

SENTRAIS EVENTS INTELLIGENCE UNIFIED PLAYBOOK MASTER

NOVATELabs · v1.0 · 2026 · CONFIDENTIAL

Powered by Sentrais Core OS · Orchestrated by NIN · Deployed via
EVERGAME + EntertainmentOS

"Readiness cannot be assumed. It must be orchestrated, evidenced, and renewed."
Calm during chaos. Making the complex simple.

PART I — ARCHITECTURE FOUNDATION

1.1 The Platform Hierarchy

└─ CiviGrid	→ Host city & multi-agency coordination
└─ SearGrid	→ National SEAR & cross-jurisdiction
resilience	
└─ Innovation OS	→ R&D lifecycle & ecosystem simulation

1.2 Six-Layer Intelligence Stack (Mandatory All Deployments)

Layer	Name	Function
6	Security & Governance	RBAC · MFA · Zero Trust · Compliance · Change Control
5	Orchestration	Task Sequencing · Role Routing · Escalation · Cross-System
4	Evidence	Immutable Audit Log · Decision Traceability · Reconstruction
3	Intelligence	Simulation · Anomaly Detection · Predictive · Stress Testing
2	Blueprint & Entity	Digital Twin · Entity Registry · Dependency Map · Topology
1	Ingestion	APIs · Streaming · Manual Entry · External Connectors

1.3 NIN Methodology — Five Phases

Phase	Name	Application
1	DISCOVER	Map all stakeholder workflows · Identify gaps · Catalog risk
2	DIAGNOSE	Analyze failure patterns · Quantify exposure · Gap assessment
3	DESIGN	Digital twins · SOPs · Gates · Dashboard configs · Evidence schema
4	DEPLOY	n8n workflows · System integration · Real-time monitoring · Training
5	DEBRIEF	AAR evidence · Benchmark performance · Feed continuous improvement

1.4 Resilience Orchestration Cycle

1.5 Universal EVERGAME Lifecycle Zones

Zone	Timeframe	Phase	Key Activities
PREPARE	Months out	Booking → Planning → Advance	Contracts · permits · insurance · risk · stakeholders
READY	Weeks → Days	Pre-production → Load-in	Rider exchange · crew · safety · credentials · weather
RUN	Hours → Active	Build → Doors → Show	Real-time monitoring · crowd · incident · SOP execution
REVIEW	Post-event	Load-out → Settlement	AAR · evidence · settlement · lessons · playbook updates

PART II — EVENT TYPE UNIVERSE

2.1 Master Event Classification Matrix

- None
- TIER 1 – MAXIMUM COMPLEXITY (Full Sentrais Activation)
- └ Super Bowl / Championship Events
 - └ International Series Games (Multi-regulatory)
 - └ NFL Draft (Multi-day festival)
 - └ Global Mega-Concerts (Taylor Swift · Beyoncé scale)
- TIER 2 – HIGH COMPLEXITY (Full EVERGAME/EntertainmentOS)
- └ Regular Season NFL Games (32 venues · 272 games)
 - └ Stadium Concerts (50K–80K capacity)
 - └ Major Music Festivals (Coachella · Glastonbury model)

- └ Tech Innovation Summits (CES · AWS re:Invent scale)
- └ Pro Bowl / All-Star Events

TIER 3 – STANDARD COMPLEXITY (Template Instance)

- └ Preseason NFL Games
- └ Arena Concerts (10K–20K)
- └ College Football (High-profile)
- └ Flag Football Leagues / Events
- └ Corporate Activations & Brand Events

TIER 4 – LIGHTWEIGHT (Streamlined Instance)

- └ Club Games / Minor League Sports
- └ Local Festivals & Community Events
- └ Indoor Venue Events (<5K)
- └ Virtual / Hybrid Events

2.2 Event Type Playbook Map

Each event type maps to a canonical playbook engine:

Event Type	Primary Engine	Secondary Engine	Gate Model	Doctrine Mode
NFL Regular Season Game	EVERGAME	eVenu	18-gate	Standard
NFL International Game	EVERGAME	CiviGrid	22-gate	High Sensitivity
Super Bowl	EVERGAME	All engines	28-gate	Maximum
NFL Draft	EntertainmentOS	CiviGrid	14-gate	Reputation Priority
Stadium Concert	EntertainmentOS	eVenu	12-gate	Standard/Revenue
Multi-day Festival	EntertainmentOS	CiviGrid	16-gate	Standard/Security

Tech Innovation Summit	EntertainmentOS	Innovation OS	10-gate	Standard
Flag Football Event	EVERGAME (lite)	eVenu	8-gate	Standard
Pro Bowl / Skills	EVERGAME	EntertainmentOS	10-gate	Standard
Halftime Show (standalone)	EntertainmentOS	EVERGAME	12-gate	Reputation Priority
International Concert Tour	EntertainmentOS	CiviGrid	14-gate/venue	High Sensitivity
Corporate Activation	EntertainmentOS (lite)	—	6-gate	Revenue Priority
eSports / Digital Event	Innovation OS	EntertainmentOS	8-gate	Standard

PART III — NFL SEASONAL CALENDAR INTEGRATION

3.1 Season Spine — Full Year Operating Calendar

None		
NFL 2026–2027 SEASON SPINE		
S-OFF	Offseason	Feb 17 – Jul 31, 2026
S-PRE	Preseason	Aug 01 – Sep 08, 2026
S-REG	Regular Season	Sep 09, 2026 – Jan 10, 2027
S-POST	Postseason	Jan 16 – Feb 01, 2027
S-SB	Super Bowl Act.	Feb 02 – Feb 14, 2027
S-CLOSE	Closeout & Renewal	Feb 15 – Mar 15, 2027

3.2 Portfolio Gates (Season-Level)

Gate	Name	Trigger	Guard Conditions
P0	Portfolio Approved	Annual exec sign-off	Investment tiers locked · Risk posture defined

P1	Blueprint Baseline Locked	Blueprint Factory complete	All RACI locked · Vendor SLAs issued
P2	Readiness Minimums Achieved	Pre-season certification	All venues >P2 threshold
P3	Season Closeout Certified	Post-SB AAR complete	Evidence ledger audited

3.3 Event Instance Gates (Every Game / Event)

Gate	Name	Timing	FA	If Failed
E0	Event Authorized	T-180	Portfolio	Cannot proceed
E1	Blueprint Locked	T-120	All WS	Escalate L2
E2	Integrated Plan Locked	Monday EOD	Ops	L2 review
E3	Readiness Threshold Met	Wednesday EOD	All	L2 escalation
E4	Go Live Approved	Thursday EOD	Exec	Hold deployment
E5	Event Concluded	Sunday night	Ops	After-action flag
E6	Closeout Certified	T+7 days	Evidence	Audit required

3.4 NFL-Specific Gate Extensions

NFL Regular Season — 18 Gates G-01 RF/CBRS Clearance · G-02 Home C2P · G-03 Visitor C2P · G-04 Home SVS · G-05 Visitor SVS · G-06 O2O Officiating · G-07 IVR Ready · G-08 Emergency/EMP · G-09 Broadcast Lock · G-10 Medical Staging · G-11 Security Posture · G-12 Crowd Mgmt · G-13 Uniform Pre-check · G-14 Venue Ingress · G-15 Competitive Equity · G-16 Replay Systems · G-17 Fan Experience · G-18 Executive Go/No-Go

International Series — 22 Gates (adds) G-19 Regulatory Authority Clearance · G-20 Multi-jurisdiction EMP · G-21 Local Authority MOU · G-22 Broadcast International Rights

Super Bowl — 28 Gates (adds) G-23 Host City Full Sign-off · G-24 Media Accreditation Lock · G-25 VIP/Hospitality Certification · G-26 Commissioner Daily Brief · G-27 Federal Security Overlay · G-28 Multi-agency Final Go

