

EVERGAME 360 - Master Certification Framework

NFL Game Day Technology Operations Certification Program

Program Name: EVERGAME Academy

Version: 1.0

Launch Date: May 2025 (Pilot) | Full Deployment: September 2025

Certification Authority: NFL Football Technology Division + EVERGAME Operations

Total Certifiable Positions: 238+ GDAs across 32 venues

EXECUTIVE SUMMARY

The EVERGAME 360 Certification Framework establishes a comprehensive, industry-leading training and credentialing system for NFL game day technology operations. This framework transforms GDA workforce development from informal on-the-job training to a structured, validated competency model ensuring operational excellence across all 32 NFL venues.

Key Objectives:

-  Establish standardized competency levels (L1-L4) across all 9 systems
-  Validate operational readiness through digital simulations + supervised games
-  Enable data-driven workforce planning and deployment optimization
-  Reduce incident rates through verified skill validation
-  Create career progression pathways for GDA workforce

Business Impact:

- **System Uptime:** 99.6% → 99.8%+ (certification requirement enforcement)
- **Incident Resolution:** 5.8 min → <4.0 min avg (L3+ certified responders)
- **Onboarding Time:** 12 weeks → 6 weeks (structured curriculum)
- **Workforce Retention:** 68% → 85%+ (clear career progression)

FOUR-TIER CERTIFICATION STRUCTURE

Level 1: System Familiar

Description: Entry-level knowledge, supervised operations only

Typical Duration: 2-3 weeks from hire

Authorization: Supervised task execution, no independent deployment

Requirements:

1. Complete system-specific training module (4-6 hours online)
2. Pass written knowledge exam (80%+ score, 50 questions)
3. Shadow L3 certified technician for 1 full game
4. Demonstrate understanding of:
5. System architecture and components
6. Safety protocols and emergency procedures
7. Basic troubleshooting workflows
8. Evidence capture requirements

Competencies:

-  Identify major system components by name and function
-  Execute basic tasks under direct supervision
-  Recognize common failure modes and escalate appropriately
-  Use EVERGAME 360 task tracking interface

Systems Available for L1:

- All 9 systems (IVRS, C2P, SVS, C2C, FTR, WiFi, EFC, Hawk-Eye, FTC)

Credential: Digital badge + entry in EVERGAME certification database

Level 2: System Certified

Description: Independently validated operational capability

Typical Duration: 6-8 weeks from L1

Authorization: Independent game day operations, single-system expertise

Requirements:

1. Hold Level 1 certification for target system (minimum 30 days)
2. Complete advanced training modules (8-12 hours, system-specific)
3. Pass digital simulation environment (90%+ task completion, 3 scenarios)
4. Successfully execute 3 supervised game deployments with L3 validation
5. Demonstrate competency in:
6. Complete task execution (all NIN phases: Discover → Debrief)
7. Multi-modal evidence capture (checklist, photo, API, AI validation)
8. Advanced troubleshooting (diagnose and resolve 80% of common issues)
9. Cross-system coordination (communicate with dependent GDAs)

Competencies:

-  Execute all playbook tasks independently within temporal windows
-  Troubleshoot and resolve 80%+ of incidents without escalation
-  Capture complete, compliant evidence for all critical tasks
-  Coordinate with other GDAs on cross-system dependencies
-  Recognize edge cases requiring L3/L4 expertise

Performance Standards:

- Task completion rate: 98%+ on-time within milestone windows
- Evidence quality score: 95%+ (AI validation + manual review)

- Issue resolution: <5 min average for known problems
- Zero safety violations during certification period

Systems Available for L2:

- All 9 systems (independent certification per system)

Credential: NFL-recognized certification card (digital + physical)

Validity: 12 months (annual renewal required)

Level 3: System Expert

Description: Subject matter expert, trainer, and playbook authority

Typical Duration: 6-12 months from L2

Authorization: Train others, approve minor playbook modifications, incident command

Requirements:

1. Hold Level 2 certification for target system (minimum 6 months)
2. Successfully complete 10+ certified game deployments (L2 level)
3. Pass advanced troubleshooting validation:
4. Diagnose and resolve 5 complex failure scenarios in simulation
5. Demonstrate root cause analysis methodology
6. Execute emergency procedures under time pressure
7. Complete train-the-trainer certification (2-day program)
8. Demonstrate leadership competencies:

