

NFL EVERGAME 360 Dashboard - Executive Summary

Complete System Overview & Implementation Roadmap

Prepared For: NFL Executive Leadership

Date: November 15, 2025

Version: 1.0

Classification: Internal - Executive Review

Executive Overview

The **EVERGAME 360 Unified Dashboard** transforms the NFL from a policy-driven organization into an **intelligence-driven ecosystem**. Powered by the Sentrais OS framework and NIN (Network Intelligence Node) Forensics methodology, EVERGAME creates a single pane of glass for monitoring franchise health, competitive integrity, and operational excellence across all 32 clubs, 272+ games, and the entire 12-month League calendar.

The Challenge

Currently, the NFL operates with:

- **Fragmented Compliance Monitoring** - Spreadsheets, email chains, manual phone calls
- **Reactive Enforcement** - Violations discovered *after* they occur
- **Inconsistent Evidence** - "He said/she said" disputes in investigations
- **Limited Transparency** - Difficult to demonstrate competitive integrity to media, fans, gambling partners
- **Administrative Burden** - Thousands of staff hours manually tracking certifications, submissions, and game-day procedures

The Solution: EVERGAME

A living, breathing intelligence platform that:

- ✓ **Automates** 25+ compliance workflows from the Game Operations Manual
 - ✓ **Predicts** violations before they occur with pattern recognition
 - ✓ **Validates** every decision with an immutable evidence chain
 - ✓ **Surfaces** real-time insights to the right person at the right time
 - ✓ **Demonstrates** competitive integrity through transparent, algorithm-driven governance
-

System Architecture: Three-Layer Foundation

Layer 1: Sentrais Orchestration Intelligence (EVERGAME AI Frame)

What It Does:

- Translates static PDF policies into executable playbooks
- Recognizes patterns across 32 clubs to identify systemic risks
- Provides real-time decision support during investigations
- Maintains immutable evidence ledger for audit trails

Proprietary Technology:

- Playbook Translation Engine (converts Game Operations Manual → workflows)
- Pattern Recognition (flags clubs trending toward violations)
- Evidence Chain (timestamps every action, responsible party, policy reference)

Layer 2: Coordination Services

What It Does:

- Multi-stakeholder communication bus (League ↔ Clubs ↔ Venues ↔ Officials)
- Role-based access control (Commissioner sees different data than Club GM)
- Real-time data aggregation (normalizes data from disparate club systems)
- Workflow state management (tracks pregame checklists, certification cycles)

Integration Patterns:

- API Integration for modern systems (club management platforms)
- Database Integration for legacy systems (venue operations)
- File/Message Queue for batch processes (injury reports, EMPs)

- Custom Adapters for proprietary systems (technology infrastructure)

Layer 3: Existing NFL Systems (Preserved)

What Connects:

- Club management systems (role assignments, certifications)
- Venue operations platforms (facility compliance)
- Technology infrastructure (C2C, tablets, IVR live feeds)
- Injury reporting systems (practice reports, game status)
- Broadcast coordination tools (media compliance)
- League database (GSIS) - schedules, rosters, statistics

No Replacement Required: Sentrais sits *above* existing investments, adding coordination without disruption.

Deliverables: Complete System Documentation

1. Data Schema Architecture (34 Tables Across 5 Layers)

[View Full Document](#)

Layer 1: Core Reference (10 Tables)

- League structure (seasons, conferences, divisions, clubs)
- Venues (stadiums, neutral sites, international)
- People and roles (12+ required designations per club)
- Organizational hierarchy

Layer 2: Governance & Policy (5 Tables)

- 8 policy domains (Integrity, Technology, Medical, Injury, Uniform, Broadcast, Ticketing, Emergency)
- Policy documents (Game Operations Manual, Appendices)
- Enforceable clauses with violation severity
- Required artifacts (certifications, plans, reports)

Layer 3: Seasonal Operations (6 Tables)

- 272+ games across all types (preseason, regular, playoff, special events)
- Pregame meetings (3-5 required per game)
- Technology system checks (6 systems validated per game)
- Schedule key dates (from Appendix H)

Layer 4: Compliance & Risk (8 Tables)

- Certifications (Integrity, Game Ops, Technology)
- Emergency Management Plans (Appendix J)
- Injury reports (timeliness, specificity tracking)
- Integrity cases (investigations, sanctions)
- Uniform violations (on-field enforcement)

Layer 5: Metrics & Scoring (5 Tables)

- Compliance scores (0-100% per club, domain, season)
- 21 distinct KPIs across all dashboards
- Alert rules (automated notifications)
- Historical trends and benchmarking

Total: 34 detailed tables with field definitions, relationships, business rules, indexes, and SQL validation logic.

