

LIVE EVENTS INTELLIGENCE: GO-TO-MARKET STRATEGY

Powered by Sentrais

1. Executive Summary

Live events—tours, concerts, festivals, comedy tours, and multi-night residencies—operate with fragmented systems, siloed stakeholders, and legacy operational models that leak money, reduce fan experience quality, and impose unnecessary risk. No unifying intelligence layer exists across production, venue operations, promoters, ticketing, and fan engagement.

Sentrais is positioned to become the *operational intelligence platform* for this sector by delivering a unified, real-time, predictive view of live event operations. The vertical leverages proven NFL deployments and roadmap intelligence to model venues, tours, run-of-show workflows, production specs, and VIP monetization.

This vertical expands the Sentrais footprint into a high-value adjacency, creating a new recurring revenue stream while building strategic leverage for future capital and enterprise deals.

2. Total Addressable Market (TAM)

Top-down (industry revenue) and bottom-up (addressable clients) approaches.

2.1 Industry TAM

Source: industry reports (PwC Global Entertainment & Media Outlook, Live Nation filings, Pollstar)

Market Segment	Annual Global Value
Live music market	\$36B

VIP / Premium ticketing \$8–10B

Touring production & logistics \$20B+

Venue operations & technology \$15B

Artist merch, fan monetization \$5B+

Total Live Events Ecosystem: \$75–\$85B

2.2 Technology Addressable Market for Sentrais

Sentrais does not compete with ticketing or core POS.

It powers intelligence, operational orchestration, and real-time performance.

Estimated attach rate across stakeholders:

- Promoters (Live Nation, AEG): \$2–4M per year each
- 1,500 tier-one and tier-two venues worldwide: \$50–150K per venue per year
- 100+ global touring artists capable of \$250–500K per year
- Production companies and logistics operators: \$200–500K per year
- VIP experience design and monetization platforms: \$100–200K per year

Serviceable Obtainable Market (SOM) over 5 years: ~\$450–600M

(Conservative penetration of: 10% venues, 20% high-value artists, one major promoter, and a handful of global productions.)

This aligns with an enterprise SaaS scale-growth path.

3. Market Positioning

Sentrais: The Intelligence OS for Live Events

Positioning Statement:

Sentrais delivers the first real-time operational intelligence platform for live events. It unifies touring, production, venue operations, ticketing, VIP experiences, and fan flows into a single, predictive, revenue-optimized system.

Differentiators

1. **End-to-end modeling engine**
Stages → seating → ingress/egress → load-in → curfews → VIP → fan data → financial impact modeling.
 2. **Real-time operational readiness and orchestration**
Predicts overruns, VIP failures, seat displacement, production conflicts.
 3. **Cross-ecosystem visibility**
Connects artists, production managers, venues, promoters, and ticketing partners.
 4. **Financial impact intelligence**
Quantifies cost avoidance, revenue opportunities, and operational uplift.
 5. **Live Events AI Workbench**
Provides a governance-ready AI layer for scenario simulation and decision support.
 6. **Neutral and vendor-agnostic**
Unlike ticketing companies or promoters, Sentrais sits above the stack as the intelligence harness.
-

4. Buyer Personas

Primary Buyers (commercial authority)

1. Promoter / Tour Operator Executives

Live Nation, AEG Global Touring

- Priorities: reduce penalties, improve throughput, optimize venue-day profitability, standardize processes across markets.
- Value triggers:

- Curfew overruns reduced by 30–50 percent
 - VIP profitability uplift
 - Better venue-turn timing from show to show
-

2. Venue General Managers & Operations Directors

Arenas, stadiums, theaters

- Priorities: avoid seating misconfiguration incidents, drive fan satisfaction, meet safety standards.
 - Value triggers:
 - Predictive models for seating conflicts
 - Load-in/load-out performance scoring
 - End-of-night reconciliation automation
-

3. Production Managers (Hydro, Huggies types)

The power users who “run the show.”

- Priorities: visibility, predictable quality, no surprises, maintain brand as elite operators.
 - Value triggers:
 - Real-time visibility into staffing, staging, and logistics
 - Protection against being unfairly blamed
 - Ability to communicate confidently with artists
-

4. Artist Management Teams

High-value artists with recurring tours

- Priorities: VIP revenue clarity, brand integrity, fan satisfaction, margin protection.
 - Value triggers:
 - VIP experience design and modeling
 - Daily tour performance dashboards
 - Negotiation leverage with venues and promoters
-

5. Ticketing & Fan Monetization Leaders (Ticketmaster, AEG Presents)

- Priorities: transparency, reducing churn, increasing conversion of premium packages.
 - Value triggers:
 - VIP experience alignment with pricing
 - Fan flow modeling
 - Loyalty and monetization insights
-

5. Competitor Landscape

Direct competitors (intelligence/operations)

- **Nobody with full-stack orchestration.**
- Partial overlays include:
 - Prism (financials only)
 - VenueOps (workflow but no modeling)

- EventBooking (scheduling)
- Movement and crowd analytics tools (but siloed)

Sentrais is differentiated as a **unifying intelligence layer** rather than point-solution software.