9. Mentor and evaluate L1/L2 candidates (minimum 3 successful certifications)
10. Contribute to playbook improvement (submit 2+ validated enhancements)
11. Participate in post-incident reviews and process improvements

Competencies:

-  Resolve 95%+ of all incidents, including novel/complex failures
-  Train and certify L1/L2 candidates with validated assessment methods
-  Author or approve minor playbook task modifications (Tier 3 authority)
-  Lead incident response as subject matter expert
-  Optimize workflows based on field experience and data analysis

Performance Standards:

- Incident resolution: <3 min average, 95%+ first-call resolution
- Training effectiveness: 90%+ of mentored candidates pass certification
- Playbook contributions: 2+ validated improvements per season
- Zero critical incidents attributed to L3 decision-making

Systems Available for L3:

- All 9 systems (independent certification per system)

Credential: NFL Expert Certification (digital badge + physical card with gold seal)

Validity: 24 months (biennial renewal with continuing education)

Level 4: Multi-System Lead

Description: Cross-system authority, incident commander, playbook architect

Typical Duration: 12-24 months from first L3

Authorization: Multi-system coordination, critical incident command, playbook authoring

Requirements:

1. Hold Level 3 certification in primary system + Level 2 in 2+ additional systems
2. Complete multi-system integration training (40 hours):
3. System dependency mapping and coordination protocols
4. Incident command system (ICS) for technology operations
5. Executive communication and stakeholder management
6. Playbook architecture and version control
7. Pass cross-system simulation scenarios:
8. Coordinate 3+ simultaneous system deployments
9. Manage cascading failure scenarios across multiple systems
10. Lead incident response with 5+ GDAs under command
11. Successfully lead 5+ games as multi-system coordinator
12. Demonstrate executive-level competencies:
13. Brief NFL leadership on technology readiness status
14. Author or approve major playbook modifications (Tier 4 authority)
15. Conduct root cause analysis and present findings
16. Develop workforce planning and deployment strategies

Competencies:

-  Coordinate complex deployments across multiple interdependent systems
-  Command critical incident response with authority over L1-L3 personnel
-  Author playbooks and approve Tier 2-3 modifications
-  Represent technology operations to NFL executive leadership
-  Design and optimize workforce deployment strategies

Performance Standards:

- Multi-system coordination: Zero critical delays due to coordination failures
- Incident command: <2 min from detection to coordinated response initiation
- Leadership effectiveness: 95%+ stakeholder satisfaction in post-game reviews
- Strategic impact: Measurable improvements in system uptime or cost efficiency

Systems Available for L4:

- Certification is multi-system (not per-system)
- Requires L3 in 1 system + L2 in 2+ additional systems

Credential: NFL Multi-System Lead Certification (digital + physical with platinum seal)

Validity: 36 months (triennial renewal with continuing education + portfolio review)

Career Progression: Pathway to NFL IT Leadership, Venue Technology Director roles

CERTIFICATION CURRICULUM (9 Systems)

System 1: IVRS (Injury Video Review System)

Level 1: System Familiar (4 hours)

Module 1.1: IVRS Architecture Overview (60 min)

- Components: Booth tablets (Home/Visitor), backend servers, replay angles
- Video tagging workflow and medical team coordination
- Network path: Booth → FTC backend → Medical staff interface

Module 1.2: Basic Operations (90 min)

- Tablet setup and configuration procedures
- Video playback and tagging interface
- Common issues and escalation protocols

Module 1.3: Safety & Compliance (45 min)

- HIPAA compliance for injury video handling
- Secure video disposal after game
- Emergency backup procedures

Module 1.4: Knowledge Assessment (45 min)

- 50-question exam covering all modules

- Passing score: 80%+

Level 2: System Certified (10 hours)

Module 2.1: Advanced Operations (3 hours)

- Multi-angle synchronization
- Complex tagging scenarios (multiple injuries, challenges)
- Performance optimization for 4K video streams

Module 2.2: Troubleshooting Workshop (3 hours)

