

Sentra's Innovation OS

The Outcome Owner Blueprint & Transition Guide

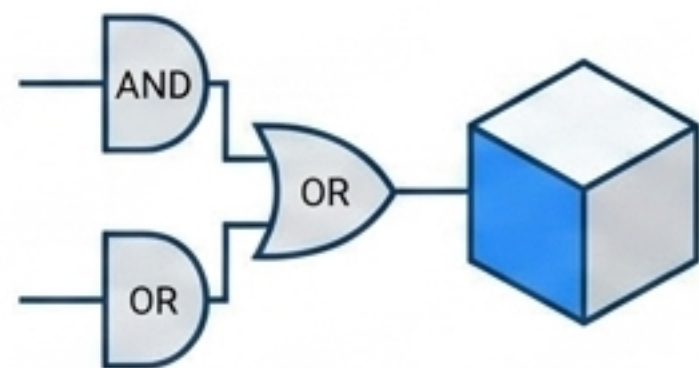

The Catalyst for OS Adoption

The Challenge:

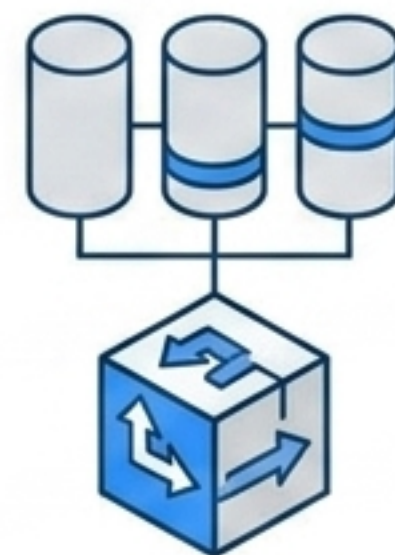

Scaling to handle massive enterprise demands a system that outpaces manual human administration.

The Solution: We are officially adopting the **Sentra's Innovation OS (SIOS)** as our internal practice model.

We are moving away from traditional, siloed project management. Instead, we are operating as a **flattened, AI-Native organization**.

Moving from Task Management to Outcome Governance

Legacy PM →		Sentrais OS	
Role Focus	Chasing tasks and micromanaging steps.	✓	Governing strategy and validating outputs.
System Admin	Manual sprint tracking and status reports.	✓	22 FORGE AI Agents handle administrative routing.
Execution	Internal team grinds through builds.	✓	Technology partner (MetaData) executes the build.
Framework	Task Manager.	✓	Gartner-validated Outcome Owner .

The Sentrais Core Operating Model

The Brain: Strategic Governance

Human Outcome Owners

Completed code and deliverables for governance review.

Sets strategy, maps SOPs, validates state machines.

The Nervous System: Routing & Admin

22 FORGE AI Agents

Automated routing, handoffs, and blueprint delivery.

The Hands: Execution

MetaData Delivery Partners

Domain 1: Strategy & Growth

[The Brain: Strategic Governance]
AI Platform Lead & Commercial/Product Head

[The System Governor]

The Outcome:

- Develops strategic goal

The Mandate:

- Provide strategy to drive contents
- Communities and realty product process
- Commercial abilities and product exchange

AI Integration:

- Employs more-automation; integration and commerciality
- Develop commercial strategy to enhance AI platform

[The Brain: Strategic Governance]
Revenue & Entertainment OS Lead

[The Pipeline Generator]

The Outcome:

- Developed the pipeline of investment

The Mandate:

- Evaluate revenue and fair-play
- Control a revenue productivity
- Implement procedure on entertainment strategy

AI Integration:

- Enhances marketing strategy and commercialization
- Develop commercial strategy for revenue and intelligence

Domain 2: Architecture & Intake

BI Architect & System Administrator

[The Internal Nervous System]

Team:	BI & System Admin
The Outcome:	System Provisioning, IAM Governance, Sales Process Architecture.
The Mandate:	Controls user lifecycles and agent runtime configurations. Architects BI sales processes, contracts, and IP routing.