Indirect competitors

- Ticketmaster (fan data + VIP tiers)
- Live Nation internal analytics
- Production scheduling tools
None provide cross-stack visibility, scenario modeling, or real-time orchestration.

Strategic advantage

Sentrais becomes the “*air traffic control*” for all stakeholders without competing for ownership of the event or the ticket.

6. GTM Model

6.1 Strategic Targeting Approach

1. **Start with the Artist → Pull to Production → Push into Promoters → Expand to Venues → Land Enterprise Deals.**
This sequenced GTM strategy mirrors what worked in the NFL.
 2. **Use high-value POCs as a market-making wedge**
These POCs become case studies, not pilots.
 3. **Establish Sentrais as the neutral intelligence harness**
Gatekeeper of truth, not a replacement for existing systems.
-

7. Proof of Concept (POC) Strategy

You defined three anchor POCs. This section refines them into a market-entering portfolio.

POC 1: Usher Tour Intelligence Model

- Objective: Model an entire tour; quantify cost avoidance; redesign VIP value; build repeatability.
 - Deliverables:
 - Tour blueprint
 - Curfew & load-in/out risk model
 - VIP tier redesign + financial modeling
 - Outcome:
 - Artist becomes reference customer
 - Opens conversations across Live Nation touring
-

POC 2: PinkPanther Theater + Festival Versatility Model

- Objective: Prove multi-venue adaptability and cross-format intelligence.
 - Deliverables:
 - Theater vs festival modeling
 - Multi-night city strategy
 - Outcome:
 - Validates Sentrais beyond arena-scale
 - Attracts touring artists that avoid mega-venues
-

POC 3: Braves Stadium Incident Reconstruction

- Objective: Demonstrate value by reconstructing a known industry failure.
 - Deliverables:
 - Visual model showing where things went wrong
 - Financial impact report
 - "Counterfactual" prediction engine
 - Outcome:
 - Immediate credibility signals to Live Nation, AEG, and Ticketmaster
-

8. Commercial Packaging & Pricing Strategy

Tiered Model

1. Tour Intelligence Blueprint (per tour)

- \$150K–\$250K for full tour modeling
 - Add-ons:
 - VIP redesign package: +\$50K
 - Logistics optimization package: +\$50K
 - Annual data continuity license: ~\$100K
-

2. Venue Intelligence Harness (per venue)

Annual subscription: \$35K–\$85K depending on capacity and event volume

Includes:

- Venue operating blueprint
 - Ingress/egress modeling
 - Production compatibility checks
 - VIP and premium seat intelligence
 - Real-time readiness scoring
-

3. Promoter/Enterprise Control Tower (Live Nation, AEG)

Annual: \$2–\$4M enterprise contract

Multi-year preferred pricing available.

Includes:

- Cross-tour readiness analytics
 - VIP monetization suites
 - Artist performance dashboards
 - Predictive financial modeling
 - Multi-venue optimization engine
-

4. Add-On Modules

- Brand activations and sponsorship modeling
- 3D staging and seat-displacement intelligence
- AI scenario engine for “What If” tour planning

- Onsite operations command center integration
-

9. Sales Motions

1. Advisory-led selling

Use Keith and Ren as strategic conduits.
Create influencer loops, not cold starts.

2. Insight-led demos

Never demo a tool. Always demo a *model* of their events.
This was the NFL unlock.

3. Executive sponsorship

Target C-level at Live Nation and AEG with a 360 model before meetings.
Make the value visible on slide 1.

4. Artist-first pipeline building

Offer artists a free intelligence dashboard in exchange for historical data.
This produces:

- Case studies
 - Reference models
 - Relationship leverage into venues and promoters
-

10. Expansion Strategy (Years 1–3)

Year 1: Land the vertical

- Complete 3 POCs
- Land 1–2 enterprise venue deals
- Secure one promoter-level engagement
- Build playbook catalog for 10+ tours

Year 2: Scale across ecosystem

- Enterprise deal with Live Nation or AEG
- Expand into VIP integrators
- Launch fan experience intelligence engine
- Multi-city brand activations

Year 3: Institutionalize

- Formalize Live Events Certification Program
- Introduce the Sentrais Live Event Index (SLI)
- Become backbone of touring and venue operations

11. Why We Win

1. **Proven in the most complex environment: NFL game operations.**
2. **First-mover advantage in a fragmented industry with no intelligence OS.**
3. **Artist-led wedge strategy bypasses historical gatekeepers.**
4. **Data network effects: the more tours you model, the faster the platform improves.**
5. **Revenue expansion across multiple stakeholders within each ecosystem**

Possible Taglines and Elevator Speech:

SENTraiS Live Event Intelligence transforms how organizations run high-stakes events by turning fragmented operations into a unified, real-time command picture. Instead of reacting to problems, SENTraiS gives your teams predictive insight—connecting people, processes, and technology into one trusted operational view. From IT readiness to venue operations and partner coordination, Sentrais ensures every game, show, or major event runs with precision, accountability, and confidence. With Sentrais, your organization doesn't just manage events—you orchestrate them.