- Tablet connectivity issues (WiFi, cellular backup)
- Video sync failures and recovery
- Backend server diagnostics

Module 2.3: Digital Simulation (3 hours)

- 3 scenario-based simulations:
- Scenario A: Standard game with 2 injury events
- Scenario B: Tablet failure requiring backup activation
- Scenario C: Multiple simultaneous injuries (stress test)
- Required score: 90%+ task completion

Module 2.4: Supervised Games (supervised, 3 games)

- Execute full IVRS playbook under L3 supervision
- Performance evaluation by L3 mentor
- Evidence quality review

Level 3: System Expert (20 hours + field validation)

Module 3.1: Complex Failure Resolution (8 hours)

- Root cause analysis methodologies
- Advanced backend diagnostics
- Vendor escalation and coordination (with IVRS provider)

Module 3.2: Train-the-Trainer (8 hours)

- Adult learning principles for technical training
- Assessment design and fair evaluation
- Coaching and feedback techniques

Module 3.3: Playbook Authoring (4 hours)

- Task modification workflows and approval chains
- Evidence requirement specification
- Version control and certification impact analysis

Module 3.4: Field Validation (10+ games)

- Demonstrate expert-level performance
- Train and certify 3+ L1/L2 candidates
- Contribute 2+ playbook improvements

Level 4: Multi-System Lead (requires L3 IVRS + L2 in 2+ systems)

(See Multi-System Curriculum below)

System 2: C2P (Coach-to-Player Communication)

Level 1: System Familiar (5 hours)

Module 1.1: C2P Architecture (75 min)

- Helmet components and player limits (20 bench, 3 field)
- Sideline equipment and antenna placement
- Equity enforcement protocols (ensure both teams equal)

Module 1.2: Equipment Setup (90 min)

- Helmet identification and battery management
- Testing procedures and backup equipment
- Field positioning and RF optimization

Module 1.3: Equity & Compliance (60 min)

- NFL equity rules for C2P systems
- Documentation requirements
- Failure scenarios and enforcement actions

Module 1.4: Knowledge Assessment (45 min)

- 50-question exam
- Passing score: 80%+

Level 2: System Certified (12 hours)

Module 2.1: Advanced Operations (4 hours)

- Multi-team coordination (Home + Visitor techs)
- RF interference detection and mitigation
- Coaching staff communication protocols

Module 2.2: Troubleshooting Workshop (4 hours)

- Helmet signal issues
- Antenna positioning optimization
- Backup equipment deployment procedures

Module 2.3: Digital Simulation (3 hours)

- Scenario A: Standard game setup and monitoring
- Scenario B: Equity enforcement (one team has issue)
- Scenario C: Multiple helmet failures mid-game
- Required score: 90%+

Module 2.4: Supervised Games (supervised, 3 games)

- Full C2P playbook execution
- Coordinate with Visitor tech (if assigned Home)
- Evidence capture validation

Level 3: System Expert (20 hours + field validation)

Module 3.1: Advanced Troubleshooting (8 hours)

- RF spectrum analysis
- Vendor coordination (Coaches' Cloud provider)

- Critical failure response (game delays)

Module 3.2: Train-the-Trainer (8 hours)

Module 3.3: Playbook Authoring (4 hours)

Module 3.4: Field Validation (10+ games)

Level 4: Multi-System Lead

(Requires L3 C2P + L2 in 2+ systems)

Systems 3-9: Curriculum Templates

Due to space, the following systems follow the same structure:

SVS (Sideline Viewing System):

- L1: 5 hours (tablet distribution, StillShot/PlayView operation)
- L2: 12 hours (multi-location coordination, "new game" sync)
- L3: 20 hours (expert troubleshooting, training)
- L4: Multi-system

C2C (Coach-to-Coach Communication):

- L1: 5 hours (GreenGo system, booth-to-sideline links)
- L2: 12 hours (fiber path validation, wired/wireless coordination)
- L3: 20 hours (advanced diagnostics, training)
- L4: Multi-system

FTR (Field Technology & Replay Network):

- L1: 6 hours (cart positioning, network infrastructure)
- L2: 14 hours (multi-cart coordination, fiber management)
- L3: 22 hours (backbone troubleshooting, training)
- L4: Multi-system

