

SIPE MASTER DOCUMENT REGISTRY

Official Source of Truth - Version Control Record

Registry Version: 1.0

Last Updated: November 23, 2025, 7:20 PM EST

Registry Owner: CEO (Tye)

Classification: NOVATE PROPRIETARY - RESTRICTED

REGISTRY PURPOSE

This document serves as the **authoritative source of truth** for all SIPE (Sentrais Innovation Playbook Engine) documentation. It maintains version control across all conversations, projects, and implementations.

Critical Function: When resuming SIPE work in any new conversation or project, ALWAYS reference this registry first to ensure you're working with the latest versions.

OFFICIAL SIPE DOCUMENT INVENTORY

Version 1.0 Release - November 23, 2025

Document Name	Version	Status	Lines	Size	Classification
SIPE_Core_Architecture	1.0	ACTIVE	1,008	42 KB	RESTRICTED
SIPE_Executive_Implementa- tion_Guide	1.0	ACTIVE	354	16 KB	INTERNAL
SIPE_Version_Control_System	1.0	ACTIVE	562	20 KB	INTERNAL
SIPE_Visual_Architecture_Reference	1.0	ACTIVE	588	56 KB	PRESENTATION
SIPE_Delivery_Summary	1.0	ACTIVE	399	17 KB	EXECUTIVE
SIPE_Master_Document_Registry	1.0	ACTIVE	-	-	RESTRICTED
TOTAL			2,911	151 KB	

FILE LOCATIONS (CURRENT)

Primary Storage (Production)

/mnt/user-data/outputs/

- |— SIPE_Core_Architecture_v1.0.md
- |— SIPE_Executive_Implementation_Guide_v1.0.md
- |— SIPE_Version_Control_System_v1.0.md

```
|— SIPE_Visual_Architecture_Reference_v1.0.md
|— SIPE_Delivery_Summary_v1.0.md
|— SIPE_Master_Document_Registry_v1.0.md (this file)
```

Backup Storage (Required)

Action Required: Upload to Google Drive within 24 hours

- Folder: NOVATE > SIPE > v1.0 Release
- Tag: NOVATE-PROPRIETARY-RESTRICTED
- Permissions: CEO, CTO, Program Director only

Archive Storage (For Historical Versions)

```
/mnt/user-data/archive/sipe/
|— [Future versions will be archived here after 12 months]
```

DOCUMENT RELATIONSHIPS & DEPENDENCIES

Primary Documents (Foundation)

1. **SIPE_Core_Architecture_v1.0.md**

2. The master blueprint - all other documents reference this
3. Contains: 11 main parts, 13 appendices
4. Key sections: Architecture, Stakeholder Outputs, KPIs, Self-Learning Engine
5. **Authority Level:** HIGHEST - This is the source of truth for all methodology questions
6. **SIPE_Version_Control_System_v1.0.md**
7. Governs how all SIPE documents are managed
8. Defines: Versioning standards, discrepancy detection, cross-chat continuity
9. **Authority Level:** GOVERNANCE - Must be followed for all document changes

Operational Documents

3. **SIPE_Executive_Implementation_Guide_v1.0.md**
4. 30-60-90 day roadmap for operationalizing SIPE
5. Practical: Resource requirements, quick wins, risk mitigation
6. **Authority Level:** OPERATIONAL - The "how to deploy" manual
7. **SIPE_Visual_Architecture_Reference_v1.0.md**
8. Presentation materials and visual diagrams
9. For: Executive presentations, training, stakeholder communication
10. **Authority Level:** COMMUNICATION - Visual representation of core architecture
11. **SIPE_Delivery_Summary_v1.0.md**
12. Executive overview and quick reference
13. For: CEO and leadership team

14. **Authority Level:** SUMMARY - High-level synthesis of all documents
15. **SIPE_Master_Document_Registry_v1.0.md** (This Document)
16. Version control record and source of truth reference
17. For: Cross-conversation continuity and version tracking
18. **Authority Level:** REGISTRY - The meta-document that governs all others

CROSS-REFERENCE WITH EXISTING NOVATE DOCUMENTATION

Superseded Documents (HISTORICAL Status)

These documents are now **SUPERSEDED** by SIPE v1.0:

- NOVATE_Agile_PMO_Framework [Previous conversations] → Now integrated into SIPE Core Architecture
- Engagement_Lifecycle_Documentation [Previous conversations] → Now Part 3 of SIPE Core Architecture
- Ad-hoc playbooks and methodologies → Now standardized in 72-playbook matrix

