

Sentrais Commercial Model & Operational Product Guide

INTERNAL BUSINESS DEVELOPMENT DIRECTIVE

CONFIDENTIAL / INTERNAL USE ONLY

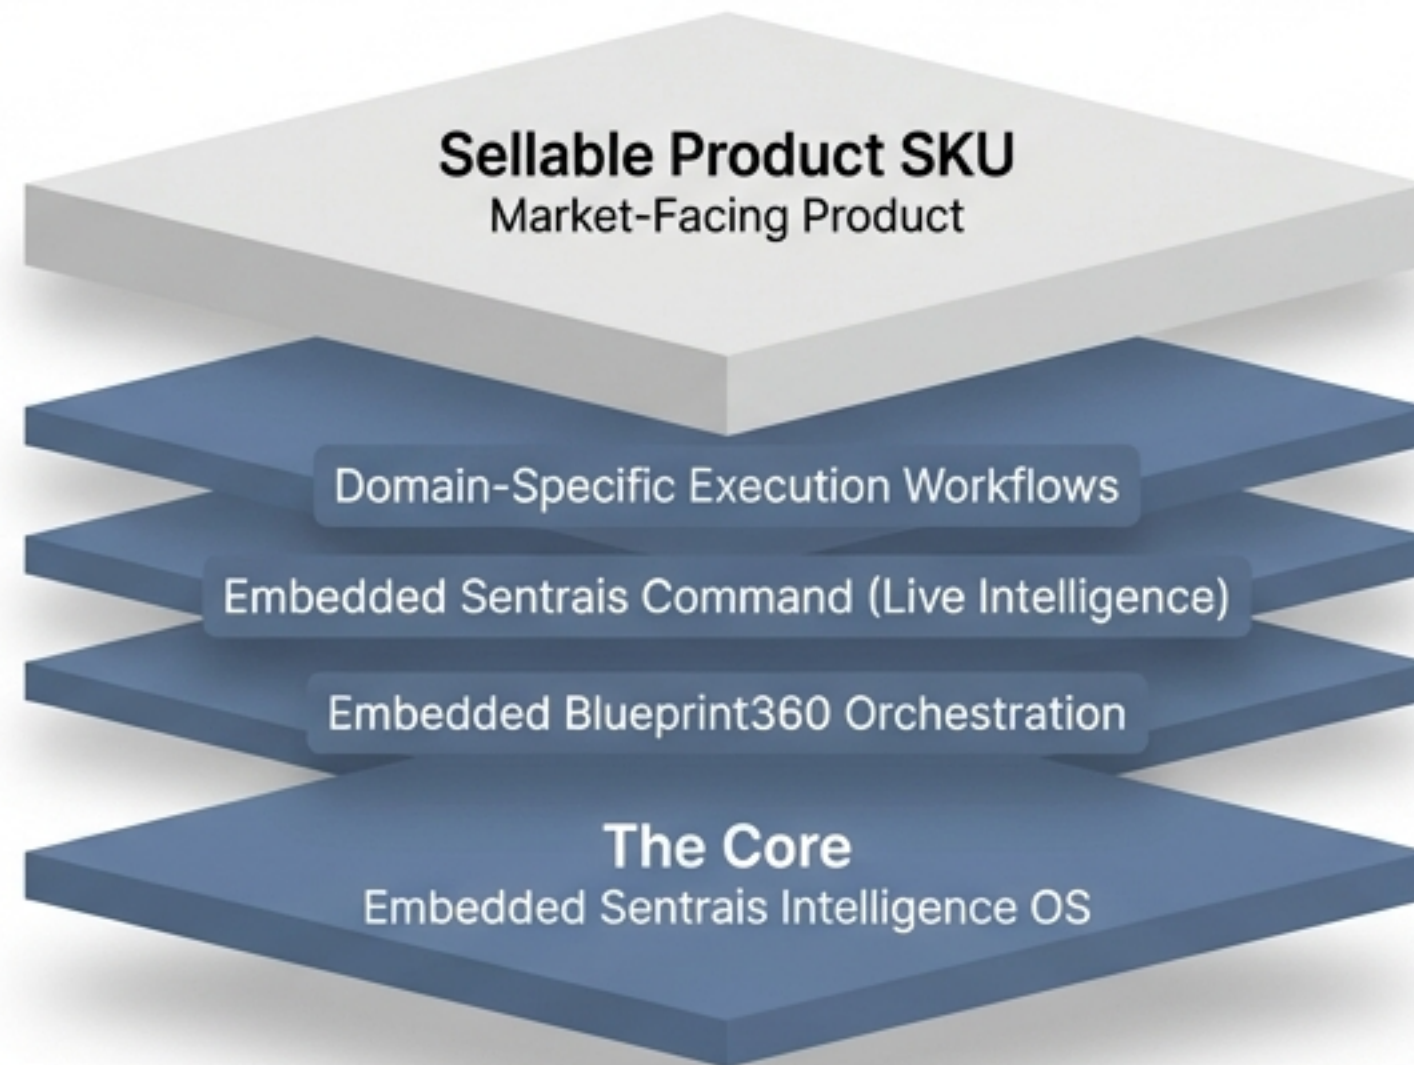

~~Clients
do not buy
features.~~

**They license
operational
capability.**

We do not sell dashboards.
We sell outcomes backed by
embedded intelligence.

The Anatomy of Value

Every SKU price reflects the totality of this stack.
You never line-item the intelligence.

We anchor value on the outcome, then explain the embedded stack.

The Shared DNA: Embedded Intelligence

Sentra's Intelligence OS

The Brain

The data spine and predictive models that power every decision.

Blueprint360

The Orchestration

Planning, dependency mapping, and readiness certification.

Sentra's Command

The Live View

Dashboards, incident awareness, and decision support.