2. Dashboard Wireframes & KPI Specifications (4 Executive Views)

[View Full Document](#)

Dashboard 1: Executive League Command Center

Audience: Commissioner, Football Operations VP, Club Presidents

Key Panels:

- **League Readiness Score:** Composite health metric (currently 94%)
- **Club Compliance Heatmap:** 32 clubs × 8 domains, color-coded status
- **Active Investigations:** Real-time case pipeline with aging alerts
- **Season Phase Timeline:** Offseason → Preseason → Regular → Postseason milestones

Value: One-glance view of League integrity and operational readiness.

Dashboard 2: Club & Venue Readiness Profile

Audience: Club GMs, COOs, Stadium Operations, League Compliance Officers

Key Panels:

- **Role Designation Matrix:** 12+ required roles with certification status
- **Emergency Management Posture:** EMP completeness, MOUs, drill history
- **Technology Compliance Scorecard:** Recent validation history, issue tracking
- **Injury Reporting Performance:** Timeliness/specificity scores, peer ranking
- **Uniform & Conduct Record:** 3-year violation trend, fine exposure

Value: Clubs can self-audit before League reviews; proactive gap identification.

Dashboard 3: Game Operations Control Room

Audience: Game Day Designees, Stadium Operations, Officials, League Observers

Key Panels:

- **Pregame Protocol Tracker:** Real-time meeting confirmations (90-min, 120-min checkpoints)
- **Technology Systems Status:** Live validation (C2C, tablets, IVR, C2P, frequencies, network)
- **Emergency Readiness Confirmation:** EMS on-site, egress routes, equipment checks
- **Injury Event & Reporting Log:** Live compliance tracking (2-minute disclosure rule)
- **Uniform & On-Field Compliance:** Pre-game inspection + in-game violations

Value: Every game becomes a compliance-validated event; instant documentation for investigations.

Dashboard 4: Season Competition & Integrity Overlay

Audience: Commissioner, Broadcast Partners, Club Owners, Gambling Compliance

Key Panels:

- **Playoff Qualification Tracker:** Algorithm-driven standings (no subjective factors)
- **Compliance vs Performance Correlation:** Statistical analysis ($r=+0.23$, weak positive)
- **Injury Reporting & Gambling Risk:** Clubs flagged for late/inaccurate disclosures
- **Historical Discipline & Consistency:** Sanction analysis ($\pm 25\%$ variance acceptable)

Value: Demonstrates competitive integrity through transparent, data-driven governance.

3. Compliance Playbook Mapping (25+ Automated Workflows)

[View Full Document](#)

Translated Manual Sections:

Section A: Competitive Aspects

- Integrity of the Game & Enforcement ✓
- Game Day Designees ✓
- Game Day Technology Liaison ✓
- Annual certifications workflow

Section B: Stadium Facilities

- Visitor Locker Room (Rule of Equity) ✓
- Pre-season inspections workflow
- Post-game visitor feedback loop

Section C: Technology Systems

- Coach-to-Coach Communications (C2C) ✓
- Analytics Tablets ✓
- Injury Video Review (IVR) ✓
- Coach-to-Player (C2P) ✓
- Frequency Coordination ✓
- Equity enforcement playbook

Appendix I: Injury Reporting

- Practice Report workflow
- Game Status Report workflow
- In-Game Injury Reporting ✓ (2-minute disclosure rule)
- Specificity scoring automation

Appendix J: Emergency Management

- Annual EMP submission & review ✓
- Completeness scoring (Basic Plan 40%, Annexes 30%, Appendices 30%)
- Emergency drill documentation ✓
- MOU tracking with local authorities

Each Playbook Includes:

-  Step-by-step workflow (trigger → responsible role → deadline → validation)
 -  Data schema integration (which tables, what fields)
 -  SQL validation rules (automated compliance checks)
 -  Dashboard display mapping (where it surfaces)
 -  Alert conditions (when to notify whom)
-

Key Performance Indicators: 21 KPIs Across All Dashboards

Executive Command Center KPIs (5)

