December 2025

Table of Contents

1. Executive Summary

The Opportunity

Sentrais Corporation is building the ***Intelligence Operating System for high-stakes environments***—an enterprise platform that unifies people, processes, systems, and data to enable real-time orchestration, predictive readiness, and certified resilience across sports leagues, venues, cities, airports, mega-events, and critical infrastructure.

We have achieved the milestone that matters most: **NFL validation**. Our multi-year contract with the NFL represents deployed technology, proven methodology, and committed annual recurring revenue across 32 clubs. This anchor client transforms our trajectory from vision-stage to scale-stage.

Key Investment Highlights

Highlight	Details
NFL Anchor Contract	Multi-year agreement signed. EVERGAME360 and NFLiOS deployed across 32 clubs. Production-proven.
Massive TAM	\$100B+ across Sports (\$8.5B), Live Events (\$75B), Aviation (\$15B), Federal/Gov (\$5B+). Category-defining opportunity.
Multiple Verticals	Sports → Live Events → Aviation → Federal (FEMA/TSA/DHS) → Mega-Events (FIFA 2026). Clear expansion path.
Proprietary Technology	SIPE Engine (4 years R&D). NIN Methodology (Gartner-recognized). First-mover in operational intelligence OS.
Capital Efficient Model	Labs Fellowship (80-90% R&D savings). Commission-only agents (8-15%). Partner delivery (revenue share).
Strategic Partnerships	AWS and Google Public Sector partner positioning. Cloud-native architecture. Federal marketplace ready.
Founder Investment	\$5M+ personal capital over 4 years. Founder alignment and commitment demonstrated.
Path to Unicorn	\$8M Y1 → \$25M Y2 → \$50M Y3 → \$130M Y5. \$1B+ valuation by 2029.

The Ask

Bridge / Revenue Financing	Strategic Angels	Series A
\$500K – \$1M	\$500K – \$1M	\$12M – \$15M
4-6x monthly ARR advance	SAFE at \$50M cap	\$50M–\$80M pre-money

FOUNDER CONTROL: 51%+ voting maintained through dual-class share structure (Class B = 10x voting rights)

2. Company Overview

Mission

"To certify every venue, game, city, and critical infrastructure as resilient—creating the global standard for operational readiness."

Master Narrative

Sentrais is the Intelligence Operating System for high-stakes environments. We architect the systems, models, and real-time intelligence that help leagues, cities, airports, and critical infrastructure prepare, respond, and perform with precision.

NOVATELabs is the research and workforce engine. It ensures communities have access to innovation, talent has access to opportunity, and our AI systems are shaped with equity, responsibility, and real-world insight.

Together, we form a single ecosystem: one that protects people, advances technology responsibly, shifts communities toward resilience, and trains the next generation of innovation leaders.

Corporate Structure

Entity	Type	Purpose
Sentrais Corporation	Delaware C-Corp	Commercial enterprise. Owns all IP, platform, advisory services. Houses Sentrais Advisory + Sentrais Platform divisions.
Sentrais Advisory	Division	Strategic consulting, NIN Forensics, operational readiness, implementation, certification advisory.
Sentrais Platform	Division	Sentrais OS (Intelligence Operating System), SaaS licensing, data services, multi-agent automation.
NOVATELabs	501(c)(3)	Nonprofit innovation engine. Applied research, workforce development, community programs, Barbara Geter Fellowship.
Sentrais Partners	Program	Certified Delivery Network. Partner-driven implementation across venues and cities.
Sentrais Academy	Program	NIN Methodology training and certification for practitioners.

Competitive Advantages

Advantage	Description
NFL Validation	Unassailable reference client. Most complex sports operation in the world validated our technology.
SIPE Engine	4 years R&D, multi-tenant architecture, production-proven. The intelligence fabric for operational orchestration.
NIN Methodology	Gartner-recognized 5D framework: Discover, Diagnose, Design, Deploy, Debrief. Systematic approach to resilience.
Multi-Vertical Platform	Same core platform serves Sports, Live Events, Aviation, Federal, Mega-Events. Network effects compound.
Capital Efficiency	Labs Fellowship (80-90% R&D savings) + commission-only sales agents + partner delivery. 15-25% variable cost vs 40-50% industry.
Neutral Intelligence Layer	We sit above ticketing, venues, promoters—the 'air traffic control' without competing for event ownership.

