

NFLIT360

NFL IT Operations Management Platform - Game Day Automation

Version

Current: v7.0

Change ID: CHG-2025-PLAYBOOK-REMODEL-001

Status: Production Ready

Quick Start

```
# Install dependencies  
npm install
```

```
# Run development server  
npm run dev
```

```
# Build for production  
npm run build
```

Overview

NFLIT360 orchestrates game day technology operations across all 32 NFL venues, managing 9 core technology systems through 16 position-based playbooks containing 775 tasks.

GDA Readiness Module

The GDA (Game Day Administrator) Readiness module is the primary interface for field technicians. It provides:

- **System Selection** - Choose from 9 technology systems
- **Position Selection** - Multi-position systems prompt for specific role
- **Task Management** - Complete tasks organized by timing tier
- **SLA Tracking** - Real-time GREEN/YELLOW/RED status
- **Dependency Visibility** - See what must complete first
- **Evidence Capture** - Photo, status post, or confirmation

User Flow

Systems → Position (if multiple) → Task List → Task Detail → Complete

Systems

System	Positions	Tasks	Hat Color
EFC (Gatekeeper)	1	26	Red
IVRS	4	66	Blue
C2P	2	122	Orange
SVS	4	274	Purple
FTR	1	58	Gray
IR_TECH	1	34	Gray
O2O	1	14	Gray
HAWKEYE	1	150	Green (Vendor)
WiFi	1	31	Gray

v7.0 Features

- **11-Tier Temporal Framework** - GD-1 through T11 timing windows
- **Task-Level Dependencies** - e.g., EFC (2.1-2.5) notation
- **Green/Yellow/Red SLA Thresholds** - Per-system monitoring
- **Milestone Tracking** - M2-M6 badges on tasks
- **Critical Task Indicators** - Visual highlighting for compliance-critical tasks

Project Structure

```
NFLIT360/
├── public/
│   └── data/

```

Deployment

Vercel (Recommended)

```
# Install Vercel CLI
npm i -g vercel
```

```
# Deploy
vercel
```

Manual Build

```
npm run build  
# Serve the 'dist' folder
```

Data Files

All playbook data is served from `/data/playbooks/`. Each playbook contains:

- Task definitions with descriptions
- Timing tier assignments (T3, T5, T8, etc.)
- SLA thresholds (green/yellow/red)
- Milestone mappings (M3, M4, M5, M6)
- Dependency chains
- Evidence capture requirements