EVERGAME

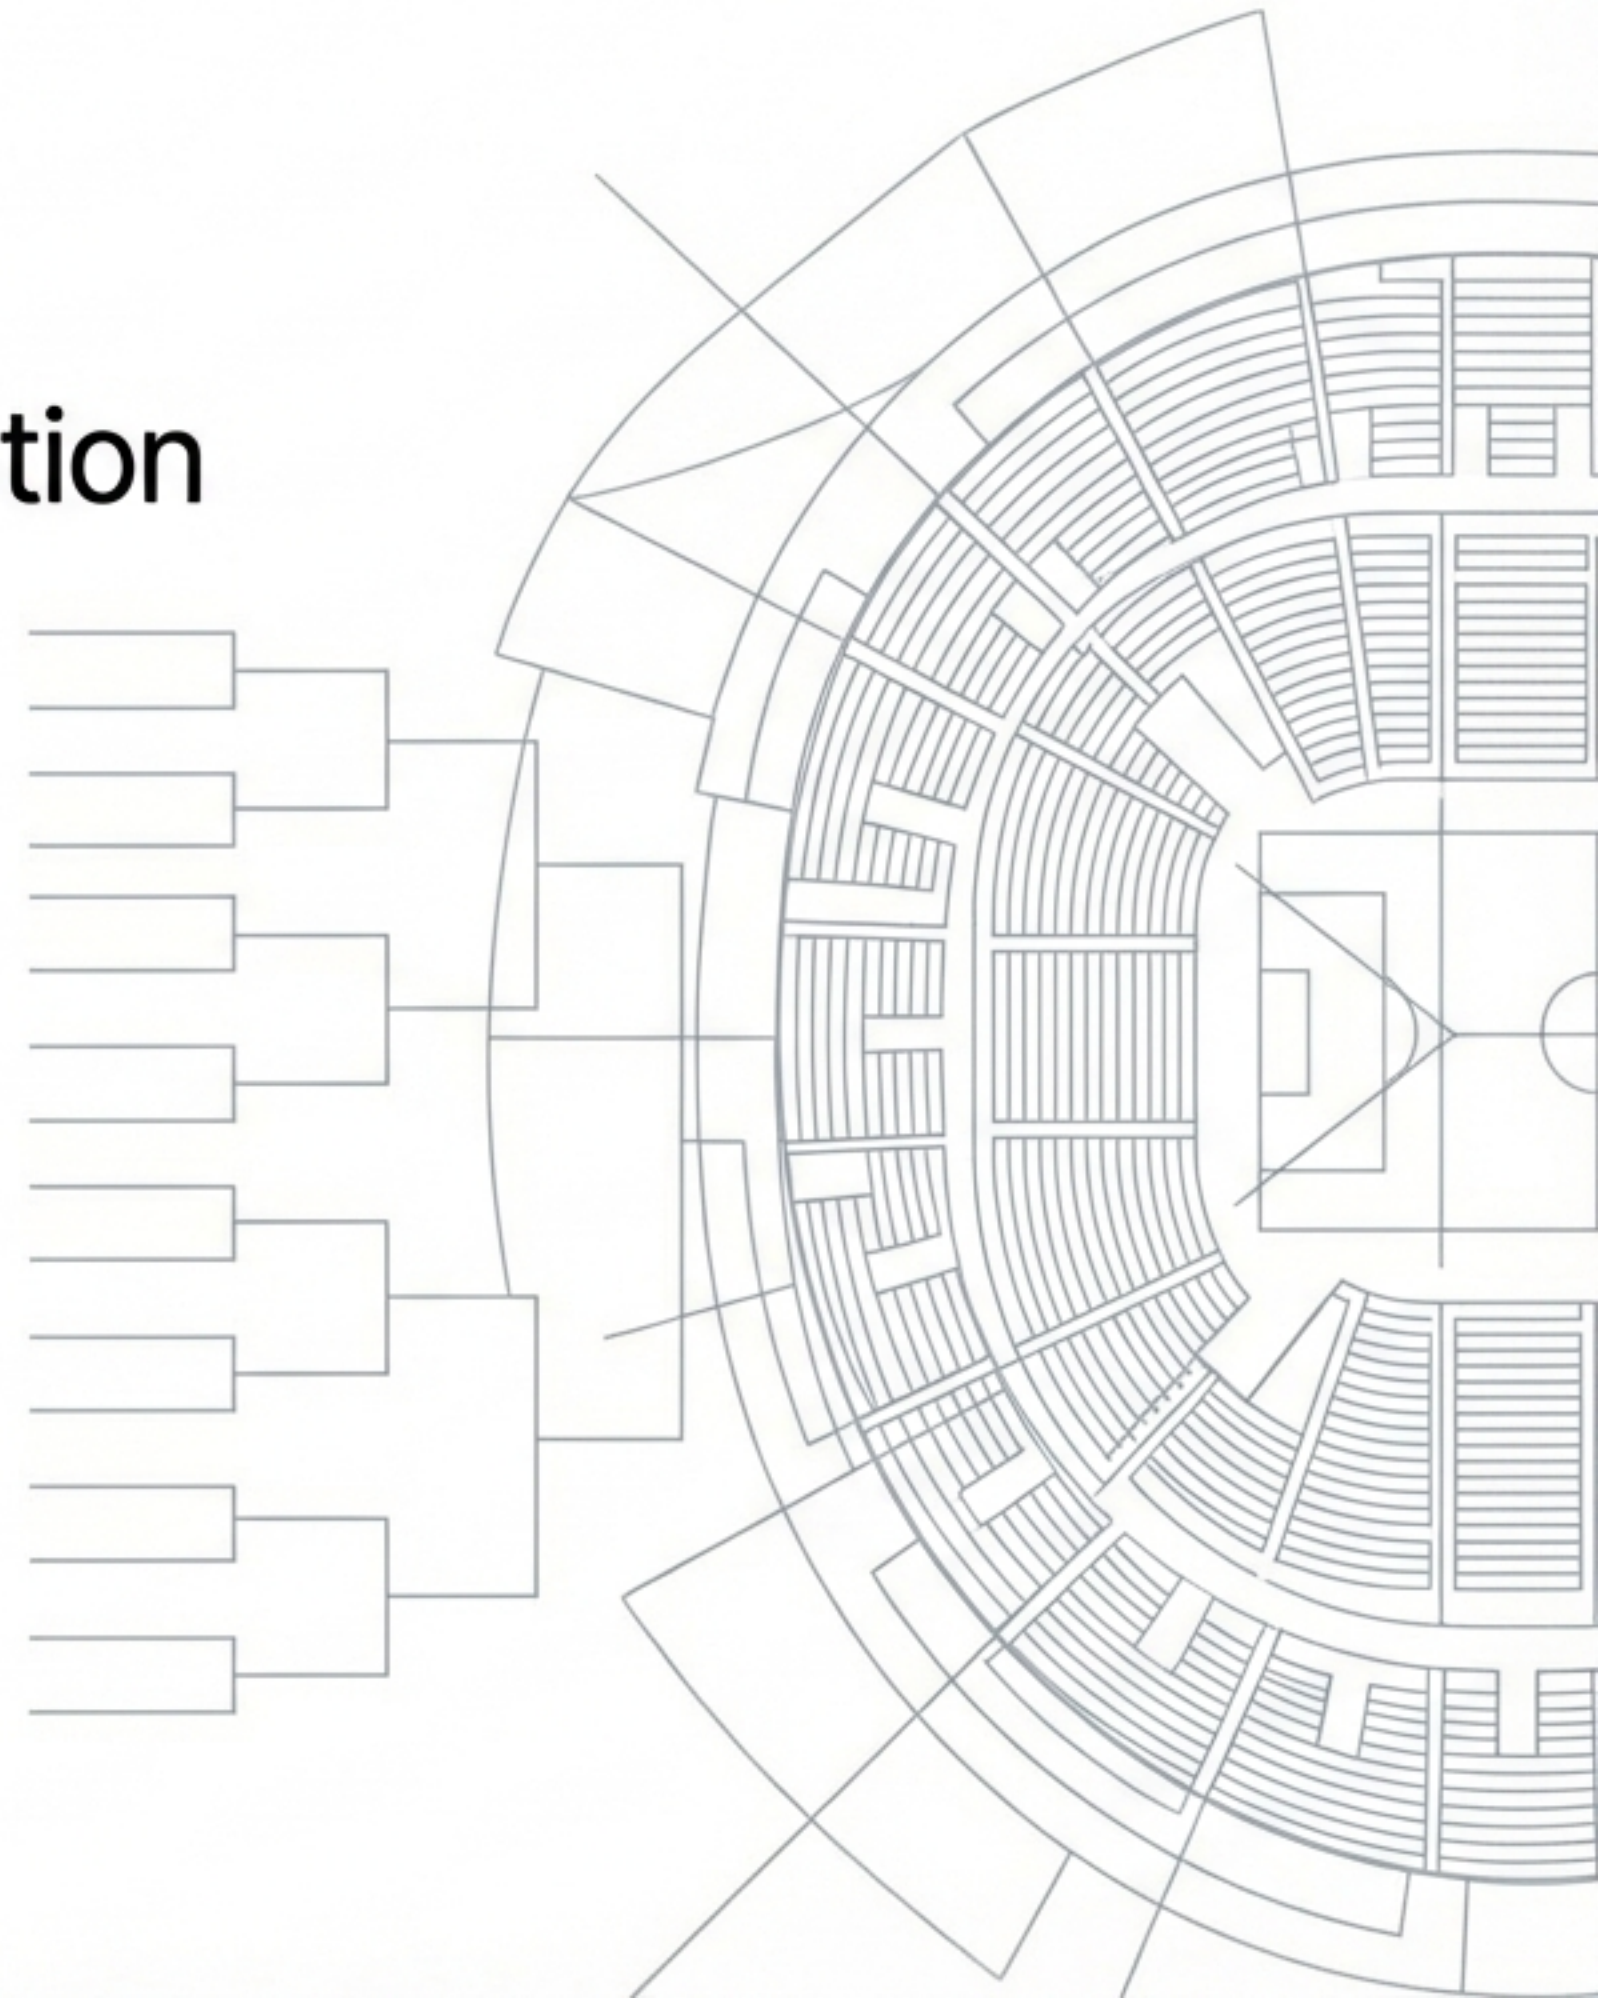

League & Major Venue Orchestration

Definition: The orchestration environment for leagues and major venues to plan, validate, and run seasons and live events with precision.

Primary Buyers: League Operations Executives, Venue Operations Leadership, Broadcast & Security Stakeholders.

Key Deliverables:

- Season and event orchestration
- Readiness scoring and assurance
- Game-day execution and live operations
- Cross-partner coordination

EVERGAME: Commercial Packaging

Platform License

**\$750K – \$1.5M
per season**

Managed Orchestration Services (Optional)

\$250K – \$750K per season

Multi-Year / Multi-Venue agreements
require custom pricing.

