

Operational Intelligence Infrastructure for High-Stakes Environments

Powering leagues, venues, cities, and critical systems

Organizations cannot see systemic risk until it becomes failure.

Fragmented Systems: Critical data trapped in isolated silos.

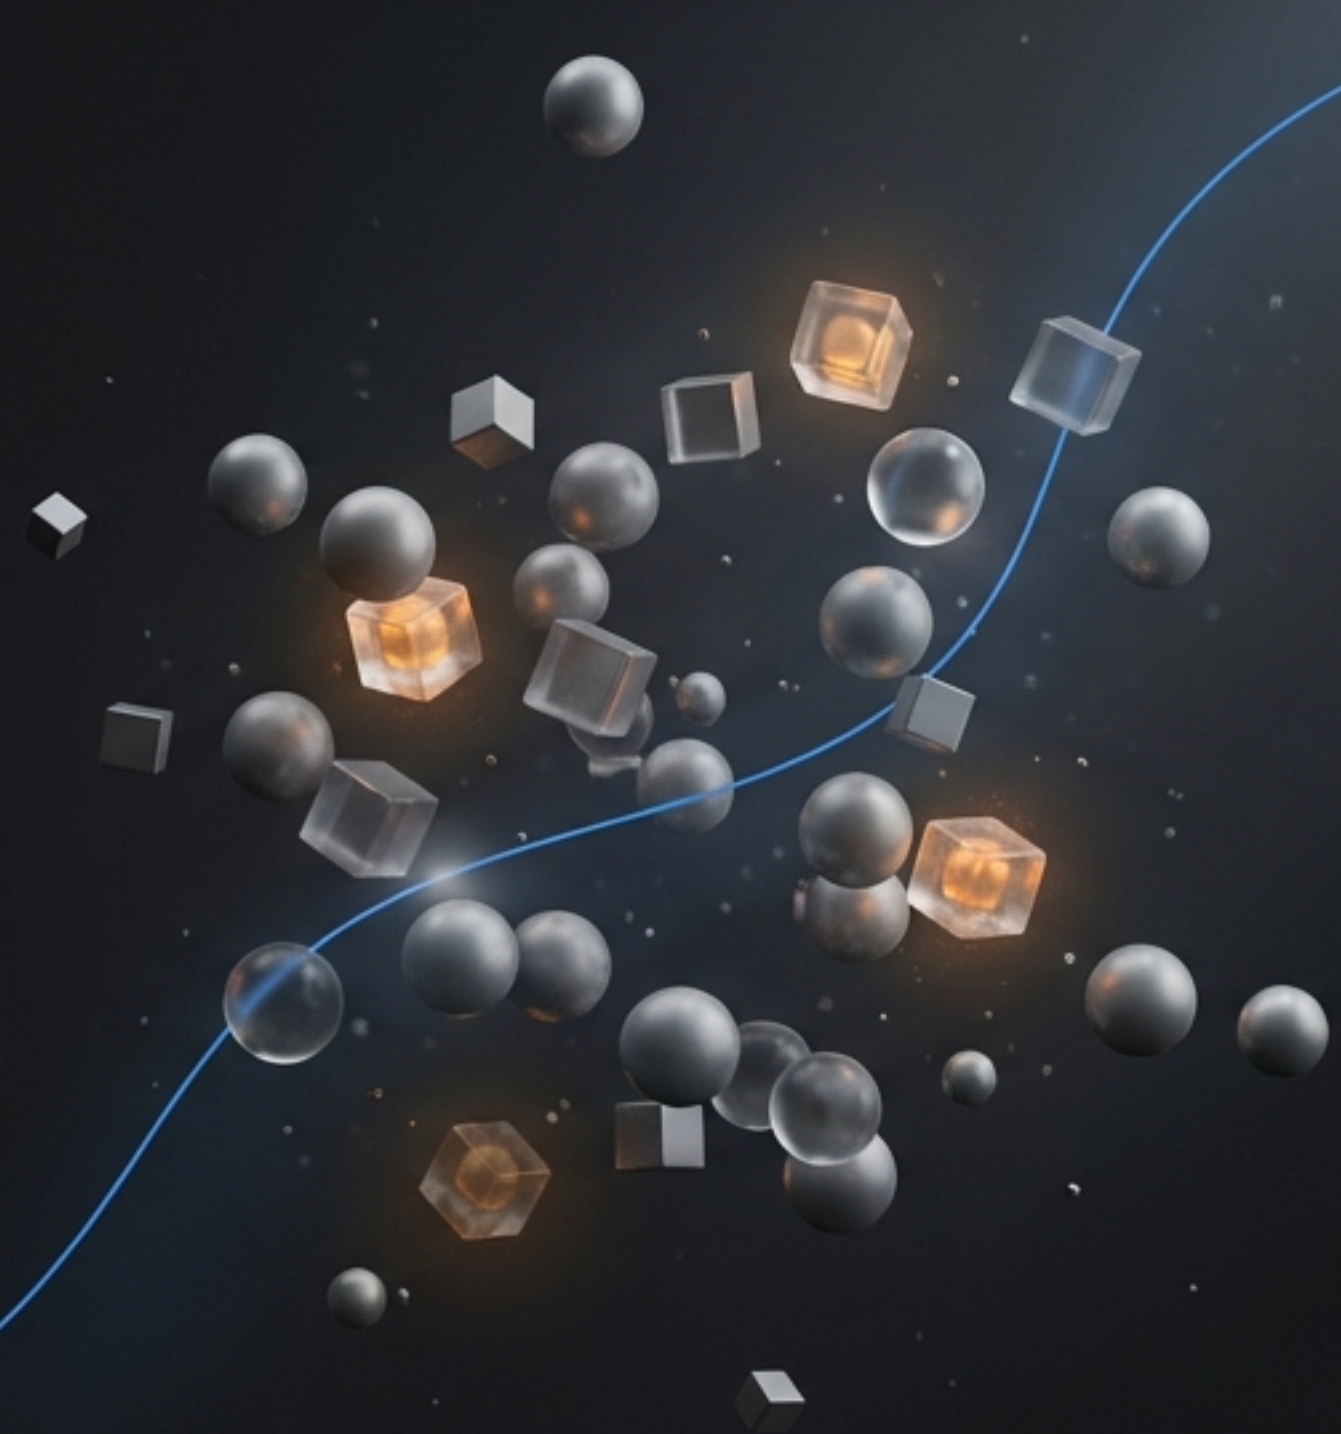

Hero-Based Coordination: Reliance on individuals rather than institutional memory.

Static Playbooks: Compliance documentation that is obsolete the moment it is written.

Invisible Gaps: Manual compliance processes masking true operational readiness.

The Missing Layer: Operational Intelligence Infrastructure

What We Are Not:

- Not just a Consulting Firm
- Not just a Workflow Automation Tool
- Not just a SIEM System
- Not just a Generic AI Copilot

What We Are:

Sentra is the coordination layer connecting people, systems, workflows, and AI into one governed runtime environment.

A Unified Intelligence Platform

Combining strategic advisory with intelligent runtime infrastructure to create a single source of operational truth.