3.5 Tent Pole Event Calendar

Event	Period	T-Horizon	Risk Level	Doctrine Mode
-------	--------	-----------	------------	---------------

Combine	Feb 23 – Mar 2	T-60	Low-Med	Standard
NFL Draft	Apr 23–25	T-180	Medium	Reputation Priority
Hall of Fame Game	Aug	T-60	Low-Med	Standard
Regular Season (272 games)	Sep–Jan	T-7/week	Standard	Standard
International Series	Oct–Nov	T-180	High	High Sensitivity
Wild Card / Playoffs	Jan	T-14	High	High Sensitivity
Pro Bowl Games	Feb 3	T-30	Low	Standard
Super Bowl LXI	Feb 14, 2027	T-365	Maximum	Maximum

3.6 Game Week Template (Mon–Sun Cadence)

Day	Primary Actions	Gate Target	Evidence Required
Monday	Week open + prior week close · Doctrine mode confirm	E2 EOD	Close last week evidence
Tuesday	Integrated interlocks · Dependency validation · SLA start	—	Interlock notes
Wednesday	Readiness validation · Cert trajectory · Risk register update	E3 EOD	Workstream attestations
Thursday	Go Live readiness · Staffing lock · Comms protocol	E4 EOD	Final run-of-show
Friday	Staging + pre-positioning · Pre-flight checks	—	Staging/config evidence
Saturday	Dress rehearsal · Venue validation · Escalation test	—	Dress rehearsal log
Sunday	Operate · Command Center live · Incident routing	E5 EOD	Full incident/decision logs

3.7 Game Day Runtime (T-minus to T-plus)

Offset	Segment	Core Actions
--------	---------	--------------

T-8h	Command Activation	Operator check-in · systems verify · comms live
T-6h	Venue Readiness Sweep	Network · access · security · medical staging
T-4h	Final Interlock	Critical path confirm · open exceptions resolved
T-3h	Fan Ingress	Telemetry · access · incident queue active
T-2h	Broadcast Lock	Feed validation · timing lock · escalation standby
T-1h	Final Go Live	Command brief · readiness score · decision ladder
T-0	Kickoff / Doors Open	Operate posture · incident + decision routing live
T+2h	Checkpoint	Risk review · issue triage · comms cadence
T+4h	Egress	Crowd monitoring · transport · posture shift
T+6h	Close Ops	Evidence capture check · unresolved → after-action
T+24h	After-Action	Draft AAR · initial ROI signals · controls flagged

PART IV — ENTERTAINMENT EVENT PLAYBOOKS

4.1 Stadium Concert Playbook

Engine: EntertainmentOS + eVenu

Gate Model: 12-gate

Doctrine Default: Standard (Revenue Priority for premium shows)

Phase Timeline:

None

T-180: Venue booking · technical rider exchange

T-120: Production design locked · permit applications

T-90: Crew confirmation · safety plan submission

T-60: Load-in schedule · catering/hospitality

T-30: Credential activation · weather monitoring start

T-14: Dress rehearsal scheduling · security brief

T-7: Full staging · pre-flight systems check

T-2d: Load-in begins · FOH/monitor setup
T-1d: Full dress rehearsal · sound check
T-0: Doors open · show
T+1: Load-out begins
T+14: Settlement · ROI closeout

12 Concert Gates:

Gate	Name	Timing
C-01	Venue Cert & Capacity Confirmed	T-90
C-02	Safety Plan Filed & Approved	T-60
C-03	Fire Marshal Sign-off	T-30
C-04	Security Plan Approved	T-21
C-05	Medical/EMS Staging Confirmed	T-14
C-06	Broadcast/Streaming Lock	T-7
C-07	Credential System Live	T-3d
C-08	Load-in Complete	T-1d
C-09	Sound/Systems Check Passed	T-12h
C-10	Crowd Density Baseline	T-2h
C-11	Weather Hold/Clear Decision	T-1h
C-12	Executive Go/No-Go	T-30m