1. **League Readiness Score** - Composite compliance across 32 clubs (Target: ≥90%)
2. **Active Risk Events** - Count by severity (Critical, High, Medium)
3. **Season Phase Progress** - Milestone completion % by phase
4. **Club Compliance Heatmap** - Multi-dimensional status grid
5. **Integrity Case Pipeline** - Investigation status and aging

Club Readiness Profile KPIs (7)

6. **Overall Club Compliance Score** - Weighted composite (Certs 30%, Submissions 25%, Incidents 25%, Timeliness 20%)
7. **Peer Ranking** - League, conference, division position
8. **Role Designation Completeness** - % of required roles filled with valid certs
9. **Emergency Management Completeness** - EMP score (95%+ required for approval)
10. **Technology System Health** - Pass/fail status across 6 systems
11. **Injury Reporting Timeliness** - % of reports on time (Target: 100%)
12. **Uniform Compliance Record** - 3-year violation trend, fine exposure

Game Control Room KPIs (6)

13. **Game Status & Compliance Posture** - GO/NO-GO determination
14. **Pregame Meeting Compliance** - On-time completion of 3-5 required meetings
15. **Technology Systems Health Dashboard** - Real-time pass/fail (auto-refresh every 60s pre-game)
16. **Emergency Readiness Checklist** - All confirmations checked before kickoff
17. **Injury Reporting (Live)** - 2-minute disclosure compliance tracking
18. **Uniform Violations (Live)** - Pre-game inspection + in-game logging

Competition & Integrity KPIs (6)

- 19. **Playoff Qualification Tracker** - Algorithm-driven standings with tiebreaker transparency
- 20. **Integrity Score Distribution** - League-wide histogram (identifies outliers)
- 21. **Compliance vs Performance Correlation** - Statistical analysis (compliance ≠ wins, but violations correlate with instability)

Additional Analytics:

- Sanction consistency (historical comparisons)
 - Injury reporting risk scores (gambling integrity)
 - Competitive impact assessment (violations affecting outcomes)
-

Business Value: Quantified Impact

Efficiency Gains

Before EVERGAME (Manual Process):

Process	Annual Hours	Method
EMP Review	1,280 hours	32 clubs × 40 hours each
Role Certifications	768 hours	32 clubs × 12 roles × 2 hours
Technology Checks	816 hours	272 games × 6 systems × 30 min
Compliance Tracking	2,000+ hours	Spreadsheets, emails, phone calls
Investigation Evidence	500+ hours	Manual collection, no audit trail
TOTAL	5,364+ hours/year	Fragmented, reactive

After EVERGAME (Automated):

Process	Time Saved	Automation
EMP Review	75% reduction	Auto-scoring, flagged deficiencies

Role Certifications	60% reduction	Auto-expiration alerts, self-service
Technology Checks	80% reduction	Real-time validation, auto-logging
Compliance Tracking	90% reduction	Single dashboard, real-time visibility
Investigation Evidence	60% reduction	Complete audit trail, immutable ledger
TOTAL SAVED	4,200+ hours/year	Proactive, transparent

League Staff Time Saved: 2,000+ hours/season

Club Staff Time Saved: 50+ hours per club/season (1,600 hours total)

Risk Mitigation

Violation Prevention

- **40% reduction** in compliance incidents (proactive alerts catch issues before they escalate)
- **Pattern recognition** identifies systemic problems (e.g., "8 clubs missing EMP updates")
- **Predictive alerts** 30/60/90 days before deadlines

Investigation Efficiency

- **60% faster** investigations (complete evidence chain eliminates manual collection)
- **100% audit trail** (every action timestamped with responsible party and policy reference)
- **Eliminates disputes** (immutable evidence, no "he said/she said")

Competitive Integrity

- **Algorithm-driven** playoff standings (zero subjective factors)
- **Sanction consistency** (automated historical comparisons, $\pm 25\%$ variance flagged)
- **Public transparency** (sanitized dashboard view builds fan trust)

Gambling Compliance

Injury Reporting Integrity

- **Real-time monitoring** of disclosure timeliness and specificity
- **Risk scoring** for clubs with pattern violations (2+ late reports in 30 days = "Medium Risk")
- **Automated alerts** to gambling partners (API access to risk flags, not raw data)

Competitive Equity Demonstration

- **Transparent tiebreaker logic** (algorithm publicly documented)
 - **No insider advantage** (all stakeholders see same data simultaneously)
 - **Betting line confidence** (accurate injury disclosures reduce information asymmetry)
-

