

2 LOVABLE PROMPT

eVenu360 Deployment / Clone Template (Rinse & Repeat)

Purpose

Instantly spin up a client-ready demo, POC, or onboarding environment using the base project.

This is the prompt you reuse every single time.

◆ PROMPT: DEPLOY EVENU360 INSTANCE

DUPLICATE PROJECT: "eVenu360 – Sentrais Base"

NAME THE NEW PROJECT:

"eVenu360 – {Client Name} – {Event Name}"

DEPLOYMENT CONFIGURATION

Apply the following configuration values:

Client Name: {Client Name}

Event Name: {Event Name}

City / Region: {City}

Event Dates: {Start Date} – {End Date}

Roles Enabled:

- {Executive}
- {Operator}
- {Auditor}

(Optional: Admin)

Playbooks Activated:

- {Stadium Certification}
- {Event-Day Operations}
- {Emergency Readiness}
- {Post-Event Review}

Branding:

- Apply client logo
- Apply accent color
- Replace "Sentrais" with "Powered by Sentrais" where appropriate

DATA MODE

Set data mode to:

- Demo (mock data) OR
- POC (hybrid mock + intake) OR
- Production (live data)

If Demo:

- Keep seeded data
- Rename entities to match client context

ROLE EXPERIENCE

Ensure role switching works globally:

- Executive sees 360 Overview by default
- Operator lands in Command Center
- Auditor lands in Compliance & Evidence

TEMPORAL SETUP

Set eventDate and currentDate to simulate:

- Pre-event readiness OR
- Event-day operations OR
- Post-event review

FINAL CHECK

Confirm:

- No base project links remain
- All labels reflect client context
- Evidence and readiness states render correctly
- IDS and compliance banners respond to data

OUTPUT

This deployment must be demo-ready in under 15 minutes
and reusable for client onboarding if the POC closes.

Why this works (and why it's powerful)

One model → infinite instances

Lovable does instantiation, not invention

You protect IP, logic, and governance

Sales, delivery, and onboarding all use the same artifact

This is how you:

Demo confidently

Close faster

Scale without chaos