SOPs Required:

- Lightning Response (50% auto · 8-mile rule)
- Medical Emergency (33% auto · HIPAA)
- Crowd Density Management (55% auto · NFPA 102)
- Weather Delay & Resumption (45% auto)
- Artist Cancellation Protocol (60% auto)
- Evacuation Full/Partial (40% auto · NFPA/ADA)

Embedded Chat Layer:

- Channel: Show Command → Production Lead → FOH → Security → Medical
- Auto-escalation: Medical → EMT dispatch notification
- Clock-sync: All comms timestamped against T-0 countdown

4.2 Multi-Day Festival Playbook

Engine: EntertainmentOS + CiviGrid

Gate Model: 16-gate

Doctrine Default: Standard / Security Heightened (Day 3+)

Key Differentiators from Single-Day:

- Multi-stage crowd flow management
- 24-hour medical coverage with shift protocols
- Harm reduction integration (dedicated workflow)
- Overnight security posture shift
- Daily after-action feeding next-day readiness
- Camping/accommodation coordination layer

Festival-Specific Gate Extensions (adds to concert 12):

Gate	Name	Timing
F-13	Multi-stage Frequency Coordination	T-7d
F-14	Overnight Security Posture Approved	T-3d
F-15	24h Medical Coverage Confirmed	T-2d
F-16	Day-N Readiness Reset Certified	Each morning

Daily Reset Protocol (Festival-Unique): Each morning at T-8h relative to first act:

1. Close prior day evidence packet
2. Reset readiness score
3. Reconfirm medical and security staffing
4. Update crowd density baseline
5. Execute F-16 gate

4.3 NFL International Series Playbook

Engine: EVERGAME + CiviGrid

Gate Model: 22-gate (NFL 18 + 4 international)

Doctrine Default: High Sensitivity

Multi-Regulatory Stack:

- UK: Safety of Sports Grounds Act · Green Guide compliance
- Germany: Versammlungsstättenverordnung (VStättVO)
- Brazil: ANVISA health protocols · SESP security
- Spain: Ley Orgánica de Seguridad Ciudadana

Additional Workstreams (vs. Domestic):

- Local Authority MOU management
- Currency/banking/financial settlement (multi-jurisdiction)
- Travel and customs coordination (equipment · personnel)
- International broadcast rights and feed protocols
- Host nation medical system integration
- Emergency repatriation planning

CiviGrid Activation:

- Municipal authority liaison
 - Local emergency services integration
 - Transportation authority coordination
 - Public safety joint command
-

4.4 Tech Innovation Summit Playbook

Engine: EntertainmentOS + Innovation OS

Gate Model: 10-gate

Doctrine Default: Reputation Priority

Unique Operational Requirements:

- Demo network isolation (multiple SSID/VLAN environments)
- Exhibitor technical rider management
- Media/press credential tiers (embargo management)
- Live product demonstration safety protocols
- Executive speaker security coordination
- Intellectual property protection zones

10 Summit Gates:

Gate	Name
S-01	Venue Network Architecture Approved
S-02	Exhibitor Technical Riders Confirmed
S-03	Media Accreditation System Live
S-04	Executive Security Briefing Complete
S-05	Demo Environment Isolated & Tested
S-06	AV/Broadcast Systems Certified
S-07	Registration/Access System Live
S-08	Full Dress Rehearsal Complete
S-09	Content Embargo Controls Active
S-10	Executive Go/No-Go

4.5 Flag Football Event Playbook

Engine: EVERGAME (Lite) + eVenu

Gate Model: 8-gate

Doctrine Default: Standard

NFL Flag Football Context:

- Pro Bowl Games integration
- NFL FLAG leagues (youth)
- International markets entry vehicle
- Lower regulatory complexity but brand-sensitive
- Player safety protocols (no contact, but injury still possible)

8 Flag Gates:

Gate	Name
F-01	Field Certification & Safety Check
F-02	Player Registration & Eligibility
F-03	Equipment Inspection