Delivery & Intake Alignment

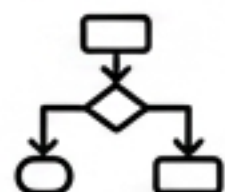

[The Catcher]

Team:	Delivery & Intake
The Outcome:	Seamless Handoffs, Deliverable Staging.
The Mandate:	Ensures the ball is caught smoothly when deals close. Stages client docs and operational data for Discover/Diagnose phases.
AI Integration:	Works in strict tandem with Intake and Discovery Agents.

Domain 3: Operations & Client Success

Solution Architect

[The Technical Bridge]

Team: Operations

The Outcome:

Technical Integrity, Operational Blueprinting.

The Mandate:

Validates designs.

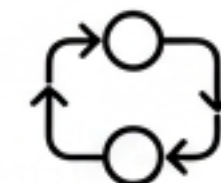

Maps client SOPs. Maps client SOPs into executable workflows. Ensures technical state machines are sound before MetaData builds code.

AI Integration:

Works alongside the Architecture Agent.

Engagement Lead (EL)

[The Human-in-the-Loop]

Team: Client Success

The Outcome:

Client Success, Communication Queues, Gate Transitions.

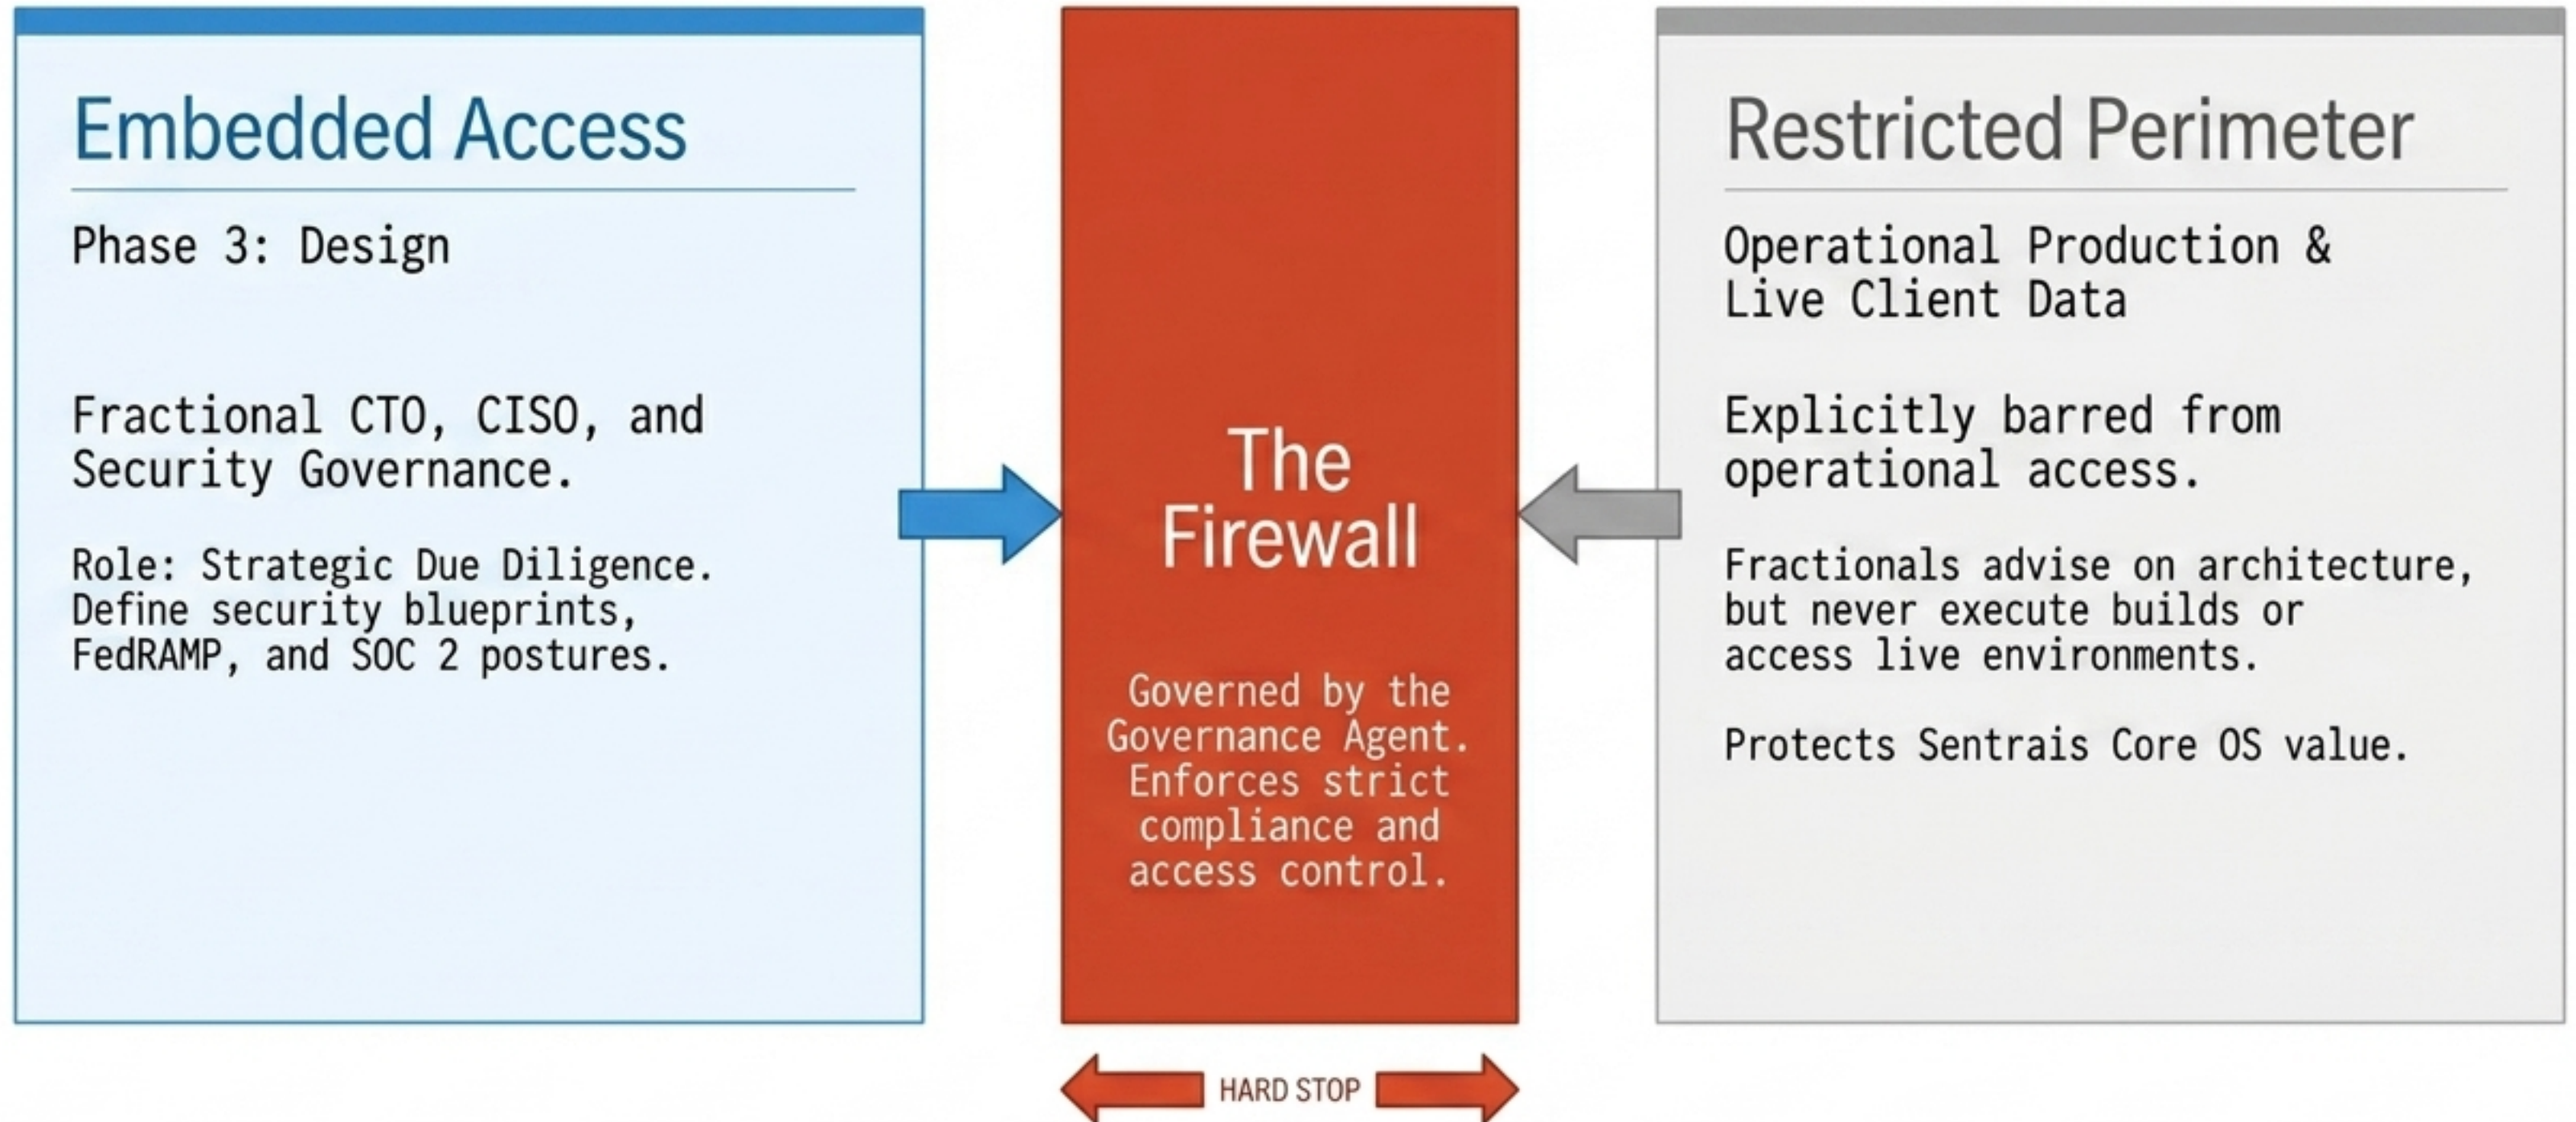

The Mandate:

Manages the client portal experience and Gate Packages. Governs readiness through the NIN methodology (does not write code).

AI Integration:

Drives communication cadences using the Communications Agent.

The Access Guardrail: Integrating Fractional Support

Sentrais Ecosystem Node Directory

NODE	CORE OUTCOME	PRIMARY AI COUNTERPART
AI Platform / Commercial Head	Market Alignment & Unified Governance	Portfolio Agent
Revenue & Entertainment Lead	ARR Milestones & Pipeline Gen	Automated Intake Systems
BI Architect & System Admin	System Provisioning & IAM Governance	Agent Runtime Configurations
Delivery & Intake Alignment	Seamless Handoffs & Staging	Intake & Discovery Agents
Solution Architect	Technical Integrity & Blueprinting	Architecture Agent
Engagement Lead (EL)	Client Success & Gate Transitions	Communications Agent

The ultimate goal: Eliminate micromanagement. We act strictly as the strategic brain—AI routes the tasks, MetaData writes the code, we govern the outcomes.
