

EVERGAME 360 - Certification Management Quick Refer- ence

**For NFL Technology Administrators and
GDA Supervisors**

Overview

The EVERGAME 360 Certification Lifecycle Management system ensures that every GDA deployed to a game has current, valid certification for their assigned systems. This quick reference guide provides step-by-step workflows for the most common administrative tasks.

Quick Reference: Common Tasks

1. Adding a New Task to a Playbook

When to use: When operational requirements change and a new task must be added to an existing certified playbook.

Step-by-Step Workflow:

Step 1: Submit Task Addition Request

- └ Required Information:
 - | └ System ID (e.g., "IVRS", "C2P", "WiFi")
 - | └ Playbook ID (e.g., "IVRS_HOME_BOOTH")
 - | └ Task Description (clear, actionable)
 - | └ NIN Phase (Discover, Diagnose, Design, Deploy, Debrief)
 - | └ Milestone (M1-M6)
 - | └ Severity (Low, Medium, High, Critical)
 - | └ Justification (why is this task needed?)
 - | └ Evidence Requirements (what must be captured?)
- └ Who Can Submit: GDA Supervisor or NFL Technology Lead
- └ Where: EVERGAME 360 Admin Portal → Playbook Management → Add Task

Step 2: AI Automatic Analysis (Happens in <60 seconds)

- └ Claude AI Performs:
 - | └ Identifies which certification modules are affected
 - | └ Assesses training gap for currently certified GDAs
 - | └ Calculates re-certification scope:
 - | └ Delta Training (15-30 min micro-module)
 - | └ Full Recertification (4-8 hours)
 - └ Documentation Only (no training)
 - | └ Estimates implementation timeline
 - └ Generates risk assessment
- └ Output: Certification Impact Report (auto-generated PDF)

Step 3: Stakeholder Approval

- └ Required Approvers:
 - | └ NFL Football Technology Director (always required)
 - | └ System Subject Matter Expert (always required)
 - | └ Certification Training Manager (always required)
 - | └ Legal/Compliance (if policy-impacting)
- └ SLA:
 - | └ Standard Tasks: 5 business days
 - | └ Urgent Tasks: 2 business days
- └ Approval Action: Approve | Request Changes | Reject

Step 4: Certification Update Execution

- └ Three Possible Outcomes:
 - | Outcome A: New Task Added to Existing Certified Playbook
 - | └ Impact: DELTA TRAINING REQUIRED
 - | └ Action: Create 15-30 minute micro-learning module
 - | └ Deployment: Push notification to all affected GDAs
 - | └ Deadline: Complete before next game assignment
 - | Outcome B: New Task Modifies Critical System Operation
 - | └ Impact: FULL RECERTIFICATION REQUIRED
 - | └ Action: Schedule full 4-8 hour re-certification training
 - | └ Deployment: Mandatory completion before ANY game
 - | └ Enforcement: System blocks assignment until certified
 - | Outcome C: New Task is Procedural Enhancement Only
 - | └ Impact: DOCUMENTATION UPDATE ONLY
 - | └ Action: Update playbook documentation
 - | └ Deployment: Email notification with updated playbook
 - | └ Training: None required
- └ Playbook Version Increment: MAJOR.MINOR.PATCH

Step 5: Deployment and Validation

- └ Deployment Gates (all must pass):

- | | | ✓ All affected GDAs complete required training
- | | | ✓ System integration testing passes
- | | | ✓ Pilot execution at 1 game with post-game review
- | | | ✓ NFL Technology Director final approval
- |
- | └─ Go-Live: Task activated in production playbooks

2. Modifying an Existing Task

When to use: When an existing task needs to be updated (changed description, severity, evidence requirements, etc.)