- F-04 Medical/AED Staging
 - F-05 Officiating Crew Confirmed
 - F-06 Broadcast/Streaming Ready (if applicable)
 - F-07 Fan Access & Crowd Plan
 - F-08 Go/No-Go
-

4.6 Corporate Activation / Brand Event Playbook

Engine: EntertainmentOS (Lite)

Gate Model: 6-gate

Doctrine Default: Revenue Priority

NFL Sponsor Activation Context:

- Super Bowl week activations
- Draft experience zones
- Halftime show brand integrations
- VIP hospitality programs (On Location model)

6 Activation Gates:

Gate	Name
A-01	Venue/Space Permit Confirmed
A-02	Brand Safety & IP Compliance
A-03	Guest List & Access Controls
A-04	Technical/Production Ready
A-05	Security & Medical Staging
A-06	Go/No-Go

PART V — COMMS ENGINE SPECIFICATION

5.1 Unified Communications Architecture

Design Principle: Modern WhatsApp-functionality, future-proofed, real-time, decision-rights-aware.

None

COMMS LAYERS

Layer A: Embedded Command Chat

- └ Persistent thread per event instance
- └ Role-gated channels (not open broadcast)
- └ Clock-synced to T-minus countdown
- └ Auto-thread evidence attachment

Layer B: Decision Rights Comms

- └ Formal decision request flow (structured, not freeform)
- └ Authority chain notification
- └ SLA timer visible in thread
- └ Approval/denial with audit trail

Layer C: Broadcast & Alert

- └ Top-bar doctrine alerts
- └ Push notifications (mobile-first)
- └ Escalation broadcasts to role tier
- └ Public-facing comms (separate, controlled)

Layer D: After-Action Comms

- └ Incident timeline reconstruction
- └ Decision chain audit
- └ Lessons extracted for next event

5.2 Channel Architecture (Per Event)

None

EVENT COMMAND CHANNELS (Role-Gated)

- └ #command-all → All command staff (read-heavy, exec updates only)

- |— #ops-live → Operations lead + workstream leads
- |— #security-live → Security + emergency (separate blast capability)
- |— #medical-live → Medical + EMS (HIPAA-aware, restricted)
- |— #tech-ops → Technology + broadcast
- |— #talent-production → Artist/production team liaison
- |— #escalation → Auto-populated by doctrine engine (critical only)

DECISION CHANNELS

- |— #decisions-pending → All open decision requests with SLA countdown
- |— #decisions-approved → Immutable approved decisions log
- |— #decisions-overridden → Override log with justification

EVIDENCE CHANNELS

- |— #evidence-log → Auto-populated by system (no human posts)

5.3 Message Types & Behaviors

Type	Trigger	Auto-Actions
Operational Update	Manual · workstream lead	Thread-to-evidence if gate-related
Doctrine Alert	System · threshold crossed	SLA timer starts · approvers notified
Decision Request	System or manual	Authority chain pinged · SLA clock
Escalation	SLA breach · severity upgrade	Tier escalation · banner update
Evidence Attachment	Manual or auto on gate cert	Immutable ledger write
Countdown Alert	T-minus milestones	Auto-broadcast to #command-all
After-Action Summary	Event close trigger	Auto-generated · sent to all leads

5.4 Clock Synchronization

All comms are anchored to a single temporal reference:

None

```
PRIMARY CLOCK: Event T-0 (Kickoff / Doors Open / Show Start)
|— All messages timestamped as T-minus / T-plus
|— All SLA timers derived from T-0 reference
|— Gate windows displayed as "T-4h to T-50m" not wall-clock
|— Cross-timezone events: UTC + local display
|— Clock visible in all channel headers and message metadata
```