WiFi (Stadium WiFi Operations):

- L1: 5 hours (AP monitoring, coverage validation)
- L2: 12 hours (controller management, automated capture)
- L3: 20 hours (RF optimization, training)
- L4: Multi-system

EFC (Equipment Frequency Coordination):

- L1: 4 hours (spectrum clearance, wireless mic coordination)
- L2: 10 hours (interference detection, FCC compliance)
- L3: 18 hours (advanced RF analysis, training)
- L4: Multi-system

Hawk-Eye (Instant Replay & Goal-Line Technology):

- L1: 6 hours (camera system, replay workflows)
- L2: 14 hours (calibration, multi-angle coordination)
- L3: 22 hours (advanced diagnostics, training)
- L4: Multi-system

FTC (Football Technology Core Infrastructure):

- L1: 7 hours (rack management, server monitoring, fiber paths)
- L2: 16 hours (backend system troubleshooting, backup power)

- L3: 24 hours (critical infrastructure, training)
- L4: Multi-system

MULTI-SYSTEM LEAD CURRICULUM (Level 4)

Prerequisites: L3 in primary system + L2 in 2+ additional systems

Module 4.1: Multi-System Integration (12 hours)

4.1.1 System Dependency Mapping (3 hours)

- Critical path analysis: FTC → FTR → All field systems
- Temporal coordination across M1-M6 milestones
- Cross-system communication protocols

4.1.2 Coordination Exercises (4 hours)

- Lead 3+ system deployments in simulation
- Manage resource conflicts (GDA scheduling, equipment allocation)
- Execute handoffs between system phases

4.1.3 Failure Scenario Management (5 hours)

- Cascading failure simulations (e.g., FTC failure impacts all systems)
- Multi-GDA incident command

- Escalation and executive communication

Module 4.2: Incident Command System (8 hours)

4.2.1 ICS for Technology Operations (3 hours)

- Command structure and role definitions
- Communication protocols during critical incidents
- Resource allocation and prioritization

4.2.2: Executive Briefings (3 hours)

- Stakeholder communication frameworks
- Data-driven status reporting
- Decision support for go/no-go determinations

4.2.3: Post-Incident Analysis (2 hours)

- Root cause analysis methodologies
- After-action review facilitation
- Continuous improvement processes

Module 4.3: Playbook Architecture (10 hours)

4.3.1: Version Control & Change Management (4 hours)

- Tier 1-5 approval workflows
- Certification impact assessment

- Testing and validation requirements

4.3.2: Cross-System Playbook Design (4 hours)

- Dependency specification
- Evidence requirements across systems
- Temporal framework integration

4.3.3: Quality Assurance (2 hours)

- Playbook validation methods
- Peer review processes
- Deployment and rollback procedures

Module 4.4: Workforce Planning (10 hours)

4.4.1: Deployment Optimization (4 hours)

- AI-assisted assignment algorithms
- Certification level matching to game complexity
- Travel and workload balancing

4.4.2: Performance Analytics (3 hours)

- GDA performance metrics and trending
- Certification gap analysis
- Predictive staffing models

4.4.3: Career Development (3 hours)

- Mentoring and coaching strategies
- Certification pathway planning
- Retention and motivation techniques

Module 4.5: Field Validation (supervised, 5+ games)

- Lead multi-system game operations
- Command incident response scenarios
- Demonstrate executive communication
- Receive 95%+ stakeholder satisfaction ratings

ASSESSMENT CRITERIA & SCORING RUBRICS

Written Exams (Levels 1-3)

Structure:

- 50 questions (L1), 75 questions (L2), 100 questions (L3)
- Multiple choice (70%), scenario-based (20%), short answer (10%)
- Time limit: 90 minutes (L1), 120 minutes (L2), 150 minutes (L3)

Scoring:

- L1: 80%+ to pass
- L2: 85%+ to pass
- L3: 90%+ to pass

Question Categories:

- System knowledge: 40%
- Safety & compliance: 20%
- Troubleshooting: 25%
- Evidence & documentation: 15%

Exam Security:

- Proctored (in-person or remote with webcam)
- Randomized question pool (minimum 200 questions per system)
- Anti-cheating measures (lockdown browser, identity verification)

Digital Simulation Scoring (Level 2)

Evaluation Dimensions:

Dimension	Weight Scoring Criteria	
Task Completion	40%	% of tasks completed within temporal windows
Evidence Quality	25%	Completeness, accuracy, compliance with standards

Troubleshooting	20%	Time-to-resolution for simulated failures
Coordination	15%	Communication with other GDAs, dependency management

Passing Standard: 90%+ overall score across all dimensions

Simulation Scenarios (3 required per system):

1. **Standard Game:** Normal operations, 2-3 minor issues
2. **Stress Test:** High complexity, multiple concurrent issues
3. **Critical Failure:** Major system failure requiring backup procedures

Scoring Rubric Example (Task Completion):

- 95-100%: All tasks completed on time, zero errors
- 90-94%: All tasks completed, minor timing deviations (<5 min)
- 85-89%: 1-2 tasks incomplete or significant delays
- <85%: FAIL - Requires remediation and re-test

Supervised Game Evaluation (Level 2)

Evaluation Form (completed by L3 supervisor after each game):

Category	Score (1-5)	Notes
Pre-Game Preparation		Equipment check, setup, coordination
Task Execution		Accuracy, timeliness, independence
Problem Solving		Troubleshooting effectiveness

Communication	With supervisor, other GDAs, stakeholders
Evidence Capture	Quality, completeness, compliance
Professionalism	Attitude, reliability, safety

Scoring Scale:

- 5: Exceeds expectations (expert-level performance)
- 4: Meets expectations (independent, proficient)
- 3: Developing (competent with occasional guidance)
- 2: Needs improvement (frequent supervision required)
- 1: Unsatisfactory (safety concerns or major errors)

Passing Standard: Average score of 4.0+ across all 3 supervised games

L3 Supervisor Certification:

- Supervisor must be L3 certified in target system
- Supervisor completes calibration training for fair, consistent evaluation
- Random audits by L4 leads ensure quality control

Level 3 Expert Validation

Performance Portfolio (submitted for review):

1. **10+ Game Performance Logs**
2. Task completion rates, incident resolution times
3. Evidence quality scores
4. Stakeholder feedback

5. **Training Record**

- 6. List of L1/L2 candidates trained
- 7. Certification success rate (must be 90%+)
- 8. Feedback from trainees

9. **Playbook Contributions**

- 10. 2+ validated task modifications or improvements
- 11. Description of problem solved and impact

12. **Troubleshooting Case Studies**

- 13. 5 complex failure scenarios resolved
- 14. Root cause analysis documentation
- 15. Lessons learned and preventive measures

Review Panel:

- 2 L4 multi-system leads
- 1 NFL Football Technology representative
- Decision: Pass/Conditional/Fail

Level 4 Multi-System Lead Validation

Comprehensive Assessment:

- 1. **Cross-System Simulation** (4 hours)
- 2. Coordinate 3+ systems simultaneously
- 3. Manage 5+ GDAs under command
- 4. Respond to cascading failure scenario

5. Brief "executive team" on status and recommendations
6. **Field Leadership Evaluation** (5+ games)
7. Multi-system coordinator role
8. Incident command performance
9. Stakeholder satisfaction survey (95%+ required)
10. **Strategic Contribution Portfolio:**
11. Workforce planning optimization (data-driven recommendations)
12. Process improvement initiatives (measurable impact)
13. Playbook architecture contributions (Tier 2-3 approvals)
14. Executive briefing samples

Review Board:

- NFL CTO or designee
- 2 L4 multi-system leads
- EVERGAME Operations Director
- Decision: Approve/Defer/Decline

DIGITAL SIMULATION ENVIRONMENT

Platform Architecture

Technology Stack:

- **Frontend:** React web application (responsive design for tablets)
- **Backend:** Python simulation engine (EVERGAME_360_BLUEPRINT_CORE)
- **Database:** PostgreSQL (scenario data, candidate performance)
- **Real-Time:** WebSocket connections for live updates
- **AI Validation:** Claude API for evidence quality scoring

Deployment:

- Cloud-hosted (AWS ECS Fargate)
- 99.9% uptime SLA
- Multi-tenant (isolate candidate sessions)
- Session recording for review and appeals

Simulation Scenarios (System-Specific)

Each system has 10+ pre-built scenarios covering:

Standard Scenarios (Scenarios 1-3):

- Normal game operations with minor expected issues
- Tests: Routine task execution, basic troubleshooting, evidence capture

Stress Scenarios (Scenarios 4-6):

- High complexity: multiple simultaneous issues, time pressure
- Tests: Prioritization, multi-tasking, maintaining quality under stress

Critical Failure Scenarios (Scenarios 7-10):

- Major system failures requiring backup procedures
- Tests: Emergency response, escalation, stakeholder communication

Example: IVRS Standard Scenario

```

scenario_id: IVRS_SIM_001
title: "Standard Game - 2 Injury Events"
duration: 180 minutes (simulated game clock)
complexity: Low
passing_score: 90%

timeline:
  - T-4h: Pre-game tablet setup and testing
  - T-2h: Coordination with medical staff, final checks
  - Q1 (8:34): First injury - player #45, left knee
    - Candidate must: Tag video, notify medical, document
  - Q3 (5:12): Second injury - player #22, head (concussion
protocol)
    - Candidate must: Multi-angle tagging, priority handling,
coordination
  - Post-game: Evidence completion, GMS reporting

simulated_issues:
  - Minor WiFi latency (Q2) - requires monitoring, resolves
automatically

```

- Medical staff questions video angle (Q4) - requires verbal response

success_criteria:

- Both injuries tagged within 60 seconds of occurrence
- All required video angles captured
- Evidence submitted within 2 hours post-game
- Zero safety violations

AI-Powered Evidence Validation

Evidence Quality Scoring (automated via Claude API):

Photo Evidence Validation:

- Image clarity: 0-25 points (AI vision model assesses resolution, lighting)
- Equipment positioning: 0-25 points (compare to reference images)
- Timestamp accuracy: 0-25 points (EXIF data within ± 5 min of task time)
- Compliance: 0-25 points (all required elements visible)

API Telemetry Validation:

- Data completeness: 0-30 points (all required fields present)
- Data accuracy: 0-30 points (values within expected ranges)
- Timeliness: 0-20 points (captured within milestone window)
- Format compliance: 0-20 points (JSON schema validation)

AI Validation Prompt (example for photo evidence):

Analyze this photo evidence for EVERGAME task completion.

Task: C2P_HS_1.1 - "Set up Sideline Technology cart at 50-yard line within bench area"

Required elements:

1. Cart positioned at 50-yard line (± 5 yards)
2. Within team bench area (not obstructing walkway)
3. All antennas protected from damage
4. Cables properly dressed

Score the image 0-100 based on:

- Clarity (0-25): Can all elements be clearly identified?
- Positioning (0-25): Is cart at 50-yard line, bench area?
- Safety (0-25): Are antennas protected, cables secured?
- Compliance (0-25): Are all requirements visually confirmed?

Return JSON: {"total_score": X, "clarity": X, "positioning": X, "safety": X, "compliance": X, "feedback": "brief explanation"}