Complementary Documents (ACTIVE Status)

These documents remain active and work alongside SIPE:

- **NFL_Innovation_HUB_Program_Design.pdf** → Reference document, not NOVATE-controlled
- **N-Ovate Innovation Nexus (NIN) Methodology** → Core methodology, SIPE operationalizes this
- **Sentraix Platform Documentation** → Technical infrastructure that SIPE runs on
- **EverGame Knowledge Hub** → Client-facing knowledge base, integrates with SIPE

VERSION HISTORY LOG

Version 1.0 - November 23, 2025 (Initial Release)

Release Type: MAJOR (Foundation Architecture)

Author: Claude AI (NOVATE Intelligence System)

Approver: Pending (CEO Tye)

Conversation ID: [Current conversation - Nov 23, 2025]

What's New:

- Complete SIPE architecture from ground up

- Three-layer intelligence system (Foundation, Intelligence, Presentation)
- Stakeholder-specific output engines (Client, Internal, Architecture)
- Self-learning engine with ML pipeline
- 72-playbook matrix (Zone × Model × Phase)
- Methodology synthesis (McKinsey, Bain, Deloitte, SAFe, NIST, Lean Six Sigma, PE firms)
- Churn prevention intelligence (Diagnose/Design phase focus)
- Cloud spend optimization and vendor independence modules
- Security and IP protection protocols
- NIN Analytics upsell framework
- 90-day implementation roadmap
- Version control and discrepancy tracking system

Files Created:

- SIPE_Core_Architecture_v1.0.md (1,008 lines)
- SIPE_Executive_Implementation_Guide_v1.0.md (354 lines)
- SIPE_Version_Control_System_v1.0.md (562 lines)
- SIPE_Visual_Architecture_Reference_v1.0.md (588 lines)
- SIPE_Delivery_Summary_v1.0.md (399 lines)
- SIPE_Master_Document_Registry_v1.0.md (this file)

Approval Status: PENDING

- [] CEO (Tye) - Strategic approval and budget authorization
- [] CTO - Technical architecture validation
- [] Program Director - Operational feasibility review

Next Version Scheduled: v1.1 or v2.0 (TBD based on feedback from 90-day implementation)

FUTURE VERSION PLANNING

Anticipated Updates (Next 90 Days)

Version 1.1 (MINOR) - Expected Q1 2026

- Enhancements to specific modules based on pilot feedback
- Additional playbook specifications (expanding beyond initial 4)
- Refined KPI thresholds based on real-world data
- Client dashboard UX improvements

Version 1.2 (MINOR) - Expected Q2 2026

- Self-learning engine optimizations
- ML model accuracy improvements
- New integration specifications (additional tools)
- Expanded NIN Analytics capabilities

Version 2.0 (MAJOR) - Expected Q3-Q4 2026

- Industry-specific playbook variants
- API marketplace specifications

- Advanced predictive capabilities
- Licensing/white-label framework

CHANGE REQUEST PROCESS

How to Propose Changes to SIPE Documents

Step 1: Identify Change Type

- MAJOR: Breaking changes, methodology shifts, architecture redesign
- MINOR: Feature additions, new modules, enhanced capabilities
- PATCH: Bug fixes, clarifications, corrections

Step 2: Submit Change Request

- Use format from SIPE_Version_Control_System_v1.0.md (Appendix B)
- Include: Affected documents, rationale, impact assessment, proposed solution

Step 3: Approval Process

- MAJOR: CEO + CTO + Program Director
- MINOR: Program Director + Subject Matter Expert
- PATCH: Document Owner

Step 4: Implementation

- Create new version file with incremented version number
- Update this Master Registry
- Communicate to all stakeholders
- Archive previous version (if >12 months old)

DISCREPANCY TRACKING

Current Known Discrepancies: NONE

Status:  All v1.0 documents are internally consistent as of release

Last Audit: November 23, 2025

Next Audit: December 23, 2025 (30-day review)

Discrepancy Report Log

This section will be updated when discrepancies are identified

ID	Date Found	Type	Documents Affected	Severity	Status	Resolution Date
----	------------	------	--------------------	----------	--------	-----------------

----	-----	-----	-----	-----	-----	-----
------	-------	-------	-------	-------	-------	-------

-	-	-	-	-	-	-
---	---	---	---	---	---	---

CROSS-CONVERSATION CONTINUITY PROTOCOL

For Future Claude Conversations

When Tye or any NOVATE team member starts a new conversation about SIPE:

STEP 1: Declare Continuity

State: "I am continuing work on SIPE (Sentrais Innovation Playbook Engine), which was documented in a previous conversation on November 23, 2025."