3. Market Opportunity

Total Addressable Market: \$100B+

Sentrais operates across multiple verticals, each representing a massive market opportunity. Our platform serves as the intelligence layer across high-stakes environments—from sports and entertainment to critical infrastructure and government operations.

Market Vertical	TAM	Key Segments
Sports & Entertainment	\$8.5B	Leagues (\$3.2B), Venue Management (\$2.8B), City Resilience (\$2.5B)
Live Events Intelligence	\$75-85B	Concerts/Tours (\$36B), VIP/Premium (\$10B), Production (\$20B), Venue Tech (\$15B)
Aviation & Transportation	\$15B	Airport operations, TSA checkpoint intelligence, emergency preparedness
Federal Government	\$5B+	FEMA, DHS, CISA, DoD installations, state/local emergency management
Mega-Events (FIFA 2026)	\$2-5B	Host cities, LOCs, stadium operators, multi-agency coordination
TOTAL TAM	\$100B+	First-mover advantage in operational intelligence OS category

Vertical Expansion Strategy

Sentrais follows a proven land-and-expand strategy, using each vertical to unlock adjacent markets:

- Sports (NFL Anchor):** Deployed with 32 clubs. Expands to MLS, NBA, NHL. Provides credibility for all other verticals.
- Live Events:** Artist-first wedge strategy. Start with touring intelligence (Usher-level artists), pull to production companies (Hydro, Live Nation), push to venues and promoters.
- Aviation:** Digital Airport Emergency Plan (AEP). FAA Part 139 compliance. TSA checkpoint intelligence. \$4-5M per major airport system.
- Federal:** FEMA readiness (\$5M+ contracts). DHS multi-agency orchestration. CISA cyber-physical fusion. AWS/Google marketplace enabled.
- Mega-Events:** FIFA 2026 World Cup as defining opportunity. 16 host cities, 16+ stadiums, federal-to-local coordination. National-level contracts.

Why Now?

- Post-COVID Operational Awakening:** Venues and cities experienced catastrophic disruption. Resilience is now a board-level priority, not an afterthought.
- Climate-Driven Urgency:** Extreme weather events are increasing. Stadiums, arenas, airports, and cities need systematic readiness frameworks.
- Regulatory Pressure:** New safety and compliance requirements (FAA Part 139, TSA directives, emergency egress) demand documented readiness.
- Insurance Requirements:** Insurers are requiring demonstrated resilience programs for coverage. Certification reduces premiums.
- FIFA 2026 Catalyst:** The largest sporting event in US history creates urgency for city, venue, and federal readiness infrastructure.
- AI/Intelligence Maturity:** Technology has reached the point where real-time intelligence at venue and city scale is practical and affordable.

Serviceable Markets (5-Year SOM)

Segment	# Targets	Avg ACV	SAM	SOM	Timeline
Major Sports Leagues	5	\$1.5M	\$7.5M	\$6M	2026-2027
Pro Sports Teams	150	\$150K	\$22.5M	\$4.5M	2026-2028
Major Venues	1,500	\$85K	\$127M	\$12.7M	2026-2029

Live Events (Tours/Artists)	100+	\$200K	\$20M	\$4M	2026-2028
Promoters (Live Nation, AEG)	3	\$3M	\$9M	\$3M	2027-2028
Airports (Tier 1 & 2)	50	\$1M	\$50M	\$5M	2027-2029
Federal (FEMA/TSA/DHS)	10+	\$5M	\$50M	\$10M	2027-2029
Cities (Top 100 US)	100	\$500K	\$50M	\$5M	2027-2029
TOTAL	1,900+	—	\$336M	\$50M	—

4. Products & Technology

Product Portfolio

Product	Description	Status	ACV Range
EVERGAME360	Sports & Entertainment Intelligence. League-wide operational visibility for 32 NFL clubs.	LIVE	\$500K-2M
NFLiOS	NFL Innovation Orchestration System. Custom white-labeled SIPE implementation.	LIVE	Custom
eVenu	Venue Certification & Readiness. Compliance scoring, audit automation, certification authority.	SCALING	\$35K-500K
CiviGrid	City & Regional Resilience. Multi-agency coordination, emergency preparedness.	DEVELOPMENT	\$200K-1M
Tour Intelligence	Live Events operational modeling. Tour blueprints, VIP optimization, curfew/load management.	POC	\$150K-250K
Airport OS	Airport Emergency Operations Intelligence. Digital AEP, checkpoint modeling, FAA Part 139.	DEVELOPMENT	\$450K-1.2M
Federal Command	FEMA/DHS multi-agency orchestration. National-to-local readiness coordination.	DEVELOPMENT	\$2M-5M