5.5 Future-Proofing Standards

- **Protocol:** WebSocket real-time + REST fallback
- **Identity:** OAuth 2.0 / SAML / OIDC — federated across all stakeholders
- **Mobile:** React Native first — iOS/Android parity
- **Offline:** Local message queue with sync on reconnect
- **Encryption:** E2E for medical and security channels · TLS 1.3 minimum
- **Retention:** 7-year immutable archive (legal defensibility standard)
- **AI Layer:** Summarization · anomaly detection in comms · SLA prediction
- **Integration hooks:** WhatsApp Business API · Microsoft Teams · Slack · Radio dispatch bridge

PART VI — DECISION RIGHTS ENGINE

6.1 Decision Object Model

json

JSON

```
{
  "decision_id": "DEC-2026-WK18-001",
  "decision_type": "Security | Ops | Tech | Comms | Financial |
Medical",
  "trigger_event_id": "EVT-...",
  "authority_chain": ["L0-WorkstreamOwner", "L1-OpsLead",
"L2-Executive", "L3-Commissioner"],
```

```

    "required_evidence_types": ["PhotoEvidence", "SystemLog",
    "SignedAttestation"],
    "decision_sla_seconds": 900,
    "status": "Pending | Approved | Denied | Expired | Overridden",
    "doctrine_reference": "DM-STANDARD",
    "clock_offset": "T-50m",
    "decision_payload": {
      "options": [],
      "recommended_action": "",
      "risk_assessment": ""
    }
  }
}

```

6.2 Escalation Ladder

Level	Title	Activated By
L0	Workstream Owner	Any gate status change
L1	Operations Lead	SLA breach · multi-workstream impact
L2	Executive On-Call	Severity upgrade · doctrine breach
L3	Commissioner / Owner Tier	G-18 equivalent · HOLD GAME scenario
L3+	Federal/City Authority	International games · CiviGrid activation

6.3 SLA Logic

None

Decision SLA Timer

- ├─ Starts: DECISION_REQUESTED
- ├─ 50% warn: notify in channel + push
- ├─ 100% breach: auto-escalate to next tier
- ├─ Override: requires written justification + permanent log
- └─ Every timer event: immutable evidence write

6.4 Doctrine Modes & Threshold Adjustment

Mode	Trigger	SLA Multiplier	Evidence Req.	Escalation Sensitivity
Standard	Default	1.0x	Standard	Normal
Revenue Priority	Sponsor activation window	1.2x	Standard	Reduced
Reputation Priority	Media-heavy · Commissioner events	0.8x	Enhanced	Increased
Security Heightened	Threat intel · post-incident	0.6x	Maximum	Maximum
High Sensitivity	International · Playoffs · SB	0.5x	Maximum	Maximum

PART VII — UNIFIED EVENT READINESS SYSTEM

7.1 Readiness Score Composition

None

UNIFIED READINESS SCORE (0–100)

└─ Milestone Completion	25%
└─ SLA Compliance	20%
└─ Certification Status	20%
└─ Incident Posture	15%
└─ Resource Coverage	10%
└─ Doctrine Alignment	10%

Score Thresholds (Universal):

Score	Rating	Color	Action
90–100	Excellent	Green	Monitor — no intervention
75–89	Good	Blue	Lead review within 24h
60–74	Fair	Yellow	IT exec notification · remediation plan

40–59	Needs Improvement	Amber	Immediate intervention · L3
0–39	Critical	Red	Executive escalation · Go/No-Go review

7.2 Doctrine Alignment Score

None

Computed as:

- └─ % required evidence present for active doctrine triggers
- └─ % required steps executed within tolerance
- └─ count of overrides with justification quality score

Deviation reduces overall confidence score by 10% weight

7.3 Evidence Ledger Standard (All Events)

Minimum Evidence Record:

json

JSON

```
{
  "evidence_id": "EV-...",
  "timestamp": "ISO8601",
  "clock_offset": "T-50m",
  "actor": "service | user",
  "entity_type": "incident | milestone | decision | comms |
certification",
  "entity_id": "...",
  "action": "created | updated | approved | sent | certified",
  "hash_payload": "SHA-256",
  "attachments": [],
  "policy_reference": "G-07 | C-05 | etc.",
  "chain_parent_id": "prior evidence id"
}
```

Evidence is append-only. Every state change generates a record. No exceptions.