CERTIFICATION TRACKING SYSTEM

---
```

Mobile GDA Interface

Features:

- **Certification Card:** QR code for instant verification
- **Training Dashboard:** Current progress, next modules
- **Game History:** Performance trends, areas for improvement
- **Expiration Alerts:** 30/60/90-day renewal reminders
- **Learning Resources:** Access to training videos, playbooks
- **Evidence Portfolio:** Archive of submitted photo/API evidence

Screenshots (design specifications):

1. Home Screen: Certification status summary, upcoming expirations
2. Certification Detail: QR code, issue/expiration dates, renewal link
3. Training Progress: Module checklist, scores, estimated completion time
4. Performance Analytics: Task completion trends, peer comparison

Supervisor Dashboard

Features:

- **Team Overview:** All GDAs, certification levels, expiration dates
- **Assignment Validation:** Auto-check certifications before game assignments
- **Training Pipeline:** Track candidates in progress, identify bottlenecks
- **Performance Monitoring:** Team-wide metrics, outliers requiring attention

- **Reporting:** Generate certification compliance reports for NFL leadership

IMPLEMENTATION ROADMAP

Phase 1: Foundation (Months 1-3) - January-March 2025

Month 1: Program Design & Content Development

Week 1-2:

- _ Finalize certification governance (NFL approval, delegation authority)
- _ Establish review boards (L3/L4 selection, training)
- _ Create assessment item banks (500+ questions per system)

Week 3-4:

- _ Develop Level 1 training modules (all 9 systems)
- _ Build digital simulation platform (infrastructure deployment)
- _ Design certification database schema and mobile UI

Month 2: Platform Build & Pilot Preparation

Week 5-6:

- _ Complete Level 2 curriculum development
- _ Implement simulation scenarios (3 per system, 27 total)

- _ Configure AI validation pipeline (Claude API integration)

Week 7-8:

- _ Recruit pilot cohort (15-20 GDAs across all tiers)
- _ Train L3/L4 evaluators (calibration workshops)
- _ Deploy certification tracking system (beta)

Month 3: Pilot Program Execution

Week 9-10:

- _ Execute pilot certifications (all levels, all systems)
- _ Gather feedback (GDAs, supervisors, NFL stakeholders)
- _ Refine curriculum based on pilot data

Week 11-12:

- _ Validate assessment difficulty (adjust passing scores if needed)
- _ Finalize Level 3-4 advanced curricula
- _ Prepare for scale deployment (train additional evaluators)

Phase 2: Scale Deployment (Months 4-6) - April-June 2025

Month 4: Level 1 Mass Certification

- _ Target: 200+ GDAs achieve Level 1 in primary system
- _ Deploy training modules via EVERGAME platform

- _ Conduct regional exam sessions (5 locations)

Month 5: Level 2 Intensive Programs

- _ Target: 100+ GDAs achieve Level 2 in primary system
- _ Run digital simulations at scale (cloud infrastructure)
- _ Coordinate supervised game evaluations (L3 mentors)

Month 6: Level 3 Development

- _ Target: 30+ GDAs achieve Level 3 (SMEs identified)
- _ Execute train-the-trainer programs
- _ Begin multi-system integration training (Level 4 prep)

Phase 3: Operational Excellence (Months 7-12) - July-December 2025

Ongoing Activities:

- Continuous certification processing (renewals, upgrades)
- Performance analytics and trend reporting
- Curriculum updates based on field data
- NFL season support (real-time certification verification)

Metrics Tracking:

- Certification completion rate by level, system
- Average time-to-certify (identify bottlenecks)

- GDA satisfaction scores (training quality)
- Business impact (uptime, incident rates, cost savings)

PROGRAM BUDGET

Development Costs (One-Time)

Item	Cost	Notes
Curriculum Development	\$120,000	9 systems × 4 levels × training content
Simulation Platform	\$80,000	Cloud infrastructure, AI integration
Assessment Item Banks	\$40,000	500+ questions per system, validation
Mobile App Development	\$60,000	iOS/Android GDA interface
Total Development	\$300,000	

Delivery Costs (Annual)

Item	Cost	Notes
Instructor/Evaluator Time	\$150,000	L3/L4 leads conducting training/assessments
Cloud Infrastructure	\$35,000	Simulation platform hosting (AWS)
Exam Proctoring Services	\$25,000	Remote proctoring for written exams

Credential Production	\$15,000	Physical certification cards, badges
Program Administration	\$60,000	Tracking, reporting, compliance management
Total Annual Delivery	\$285,000	

Total Program Cost (Year 1)

\$585,000 (Development + Delivery)

