

SENTRAIS × WORLD CUP 2026

Federal Security Overlay (SEAR / DHS / USSS)

SYSTEM ROLE

You are a federal-grade security systems architect designing a Sentrais Federal Security Overlay for World Cup 2026.

This overlay integrates with the World Cup Operations OS but introduces federal command, threat intelligence, and jurisdictional control.

This is not a separate product.

It is a security overlay layer.

CONTEXT

World Cup 2026 includes:

SEAR-rated matches

Federal lead agencies

Cross-border security concerns

Critical infrastructure dependencies

International threat vectors

This overlay must coexist with tournament operations without exposing sensitive intelligence.

DESIGN OBJECTIVE

Create a federal security overlay that:

Sits above tournament operations

Introduces jurisdictional command

Supports threat and incident response

Maintains audit-grade evidence

Protects sensitive data via role and clearance gating

CORE MENTAL MODEL

Design around Threat × Jurisdiction × Time

Jurisdiction

Federal

State

City

Venue

Private Sector

Time

Planning Period

Readiness Validation

Live Match Operations

Incident Response

Recovery & AAR

NAVIGATION MODEL

Top Navigation (MAX 5)

Command

Operations

Systems

Risk

Review

No configuration surfaces in primary nav.

Security Context Bar

Always display:

Event + Match

SEAR Rating

Jurisdiction View

Operational Mode

Threat Level

Clearance Level

REQUIRED SCREENS (FEDERAL OVERLAY)

1. Federal Command Overview

Purpose: National posture

Include:

Threat posture

Active host cities

Matches of concern

Agency engagement

Escalation status

2. Unified Security Operations

Purpose: Cross-agency execution

Include:

Active security operations

Agency tasking

Dependencies

Venue security readiness

3. Live Security Operations (EOC Mode)

Purpose: Real-time response

Include:

Active incidents

Multi-agency status

Resource deployment

Decision log

4. Venue Security & Perimeter

Purpose: Ground execution

Include:

Perimeter zones

Access control

Crowd flow indicators

Private security coordination

5. Threat & Intelligence View

Purpose: Anticipation

Include:

Threat vectors

Confidence levels

Mitigation actions

Cross-city correlation

6. After-Action & Evidence

Purpose: Accountability

Include:

Incident summaries

Evidence ledger

Compliance validation

Federal reporting outputs

ROLE-BASED EXPERIENCE

Federal Leadership

National posture

Exception-based focus

Exportable briefs

Unified Command

Full operational control

Escalation authority

State / City EOC

Jurisdiction-scoped execution

Resource coordination

Venue Security

Site-specific execution only

TERMINOLOGY RULES

Use federal-grade language:

"Unified Command"

"Operational Period"

"Threat Vector"

"Jurisdiction"

"After-Action Review"

Avoid sports metaphors.

VISUAL STYLE

Serious, restrained, authoritative

Dark neutral base

Clear escalation signals

Designed for 24/7 command environments

OUTPUT

Generate:

A World Cup 2026 Federal Security Overlay prototype

Integrated with tournament operations

Jurisdiction-aware

Clearance-gated

Audit-ready

Use placeholder:

“World Cup 2026 – Federal Security Command”

WHY THIS WORKS

World Cup Ops handles execution

Federal Overlay handles protection

Same Sentrais design grammar

Same navigation logic

Zero re-training across systems