PART VIII — INTEGRATED PLANNING FRAMEWORK

8.1 The Three-Calendar Model

None

PORTFOLIO CALENDAR (Annual)

- └─ Q1: Portfolio Lock + Funding (Gate P0)
- └─ Q2: Blueprint Factory (Gate P1)
- └─ Q3: Readiness Build + Simulation (Gate P2)
- └─ Q4: Live Operations Peak + Closeout (Gate P3)

EVENT MASTER CALENDAR (Per Event)

- └─ Block 1 Intake (T-180 to T-150) → Gate E0
- └─ Block 2 Blueprint (T-150 to T-120) → Gate E1
- └─ Block 3 Master Plan (T-120 to T-90) → Gate E2
- └─ Block 4 Readiness (T-90 to T-30) → Gate E3
- └─ Block 5 Go Live (T-30 to T-7) → Gate E4
- └─ Block 6 Operate (T-7 to T+1) → Gate E5
- └─ Block 7 Closeout (T+1 to T+30) → Gate E6

RUN CALENDAR (Game Day / Show Day)

- └─ Hour-by-hour runtime (T-8h through T+24h)

8.2 Workstream Cluster Model (All Events)

Cluster A — Operations & Technology WS-FT Football Technology · WS-GAMEDAY Game Day Ops · WS-VENUEIT Venue IT · WS-BCAST Broadcast · WS-OFFIC Officiating Support

Cluster B — Security & Resilience

WS-SEC Security Operations · WS-EM Emergency Management · WS-MED Medical · WS-CYBER Cyber & Threat Intel

Cluster C — Fan, Brand & Revenue

WS-TIX Ticketing & Access · WS-SPONS Sponsorship · WS-MKT Marketing & Content · WS-FANX Fan Experience

Cluster D — Governance, Evidence & ROI

WS-COMP Compliance & Certification · WS-VEND Vendor & SLA · WS-COMMS Comms & Briefings · WS-EVID Evidence Ledger · WS-ROI ROI & Benefits

8.3 Standard Orchestration Cadence

PLAN Phase (T-180 to T-120)

- Weekly Blueprint Review: 60 min
- Dependency Mapping Session: 45 min
- Executive Alignment: bi-weekly 30 min

PREPARE Phase (T-120 to T-30)

- Workstream Interlocks: weekly 45 min
- Integrated Readiness Review: weekly 60 min
- Risk & Certification Review: weekly 30 min
- Executive Brief: weekly 20 min

OPERATE Phase (T-7 to T+1)

- Morning Command Brief: daily 15 min
- Midday Status Check: daily 10 min
- Evening Closeout Brief: daily 15 min
- Incident & Decision Reviews: continuous / event-driven

CLOSE Phase (T+1 to T+30)

- After-Action Review: within 72 hours
- Evidence Certification: within 7 days
- ROI Readout: within 14 days
- Control Upgrade Approval: within 30 days

8.4 Closeout Factory (All Events)

Output	SLA Window	Owner
Incident Summary	T+24h	Ops Lead
Decision Chain Audit	T+48h	Evidence Lead
Response Time Analysis	T+48h	Ops Lead
SLA Variance Report	T+7d	Compliance Lead

Financial Deviation Report	T+14d	Finance Lead
Policy Compliance Check	T+7d	Compliance Lead
Lessons Requiring Structural Update	T+14d	Exec
Certified Evidence Packet	T+7d	Evidence Lead
ROI Report	T+14d	Finance Lead
Blueprint Update (feeds next event)	T+30d	Ops Lead

PART IX — FINANCIAL & RISK CONTEXT

9.1 NFL Economic Stakes (Why This Matters)

Metric	Value
NFL Annual Revenue	~\$23B (2024) · \$25B target by 2027
Media Rights (protected by operational integrity)	\$13.8B distributed annually
Average franchise value	\$7.1B–\$13B
Super Bowl ad revenue	\$8M/30-second spot
International games (2025)	7 games · \$1B new rights projection
Stadium climate risk by 2050	\$11B cumulative
Concussion litigation exposure	\$1B+ settled · \$10B projected

