual)	
• Status Reports: 2 min (vs 45 min manual)	
• Stage Gates: 3 days (vs 1-2 weeks manual)	
System Health:	
• Nextcloud: 99.9% uptime ✓	
• n8n: 473 workflows, 99.5% success ✓	
• API calls: 12,450 this week ✓	
Optimization Recommendations:	
1. Increase Nextcloud storage (85% capacity)	
2. Optimize n8n workflow #47 (slow execution)	
3. Consider caching for frequently-accessed docs	
Anonymized Project Performance:	
• Project A (INCUBATION-CHALLENGE): Green	
• Project B (TRANSFORMATION-COCREATE): Yellow	
• Project C (PERFORMANCE-OPS): Green	
Tech Stack ROI:	
• Hours saved weekly: 85 hours	
• Automation value: \$8,500/week	
• Infrastructure cost: \$248/week	
• Net value: \$8,252/week (3,329% ROI)	

NOTE: Architecture team sees efficiency metrics ONLY.
They cannot drill down to see "Project A" = NFL HUB
or access any client documents/communications.

Key Takeaways:

- **Architecture team gets what they need** (efficiency data) WITHOUT seeing client secrets
- **Security by design**, not by policy - SIPL enforces at system level
- **Enables collaboration** without compromising confidentiality

- **Trust but verify** - audit logs track all access attempts

USAGE INSTRUCTIONS

How to Use These Diagrams:

1. For Team Training:

- Print Diagrams 1-3 as handouts
- Walk through each system connection
- Use Diagram 7 (Engagement Lead workflow) for role-specific training

2. For Executive Presentations:

- Use Diagram 1 (Three-Layer Architecture) for high-level vision
- Use Diagram 6 (Data Flow Summary) for "how it all connects"
- Use ROI examples from Diagram 7 for business case

3. For Technical Implementation:

- Use Diagram 3 (Client Onboarding) as n8n workflow blueprint
- Use Diagram 4 (Status Reports) for Claude API integration
- Use Diagram 5 (Stage Gates) for Evidence Ledger requirements

4. For Client Communications:

- Use simplified version of Diagram 3 to show "instant onboarding"
- Use ROI metrics from Diagram 4 to show "consistent communication"
- Do NOT show internal architecture details (SIPL)

5. For Visual Design (Framer/Canva):

- Convert text diagrams to professional flowcharts
- Use NOVATE brand colors
- Add icons and visual elements
- Create interactive versions for microsites

NEXT STEPS

To Create Professional Visuals:

1. **Use Framer** for interactive web diagrams:
 2. Hover states showing detail
 3. Click-through for each system
 4. Animated data flows
5. **Use Canva** for static diagrams:
 6. Training handouts
 7. Presentation slides
 8. Posters for office
9. **Use Claude Projects** to generate more:
10. "Create diagram for [specific workflow]"

11. "Expand on [specific system integration]"

12. "Show [role] perspective for [process]"

END OF TECH STACK & WORKFLOW ARCHITECTURE

These diagrams are ready to share with your team, convert to professional visuals, or use as implementation blueprints.