Sentrai OS Architecture

Sentrai OS is the unified intelligence layer that powers all products. It delivers:

1. **Real-Time Orchestration:** Live dashboards, alerting, workflow automation across all stakeholders
2. **Simulation & Scenario Engine:** Predictive modeling, tabletop exercises, mass casualty simulations
3. **Evidence Ledger:** Immutable record of actions, decisions, and readiness validation
4. **Readiness Scoring:** Quantified metrics for compliance, safety, cyber, medical preparedness
5. **Multi-Agent Automation:** AI-enabled workflows with human-in-the-loop governance
6. **Cloud-Native Integration:** AWS Lambda, EventBridge, Bedrock; Google Vertex AI, Chronicle, Maps

Technology Stack

SIPE Engine (Sentrai Intelligence Processing Engine)

The proprietary core of all Sentrai products. Four years of R&D, now production-proven with NFL deployment.

Capability	Description
Multi-Tenant Architecture	Single platform serving multiple clients with complete data isolation. NFL, venues, cities on same infrastructure.
Real-Time Processing	Sub-second intelligence across thousands of data points. Stadium telemetry to city-wide coordination.
AI/ML Integration	Predictive analytics, anomaly detection, pattern recognition. Integrated with AWS Bedrock, Google Vertex.
Cyber-Physical Fusion	Correlates badge access, video analytics, SCADA/OT anomalies, network events. Critical infrastructure ready.
Enterprise Security	SOC 2 Type II readiness. FedRAMP pathway. Role-based access. Encryption at rest and in transit.

NIN Methodology

Gartner-recognized framework for systematic resilience and readiness. The 5D approach:

Phase	Description
DISCOVER	NIN Forensics. Current state assessment, operational mapping, baseline readiness scores.
DIAGNOSE	Root cause analysis, prioritize risks, quantify impact, dependency graphing.
DESIGN	Solution architecture, future-state blueprints, playbook design, investment roadmap.
DEPLOY	Implementation, training, go-live support, Sentrais OS activation, certification delivery.
DEBRIEF	Continuous improvement, AAR/IP automation, lessons learned, recurring assessment.

5. Business Model

Revenue Streams

Revenue Type	Description	Margin	% of Revenue
Platform SaaS	Annual subscriptions to Sentrais OS, EVERGAME, eVenu, CiviGrid	85%+	60-70%
Advisory & Implementation	NIN Methodology engagements, blueprinting, integration services	50-60%	20-25%
Certification Fees	eVenu certification, readiness validation, compliance attestation	75%+	10-15%
Academy Training	NIN Certification programs, workforce development, partner training	80%+	5-10%

Capital Efficiency Model

Sentrais operates a fundamentally different cost structure than traditional enterprise software companies:

Function	Traditional Model	Sentrais Model
R&D / Engineering	\$150K-250K per FTE engineer	Labs Fellows at 80-90% cost savings. Variable capacity.
Sales	\$200K+ OTE per Account Executive	Commission-only agents (8-15%). Zero fixed S&M cost.
Delivery	Internal professional services team	Certified Partners on revenue share. No bench cost.
Result	40-50% S&M + R&D cost as % revenue	15-25% variable cost. Capital efficient scaling.

The Growth Flywheel

NFL VALIDATION → **PLATFORM AUTOMATION** → **PARTNER NETWORK** → **REVENUE GROWTH** → **REPEAT**

Each vertical win compounds: NFL validates sports → Sports validates live events → Events validate venues → Venues validate cities → Cities validate federal. The intelligence layer becomes the connective tissue across all high-stakes environments.