Implementation Roadmap: 24-Week Phased Deployment

Phase 1: Data Foundation (Weeks 1-4)

Objective: Build core infrastructure

Activities:

- Implement 34-table schema (PostgreSQL + Sentrais graph hybrid)
- Develop RESTful API endpoints and GraphQL schemas
- Migrate historical data (past 3 seasons for trend analysis)
- Set up role-based access control (6 user role types)

Deliverables:

-  Database deployed with sample data
-  API documentation published
-  Data migration scripts validated
-  RBAC tested

Milestone: Data layer ready for dashboard connections

Phase 2: Dashboard Development (Weeks 5-12)

Objective: Build all 4 executive dashboards

Week 5-6: Executive Command Center

- League Readiness Score (gauge visualization)
- Club Compliance Heatmap (32×8 interactive grid)
- Active Investigations (case pipeline table)

- Season Phase Timeline (milestone tracker)

Week 7-8: Club Readiness Profile

- Role Designation Matrix (12+ roles per club)
- Emergency Management Posture (EMP completeness)
- Technology Compliance Scorecard (validation history)
- Injury Reporting Performance (timeliness/specificity)

Week 9-10: Game Control Room

- Pregame Protocol Tracker (real-time meeting confirmations)
- Technology Systems Status (live validation, 60s refresh)
- Emergency Readiness Confirmation (EMS, egress, equipment)
- Injury Event & Reporting Log (2-minute compliance)

Week 11-12: Competition & Integrity

- Playoff Qualification Tracker (algorithm-driven standings)
- Compliance vs Performance Correlation (scatter plot)
- Injury Reporting Risk Scores (gambling compliance)
- Historical Discipline Analysis (sanction consistency)

Deliverables:

-  All 4 dashboards functional
-  21 KPIs rendering correctly
-  Mobile-responsive design validated
-  User acceptance testing completed

Milestone: Dashboard layer ready for workflow automation

Phase 3: Playbook Translation & Integration (Weeks 13-16)

Objective: Automate 25+ compliance workflows

Week 13: Sentrais Playbook Engine Setup

- Ingest Game Operations Manual (PDF → machine-readable)
- Define workflow triggers (season phases, deadlines, events)
- Map policy clauses to validation rules (SQL logic)

Week 14: Core Workflow Automation

- Annual certifications (Integrity, Game Ops, Technology)
- EMP submission and review (completeness scoring)
- Technology pre-game validation (6 systems × 272 games)

Week 15: System Integrations

- Connect to club management systems (API pattern)
- Connect to venue operations (database pattern)
- Connect to technology infrastructure (custom adapters)

Week 16: Alert & Notification Engine

- Configure 40+ alert rules (thresholds, severity, recipients)
- Email/SMS delivery setup
- Dashboard notification center

Deliverables:

-  25+ playbooks operational
-  3-5 NFL systems integrated
-  Alert engine functional
-  End-to-end workflow testing

Milestone: Automation layer ready for pilot deployment

Phase 4: Pilot Program (Weeks 17-20)

Objective: Validate with 4 clubs across different divisions

Pilot Clubs (Recommended):

- **AFC East:** Buffalo Bills (high-performing, proactive compliance)
- **NFC West:** San Francisco 49ers (tech-forward, modern systems)
- **AFC South:** Indianapolis Colts (mix of legacy + modern)
- **NFC North:** Green Bay Packers (community-owned, unique structure)

Week 17: Pilot Onboarding

- Training sessions for Game Day Designees, GDTLs, Stadium Managers
- Dashboard access provisioned (role-based)
- Historical data loaded (past 2 seasons)

Week 18-19: Live Operation

- Monitor 2-3 pilot club home games
- Real-time feedback collection
- Issue tracking and resolution

Week 20: Pilot Debrief

- Lessons learned session with each club
- Dashboard UX refinements
- Workflow optimization based on feedback

Deliverables:

-  4 pilot clubs fully operational
-  8-12 games monitored successfully
-  User feedback incorporated
-  System performance validated

Milestone: Production-ready for League-wide rollout

Phase 5: League-Wide Rollout (Weeks 21-24)

Objective: Deploy to all 32 clubs in 4 waves

Week 21: Wave 1 (AFC Divisions)

- AFC East (4 clubs): BUF, MIA, NE, NYJ
- AFC North (4 clubs): BAL, CIN, CLE, PIT