STEP 2: Load Source of Truth

Request: "Please reference the SIPE Master Document Registry v1.0 to ensure we're working with the latest versions."

STEP 3: Verify Current State

Ask: "Are there any updates or changes to SIPE since the v1.0 release on November 23, 2025?"

STEP 4: Check for Discrepancies

Query: "Have any discrepancies been flagged in the SIPE documentation since last conversation?"

STEP 5: Proceed with Confidence

Once verified, proceed with work knowing you're building on the correct foundation.

For Project-Specific Work

When applying SIPE to a specific engagement (e.g., NFL Innovation HUB):

ALWAYS:

- Reference the SIPE_Core_Architecture for methodology questions
- Use the appropriate playbook from the 72-playbook matrix
- Tag the engagement with [Zone] + [Model] + [Phase]
- Log all decisions in Evidence Ledger
- Track KPIs against thresholds defined in SIPE

NEVER:

- Deviate from NIN 6-phase model without documented approval
- Skip stage gates or evidence collection
- Use outdated playbook versions
- Share internal SIPE documentation with clients (outputs only)

SOURCE OF TRUTH HIERARCHY (RE-MINDER)

When conflicts arise between documents, this is the precedence order:

Tier 1: Authoritative (Highest Priority)

1. **SIPE_Core_Architecture_v1.0.md** - Methodology and framework
2. **Sentraix Evidence Ledger** - Historical engagement data

3. **Approved Client Contracts** - Legal commitments

Tier 2: Operational

4. **SIPE Playbooks** (when developed) - Execution guidance
5. **Engagement Deliverables** - Project-specific docs
6. **Training Materials** - Team knowledge

Tier 3: Reference

7. **External Frameworks** (SAFe, NIST, etc.) - Best practices
8. **Prior Chat Logs** - Historical context
9. **Client Communications** - Emails, Slack, meeting notes

Conflict Resolution: If Tier 1 contradicts Tier 2/3, Tier 1 wins. If same-tier conflict, escalate to Program Director.

APPROVAL SIGNATURES (DIGITAL)

Registry Approval:

- [] CEO (Tye) - Date: _____
- [] CTO - Date: _____

- [] Program Director - Date: _____

SIPE v1.0 Package Approval (All 6 Documents):

- [] CEO (Tye) - Date: _____
- [] CTO - Date: _____
- [] Program Director - Date: _____

Approval Method: DocuSign or email confirmation to sipe-approvals@novatelabs.com

DISTRIBUTION & ACCESS CONTROL

Who Can Access What

SIPE_Core_Architecture_v1.0.md (RESTRICTED):

-  CEO, CTO, Program Director (Full Access)
-  Engagement Leads (Sections 1-3, 8 only)
-  Project Managers (Sections 2-3, 8, 10 only)
-  Architecture Team (Sections 1, 6.2-6.3, 11 only)
-  Clients (No Access - Outputs Only)

SIPE_Version_Control_System_v1.0.md (INTERNAL):

-  All NOVATE Employees (Read Access)

-  Delivery Teams (Read + Report Discrepancies)
-  Engagement Leads (Read + Report + Resolve)
-  Clients (No Access)

SIPE_Executive_Implementation_Guide_v1.0.md (INTERNAL):

-  Executive Team (Full Access)
-  Investors/Board (With CEO Approval)
-  Strategic Partners (Selective, With Redactions)

SIPE_Visual_Architecture_Reference_v1.0.md (PRESENTATION):

-  Internal Presentations (All Sections)
-  Client Presentations (Sections 3, 6 only - Redact Internal)
-  Board/Investor (With CEO Approval)

SIPE_Delivery_Summary_v1.0.md (EXECUTIVE):

-  CEO, CTO, Program Director
-  Executive Team
-  Investors (With CEO Approval)

SIPE_Master_Document_Registry_v1.0.md (RESTRICTED):

-  CEO, CTO, Program Director only
-  Document Owners (for their sections)
-  All others (No Access - This is governance document)

BACKUP & DISASTER RECOVERY

Backup Strategy

Primary Backup (Daily):

- Location: Google Drive > NOVATE > SIPE > v1.0 Release
- Automated: Yes (if Google Drive sync enabled)
- Retention: Indefinite

Secondary Backup (Weekly):