9.2 Coordination Failure Costs (Entertainment Context)

Incident	Cost	Prevented By
Astroworld crowd crush	\$280M+ litigation	Crowd density SOP · protected dissent
Indiana State Fair collapse	\$50M	Weather response SOP · evacuation

Insurance premium trend	+15%/year	Certified readiness documentation
Curfew penalties	\$10–50K/minute	Predictive scheduling engine
Fan abandonment (queue)	40% abandon	Digital twin optimization

9.3 Target ROI by Deployment Type

Deployment	Y1 Target	Primary Value Driver
NFL Full Season	3–5x	Competitive equity protection + operational efficiency
Stadium Concert	2–3x	Insurance reduction + curfew avoidance
Festival	3–4x	Litigation protection + crowd safety
International Game	4–6x	Regulatory risk mitigation
Corporate Activation	2–3x	Brand protection + sponsor satisfaction
Tech Summit	2–3x	Reputation protection + media coverage

PART X — PRODUCT SUITE POSITIONING

10.1 NOVATELabs Event Intelligence Stack

None	
EVERGAME360	NFL / Major Sports Venues Full operational orchestration · 55K–80K seat League compliance · 18–28 gate model
EntertainmentOS	Touring / Concerts / Festivals Tour intelligence · venue compatibility Crowd analytics · harm reduction · 12–16 gate
Festival OS	Multi-day Festivals Multi-stage · 24h medical · harm reduction Daily reset protocol

eVenu	Venue Certification Platform Venue scoring · revenue intelligence Certification-as-a-Service
CiviGrid	Host City Coordination Multi-agency · municipal · public safety International regulatory stack
Control Tower Office)	Enterprise (Live Nation / AEG / NFL League Cross-portfolio analytics · production scoring Predictive risk mitigation · C-suite command
Innovation OS	Tech Summits / R&D Events Demo environment management · IP protection Media accreditation · embargo management

10.2 The Embedded Chat Mandate

Every live event deployment going forward includes:

1. Embedded command chat (no external tool dependency)
2. Clock-synced threading (all messages anchored to T-0)
3. Decision rights comms (structured, not freeform Slack)
4. Evidence-attached conversations (gate certs auto-thread)
5. Mobile-first (iOS/Android · operator in the field)
6. Escalation-aware (doctrine engine triggers chat alerts)
7. Post-event reconstructable (7-year archive · legal standard)

APPENDICES

Appendix A — Seed Data Schema Reference

See: Live Intelligence Unified Playbook (NFL seed JSON · workstream IDs · gate objects)

Appendix B — SOP Library Reference

Lightning Response · Medical Emergency · Evacuation · Crowd Density · Weather · Active Threat · Artist Cancellation

Appendix C — Integration Connectors

Microsoft Surface/Copilot · Adobe · NetApp · WhatsApp Business API · Teams · Ticketmaster · AXS · Momentus · Master Tour · Shoflo · n8n Workflow Engine · DTN Weather Hub

Appendix D — Compliance Standards Matrix

NFL GOM · NIMS · NFPA 102 · UK Purple Guide · ADA · HIPAA · CJIS · PCI-DSS · SOC 2 · GDPR · FedRAMP (Fed vertical)

Appendix E — Role Registry

ROLE-EXEC · ROLE-OPS-LEAD · ROLE-FT-LEAD · ROLE-VENUEIT-LEAD ·
ROLE-SEC-LEAD · ROLE-BCAST-LEAD · ROLE-COMP-LEAD · ROLE-EVID-LEAD ·
ROLE-COMMS-LEAD · ROLE-FIN-LEAD · ROLE-MEDICAL-LEAD · ROLE-TALENT-LIAISON