Week 22: Wave 2 (AFC Divisions)

- AFC South (4 clubs): HOU, IND, JAX, TEN
- AFC West (4 clubs): DEN, KC, LV, LAC

Week 23: Wave 3 (NFC Divisions)

- NFC East (4 clubs): DAL, NYG, PHI, WAS
- NFC North (4 clubs): CHI, DET, GB, MIN

Week 24: Wave 4 (NFC Divisions)

- NFC South (4 clubs): ATL, CAR, NO, TB
- NFC West (4 clubs): ARI, LAR, SF, SEA

Each Wave Includes:

- 2-hour training webinar (role-specific: GDD, GDTL, Stadium Manager)
- Access provisioning (credentials, permissions)
- Historical data migration (past 2 seasons)
- Dedicated support channel (Slack, email, phone)

Deliverables:

-  All 32 clubs operational
-  Complete training attendance (96+ staff trained)
-  All integrations live
-  24/7 support available

Milestone: Full production deployment for 2025 season

Success Metrics: How We Measure Impact

Operational Efficiency (Weeks 1-12)

- **Certification Processing Time:** Reduce from 40 hours → 10 hours per club
- **EMP Review Time:** Reduce from 8 hours → 2 hours per club (League staff)
- **Technology Check Time:** Reduce from 90 minutes → 30 minutes per game
- **Target:** 75% time reduction across all workflows

Compliance Improvement (Weeks 13-24)

- **On-Time Submissions:** Increase from 85% → 95% (certifications, EMPs)
- **Pregame Meeting Compliance:** Achieve 98% on-time completion
- **Technology Pass Rate:** Maintain 100% pre-kickoff validation
- **Injury Report Timeliness:** Achieve 100% within 2-minute disclosure rule
- **Target:** 95%+ compliance across all domains

Risk Reduction (Ongoing)

- **Violation Prevention:** 40% reduction in compliance incidents vs. prior season
- **Investigation Duration:** Reduce from 45 days → 18 days (average)
- **Sanction Consistency:** All sanctions within $\pm 25\%$ of historical average (no outliers)
- **Target:** Zero competitive integrity disputes

User Adoption (Weeks 17-24)

- **Dashboard Utilization:** 90%+ of authorized users active weekly
- **Training Completion:** 100% of required roles certified on EVERGAME
- **User Satisfaction:** Net Promoter Score (NPS) ≥ 70
- **Target:** System becomes "single source of truth" for compliance

Competitive Integrity (Season-Long)

- **Public Trust:** Fan surveys show 85%+ confidence in League integrity (up from baseline)
- **Media Transparency:** Zero controversies over "subjective" decisions (algorithm-driven)
- **Gambling Partner Confidence:** Betting line accuracy within 2% of expected (injury disclosure impact)
- **Target:** League becomes gold standard for sports governance transparency

Investment & ROI Analysis

Total Cost of Ownership (3-Year)

Component	Year 1	Year 2	Year 3	Total
Sentraix Platform License	\$1.2M	\$1.0M	\$1.0M	\$3.2M
Implementation Services	\$800K	\$200K	\$100K	\$1.1M
System Integrations	\$400K	\$100K	\$50K	\$550K
Training & Change Mgmt	\$300K	\$100K	\$50K	\$450K
Ongoing Support	\$200K	\$250K	\$300K	\$750K
Infrastructure (AWS)	\$150K	\$180K	\$200K	\$530K
TOTAL	\$3.05M	\$1.83M	\$1.70M	\$6.58M

Return on Investment (3-Year)

Benefit Category	Annual Value	3-Year Total
------------------	--------------	--------------

League Staff Time Saved (2,000 hrs × \$100/hr)	\$200K	\$600K
Club Staff Time Saved (1,600 hrs × \$75/hr)	\$120K	\$360K
Violation Prevention (40% reduction × \$500K avg cost)	\$200K	\$600K
Investigation Efficiency (60% reduction × \$300K)	\$180K	\$540K
Avoided Integrity Crises (1 major incident prevented)	\$2M	\$6M
Gambling Compliance Value (reputation protection)	\$500K	\$1.5M
TOTAL ANNUAL BENEFIT	\$3.2M	\$9.6M

Net ROI: \$9.6M benefit - \$6.58M cost = **\$3.02M net gain over 3 years**

ROI Percentage: 46% return on investment

Payback Period: 18 months

Note: Intangible benefits not quantified include enhanced competitive integrity reputation, reduced legal risk, improved fan trust, and strengthened gambling partner relationships.

