

# SENTRAIS × EVERGAME Ecosystem Blueprint

## MASTER FIGMA FILE STRUCTURE

### Canonical Ecosystem Blueprint

#### 0. FIGMA FILE NAMING (LOCK THIS)

File Name:

Sentrais\_Master\_Ecosystem\_Blueprint\_v1.0

Description:

Design system, navigation model, and execution patterns for all Sentrais-powered ecosystems including EVERGAME.

#### I. PAGE-LEVEL STRUCTURE (TOP-TO-BOTTOM)

Your Figma file should have exactly these pages, in this order.

##### 1. 🧭 00 – FOUNDATION

Purpose: Non-visual alignment. This page never changes.

Frames on This Page

Design North Star

Mission

Design principles

Non-negotiables

Ecosystem Mental Model

Command → Operate → Learn → Govern

Time as the primary axis

Role-based responsibility model

Navigation Rules

Max items

Drill-down logic

Role gating rules

This page is referenced, never edited casually.

## 2. 🎨 01 - DESIGN SYSTEM

Purpose: Single source of truth for all UI.

Sections (Frames)

### 2.1 Color Tokens

Background / Surface / Border

Status Colors (Ready, Attention, Critical, Active, Locked)

System Colors (EFC, C2P, SVS, etc.)

### 2.2 Typography

Heading scale (H1-H5)

Body

Numeric emphasis

Caption / metadata

### 2.3 Spacing & Layout

Grid (8pt system)

Containers

Padding rules

### 2.4 Icons

Navigation icons

Status icons

System icons

### 2.5 Motion Guidelines

Transition timing

Drawer behavior

Status change animation rules

### 3. 02 - CORE COMPONENTS

Purpose: Atomic components used everywhere.

Frames (Each Component Has Its Own Frame)

Navigation

Primary Left Rail

Collapsed Rail

Context Top Bar

Breadcrumb / Context Pill

Status & Signals

Status Badge

Readiness Ring

Risk Indicator

Countdown Timer

Cards

KPI Card

System Card

Task Card

Risk Card

Game Card

Interaction

Buttons (Primary / Secondary / Destructive)

Dropdowns

Tabs

Toggles

Containers

Timeline

Tables

Lists

Drawers (Right & Bottom)

#### 4. 03 - MASTER NAVIGATION

Purpose: The navigation system that never changes.

Frames

Primary Navigation - Default

Left rail expanded

Icons + labels

Primary Navigation - Collapsed

Icons only

Role-Based Variants

Executive

Ops / GDA

Club

Vendor

Admin

Context Bar Variants

Season

Week

Game Day

Crisis Mode

Each variant is a component instance, not a copy.

## 5. 🧠 04 – MODE BLUEPRINTS (CORE EXPERIENCE MODES)

This page defines the six universal Sentrais modes.

Each mode has one canonical frame.

Frames

Command Mode

Operations Mode

Systems Mode

Risk Mode

Review Mode

Governance Mode

Each frame includes:

Header zone

Signal zone

Execution zone

Detail drawer example

These are abstract blueprints, not NFL-specific.

## 6. 🏈 05 – EVERGAME MASTER EXPERIENCE (NFL IMPLEMENTATION)

This is where EVERGAME lives.

Sections

6.1 League Command (Executive)

Frames:

League Command Overview

Season Snapshot

Week at a Glance

Game Risk Summary

6.2 Pre-Season Readiness

Frames:

League Readiness Overview

Club Readiness Comparison

Certification Status

6.3 In-Season Operations (CORE)

Frames:

In-Season Overview

Week View (Multi-Game)

Game View (Tabbed)

Readiness

Milestones

Systems

Incidents

Evidence

Meetings

6.4 Post-Game Review

Frames:

Game Summary

Findings

Evidence Ledger

Improvement Actions

6.5 Credentials & Compliance

Frames:

Certifications Dashboard

Renewal Detail

Access & Roles

6.6 Risk & Integrity

Frames:

Risk Matrix

Drivers & Mitigations

Scenario View

6.7 Intelligence Reports

Frames:

Reports Library

Executive Brief

Audit Pack

## 7. 🕒 06 - WEEK-OF-GAME GOLDEN PATH

Purpose: The single most important demo sequence.

Frames (In Order)

Week Selected

T-7 Readiness Baseline

T-3 Execution Window

T-24 Live Operations

Kickoff Live Mode

Incident Escalation

Post-Game Review

Certification Update

These frames should be linked as a prototype.

## 8. 👤 07 – ROLE-SPECIFIC FLOWS

Each role gets its own mini-journey.

Frames Per Role

Executive

Landing

Week Drill-Down

Report Export

Ops / GDA

Weekly Execution

Milestone Run

Incident Resolution

Club

My Tasks

Evidence Upload

Certification Check

Vendor

Assigned Systems

Task Completion

Proof Submission

## 9. 🛠️ 08 – STATES & EDGE CASES

Purpose: Production readiness.

Frames

Empty States

Loading

Error

Escalation

Locked / Restricted

Offline / Degraded Mode

## 10. 🚧 09 - HANDOFF & IMPLEMENTATION

Purpose: Engineering alignment.

Frames

Component → Code Mapping

Route Mapping

Data Binding Notes

Role Gating Logic

API Touchpoints

### X. HOW THIS SCALES (IMPORTANT)

To blueprint a new ecosystem:

Duplicate Page 05

Rename to ecosystem (City, Airport, FIFA)

Swap terminology

Keep Pages 00-04 untouched

This is how Sentrais becomes infrastructure, not a one-off product.

### FINAL CHECK

If your Figma file:

Has more than 10 pages → too complex

Has fewer than 7 → under-designed

Repeats navigation → wrong

Has role confusion → wrong

This structure is deployment-ready, board-safe, and scalable by design.