6. Go-to-Market Strategy

Land & Expand Model

Phase	Strategy	Target Accounts
PHASE 1	Land the League	NFL (SIGNED ✓), MLS (Q3 2026), NBA (Q4 2026)
PHASE 2	Expand to Clubs & Venues	League endorsement drives club adoption. ASM Global, Live Nation, Oak View Group.
PHASE 3	Adjacent Verticals	Live Events (touring artists), Aviation (airports), Federal (FEMA/DHS/TSA)
PHASE 4	Mega-Events & Global	FIFA 2026 World Cup, international expansion, cross-border coordination

Target Accounts — 2026

Tier 1: Sports Leagues

League	ACV Potential	Target Close	Status
NFL	\$2M+	SIGNED	✓ LIVE
MLS	\$800K-1.2M	Q3 2026	Pipeline
NBA	\$1M-1.5M	Q4 2026	Pipeline

Tier 2: Venue Operators

Operator	Venues	ACV Potential	Priority
ASM Global	350+	\$500K-2M	HIGH
Live Nation	200+	\$500K-1.5M	HIGH
Oak View Group	50+	\$300K-800K	MEDIUM

Tier 3: Federal & Aviation

Agency/Segment	Contract Type	ACV Potential	Timeline
FEMA (National Readiness)	FFP + Annual	\$5.1-5.7M	2027
TSA (Airport Security)	FFP + Annual	\$4.2-4.8M	2027
Major Airports (Top 20)	Annual License	\$1M+ each	2027-2028

Sales Channels

Channel	Target Segment	Cost Structure
Direct (CEO/CRO)	Enterprise accounts (leagues, major venues, federal)	Fixed cost. High-touch strategic selling.
Agent Network	Mid-market venues, teams, regional accounts	Commission-only 8-15%. 30-50 agents.
Partner Referrals	Consulting firms, system integrators	10-20% referral fee. Zero fixed cost.
AWS/Google Marketplace	Federal, public sector, enterprise IT	Marketplace fee. Pre-qualified buyers.

Strategic Partnerships

AWS and Google Public Sector partnerships position Sentrais as the intelligence layer on cloud infrastructure:

Partner	Joint Value Proposition
AWS	Sentrais + AWS modernize high-stakes environments with unified visibility, AI-enabled orchestration, and responsible intelligence. Lambda, EventBridge, Bedrock, S3 integration.
Google Public Sector	Sentrais + Google enable agencies to operate with precision via AI-native infrastructure. Vertex AI, Chronicle/Mandiant, Maps/Geospatial integration.

7. Financial Projections

Revenue Trajectory

Metric	Y1 (2026)	Y2 (2027)	Y3 (2028)	Y4 (2029)	Y5 (2030)
ARR	\$8M	\$25M	\$50M	\$85M	\$130M
YoY Growth	—	212%	100%	70%	53%
Enterprise Clients	20	60	120	200	300
Gross Margin	70%	75%	78%	80%	82%
Net Revenue Retention	120%	125%	130%	130%	130%

Quarterly Revenue Build — Year 1 (2026)

Q1 2026	Q2 2026	Q3 2026	Q4 2026
\$2.5M	\$4.5M	\$6.5M	\$8M+
NFL Multi-Year Signed	Series A Closed	Second League Signed	20+ Enterprise Clients

Path to Profitability

Milestone	Target	ARR Required
Cash Flow Break-Even	Q4 2027	\$20M ARR
EBITDA Positive	Q2 2028	\$35M ARR
20% EBITDA Margin	Q4 2029	\$85M ARR

Valuation Trajectory

Round	ARR	Multiple	Valuation
Series A (2026)	\$2.5M	20-30x	\$50M-\$80M
Series B (2027)	\$25M	15-20x	\$375M-\$500M
Series C / Exit (2029)	\$85M	12-15x	\$1B+

8. Use of Funds

Series A Allocation (\$12-15M)

Category	Allocation	Key Investments
Sales & Marketing	35%	Agent network build, enterprise BD, marketing automation
Product & Engineering	30%	Platform development, new verticals, Labs Fellows expansion
Customer Success	15%	Implementation capacity, partner enablement, support
G&A / Infrastructure	10%	Finance, legal, security certifications, operations
Reserve	10%	Strategic opportunities, contingency

Key Milestones Funded

1. **Q2 2026:** Second major league signed (MLS or NBA)
2. **Q3 2026:** First major venue operator contract (ASM Global or Live Nation)
3. **Q4 2026:** \$8M ARR achieved, 20+ enterprise clients
4. **Q2 2027:** \$15M ARR, Series B process launched, first federal contract
5. **Q4 2027:** \$25M ARR, cash flow break-even, FIFA 2026 preparation in progress

9. Team

Executive Leadership

Name	Role	Key Contributions
Tye Hayes	Founder & CEO	\$5M+ founder investment. 4 years building technology. Secured NFL validation. Vision & strategy.
Knox	Chief Product Officer	Product strategy. NIN methodology ownership. NFL relationship management.
Tionna	Director, Sentrais Labs	R&D leadership. Fellowship program. SIPE Engine development. 80-90% cost savings model.
Kirjuan	Chief Revenue Officer	Revenue ownership. Agent network development. Commission-only sales model. Partner recruitment.