Includes Embedded Capabilities:

- Canonical data spine & Predictive risk models (via Intelligence OS)
- Readiness certification logic (via Blueprint360)
- Incident awareness & response intelligence (via Sentrais Command)

eVenu

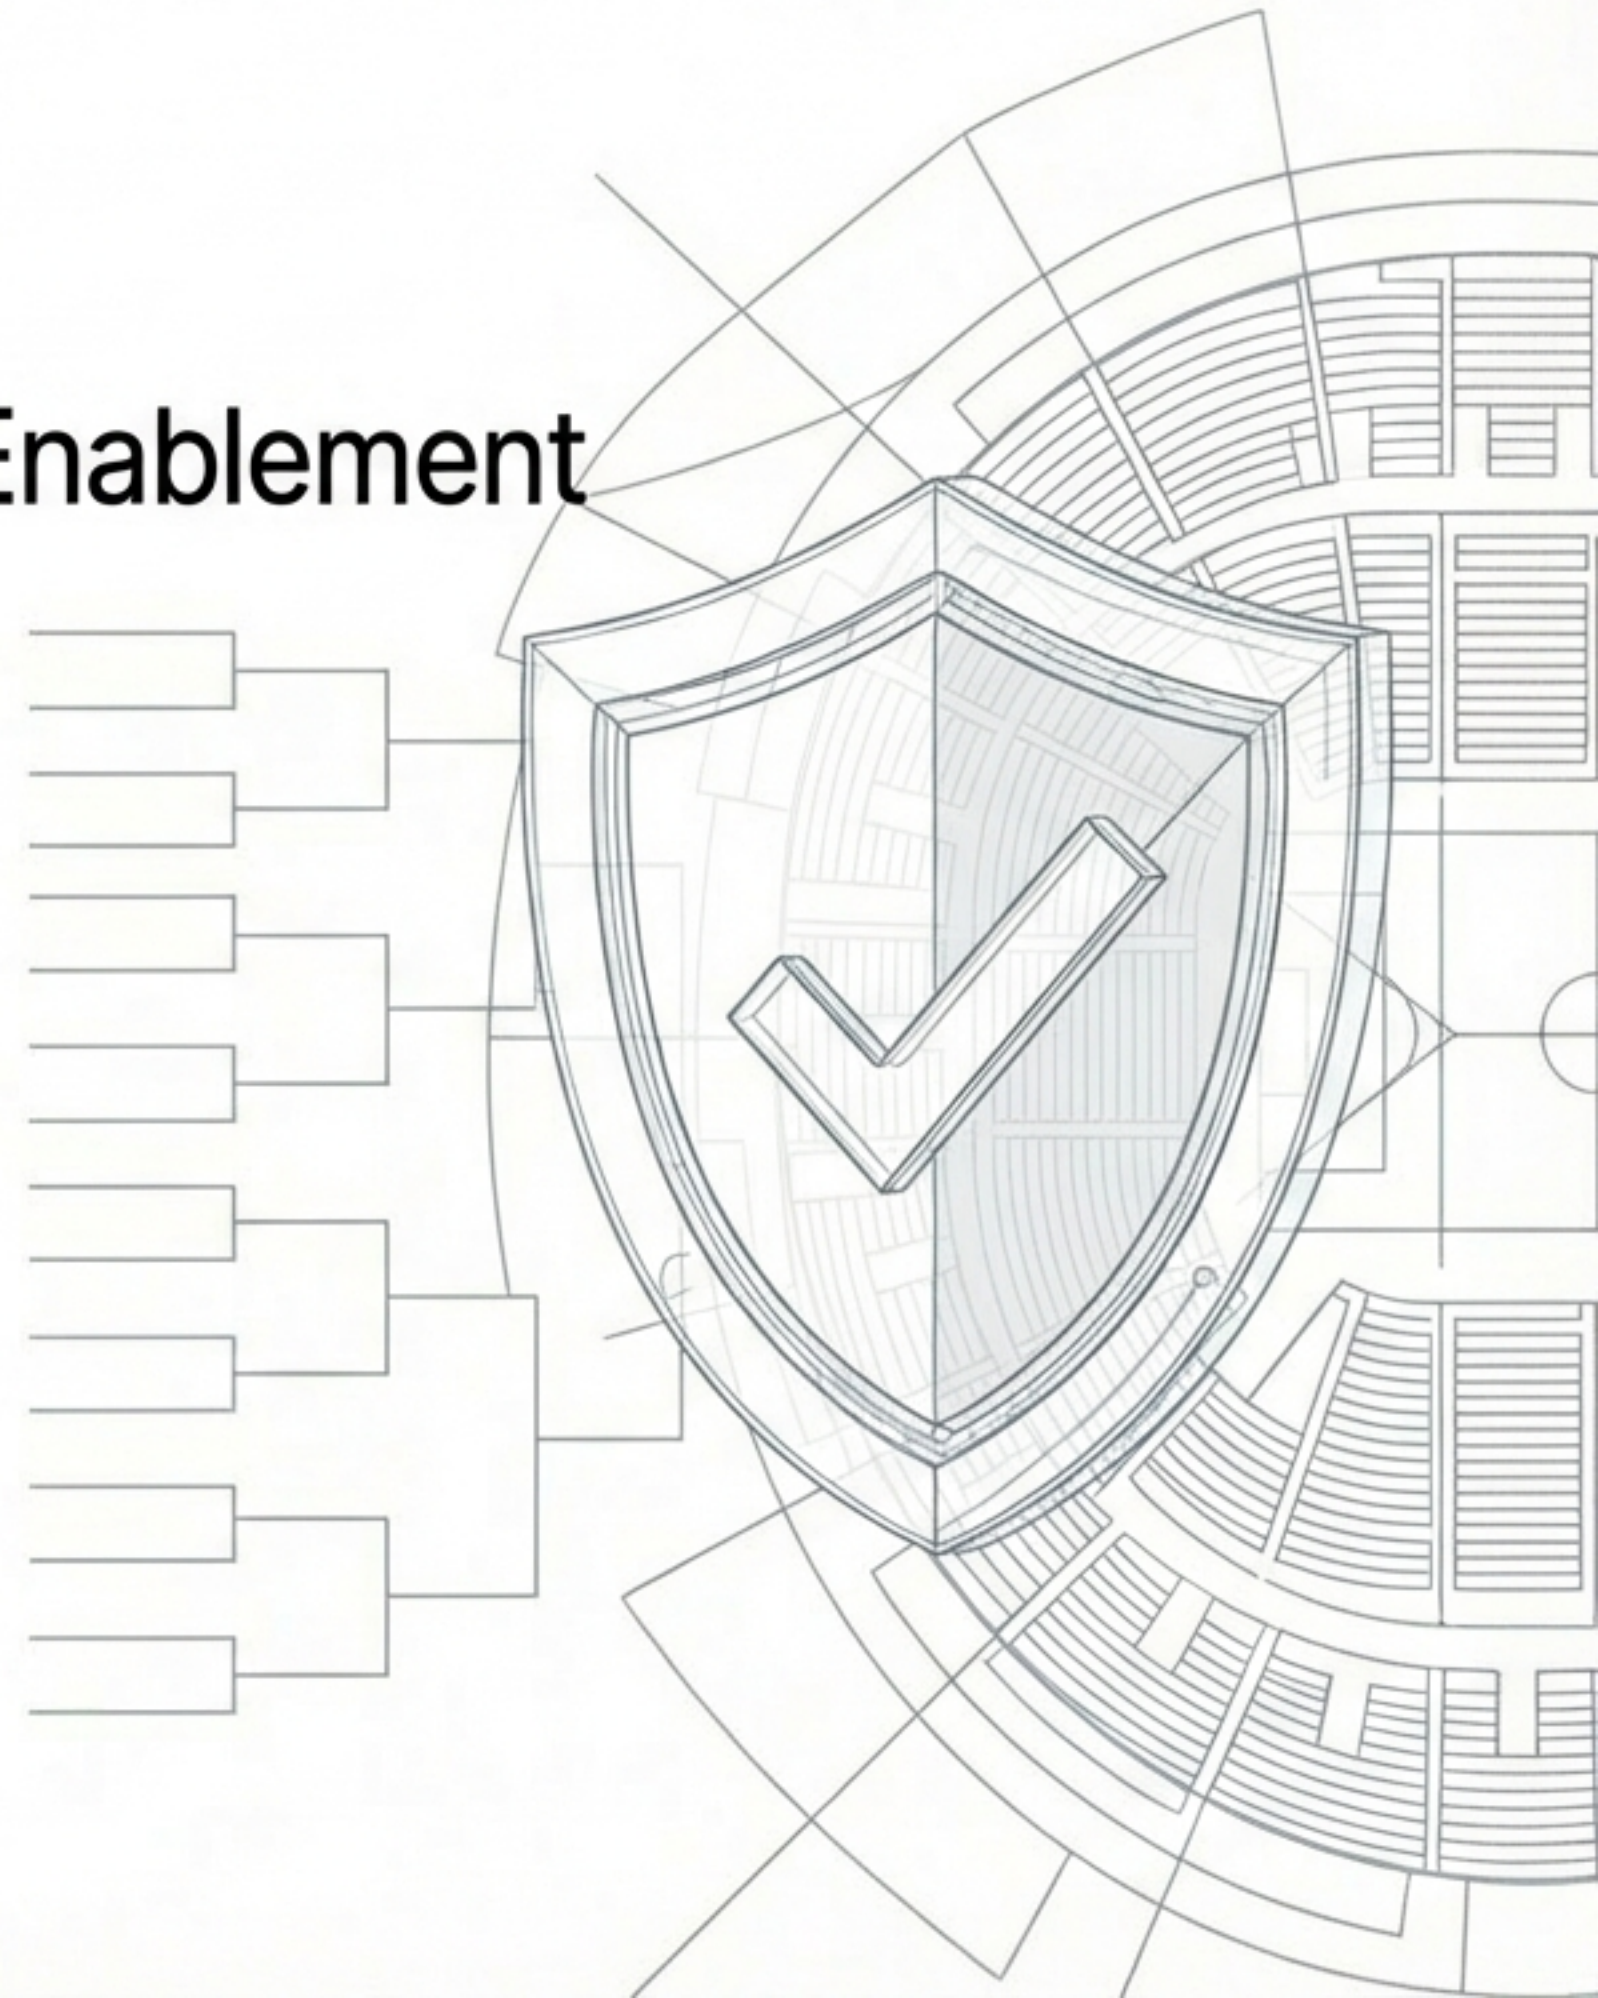

Stadium Certification & Revenue Enablement

Definition: A digital certification platform that standardizes stadium readiness, compliance, and inspections while enabling new, repeatable revenue streams.

Primary Buyers: Stadium Authorities, Venue Operators, Leagues.

Key Deliverables:

- Digital inspections and certification
- Audit-ready evidence
- Monetizable readiness programs
- Credentialing workflows

eVenue: Commercial Packaging

Per-Venue License

**\$150K – \$350K
annually**

Certification Programs (Add-On Revenue Potential)

\$25K – \$100K per certification tier

This SKU is intentionally CFO-friendly.

Includes Embedded Capabilities:

- Evidence capture & audit trails
(via Intelligence OS)
- Validation gates & readiness scoring
(via Blueprint360)