SentraiSOS

Core Intelligence
Operating System

Blueprint360

Operational DNA
Modeling Layer

Vertical Intelligence

EVERGAME

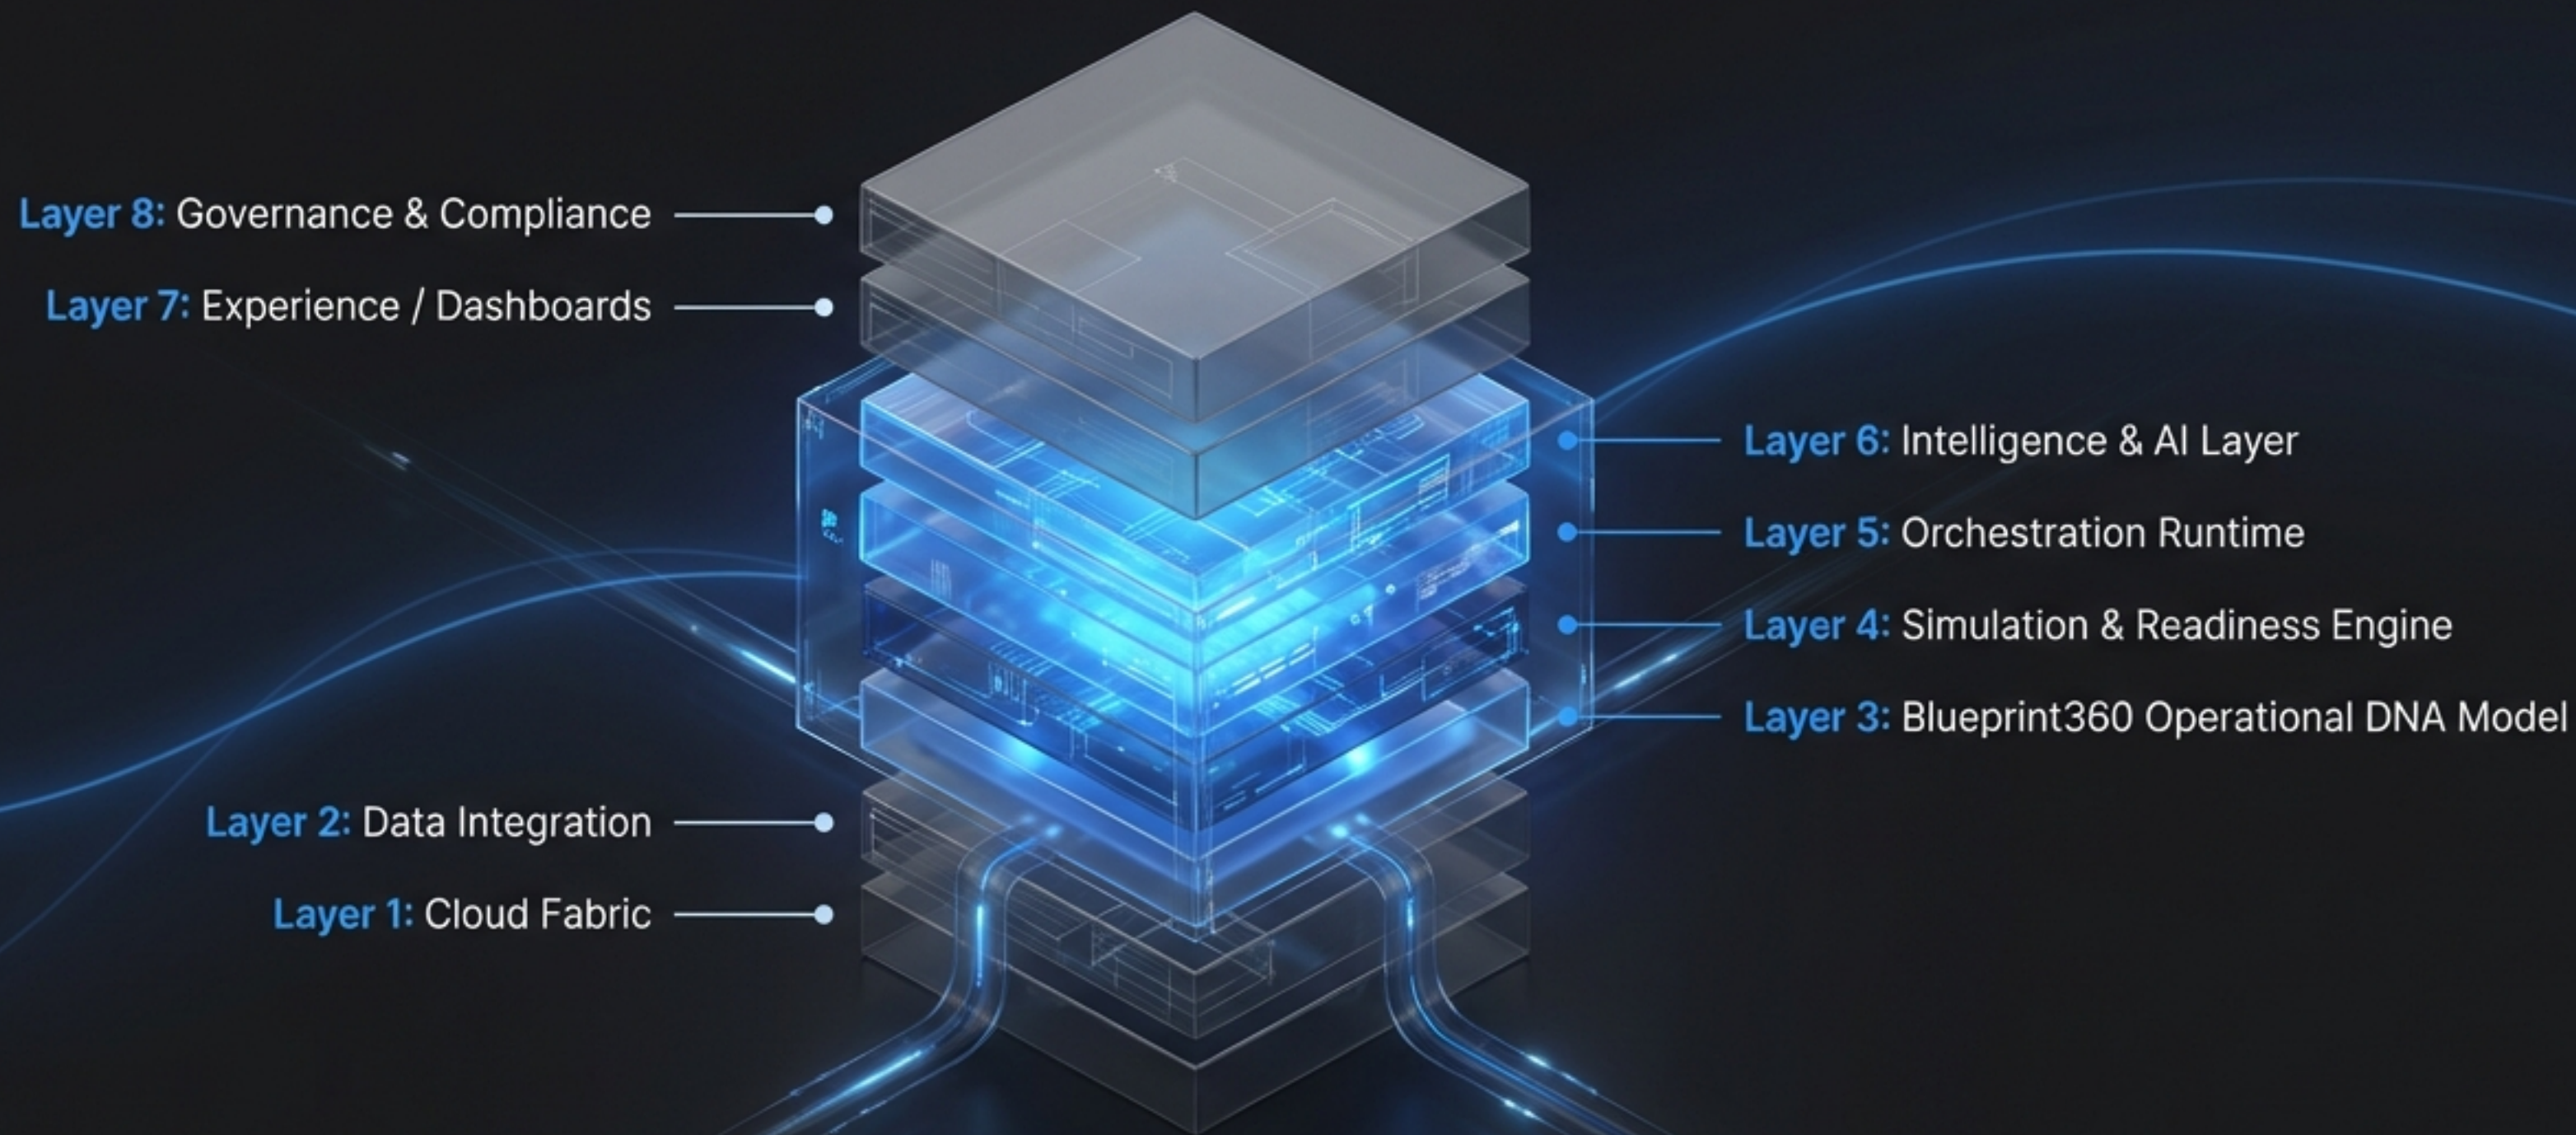

eVenu

EntertainmentOS

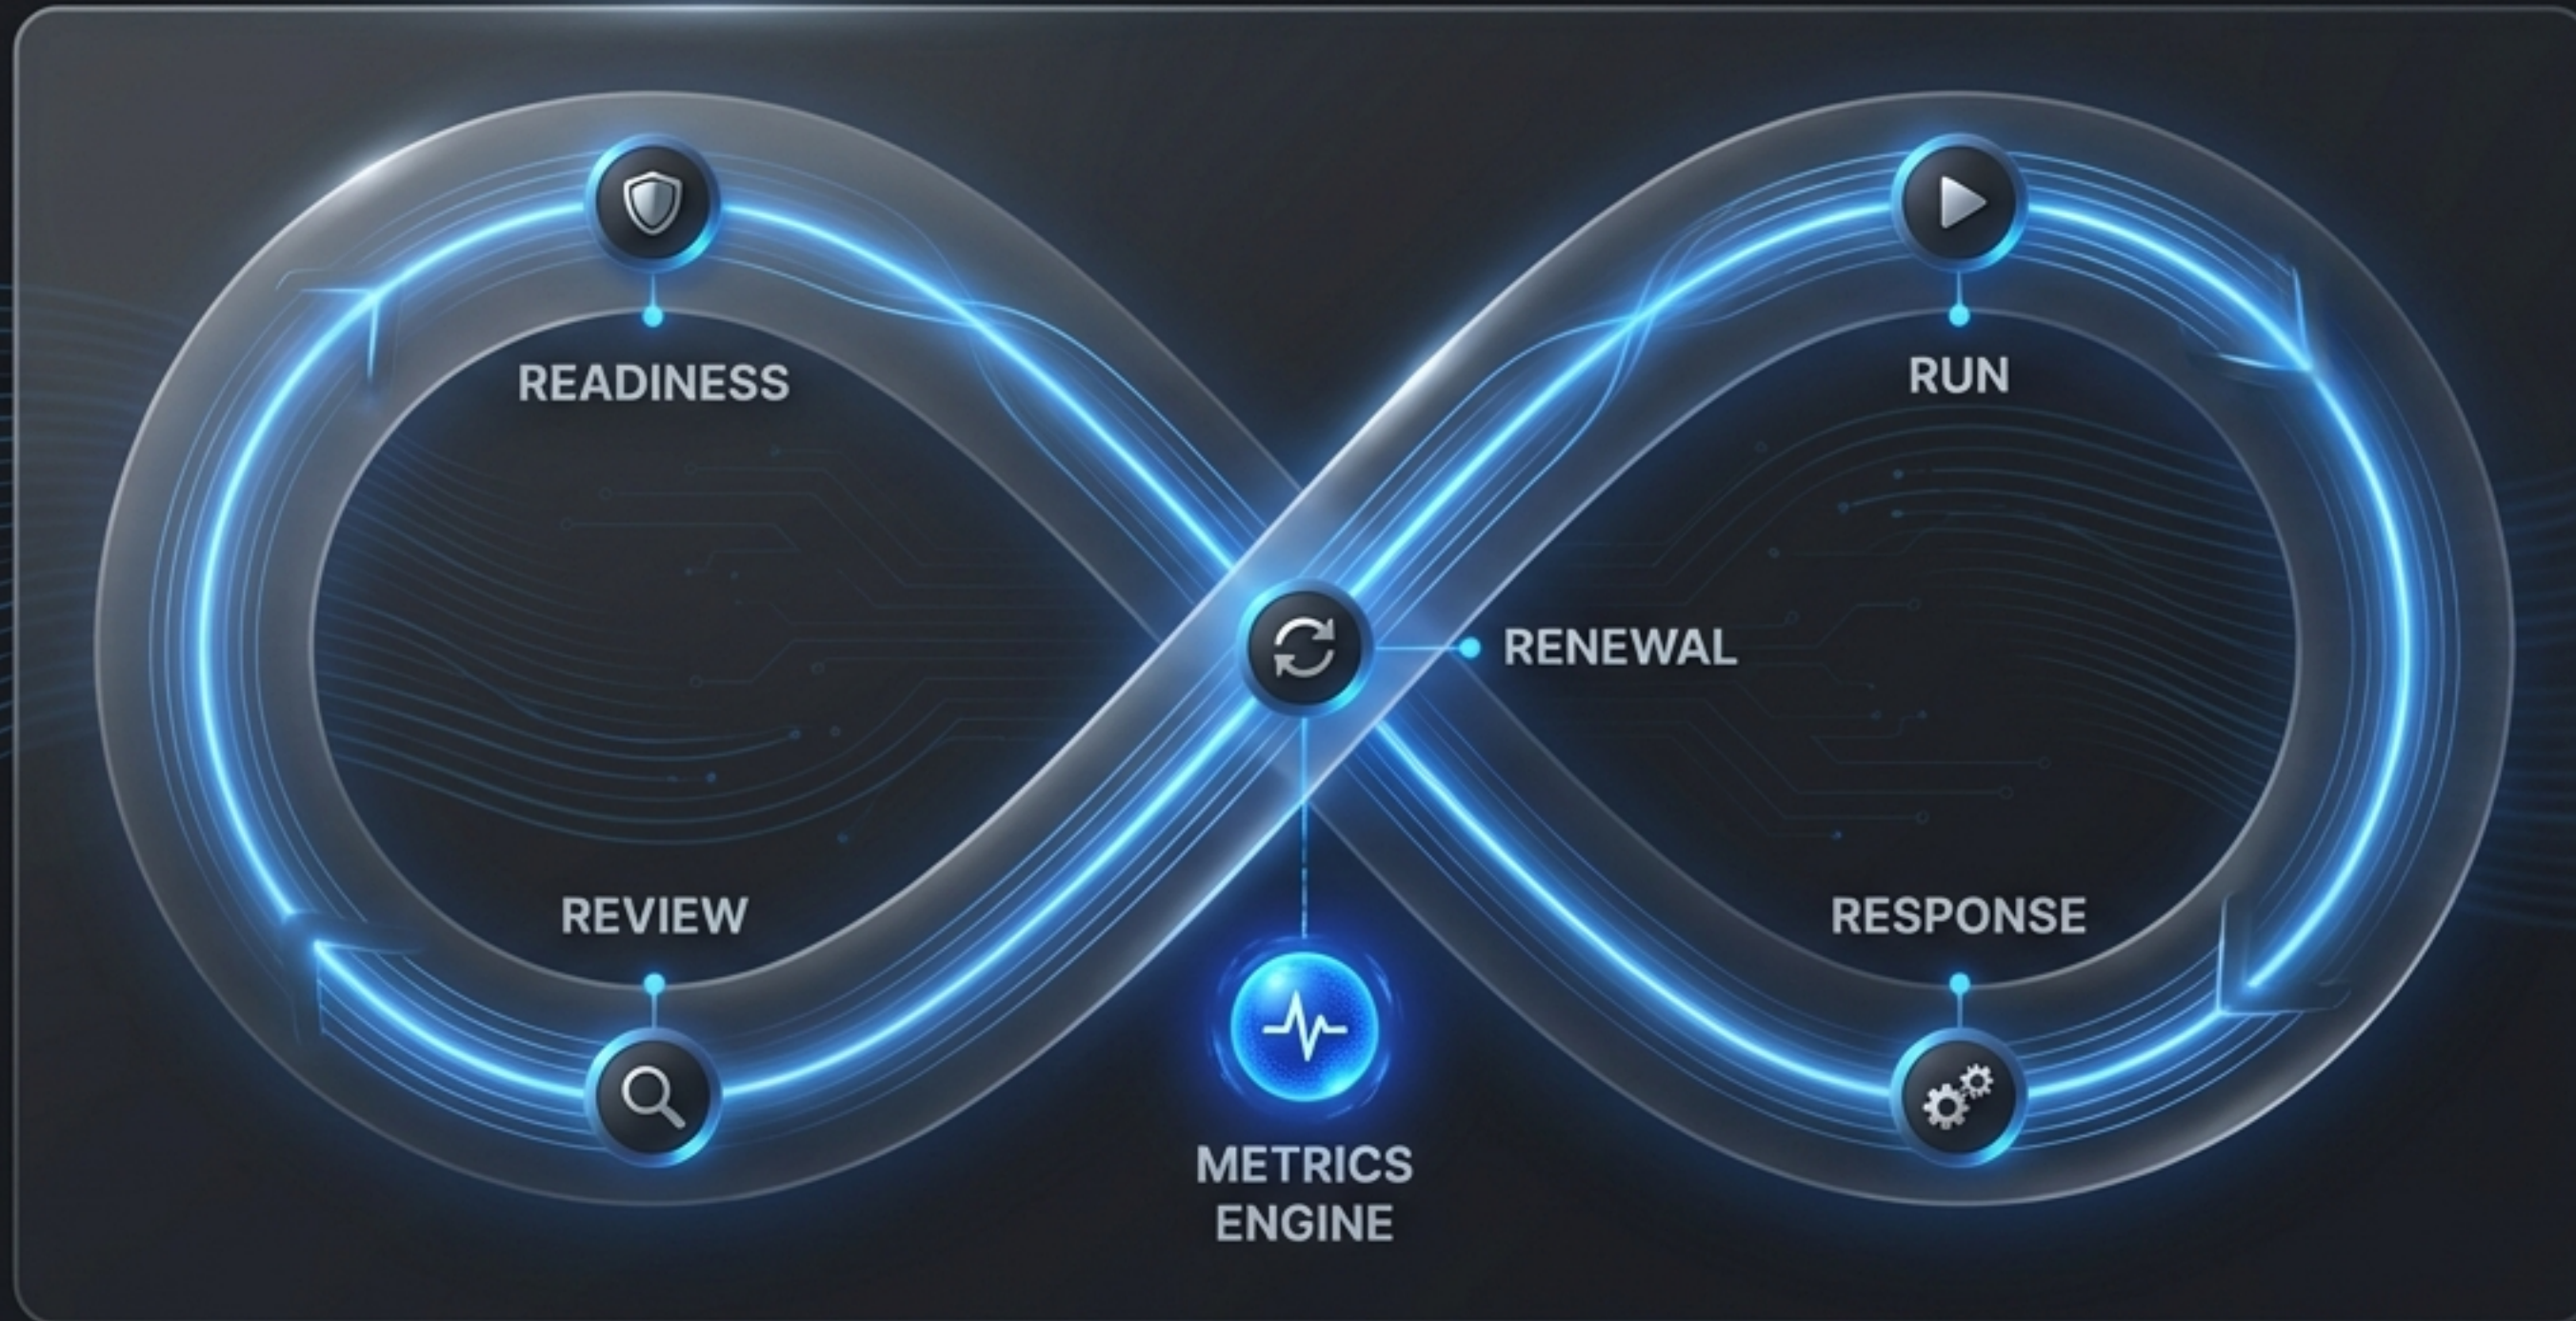

The Canonical Stack

SentraiOS provides the foundation. Blueprint360 is the modeling engine inside it.

THE RESILIENCE ORCHESTRATION FRAMEWORK

From static planning to dynamic operational cycling.

Bridging Strategy and Technology

Advisory Capabilities

- NIN Forensics & Operational Mapping 
- Resilience Framework Design 
- Multi-agency coordination architecture 

Platform Delivery

-  • SentraisOS configuration
-  • Simulation model creation
-  • Evidence runtime activation

We build the map (Advisory), then we drive the execution (Platform).

EVERGAME: Sports Intelligence Vertical

Target: Leagues, Clubs, Major Venues

- Unified gameday operations
- Technology readiness modeling
- SLA tracking and compliance automation
- Real-time risk flags & Preseason simulation

Greater visibility. Faster resolution. Measurable readiness.