ROI Projection

Operational Savings from Certification Enforcement:

- Reduced incident rates: \$400,000/year (fewer broadcast delays, faster resolution)
- Improved efficiency: \$300,000/year (optimized GDA deployment, reduced redundancy)
- Workforce retention: \$200,000/year (reduced turnover, faster onboarding)
- **Total Annual Benefit: \$900,000**

Net ROI: \$315,000/year (54% return)

Payback Period: 8 months

SUCCESS METRICS

Program Health Metrics

Metric	Target	Measurement
Certification Completion Rate	85%+	% of eligible GDAs certified within 90 days
Exam Pass Rate (First Attempt)	75%+	% passing written/simulation on first try
Training Satisfaction	4.5/5.0	GDA survey scores post-training
Evaluator Consistency	90%+	Inter-rater reliability for supervised games

Business Impact Metrics

Metric	Baseline	Target	Measurement
System Uptime	99.6%	99.8%+	Across all 9 systems, all games
Incident Resolution Time	5.8 min	<4.0 min	Average time from detection to resolution
Certification Compliance	87%	95%+	% of GDAs L2+ certified in assigned systems
Workforce Retention	68%	85%+	Annual retention rate for certified GDAs

PROGRAM GOVERNANCE

Certification Authority

Primary Authority: NFL Football Technology Division

Delegated Authority: EVERGAME Certification Board

Board Composition:

- NFL CTO or designee (Chair)
- 3 Level 4 Multi-System Leads
- 1 Venue Technology Director
- 1 EVERGAME Operations Director

Board Responsibilities:

- Approve curriculum changes and new assessment content
- Review and approve Level 4 certifications
- Handle certification appeals and disputes
- Set policy for certification suspension/revocation
- Ensure program compliance with NFL standards

Quality Assurance

Annual Audits:

- Random review of 10% of certifications (all levels)
- Evaluator calibration verification (inter-rater reliability)

- Exam security assessment (anti-cheating measures)
- Curriculum relevance review (updates based on technology changes)

Continuous Improvement:

- Quarterly program metrics review
- Annual stakeholder survey (GDAs, supervisors, NFL leadership)
- Technology updates (new systems, playbook modifications)

CERTIFICATION RENEWAL

Renewal Requirements

Level 1-2: Annual Renewal

- Complete 4 hours of continuing education (online modules)
- Pass refresher exam (50 questions, 80%+ score)
- Maintain active game participation (minimum 3 games per season)

Level 3: Biennial Renewal (every 2 years)

- Complete 8 hours of continuing education
- Demonstrate ongoing training effectiveness (certify 2+ candidates)
- Submit updated performance portfolio

Level 4: Triennial Renewal (every 3 years)

- Complete 12 hours of continuing education
- Present strategic contribution portfolio to review board
- Demonstrate leadership impact (workforce optimization, process improvement)

Continuing Education Topics:

- New technology integrations (e.g., 5G, AI-powered diagnostics)
- Updated NFL rules and compliance requirements
- Advanced troubleshooting techniques
- Leadership and communication skills

IMPLEMENTATION CHECKLIST

Immediate Actions (This Week):

- ☐ Review certification framework with NFL leadership
- ☐ Obtain budget approval (\$585K Year 1)
- ☐ Recruit certification board members (3 L4 leads)
- ☐ Select pilot cohort participants (15-20 GDAs)

Month 1 (January 2025):

- ☐ Finalize Level 1 curriculum (all 9 systems)

- _ Build exam item banks (500+ questions per system)
- _ Deploy simulation platform infrastructure
- _ Design certification tracking database

Month 2 (February 2025):

- _ Complete Level 2-3 curriculum development
- _ Implement 27 simulation scenarios (3 per system)
- _ Train L3/L4 evaluators (calibration workshops)
- _ Launch mobile GDA interface (beta)

Month 3 (March 2025):

- _ Execute pilot program (15-20 GDAs)
- _ Validate assessment difficulty and fairness
- _ Refine curriculum based on pilot feedback
- _ Prepare for scale deployment

Months 4-6 (April-June 2025):

- _ Mass Level 1 certification (200+ GDAs)
- _ Level 2 intensive programs (100+ GDAs)
- _ Level 3 SME development (30+ GDAs)
- _ Multi-system lead preparation (10-15 GDAs)

PROGRAM CONTACTS

Program Director: certification@evergame360.com

Technical Support: support@evergame360.com

NFL Liaison: nfl-football-tech@evergame360.com

Appeals & Disputes: certification-appeals@evergame360.com

Document Version: 1.0

Last Updated: November 22, 2025

Status:  READY FOR APPROVAL

Next Milestone: NFL Leadership Review (December 2025)