- Compliance risk alerts
(via Sentrais Command)

CiviGrid

Host City Orchestration

Definition: The orchestration environment for host cities to coordinate agencies, partners, and operations across major events and emergencies.

Primary Buyers: Mayors & City Managers, Emergency Management Agencies, Public Safety Leadership.

Key Deliverables:

- Multi-agency coordination
- Unified operational visibility
- Event and emergency readiness
- Post-event accountability

CiviGrid: Commercial Packaging

The Price

Single Major Event Deployment

\$500K – \$1.25M

Annual City Subscription

\$1M – \$2.5M

Custom pricing applies for multi-event agreements.

The Embedded Value

Includes Embedded Capabilities:

- Cross-agency data integration (via Intelligence OS)
- Dependency & escalation mapping (via Blueprint360)
- City-wide command dashboards (via Sentrais Command)

SEARGrid

High-Risk & National Security Event Orchestration

Definition: A national-security-grade orchestration platform for planning, certifying, and executing high-risk events aligned to SEAR standards.

Primary Buyers: Federal Agencies, States/Governors' Offices, High-Risk Event Authorities.

Key Deliverables:

- SEAR-aligned readiness and certification
- Live operational control
- Escalation and coordination logic
- Audit-ready assurance

SEARGrid: Commercial Packaging

The Price

Single SEAR Event Deployment

\$1.5M – \$3.5M

Annual / Programmatic Deployment

\$3M – \$7.5M

Federal Framework Agreements use custom pricing.

The Embedded Value

Includes Embedded Capabilities:

- Threat & risk modeling + Assurance ledger (via Intelligence OS)
- SEAR planning & validation gates (via Blueprint360)
- National-level command intelligence (via Sentrais Command)

Standard Pricing Language

Required verbatim text for all proposals.

Pricing reflects the licensing of a complete operational capability, including embedded intelligence, orchestration, live command visibility, and continuous learning. Sentrais does not charge separately for analytics, dashboards, or AI. These capabilities are integral to every deployment.
