

Sentraais Design System

Architecture & Implementation Guide

Scope: Architecture / Governance / Templates / Production
Status: Implementation Ready
Doc Type: Technical Schematic

PROJECT:
SENTRAIIS DESIGN SYSTEM

DOCUMENT ID:
UI-CONP-001

DATE:
2024-05-15

ENGINEER:
A. CHEN

The Four-File Ecosystem

The Laws of Physics: Global Governance

Mechanical Rules

- **Auto Layout:** Enabled by default for EVERY component.
- **Spacing:** Tokenized only. No freehand padding.

Naming Syntax

**Category / Type /
Variant / State**

No emojis. No abbreviations
(Exceptions: NIN, KPI, SLA).

Token Logic

**Token / Category /
Role / State**

Must be a Figma Style or Variable.

File 01 Structure: The Control Plane

Layers/Pages

- › PAGE 00_Overview & Governance
- › PAGE 01_Foundations
- › PAGE 02_Primitives
- › PAGE 03_Components
- › PAGE 04_Patterns
- › PAGE 05_Workflows
- › PAGE 06_Reports
- › PAGE 07_Utilities
- › PAGE 99_Deprecated

Scope of Core Library

Accessibility
JetBrains Mono

CRITICAL RULES: Do not create components on this page.
Do not include screenshots or examples.

Page 02: Primitives (The Atoms)

Text

Icon

Badge

Indicator

Avatar

Divider

Tooltip

Syntax: Primitive / Badge / Status / InProgress

Specs: Must be a Component. Must use Auto Layout. Must use System Tokens only.

Page 03: Components (The Molecules)

Required States

- ☐ Default
- ☐ Loading
- ☐ Disabled / Blocked

Naming: Component / Card / Task / Default

Component Library Structure

1. Card

Create these explicit section headers in the Figma file.

2. Navigation

3. Record

4. Action

5. Workflow

Page 04: Patterns (UI Assemblies)

Required Pattern Frames: Dashboard, ListView, RecordView, ReviewFlow, DecisionFlow, TransitionFlow.

THE GOLDEN RULE: Use components only. These frames must contain NO new UI elements.

Naming: Pattern / RecordView / Innovation

Page 05: Workflows (NIN Phases)

Frame Requirements

- Stage Indicator
- Required Actions
- Gate State

Page 06 & 07: Reports & Utilities

Page 06: Reports

Include: Executive, Operational, Audit Reports

Warning: No charts without tokens.

Page 07: Utilities

Include: Grid overlays, Annotation components, Measurement tools

Page 99: Deprecated

Purpose: Storage for retired components.

- 1. Move** component to Page 99.
- 2. Prefix name** with: **DEPRECATED /**
- 3. Do not** delete anything from this page.

File 02: Workspace Templates

Page 00 (ReadMe) Requirements:

- Link back to Core Design System.
- Explicit Statement: **"No components are created in this file."**
- **Purpose:** Structural frameworks and reusable environments.

Template Page 01: Global Layout

Instructions: Lock layout frames. Use placeholders only.

Template Page 02 & 03: Workspaces & Modules

Template Page 04: Record Views

1. Header

2. Summary

3. Workflow

4. Links

5. Evidence

6. Timeline

Canonical Layouts for:
Challenge, Submission, Review,
Outcome.

Template Page 05 & 06: Flows & Reports

Page 05 Flows

Lay out end-to-end journeys. **No new UI allowed.**

1. Start
JetBrains Mono

2. Process
JetBrains Mono

3. Review
JetBrains Mono

4. End
JetBrains Mono

Page 06 Reports

Duplicate report patterns from Core. Populate with sample data. **Do not alter structure.** ⚠

File 03: Product Implementations

Page 00: Configuration Only.
No new components.

Process: Duplicate templates.
Adjust Labels, Data, and
Permissions notes.
No visual divergence.

File 04: Sandbox Exploration

- **Page 00:** Allow free exploration.
- **Governance:** Promote ideas to Core only via governance review.

The Final Quality Check (Mandatory)

Swiss Engineering Manual meets
Modern Architectural Blueprint

The Bottom Line: Operational Success

→ **SPEED** ←

Designers move fast without fragmentation.

→ **TRUST** ←

Engineers trust the system consistency.

→ **UNITY** ←

Sentra is functions as a unified OS.