Accelerating Innovation: NFL Innovation HUB

The diagram illustrates the NFL Innovation HUB process. On the left, a large blue funnel is surrounded by various abstract icons representing innovation, such as a lightbulb, a shield, a gear, and a network. These icons are being processed by the funnel. The output of the funnel is a blue beam of light that passes through a central rectangular box labeled "SentraisOS". This box is depicted with circuitry patterns, suggesting a technological or operational layer. Above the box, text states: "SentraisOS serves as the operational intelligence layer inside the NFL ecosystem." Below the box, three specific functions are listed, each preceded by a small icon: a gear for "Vendor integration validation", a magnifying glass for "Fan experience journey analysis", and a document for "Compliance modeling and cross-system dependency mapping". At the bottom of the diagram, a large blue beam of light extends horizontally across the frame. Below this beam, the text reads: "Transforming innovation from abstract concept into measurable operational performance."

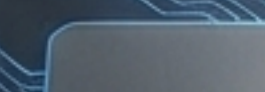

SentraisOS serves as the operational intelligence layer inside the NFL ecosystem.

SentraisOS

- Vendor integration validation
- Fan experience journey analysis
- Compliance modeling and cross-system dependency mapping

Transforming innovation from abstract concept into measurable operational performance.

SentraiOS serves as the operational intelligence layer inside the NFL ecosystem.

The logo for SentraisOS is a stylized representation of a microchip. It features a central rectangular area with the text "SentraisOS" in a bold, black, sans-serif font. This central area is surrounded by a dark blue border with rounded corners. Within this border, there are intricate, glowing blue circuit-like patterns that resemble a printed circuit board (PCB) layout. The entire logo is set against a dark blue background with a subtle, lighter blue grid pattern.

- Compliance modeling and cross-system dependency mapping

Transforming innovation from abstract concept
into measurable operational performance.

Critical Infrastructure: New Orleans Super Bowl 2025

Supporting the Critical Infrastructure Cyber Command

- Cross-agency dependency mapping
- Cyber posture modeling
- Escalation protocols & Communications interoperability

A strengthened multi-agency coordination framework aligned with SEAR-level models.

Who We Serve

Sports & Entertainment

Leagues, clubs, stadiums, live event operators

Cities & Government

Emergency management, homeland security,
resilience offices

Critical Infrastructure

Airports, ports, utilities, transportation systems

Global Event Ecosystems

Major tournaments and SEAR-level environments

Responsible AI Governance

AI adoption without guardrails is a liability.

Principles

- Transparency
- Human Oversight
- Fairness
- Accountability

Controls

- Guardrailed model deployment
- Evidence-logged decisions
- Bias review protocols
- Zero-trust security

Sentra is embeds structured oversight across all intelligence layers.

Structure & Ecosystem

Sentrais

(Commercial Platform)

- IP Ownership
- Platform Development
- Licensing
- Vertical Products (EVERGAME, eVenu)

NOVATELabs

(Nonprofit R&D Partner)

- Model experimentation
- Workforce development
- Home of SEARGrid & CiviGrid

Distinct governance. Clear IP boundaries.

Growth Strategy

Phase 1: Sports Intelligence Expansion

EVERGAME, eVenu

Phase 2: Certification & Monetization

Readiness scoring

Phase 3: Civic Intelligence

SEARGrid/CiviGrid commercialization

Phase 4: Global Networks

Cross-border ecosystems

Revenue Model

Platform Licensing

SentraiOS core

Vertical Subscriptions

Recurring revenue from EVERGAME, eVenu

Advisory Engagements

Setup, mapping, and forensic design

Services

Certification audits, AI model validation

The Value of Orchestration

01

Operational Clarity

Unified visibility across
fragmented systems.

02

Coordinated Execution

AI-driven workflows that
bridge teams.