Risk Mitigation: Implementation Safeguards

Technical Risks

Risk: System Integration Failures

Mitigation:

- Phased integration approach (4-5 systems per wave)
- Extensive testing in sandbox environment before production
- Rollback procedures for each integration
- Sentrais custom adapter development for problematic systems

Risk: Data Migration Errors

Mitigation:

- Parallel run (old + new systems) during Week 17-20 pilot

- Data validation scripts (100% reconciliation checks)
- Manual spot-checking by League staff
- Full audit trail of migration process

Risk: Dashboard Performance Issues

Mitigation:

- Load testing with 500+ concurrent users
- Auto-scaling infrastructure (AWS)
- Caching layer for frequently accessed data
- 99.9% uptime SLA with Sentra

Organizational Risks

Risk: User Adoption Resistance

Mitigation:

- Executive sponsorship from Commissioner's Office
- Early pilot with "champion" clubs
- Role-specific training (not one-size-fits-all)
- 24/7 support during first season
- Quick wins highlighted (e.g., automated alerts save hours)

Risk: Change Management Challenges

Mitigation:

- Dedicated change management team (Weeks 17-24)
- Clear communication plan (monthly updates to all clubs)
- Feedback loops (weekly surveys during pilot)
- Incentives for early adopters (recognition in League communications)

Compliance Risks

Risk: Legal/Privacy Concerns (PII Data)

Mitigation:

- Encryption at rest and in transit (all PII fields)
- Role-based access control (strict permissions)
- Audit logging (every access tracked)

- GDPR/CCPA compliance built-in
- Annual security audits by third party

Risk: Integrity Case Confidentiality Breaches

Mitigation:

- Maximum security on integrity_case table
 - Restricted access (Commissioner Office only)
 - Automatic redaction in non-privileged views
 - Breach detection alerts
 - Legal review of all access protocols
-

Critical Success Factors

Must-Haves for Success

1. Executive Sponsorship

Requirement: Commissioner and Football Operations VP must be active champions

Why Critical: Clubs will only adopt if leadership makes it mandatory

Validation: Commissioner public statement, appearance at training sessions

2. Club Buy-In

Requirement: All 32 clubs commit to using dashboard as "single source of truth"

Why Critical: System only works if everyone uses it consistently

Validation: Signed participation agreements, GM commitment letters

3. Data Quality

Requirement: Historical data must be accurate (past 2-3 seasons)

Why Critical: Trends, benchmarks, and alerts depend on clean baseline

Validation: 95%+ accuracy in data migration validation scripts

4. Training Effectiveness

Requirement: All required roles must complete certification on EVERGAME

Why Critical: System is sophisticated; poor training = low adoption

Validation: 100% training completion, 85%+ satisfaction scores

5. Continuous Improvement

Requirement: Quarterly reviews with feedback incorporated

Why Critical: System must evolve with changing policies and needs

Validation: Release cadence (4 updates per season), user feedback scores

Conclusion: Transforming NFL Governance

The EVERGAME 360 Dashboard represents a **paradigm shift** in how the NFL manages competitive integrity, club compliance, and operational excellence. By translating the Game Operations Manual from a static PDF into a living, intelligent system, the NFL will:

- ✓ **Save thousands of staff hours** through automation
- ✓ **Prevent violations before they occur** through predictive analytics
- ✓ **Ensure competitive integrity** through transparent, algorithm-driven governance
- ✓ **Build public trust** by demonstrating fairness with data, not rhetoric
- ✓ **Protect the League's reputation** with proactive risk management

Next Steps

Week 1: Executive presentation to Commissioner and Football Operations leadership

Week 2: Secure budget approval (\$3.05M Year 1)

Week 3: Execute Sentra's contract and kickoff Phase 1

Week 4: Begin data foundation build

Target Launch: Ready for 2025 preseason (August 2025)

Complete Documentation Suite

1. [Data Schema Architecture](#) - 34 tables across 5 layers with complete field definitions, relationships, and business rules
2. [Dashboard Wireframes & KPIs](#) - 4 executive dashboards with 21 KPIs, visualizations, and interaction specifications

3. [Compliance Playbook Mapping](#) - 25+ automated workflows translating Game Operations Manual into executable processes
4. **This Executive Summary** - Complete system overview, ROI analysis, and implementation roadmap
