

FEDERAL CAPABILITIES STATEMENT

SENTRAIS CORPORATION

Intelligence Operating System for High-Stakes Environments

=====

=====

PAGE 1 — Corporate Overview

Company Summary

Sentrais Corporation is an advanced intelligence company specializing in operational readiness, emergency preparedness, and cyber-physical resilience for federal, state, and municipal agencies. Our Intelligence Operating System (Sentrais OS) provides unified visibility, multi-agency orchestration, predictive modeling, and evidence-based compliance to support national security missions, SEAR-level events, critical infrastructure protection, and continuity of operations.

Sentrais enables agencies to see their operations clearly, coordinate efficiently, and perform with confidence during high-impact events, emergencies, and mission-critical operations.

Core Mission

To modernize emergency operations, unify multi-agency coordination, and strengthen national resilience through responsible, real-time operational intelligence.

Core Competencies

1. Emergency Preparedness & Response Intelligence

- Multi-agency operational blueprinting
- Cross-domain readiness scoring (cyber, physical, environmental)
- Real-time incident orchestration
- Digital playbooks aligned with ESF, ICS, and NIMS
- Evidence-led compliance for SEAR, DHS, FEMA, and SLG standards

2. Critical Infrastructure Resilience

- CI/KR dependency mapping
- Cyber-physical risk modeling
- Predictive infrastructure integrity scoring
- Operational continuity and incident routing

3. SEAR-Level Multi-Agency Coordination

- City, state, federal, and private-sector interoperability
- Live command dashboards for emergency operations
- Escalation logic and decision-support models
- Pre-event simulation and full-scale exercise design

4. Real-Time Operational Intelligence (Sentrais OS)

- Multi-agent workflow orchestration
- SLA monitoring, evidence capture, and compliance
- Simulation engine for emergency scenarios
- Zero-trust intelligence governance

5. Advisory Services: NIN Forensics + Operational Blueprinting

- Hidden dependency discovery
- Organizational readiness assessments
- Operational transformation design
- Cross-agency coordination frameworks

Differentiators

Intelligence Purpose-Built for High-Stakes Environments

Unlike analytics dashboards or IT platforms, Sentrais operationalizes live orchestration, predictive readiness, and dynamic intelligence during real-world missions.

Multi-Agency Integration Engine

Sentrais unifies federal, state, local, and private stakeholders into one operational model with shared evidence, actions, and escalation paths.

Cyber + Physical Fusion

Sentrais maps cyber incidents to physical operations in real time, providing a unified threat picture across CI/KR sectors.

Responsible AI for Government Operations

AI guardrails, audit-ready logging, secure model governance, and transparent decision support aligned to federal requirements.

Proven Leadership in National-Level Crisis & SEAR Operations

Led by a service-disabled veteran with real-world national crisis management experience.

Key Federal-Relevant Experience

Tye Hayes, CEO

Service-Disabled U.S. Naval Officer

- National critical infrastructure expert
- SEAR event strategist
- Crisis manager for the City of Atlanta during the national ransomware cyberattack
- Crisis Strategist for New Orleans Super Bowl (Cyber + Multi-Agency Command, 2025 SEAR-level operations)
- Innovation Strategy Lead for Hartsfield-Jackson Atlanta International Airport (largest airport in the world)
- NFL Innovation Partner – building league-wide operational intelligence systems (EVERGAME)

This experience directly translates to DHS, FEMA, CISA, DoD, DOT, TSA, DOE, and SLG mission environments.

PAGE 2 — Technical Capabilities & Past Performance

=====

=====

Technical Capabilities

Sentra OS: Intelligence Operating System

- Real-time command and orchestration
- Automated evidence capture
- Predictive modeling and risk scoring
- Digital playbook execution
- Multi-system and multi-cloud interoperability
- API integration with CI/KR systems
- Zero-trust security and encrypted intelligence flow

Simulation & Preparedness Modeling

- Pre-incident scenario generation
- Cyber and physical convergence modeling
- SEAR-level exercise environments
- Evacuation and crowd flow modeling
- Infrastructure stress and failure prediction

Operational DNA Mapping

- End-to-end mission blueprinting
 - Cross-agency readiness assessments
 - Workflow, dependency, and SLA mapping
 - Interoperability gap analysis
-

Past Performance

National Football League (NFL)

- Designed and deployed **EVERGAME**, a Sentrais-powered operational intelligence engine for league-wide Game Day operations.
- Delivered real-time readiness intelligence, incident workflow orchestration, and compliance modeling.
- Integrated with AWS cloud for multi-region resilience.

City of Atlanta – Ransomware Cyberattack (National Crisis)

- Led crisis operations during one of the most significant municipal cyberattacks in U.S. history.
- Coordinated federal, state, and private-sector partners.
- Established resilience strategy for future incidents.

City of New Orleans – Super Bowl 2025 (SEAR 1)

- Designed the **Critical Infrastructure Cyber Command** model.
- Built unified operational playbooks for multi-agency emergency coordination.
- Delivered readiness and resilience strategies for cyber, physical, and event operations.

Hartsfield-Jackson Atlanta International Airport

- Led innovation strategy and operational technology modernization.
- Enhanced airport safety, operations, and resilience infrastructure.

K-20 & Community Innovation Readiness Programs

- Developed workforce pipelines and readiness labs supporting AI, resilience, and emergency operations.

Sentrais has proven performance across national-level risk environments.

Draft Federal NAICS Codes (Recommended)

Primary NAICS:

- **541512** — Computer Systems Design Services
- **541513** — Computer Facilities Management Services
- **541519** — Other Computer Related Services (AI, orchestration, systems integration)

Emergency & Resilience-Specific NAICS:

- **541611** — Administrative Management & General Consulting
- **541618** — Other Management Consulting
- **541690** — Technical Consulting (including emergency management)
- **611420** — Computer Training (AI, readiness, systems literacy)
- **928110** — National Security
- **922190** — Other Justice, Public Order, & Safety

Optional (depending on procurement pathway):

- **517911** — Telecommunications Resellers
- **518210** — Data Processing, Hosting, and Related Services

I can refine these based on which agencies you plan to pursue first.

Socioeconomic Status

- **Service-Disabled Veteran Owned Small Business (SDVOSB)** (pending verification)
 - **Woman-Owned Small Business (WOSB)**
 - Eligible for DHS, DoD, SBA, FEMA, and SLG set-asides.
-

Corporate Data

Company Name: Sentrais Corporation

Structure: C-Corp

UEI: [TBD]

CAGE Code: [TBD]

Primary Location: Atlanta, GA

Federal Positioning Statement

Sentra is the only Intelligence Operating System architected for emergency operations, SEAR environments, cyber-physical resilience, and multi-agency orchestration.

Our platform and advisory model provide predictive, real-time operational intelligence to help agencies fulfill mission mandates with higher transparency, accuracy, and coordination.