- Location: AWS S3 Bucket (NOVATE-SIPE-Archives)
- Automated: Yes (via Sentrais backup job)
- Retention: 7 years

Offline Backup (Monthly):

- Location: External encrypted drive (CEO possession)
- Automated: No (manual download)
- Retention: Permanent

Disaster Recovery Plan

Scenario 1: File Corruption

- Recovery Time Objective (RTO): 1 hour
- Recovery Point Objective (RPO): Last daily backup

- Process: Restore from Google Drive

Scenario 2: Accidental Deletion

- RTO: 2 hours
- RPO: Last daily backup
- Process: Restore from Google Drive or AWS S3

Scenario 3: Complete System Loss

- RTO: 24 hours
- RPO: Last weekly backup
- Process: Restore from AWS S3, rebuild from offline backup if needed

NEXT REVIEW DATES

30-Day Review (Registry + All Docs): December 23, 2025

- Validate no discrepancies emerged during initial implementation
- Confirm all backups are operational
- Review approval status

90-Day Review (Major Checkpoint): February 15, 2026

- Assess implementation progress against roadmap
- Evaluate need for v1.1 or v2.0
- Collect feedback from delivery teams

- Review KPI performance

Quarterly Reviews (Ongoing): Q2 2026, Q3 2026, Q4 2026, etc.

- Update version inventory
- Archive old versions (if applicable)
- Audit discrepancy log
- Refine access controls

CONTACT INFORMATION

Registry Owner: CEO (Tye)

Version Control Manager: Program Director

Technical Owner: CTO

Discrepancy Reporting: #sipe-discrepancies (Slack) or sipe-discrepancies@novate-labs.com

Questions About:

- Strategic direction → CEO
- Technical implementation → CTO
- Operational execution → Program Director
- Specific playbooks → Engagement Leads
- Version control → Document Owner + Program Director

APPENDIX A: QUICK REFERENCE CHECKLIST

Starting New SIPE Work? Use This Checklist:

- ☐ Referenced Master Document Registry to confirm latest versions
- ☐ Loaded SIPE_Core_Architecture_v1.0.md for methodology questions
- ☐ Checked for known discrepancies in this registry
- ☐ Verified I'm using correct playbook for [Zone] + [Model] + [Phase]
- ☐ Confirmed client engagement is tagged properly in Sentrais
- ☐ Ready to log decisions in Evidence Ledger
- ☐ Have access to appropriate documents for my role

Proposing Document Changes? Use This Checklist:

- ☐ Identified change type (MAJOR/MINOR/PATCH)
- ☐ Filled out change request form
- ☐ Assessed impact on other documents
- ☐ Identified all stakeholders to notify
- ☐ Got appropriate approvals
- ☐ Created new version file (incremented version number)
- ☐ Updated Master Registry (this document)
- ☐ Communicated to all affected parties

- ☐ Archived old version (if applicable)

Found a Discrepancy? Use This Checklist:

- ☐ Documented discrepancy type (Data/Methodology/Terminology/Version/Cross-Project)
- ☐ Assessed severity (Critical/High/Medium/Low)
- ☐ Reported via #sipe-discrepancies Slack or email
- ☐ Logged in Discrepancy Report Log (this document)
- ☐ Notified Document Owner
- ☐ Awaiting resolution within SLA timeframe
- ☐ Verified fix when implemented

APPENDIX B: VERSION NUMBER QUICK REFERENCE

Current Versions (As of November 23, 2025):

- SIPE_Core_Architecture: **v1.0**
- SIPE_Executive_Implementation_Guide: **v1.0**
- SIPE_Version_Control_System: **v1.0**
- SIPE_Visual_Architecture_Reference: **v1.0**
- SIPE_Delivery_Summary: **v1.0**

- SIPE_Master_Document_Registry: **v1.0**

When in doubt: Check this registry. It's always the authoritative source for version numbers.

DOCUMENT CONTROL & FINAL NOTES

Registry Version: 1.0

Release Date: November 23, 2025

Classification: NOVATE PROPRIETARY - RESTRICTED

Next Review: December 23, 2025 (30-day checkpoint)

Critical Reminder: This registry is the **meta-document** that governs all SIPE documentation. If you update any SIPE document, you **MUST** update this registry. If you find a discrepancy, you **MUST** log it here. If you start work on SIPE in a new conversation, you **MUST** reference this registry first.

Status:  **ACTIVE** - This is the official source of truth for SIPE version control.

END OF MASTER DOCUMENT REGISTRY

"The single source of truth for the intelligence operating system that transforms innovation delivery."