03

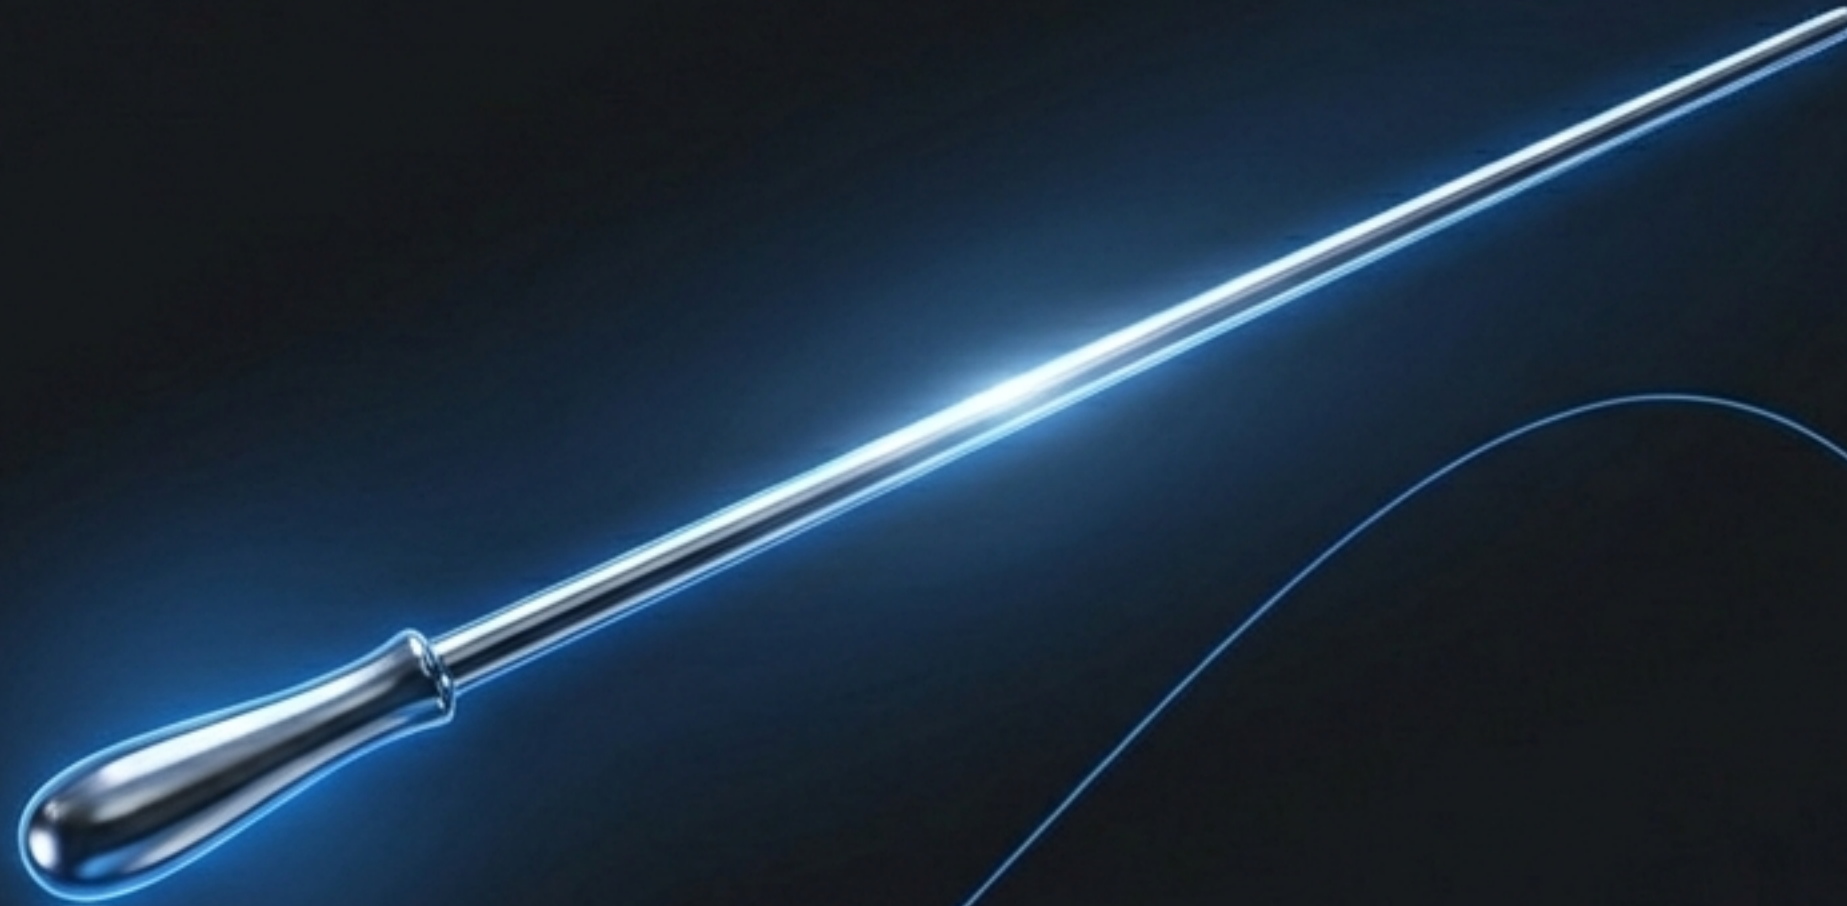

Readiness & Assurance

Evidence-backed scoring
and compliance.

04

Risk Reduction

Simulation exposes
vulnerabilities before
failure.

Build intelligence into the way you operate.

Partner with Sentrais to transform coordination, readiness, and performance.