Step-by-Step Workflow:

Step 1: Submit Task Modification Request

- | └─ Required Information:
 - | | └─ Task ID (unique identifier of task to modify)
 - | | └─ Current Task Definition (what it is now)
 - | | └─ Proposed Changes (what you want to change)
 - | | └─ Justification (why the change is needed)
 - | | └─ Safety Impact Assessment (does this affect safety?)
 - | | └─ Compliance Impact Assessment (does this affect compliance?)
- |
- | └─ Who Can Submit: GDA Supervisor, System SME, or NFL Technology Lead

Step 2: AI-Powered Change Impact Analysis

- | └─ Claude AI Performs Differential Analysis:
 - | | └─ Compares current vs proposed task definitions
 - | | └─ Identifies downstream task dependencies affected
 - | | └─ Assesses certification module impacts
 - | | └─ Calculates risk delta (safety, compliance, performance)
 - | | └─ Determines training requirement
- |
- | └─ Output: Change Impact Assessment Report

Step 3: Stakeholder Approval (Risk-Based)

- |─ Approval Matrix (who must approve):
 - | Minor Change (e.g., typo fix, clarification):
 - |─ System SME approval only
 - | Moderate Change (e.g., add evidence field):
 - |─ System SME
 - |─ Certification Manager
 - | Major Change (e.g., change critical procedure):
 - |─ System SME
 - |─ Certification Manager
 - |─ NFL Technology Director
 - | Safety-Impacting Change:
 - |─ All above +
 - |─ NFL Safety Officer
 - | Compliance-Impacting Change:
 - |─ All above +
 - |─ Legal/Compliance
- |─ SLA: 3-7 business days based on change severity

Step 4: Execute Certification Update

- |─ (Same process as "Add New Task" Step 4-5)

3. Deleting an Obsolete Task

When to use: When a task is no longer required (equipment retired, process changed, etc.)

⚠ IMPORTANT: Task deletion requires MORE scrutiny than addition due to potential compliance/safety implications.

Step-by-Step Workflow:

Step 1: Submit Task Deletion Request

- └ Required Information:
 - | └ Task ID (which task to delete)
 - | └ Deletion Justification (why no longer needed)
 - | └ Replacement Task ID (if applicable - what replaces it?)
 - | └ Compliance Verification (confirm no policy requires this)
 - | └ Safety Verification (confirm no safety requirement needs this)
- └ Who Can Submit: NFL Technology Lead or System SME ONLY

Step 2: AI-Powered Dependency and Risk Analysis

- └ Claude AI Analyzes:
 - | └ Identifies all tasks that depend on this task
 - | └ Checks for policy/compliance mandates requiring it
 - | └ Assesses safety implications of removal
 - | └ Generates risk mitigation recommendations
 - | └ Proposes workflow adjustments for dependent tasks
- └ Output: Task Deletion Impact Report with GO/NO-GO recommendation

Step 3: Mandatory Stakeholder Review (STRICT)

- └ Required Approvers (ALL must approve):
 - | └ System SME
 - | └ NFL Technology Director
 - | └ Certification Manager
 - | └ Legal/Compliance (must verify no policy violation)
 - | └ Safety Officer (if task has any safety components)
- └ SLA: 7 business days (deletion requires extra scrutiny)

Step 4: Execute Deletion

- └ Process:
 - | └ Archive task with full history (never truly delete)

- | └─ Update certification modules to remove obsolete content
- | └─ Notify all certified GDAs of playbook change
- | └─ Update system documentation
- | └─ Increment playbook version (MAJOR if critical, MINOR if routine)
- |
- └─ Training Impact: Usually DOCUMENTATION_UPDATE_ONLY unless task was core competency

Certification Status Management

Checking GDA Certification Status

Dashboard Location: IT Operations Center → Certification Control Center

View Options:

- └─ By GDA (individual certification record)
- └─ By System (all GDAs certified for specific system)
- └─ By Expiration Date (upcoming expirations)
- └─ By Compliance Status (Active | Expiring Soon | Expired)

GDA Certification Record Shows:

- └─ GDA Name and ID
- └─ All System Certifications (e.g., IVRS, C2P, WiFi)
- └─ All Playbook Certifications (e.g., IVRS_HOME_BOOTH)
- └─ Certification Date (when earned)
- └─ Expiration Date (when expires)
- └─ Delta Training Completed (recent micro-modules)
- └─ Pending Recertification (what's required)
- └─ Certification Status:
 - └─  ACTIVE - Can be assigned to games

- |  EXPIRING SOON - Reminder sent, action needed
- |  EXPIRED - BLOCKED from game assignments

Automated Certification Enforcement

System Rules (Enforced Automatically):