Extended Leadership

Name	Role	Focus Areas
Asia	VP, Innovation PMO	NIN execution, delivery quality, operational excellence
Erin	Sr. Technical Architect	SIPE integrations, infrastructure, security architecture
Mikalina	VP, Client Success	Retention, expansion, case studies, NRR optimization
Valorie	Operations Manager	Back office, Fellow recruiting, Academy operations

Organizational Design Principles

1. **Lean Core Team:** 8 FTEs in strategic roles only. No bloat.
2. **Variable Resources:** 10-30 Labs Fellows, 30-50 commission-only agents, 10-15 certified partners.
3. **Automation First:** n8n workflows, AI agents, and platform automation before headcount.
4. **Partner Before Build:** Certify external capacity before hiring internal.
5. **CEO External-Facing:** 80% time on investors, customers, strategic relationships.

10. Risk Factors & Mitigations

Risk	Impact	Mitigation Strategy
NFL Contract Delay	HIGH	Bridge financing secured. Revenue-based financing as backup. Multiple LOI-ready clients.
Second League Slow	MEDIUM	Parallel pursuit of MLS, NBA, NHL. Venue operators as alternative path. Live events vertical.
Key Person Risk (CEO)	HIGH	Executive team building in progress. CPO can lead operations. Comprehensive documentation.
Competitive Entry	MEDIUM	NFL validation creates moat. Certification authority = switching costs. 4 years R&D head start.
Labs Fellow Quality	MEDIUM	Technical Architect oversight. Rigorous onboarding. NOVATELabs training pipeline.
Federal Sales Cycle	MEDIUM	AWS/Google marketplace shortcuts. Partner channel acceleration. Commercial revenue first.
Partner Execution	LOW	Certification program with QA audits. Revenue share alignment. Performance-based.
Economic Downturn	MEDIUM	Resilience MORE important in downturns. Insurance requirements persist. Government spending stable.

11. Investment Terms

Proposed Series A Structure

Term	Proposed
Round Size	\$12M – \$15M
Pre-Money Valuation	\$50M – \$80M
Security	Series A Preferred Stock
Liquidation Preference	1x non-participating
Anti-Dilution	Broad-based weighted average
Board Composition	5 seats: 2 Founder, 2 Investor, 1 Independent
Founder Control	51%+ voting through dual-class structure (Class B = 10x voting rights)
Option Pool	15% post-money
Protective Provisions	Standard Series A terms

Bridge / Revenue Financing Options

Option	Amount	Terms	Timeline
Revenue-Based Financing	\$500K – \$1M	4-6x monthly ARR advance	2-4 weeks
Contract Factoring	70-85% of invoices	Discount on receivables	1-2 weeks
Strategic Angels	\$500K – \$1M	SAFE at \$50M cap	4-8 weeks

12. Conclusion

Why Sentrais. Why Now.

Sentrais represents a category-defining opportunity: ***the Intelligence Operating System for high-stakes environments***. With NFL validation, \$100B+ total addressable market across multiple verticals, proprietary technology, and a capital-efficient model, we are positioned to build the infrastructure layer for operational resilience worldwide.

The Path Forward

1. **Q1 2026:** NFL multi-year executed, bridge financing closed, Sentrais Corporation operational
2. **Q2 2026:** Series A closed, team scaling, second league in pipeline
3. **Q4 2026:** \$8M ARR, 20+ enterprise clients, category leadership established
4. **2027:** \$25M ARR, Series B, federal contracts, FIFA 2026 preparation, expansion into international markets
5. **2029:** \$85M+ ARR, \$1B+ valuation, IPO or strategic exit path

"We're not just building a company. We're building the category."

Tye Hayes
