Critical Dependency Chains

EFC Gating (Master Chain)

EFC tasks 2.1-2.5 (CBRS Spectrum Clearance) gate ALL wireless systems at T-4h:

```
EFC (2.1-2.5) CBRS Clearance
  └─> IVRS (all positions)
  └─> IR_TECH
  └─> O2O
  └─> WIFI
  └─> C2P (Home + Visitor)
  └─> SVS (all positions)
```

Hawk-Eye Two-Day Operation

GD-1 (Day Before)

```
├─ 1.0 Arrival → 2.0 Rack Room → 3.0 Patching
|
|                               └─ 4.0 IR Setup → 5.0 IVR Setup
→ 6.0 Testing → 7.0 Layouts
|
|                               └─ 8.0 Flyaway [A-Game]
|
└─ GATES
```

→

Game Day

```
├─ 1.0 Arrival (T-7h) → 2.0 Sync Test (T-6h)
|
|                               └─ 3.0 IR Verify → 4.0 IVR Verify →
5.0 Wearables
|
└─ 6.0 Field Checks (T-4h to T-50m)
|
└─ 7.0 End of Game
```

Special Implementation Notes

Hawk-Eye (Two-Day Operation)

- Only system with GD-1 tier
- 81 GD-1 tasks + 69 Game Day tasks = 150 total
- GD-1 completion GATES Game Day start

- 8 photo checkpoints across both days

IVRS (Combined Sheet → 4 Playbooks)

- Source: Single "IVRS" sheet with section headers
- Split: Booth, Home Field, Visitor Field
- Common tasks (4.0+) replicated to all positions

SVS (Combined Sheets → 4 Playbooks)

- Source: "SVS Home" and "SVS Visitor" sheets
- Each contains Booth + Sideline sections
- Split into 4 position-based playbooks

EFC (Critical Path)

- CBRS clearance tasks gate all wireless
- Must complete before T-4h SLA window
- Single point of failure for wireless systems

Rollback Procedure