Rule 1: Assignment Blocking

- | A GDA CANNOT be assigned to a game unless:
 - | | They have ACTIVE certification for ALL required systems
 - | | All certifications are current (not expired)
- |
- | Enforcement: Scheduling system auto-blocks assignment

Rule 2: Expiration Reminders (Automated)

- | Email GDA at:
 - | | 30 days before expiration
 - | | 14 days before expiration
 - | | 7 days before expiration
- |
- | Supervisor Alert: If GDA assigned to game has expiring cert

Rule 3: Post-Expiration Actions

- | GDA status changes to EXPIRED
- | System auto-removes GDA from future game assignments
- | Supervisor receives alert to schedule recertification
- | GDA blocked from assignments until recertified

Executive Visibility

Where Certification Data Appears in Executive Dashboards

NFL Executive Command Center:

Widget: Resource Optimization Analytics

- └ Shows: GDA certification compliance rate league-wide
 - └ Target: 100% compliance
 - └ Current: 98.9% (example)
- └ Drill-Down: Click to see which GDAs need attention

IT Operations Center:

Display 3 → Panel 3: Certification Control Center

- └ Shows: Real-time certification tracking
 - └ Active Certifications: 1,847
 - └ Expiring in 30 Days: 23 ⚠
 - └ Expiring in 14 Days: 8 🔴
 - └ Expired (Last 7 Days): 2 🚫
- └ Training In Progress: 14

Actions Available:

- └ [Send Reminder] to specific GDA
- └ [Schedule Training] via training portal
- └ [Suspend GDA] from assignments temporarily
- └ [View Training History] for audit purposes

Emergency Scenarios

Scenario 1: Game Day - Discover GDA Has Expired Certification

Problem: GDA shows up to game, system flags expired certification

Immediate Actions:

Step 1: System Blocks GDA Clock-In

- | Display Error: "Certification expired. Cannot proceed."
- | Alert: Supervisor receives immediate notification

Step 2: Supervisor Options:

Option A: Deploy Backup GDA

- | Reassign to certified backup GDA
- | Original GDA sent home, scheduled for recertification

Option B: Emergency Override (RARE - requires CTO approval)

- | Supervisor requests emergency override
- | CTO receives push notification with context
- | If approved: Temporary 1-game waiver issued
- | Post-game: Mandatory recertification required
- | Audit log: Override recorded with full justification

Step 3: Root Cause Analysis

- | Why did this GDA get assigned despite expired cert?
- | System review: Was there a scheduling bypass?
- | Process improvement: Prevent recurrence

Scenario 2: Mass Recertification After Major System Change

Problem: Major equipment upgrade requires all GDAs to be recertified

Management Process:

Step 1: Identify Affected GDAs

- | Run report: All GDAs certified on System X
- | Result: 234 GDAs require recertification
- | Timeline: Must complete before Week 1 of season

Step 2: Bulk Training Deployment

- | Create recertification course (4-8 hours)
- | Schedule multiple training sessions:
 - | | In-person sessions at NFL facilities
 - | | Virtual sessions for remote GDAs
 - | | Self-paced online modules (with proctored exam)
- | Push notifications to all 234 GDAs with deadlines

Step 3: Track Completion in Real-Time

- | Dashboard shows:
 - | | Completed: 187/234 (80%)
 - | | In Progress: 32/234 (14%)
 - | | Not Started: 15/234 (6%) 
 - | | Deadline: 12 days remaining
- | Auto-escalate: GDAs with <7 days and not started

Step 4: Enforcement

- | Deadline passes:
 - | | Completed GDAs: Status → ACTIVE (can be assigned)
 - | | Incomplete GDAs: Status → SUSPENDED (blocked from games)
- | Supervisor actions: Schedule makeup sessions for suspended GDAs

Support Contacts

For Certification Questions:

- Certification Training Manager
- Phone: [Contact Number]
- Email: certification@nfl.com

For Technical System Issues:

- NFL IT Operations Center
- Phone: [NOC Number]
- Email: itops@nfl.com

For Emergency Override Requests:

- NFL CTO Office
- Phone: [Emergency Number]
- Email: cto@nfl.com
